RICHMOND, VA (NOV. 9) UPI - Virginia Gov. L. Douglas Wilder, the nation's only elected black governor and a rising star in the Democratic Party, is taking the first formal step toward a presidential bid in 1992, it was reported Friday.

A one-time liberal who has moved right to woo moderates over the years, Wilder has drawn praise from conservatives by erasing Virginia's $1.4 billion budget gap in a very Republican fashion - cutting spending instead of raising taxes.

The creation of a campaign committee was revealed in a copyright story in The Richmond News Leader and promptly confirmed by Wilder's top strategist, Paul Goldman.

''I want to make sure all the speculators are working - and working overtime '' Goldman said, adding that Tuesday's election showed voters were looking ''for what we've been promoting. The election was about fiscally sound policies ... and that's what we've been pushing for.''

Tuesday's election also moved up Wilder's personal stock. Not only did potential black rivals, such as North Carolina's Harvey Gantt, go down in defeat, other Democratic presidential possibles squeaked by when they were expected to win big.

The exploratory committee is not named after Wilder but one of his pet causes - The Committee for Fiscal Responsbility. Goldman told United Press International, ''We are now in the debate stage of the presidential process. We need the debate now and we need the vehicle to push it.'' He said it could easily be turned into a Wilder '92 committee under federal election laws.

Wilder has spent so much time in other states promoting other Democrats - including in the early presidential sweepstakes states of Iowa and New Hampshire - that he has caught some flak back home.

He traveled so extensively in one week The News Leader headlined a story, ''Wilder to visit six states plus Virginia.''

Mark Warner, a top party fund-raiser and a Wilder appointee to a state transportation commission, will be the committee treasurer.

WASHINGTON (NOV. 9) UPI - Iraq allowed three American male hostages to leave the country, including one who was shot in the arm, the State Department said Friday.

Richard Boucher, State Department spokesman, said the U.S. Embassy in Baghdad was notified that five Americans had been taken to the Mansour Hotel in the Iraqi capital, in preparation for their release.

According to Boucher, two of the five Americans were told they could not leave. There was no explanation given by the Iraqi authorities for the continued detention of the two men.

Among the three who were allowed to depart, he said, is Miles Hoffman, the Columbus, Ga., man who was shot in the arm last month in Kuwait City by Iraqi troops. Iraqi authorities said that he had been violating the curfew in the occupied city.

Reports from other hostages said that his condition had worsened in captivity and it was possible that he would lose the arm unless he had advanced medical treatment.

Boucher did not give the identity of the other two Americans, but he said they were both on the list of male hostages who were suffering from various medical problems and needed medical attention or treatment.

The State Department said that 60 of those medical cases remain hostage in Iraq or Kuwait. About 100 American men remain ''human shields, kept near strategic industrial and military targets.

Boucher again criticized the Iraqi government for ''its heartlessly cruel policy of bargaining hostages'' in order to gain political favor with western governments and families.

Former Japanese premier Yasohiro Nakasone returned to Japan from Iraq Thursday with 74 Japanese hostages. They were released after Nakasone had travelled to Iraq and met with President Saddam Hussein.

At about the same time, the Japanese government gave up on its parliamentary struggle to send a small detachment of troops from the Self-Defense Force to join the colaition of forces now in Saudi Arabia.

The Japanese government is now trying to put together legislation which would permit the sending of volunteers to the Persian Gulf.

#90313u1297 11/09/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (NOV. 9) UPI - The government of Prime Minister Marian Calfa appeared in crisis Friday with the unraveling of an agreement reached only four days earlier on how to decentralize the government.

Top ministers of the federal government and the Czech and Slovak national governments hastily scheduled a meeting Saturday in Modra, West Slovakia, to negotiate a new pact.

At issue is an agreement reached Monday between the premiers of the three governments to transfer much of the federal government's regulatory, administrative and taxation powers to the Czech and Slovak national governments.

Later, however, Calfa said that technical obstacles, such as the transfer of offices and workers, meant that the decentralization would probably not take effect Jan. 1, 1991 as planned.

Advisers to several government ministers, speaking on condition of anonymity, told UPI the government split could threaten Calfa's tenure.

''Calfa is endangered because he is a Slovak and he is seen as having given in to the Slovaks' extreme autonomy demands,'' said one source.

''The situation is critical because so far Calfa is the only person who has been able to mediate between Czechs and Slovaks and all the different parties.''

Czech and Slovak national government leaders have been pressing for greater control over their own economic, administrative and social affairs.

They blame decades of centralized rule from Prague for the economic and ecological catastrophes the country is facing. They say only local control over economic, educational and other matters will give the country a chance to

recover from four decades of communist mismanagement.

Government spokesmen and ministers refused to speak on the crisis, and the official Czechoslovak news agency CTK carried no reports on the developments Friday.

Monday's agreement left the federal government with control over the military, foreign affairs, a central bank, raw materials and energy and some aspects of taxation, transport and communications.

But a top adviser to another minister said the validity of the federal government was threatened by the accord Calfa reached with the republican premiers.

''The main sticking point is that the federation needs more money and more regulatory influence,'' said the adviser.

The debate centers on the question of economic power. Since under the plan the government would give up most of its revenue - and thus both spending and regulatory influence - it would find it difficult to control inflation, critics suggest.

#90313u1329 11/09/1990 ~United Press International

TAMPA, FL (NOV. 9) UPI - Minnesota Vikings kicker Donald Igwebuike was indicted by a federal grand jury Friday on charges of smuggling heroin from his native Nigeria into the United States.

Igwebuike, who played for the Tampa Bay Buccaneers for five years before signing with the Vikings this year, was charged with plotting to smuggle heroin, conspiracy to import with intent to distribute and the importation of heroin.

Igwebuike, 29, was expected to turn himself in to authorities.

Investigators say the smuggling activities allegedly occurred while Igwebuike was playing with the Buccaneers and living in Tampa. The native of Anambra, Nigeria, was drafted by Tampa Bay in the 10th round in 1985.

Another Nigerian native, Ibezim Ofedu, charged in the heroin- trafficking ring pleaded innocent to similar charges in October in Tampa.

Last month, ABC News, citing unidentified sources, reported Igwebuike purchased a plane ticket for a co-defendant, Maduwuba Ibekwe, and participated in phone conversations that showed he knew of the drug deal.

Ibekwe, 31, was arrested at Orlando International Airport Oct.11. U.S. Customs Service officials allege Ibekwe tried to smuggle more than 3 1/2 ounces of heroin in pellets wrapped in electrical tape he had swallowed.

Both men are reported acquintances of Igewebuike.

#90313u1330 11/09/1990 ~United Press International

DALLAS (NOV. 9) UPI - A Federal Elections Commission official testified Friday that if allegations against former thrift owner Don Dixon were true, he made a ''mockery of political contributions limits.''

''There are good reasons for the regulations and one is so corporations cannot control politicians,'' said Brad Litchfield, a financial analyst with the FEC. ''If a person put somebody else's name down on a (contribution) disclosure form, or used company expense accounts as a conduit, then he made a mockery of the political contributions limits.''

Federal law prohibits companies from making political contributions and limits the amount from individuals to $1,000 a year.

Dixon, owner of failed Vernon Savings and Loan, is charged in a 38- count federal indictment with using thrift funds and doctored expense accounts to pay for prostitutes, make political contributions and support a lavish lifestyle. The thrift collapsed in 1987 with $1.3 billion in losses.

On Thursday, one of Vernon's six full-time jet pilots described that lifestyle.

''We often picked up women from a local topless joint,'' said Ken Seals, who piloted Vernon jets for four years. ''We never listed them on the flight log, but we took them everywhere'' including hunting trips and Vernon board meetings in California.

Seals also flew Linwood Bowman, top Texas S&L regulator in 1985 and 1986, to various Vernon's functions including a ''party trip'' in mid- 1985 in which Bowman was accompanied by an attractive female employee of Vernon.

Seals also testified the Vernon jet flew politicians, free of charge, to various fund-raisers. The passengers included Reps. Bill Lowery, R- Calif., and Rep. Tony Coelho, D-Calif., and Sens. Pete Wilson, R-Calif.

Earlier in the week, Karen Wilkening, convicted on prostitution- related charges, testified Vernon often ordered call girls for parties and was her best customer.

''They always paid in cash,'' she said.

The trial is expected to continue through November.

#90313u1347 11/09/1990 ~United Press International

CHICAGO (NOV. 9) UPI - Soybean futures were pressured by the November crop report and were lower to sharply lower Friday on the Chicago Board of Trade.

Grain prices ended the day with moderate losses on spillover weakness from the soy complex.

An increase in production and carryover estimates for soybeans prompted aggressive professional selling. The Agriculture Department's production estimate was 4.4 percent higher than the October figure.

Soybeans made session lows late in the day, then recovered some of the losses just before the final bell. At one point, nearly all soybean prices were below year-ago levels, and closing prices were just above the lows on the same date last year.

The weakness in soybeans carried over to soybean oil and meal which also were sharply lower.

Grain prices were moderately lower, although losses in corn were limited by commercial buying. The USDA estimate of a slight reduction in the corn crop also kept a floor under prices.

The export markets were quiet and country movement was light.

At the close, corn was off 1/2 to 2, soybeans down 5 to 17 1/4, wheat off 2 1/4 to 3 1/2 and oats down 3 1/2 to 4.

(NOV. 9) UPI - The U-N General Assembly Committee today rejected an Iraqi request to discuss the presence of U-S troops in the Persian Gulf region, and Iraq reiterated its threat to destroy Kuwaiti and Saudi Arabian oilfields. The committee's action was the first time the 29-member group refused to put an item on the General Assembly agenda. The Iraqi request was its first to bring the American troop issue before the world body after suffering repeated condemnations from the 15-member U-N Security Council.

Soviet President Gorbachev and German Chancellor Helmut Kohl today signed a co-operation treaty... sealing the new relationship between their two countries. The tightening of links comes exactly one year after the fall of the Berlin wall. At a signing ceremony in Bonn, Gorbachev hailed the treaty as ending an ''era of confrontation.'' The two nations also sign a treaty on economic and scientific co-operation.

The Labor Department reports a one-point-one percent jump in wholesale prices last month. It comes on another huge jump in energy prices as war fears grip Middle East oil fields. The increase in the government's closedly watched

Producer Price Index for October is better than expected by private economists who had expected a increase of just seven-tenths of one percent.

One Port Authority of New York officer describes as a ''full-scale riot'' one of the most violent incidents yet in the bitter strike against the New York Daily News. Authorities say Daily News strikers with clubs and hammers attacked a truck delivering the newspaper to the Port Authority bus terminal. Six people- including four police officers- were injured. Police say seven people were arrested... two strikers and five security guards hired by the Daily News.

The foreman in yesterday's multiple-personality rape trial in Wisconsin says jurors took two ballots during their almost seven hours of deliberations. The first was 8-4 in favor of conviction. The jury eventually did find 29-year-old Mark Peterson guilty of second-degree sexual assault of a woman claiming to have 46 distinct personalities. The case is a first in the nation, and the prosecutor says it may become a model for future cases involving crimes against people with similar mental disorders.

There are NO reports of damage or injuries from a minor earthquake along the New Madrid fault. The National Earthquake Information Center says last night's tremor measuring three-point-six on the Richter scale was felt in southeastern Missouri and parts of Kentucky and Tennessee. It was centered in an area about five miles northwest of New Madrid, which is about 150 miles southeast of St. Louis.

LOS ANGELES (NOV. 9) UPI - A trade group predicted Friday the Southern California economy, hit by a downturn in aerospace and an anticipated nationwide recession, would perform sluggishly next year but rebound in 1992.

''The year 1991 will not be easy and there will continue to be wide mood swings in public and business confidence,'' said Jack Kyser, chief economist for the Los Angeles Area Chamber of Commerce.

''But don't get depressed, because we look for the area's economy to gather momentum in 1992, and to perform quite well during the decade,'' he said.

The chamber said the economy of the region - which includes Los Angeles, Orange, Riverside, San Bernardino and Ventura counties and has 14.4 million residents - will grow by 2.7 percent next year, compared with 3.1 percent this year. Nationally, the economy has grown by about 1 percent over the past 12 months, a rate that may increase to about 1.5 percent next year.

The region, which has the nation's highest concentration of aerospace workers, will see 15,000 jobs in the industry disappear next year following a decline of about 17,000 this year. Total aerospace employment in the region is

currently at about 375,000, down from a peak of 423,500 three years ago.

''We are going to have to fight to maintain our aerospace industry base,'' Kyser told an audience of about 500 in downtown Los Angeles. ''Many areas around the U.S. are trying to snag some of our business.''

The region's economy will also be dragged down by a softening in construction and real estate, Kyser said, particularly since lenders will be ''very picky.''

''In the residential sector, we should hit bottom in terms of sales activity early in 1991, then move sideways through the balance of the year,'' Kyser said. Office vacancy rates, now at 17 percent, will probably hit about 20 percent next year, he added.

Raymond Watt, chairman of developer Watt Industries, said the region's building industry is in a slump partly because of tight funding. ''Lenders have cut us off and refuse to support us,'' Watt said.

Watt predicted that the real estate slump would bottom out in the second quarter of 1991, then pick up steam, largely because the region will add 400,000 new residents next year.

Kyser also said growth will be sluggish in the retail, tourism and hotel industries during the next year.

George Kirkland, president of the L.A. Convention and Visitors Bureau, acknowledged that Los Angeles has image problems stemming from smog, congestion and gangs.

He said the bureau, which spends about $7 million a year to promote the area, needs more money to compete with Las Vegas and Hawaii, which both spend about $25 million a year on promotion.

''We have a fabulous product,'' Kirkland told the meeting. ''We have not done a good job of selling it.''

On the plus side, the chamber's forecast said the bright spots for the region will come in the picture-television industry, international trade and rail transit.

The forecast also repeated other predictions that most of the region's growth would come away from the high-priced coastal areas.

''The Riverside-San Bernardino area will be the economic growth locomotive for the five-county area, while the economies of both Los Angeles and Orange counties will be struggling,'' Kyser said. ''In fact, all around California, it will be the inland areas such as Sacramento, Fresno, Bakersfield and the Inland Empire that will provide the economic thrust in 1991.''

(NOV. 9) UPI - The State Department says Iraq today freed three American hostages, including one who had been shot in the arm by Iraqi troops in Kuwait City last month. A State Department spokesman says the U-S Embassy in Baghdad had been notified that five Americans would be leaving, but Iraqi authorities then told two of them that they could NOT go. There was NO explanation why the two were held. The spokesman says one of the three hostages freed is Miles Hoffman, the man who was wounded in Kuwait City.

President Bush today cast the 17th veto of his administration... against the bill that would have made substantial changes in the orphan drug law. Bush said the measure would have killed incentives for drug companies to develop medicines for rare diseases.

A copyrighted story in the Richmond News Leader says Virginia Governor Douglas Wilder has taken the first formal step toward running for president in 1992.

The report says papers were filed in Washington, D-C, to create a group called The Committee for Fiscal Responsibility, headed by two top Wilder aides.

Ireland has elected its first woman president. Leftist politician Mary Robinson surged to an 86-thousand-ballot majority over former Deputy Prime Minister Brian Lenihan who was sacked last week. As president, Robinson says she said she wants to extend ''a hand of friendship'' to Northern Ireland.

Soviet President Gorbachev received a warm, but low-key welcome upon his arrival today in Bonn... a sharp contrast to the huge crowds and chants of ''Gorby, Gorby'' that greeted his last visit in June 1989. But one hard-core supporter from southern Germany says he drove 800 miles just to get a glimpse of the Soviet leader.

Gorbachev said the collapse of the Berlin Wall exactly one year ago played a key role in the creation of a new relation between Germany and the Soviet Union. Gorbachev made the remarks after he and German Chancellor Helmut Kohl signed a co-operation treaty regulating relations between the two countries.

Modern Man is here. That's with a capital M followed by another capital M. 37-year-old Leland Roger Bruns of Minneapolis, a musician and illustrator of children's books, has gone to court to officially change his name to- Modern Man.

A series of 91 calls sent sheriff's deputies to a home in Blacksburg, Virginia with guns drawn. But the owners were never home. A little detective work found out why the calls kept coming. Juice from an over-ripe tomato in a hanging basket kept shorting out a telephone- answering machine.

If there's anyone out there who mailed six live breeder chickens that never got to where they were going- contact postal authorities in Columbus, Ohio. Mail sorters have found your cardboard box with NO destination or return address on it, and they have the chickens.

LOS ANGELES (NOV. 9) UPI - Charles H. Keating Jr.'s defense attorneys Friday asked a judge to dismiss a 42-count securities fraud indictment against the former head of Lincoln Savings and Loan and three co-defendants on grounds the charges are vague.

''Your honor, when we come to answer the charges against us, we have to know what those charges are,'' defense attorney Abbe Lowell, who represents co-defendant Judith Wischer, told Superior Court Judge Lance Ito at a pretrial hearing.

''We implore you to dismiss these charges because right now there are no charges to defend,'' Lowell argued.

But Deputy District Attorney William Hodgman disagreed, saying, ''We feel there has been sufficient specificity alleged in each count.''

After listening to the defense arguments, Ito told lawyers in the case he had ''major concerns'' for about half of the charges.

The judge then adjourned the proceedings for a noon recess to allow prosecutors time to prepare to respond to his concerns. He is expected to rule on the defense dismissal request after hearing additional argument following the recess.

Keating, 66, the former head of the now-defunct Irvine, Calif.-based Lincoln Savings, and three associates were indicted in September on charges of defrauding 23,000 investors, many of them elderly, out of $250 million in the sale of worthless junk bonds.

The indictment charges the four defendants with 42 state securities fraud counts for allegedly scheming to sell the junk bonds issued by Lincoln's parents, American Continental Corp., without telling investors that the bonds were high-risk and uninsured. Authorities say many of the victims lost their life savings.

The three co-defendants are Wischer, 42, former president of American Continental; Rob S. Symes, 37, former Lincoln chief executive officer; and Ray C. Fidel, former Lincoln president.

Keating, who spent a month in County Jail on $5 million bail, was freed Oct. 18 after his bond was slashed to $300,000.

Wischer is free on $200,000 bail; Symes is free on $100,000 bail and Fidel is free on $75,000 bail.

The four defendants have pleaded innocent to the charges. If convicted, they

could be sentenced to up to 10 years in state prison. Trial in the case is not expected to begin until spring.

Wischer was the only defendant to appear at Friday's hearing. Keating, Symes and Fidel were previously granted permission by the judge not to attend.

Business

The Milwaukee Brewers and Green Bay Packers say the future of pro baseball and football in Milwaukee may be in jeopardy because of a county decision to scrap plans for the Brewers to take control of Milwaukee County Stadium.

Golf

Jose Maria Olazabal of Spain shot a bogey-free 68 and Wayne Grady of Australia posted the day's best score of 66 to share the lead after two rounds of the $1 million VISA Taiheiyo Club Masters in Tokyo.

Honors

The Buffalo Bills this weekend will honor Bob Kalsu, the only NFL player to die in the Vietnam War. Kalsu, an offensive guard for the team in 1968, served as an Army lieutenent and was killed by mortar fire in 1970. ... BYU quarterback Ty Detmer and Colorado running back Eric Bieniemy lead the list of seven Walter Camp Foundation finalists for college football's Player of the Year. The others: quarterbacks Shawn Moore of Miami and David Klingler of Houston, Washington running back Greg Lewis and wide receiver Raghib Ismail of Notre Dame.

Horse Racing

With Approval, Canada's Triple Crown thoroughbred, leads a field of 10 foreign entries in the $2.56 million Japan Cup, one of the world's richest races, in Tokyo Nov. 25.

Law

Minnesota Vikings kicker Donald Igwebuike was indicted by a federal grand jury on charges of smuggling heroin from his native Nigeria into the United States. Igwebuike, who played for the Tampa Bay Buccaneers for five years before signing with the Vikings this year, was expected to turn himself in to authorities.

Skiing

American ski authorities want to shake up the traditional World Cup circuit and are threatening to pull out of the European tour unless changes are made. If their eight-point reform plan for the 1991-92 season fails, the Americans say they might stage a well-funded series of races of their own. A two-day meeting with skiing's ruling body began Friday in Oberhofen, Switzerland, with all parties trying to avoid a confrontation.

Soccer

European soccer authorities Nov. 15 will rule on the conduct of Marco Van Basten, the AC Milan star and one of the world's best players. He broke an opponent's jaw during the European Champions Cup, and on Oct. 17 punched a player, breaking his tooth.

Tennis

Goran Ivanisevic withdrew from his quarterfinal against Jakob Hlasek in a $300,000 tournament in London. Ivanisevic has been taking antibiotics all week. The Yugoslav is now unable to collect enough computer points to qualify for next week's $2 million ATP Finals in Frankfurt, Germany. ... Boris Becker, who injured his thigh in last Sunday's Paris Open, is unsure if he can play in the Frankfurt event, which begins Tuesday. This is his last chance to overtake Sweden's Stefan Edberg for the No. 1 ranking.

#90313u1509 11/09/1990 ~United Press International

WICHITA, Kan. (NOV. 9) UPI - Learjet Inc. said Friday Singapore Airlines Ltd. planned to buy two advanced Learjet 31s in a transaction totaling $14 million.

The Learjet 31s are scheduled for delivery late next year.

Singapore Airlines would use the aircraft for training its cadet pilots and first officers.

With the advanced trainer aircraft, cadet pilots would be introduced to the handling characteristics of a jet aircraft and the cockpit environment of a large commercial jet, Learjet said. The advanced trainer also would reduce the time for a first officer to meet the airline's qualifying command criteria.

Singapore Airlines said the Learjet purchase is part of its continuing investment in training and development of its staff.

''Singapore Airlines is the first major airline to purchase the Learjet 31 for airline training,'' said Robert C. Williams, Learjet senior vice president of marketing. ''With SIA's international route system and its prestige in world airline operations, the training mission using light business jets is a

progressive and economical move that opens a potential market that could be substantial.''

Williams said the Singapore Airlines contract is a ''major step for Learjet and is a strong vote of confidence in the strength and endurance of the Model 31. We believe it will result in other airlines taking a close look at the 31 for their training missions.''

NEW YORK (NOV. 9) UPI - Nestle SA said Friday it will form a new company, Nestle USA Inc., to operate all of its food and beverage companies in the United States, where it expects more than $7 billion in annual sales.

James Biggar will be chairman and Timm Crull will be president and chief executive officer of the new company, planned to begin operations Jan. 1.

The new company was exected to include Carnation Company, The Nestle Foods Group of Companies, Nestle/Hills Coffee Company, Stouffer Foods Corp., L.J. Minor Corp., Sunmark Inc., Wine World Estates, Nestle Food Service Company,

Nestle Puerto Rico Inc., FreshNes Food Corp., and the Nestle Hospitality Group including Stouffer Hotels and Restaurants.

Helmut Maucher, chairman and CEO of parent firm Nestle SA, headquartered in Vevey, Switzerland, said, ''This move will permit us to improve on customer service and focus on key product categories with a simplified business structure.

''Until now the business units acquired over the past several years have been managed along historical lines. Communication lines will be shorter in the new structure and synergies will be possible in many areas.''

Biggar, chairman and chief executive officer of Nestle Enterprises, Inc., began his career with Stouffer Foods in 1960 and became president and CEO of the Stouffer Corporation in 1972.

Biggar assumed management responsibility in 1982 for Nestle Enterprises, Inc. Timm Crull, chairman and CEO of Carnation Company, joined Carnation in 1955, became vice president in 1967 and a member of the board of directors in 1972. He was elected president of Carnation Company in 1983, CEO in 1985 and chairman this year.

BUENOS AIRES (NOV. 9) UPI - Bell Atlantic Corp. Friday sought a role in Argentina's phone system, despite the sale of the concern one day earlier to two rival European groups.

''We are holding discussions with the government,'' said Walter Burmaister, vice president for international operations of Bell Atlantic, the telephone company based in Philadephia.

In a telephone interview with United Press International he said there were ''a lot of irregulatiries'' in the sale of the company to two European consortiums, one led by Telefonica de Espana and the other led by Stet of Italy and France Telecom.

He said legal action by Bell Atlantic ''was a possibility.''

President Carlos Menem Thursday night signed the documents transferring the state-owned Entel to the two European groups.

The northern half of the company, to be run by the Italian-French group, will be renamed Telecom Argentina, while the southern half, belonging to the Spainish company, was Friday renamed Telefonica Argentina.

Burmaister did not give the details of the alleged irregularities, but newspapers have quoted Bell Atlantic documents complaining that it was not given enough time to make good its offer to buy the northern half of Entel.

Bell Atlantic, backed by Manufacturers Hanover Trust, won the original bid to operate the northern half of Entel, but it failed to meet an Oct. 4 deadline to confirm it had the financial resources to make good its bid. On that same date Telefonica of Spain gave a firm commitment to meet its stated bid offer and the Franco-Italian gorup offered to replace Bell Atlantic.

President Menem subsequently awarded the bid to the Stet-France Telecom group, the runner-up in biddings, although there were contract modifications after the Oct. 4 deadline and the transfer of ownership date was put back to Nov. 8.

Bell Atlantic now argues it could have made good its purchase if it was given the same time and contract conditions as Stet-France Telecom.

Government officials have up to now ruled out Bell Atlantic as one of the two major operators of the telephone system, but, according to Burmaister, there may yet be a role for the company in the new setup.

''We have a saying in the United States: it's not over until the fat lady sings,'' he said.

Stet-France Telecom and Telefonica of Spain are paying $600 million in cash and $5 billion in Argentine foreign debt paper for the phone system.

Jose Martin de Bustamante, a Spaniard who is now chief of Telefonica Argentina said in a news conference Friday that his company plans to invest $400 million a year in new lines and equipment and set a priority on enabling subscribers to direct-dial long distance to any area of Argentina from lines where they now have to go through the operators.

Asked about a possible legal challenge by Bell Atlantic to the sale of Entel, Martin de Bustamante replied, ''They haven't said anything to us about it.''

He said there were now 10,000 subscribers in the southern Buenos Aires suburb of Avellaneda who could not call long distance within Argentina without going through an operator. He said providing them long distance domestic service would be ''a priority.''

Martin de Bustamante said that the installation of a phone in Argentina will cost $1,500 compared to $230 in Spain.

Officials of Telefonica de Argentina later told reporters the high costs were due to inefficiencies within the system.

Presently it is virtually impossible to get a new phone installation in Buenos Aires at a private home through legal means.

A phone installation on the black market in Buenos Aires costs from $2,500 to $4,000.

#90313u1566 11/09/1990 ~United Press International

FRANKFURT, Germany (NOV. 9) UPI - Former Chancellor Willy Brandt returned Friday night from a controversial visit to Baghdad with almost 200 freed hostages who were released after Brandt met with Iraqi President Saddam Hussein.

Emotional scenes marked the return of the hostages, as relatives standing on the tarmac cheered and waved, hugged released family members and cried.

Brandt chatted briefly with all the released hostages as they stepped off the aircraft to be reunited with families and friends.

Two U.S. citizens were among the group that landed at Frankfurt airport in a Lufthansa Airbus, in which Brandt had flown to Iraq Monday for what was termed a private humanitarian mission.

The released hostages also included 120 Germans, 20 Italians, 10 Dutch, 12 Britons and 10 other nationals.

About 300 friends and relatives were waiting at the airport to greet the freed hostages.

Before leaving the Iraqi capital, Brandt said he was disappointed he could not achieve the release of more hostages during his two meetings with Saddam.

Foreign ministry officials in Bonn said 42 of the released Germans, five Britons and the two Americans had been held at strategic military installations as ''human shields'' against possible attacks by the multinational force deployed in the Gulf.

The group of released hostages also included the German ambassadors to Kuwait and his former East German counterpart, who were taken to Baghdad by Iraqi forces about one month ago when their embassies closed down after they ran out

of basic supplies.

Brandt, president of the Socialist International and former Nobel Peace Prize winner, met Saddam Wednesday and Thursday for talks, which he said focused mainly on the search for a peaceful solution of the Persian Gulf crisis.

In interviews following the meetings, Brandt said that the outlook on a peaceful solution to the stalemate was grim and that tensions were ''extremely high'' in the Middle East.

The U.S. and the British governments had sharply condemned Brandt's initiative claiming that it helped Saddam improve his international image.

Several European governments also criticized Brandt, saying that his visit was a breach of an European Community agreement to discourage private initiatives in the gulf.

#90313u1616 11/09/1990 ~United Press International

MOSCOW (NOV. 9) UPI - The water supply in half the Latvian capital of Riga has been shut off because of a toxic chemical released into a river by a defense factory in neighboring Byelorussia, Latvian television said Friday.

The television station said that potassium cyancide was released into the Western Dvina River from a military plant in Tolotsk, Byelorussia, and many tons of pike and other fish had died.

The Western Dvina, or Daugava River, runs from the city of Tolotsk through Riga and empties into the Bay of Riga. The Western Dvina feeds several reservoirs that supply about half the water supply for Riga's 900,000 people.

Potassium cyanide is an extremely poisonous compound used in insecticides and metallurgy.

On Thursday the water supply had been turned off and then turned on again in Riga, but as of Friday, the water taps had been turned off in about half the

city, the television said.

Tests were being conducted every half hour to monitor the state of the water, the television said. It said experts believe the chemical will eventually wash out into the Baltic Sea via the Bay of Riga.

The Soviet Union has been beset by pollution problems, including problems with the Aral and Caspian seas, Lake Baikal and many of the major rivers in the country, including the famed Volga.

#90313u1648 11/09/1990 ~United Press International

NEW YORK (NOV. 9) UPI - The dollar lost ground across the board Friday after failing to obtain its usual end-of-the-week lift from currency players typically purchasing the U.S. unit on the chance Persian Gulf fighting might break out over the weekend.

Foreign-exchange traders said that was partly because the dollar could not sustain the relatively strong levels attained Thursday on a round of very tough talk about the Mideast situation from President Bush and other leaders.

The dollar's decline before the long Veterans' Day weekend pointed to further losses when full trading resumes Tuesday, particularly as it got no real lift from data on U.S. inflation at the wholesale level that should have been bullish for the currency, they said.

In a report released Friday morning, the Labor Department said the producer price index, a gauge of inflation back in the pipeline to the consumer, rose 1.1 percent last month. Most economists had expected the index, despite costlier oil, to rise just 0.7 percent.

In late New York trading, the dollar was quoted at 1.4870 German marks, down from 1.4910 Thursday; and at 129.60 Japanese yen, down from 130.18.

Janice Bellone, a senior New York deutsche mark dealer with Bayerische Hypotheken-und Wechsel Bank, said she believed the dollar's pre-weekend slip in the face of war fears boded further losses.

''If the threat of war doesn't bring the dollar up, this thing looks like it's

going to 1.40 (marks to the dollar) now,'' she said.

In Los Angeles, Richard Pontius, First Interstate Bank assistant vice president and corporate adviser, said the dollar ''ran into some natural selling interest'' after rallying Thursday on Persian Gulf tensions.

Other New York dollar rates: 1.2495 Swiss francs, off from 1.2505; 4.9930 French francs, off from 5.0025; and 1,118 Italian lire, off from 1,121.25.

The British pound inched up to $1.9655 from $1.9650.

In European trading, the dollar lost ground as U.S. economic indicators fed speculation the Federal Reserve will lower interest rates again.

Early on, the dollar gained on Mideast war fears, but both the prospect of falling U.S. rates and profit-taking shoved it lower.

Alan Chase, National Westminster Bank's strategic dealing chief, said any gains the dollar would register on an actual breakout of war would not be sustained.

''The first reaction to any advent of war is massive buying of dollars,'' Chase said, But he cautioned: ''It's going to be short- lived.''

The dollar declined in Frankfurt, to 1.4895 marks vs. 1.4910 Thursday, and in Zurich, to 1.2505 Swiss francs vs. 1.2520.

In London, the pound closed slightly higher at $1.9670 vs. $1.9665. The pound was stable despite continuing turmoil in the ruling Conservative Party, which suffered defeat in two parliamentary by- elections this week, analysts said.

The dollar also lost ground in Paris, Brussels and Milan, closed at, respectively: 5.0105 French francs vs. 5.0180, 30.65 Belgian francs vs. 30.70, and 1,122 Italian lire vs. 1,123.25.

Earlier in Tokyo, the dollar gained against the yen on fears of a war in the Middle East and soaring oil prices. The dollar closed at 130.50 yen, up from Thursday's close of 129.50.

''People don't want to hold the yen over the long weekend in this situation,'' said Juichi Ito, a customer dealer at Daiwa Bank.

The Japanese markets will be closed Monday for a national holiday.

In Zurich, gold declined to $386 an ounce from $386.50 Thursday. London gold slipped to $385 an ounce from $386.

Silver closed unchanged in Zurich at $4.25 an ounce but was lower in London at

$4.25 an ounce vs. $4.26.

Republic National Bank in New York closed cash gold at $385 an ounce, down from $387.50 Thursday. The New York Commodity Exchange settled contract gold at $384.80 an ounce, down from $387.30.

Republic closed cash silver at $4.24 an ounce, down from $4.28. Comex silver ended at $4.237 an ounce, a decline from $4.277.

#90313u1651 11/09/1990 ~United Press International

WASHINGTON (NOV. 9) UPI - Iraq may be able to import only 500,000 metric tons of grain because of the international embargo - half the amount projected one month ago, the government said Friday.

The new estimate was the latest sign of the impact of the embargo that was approved by the United States following Iraq's invasion of Kuwait. Before the invasion, the Agriculture Department had estimated Iraq would buy 5.13 million tons of wheat, feed grains, rice and soybean meal in the current 12-month period.

''Forecasts of Iraqi imports are further reduced in line with the continuing evaluation of the U.N.-sponsored embargo on trade with Iraq,'' the department said in announcing the changes.

During the 1989-1990 trading year, Iraq bought 5.2 million tons of wheat, feed grains, rice and soybean meal.

In its new estimate, the World Agricultural Outlook Board said it expected Iraq to get 300,000 tons of wheat and 200,000 tons of rice. It indicated the rice would be obtained during 1991 while some of the wheat may have been shipped before the embargo.

In October, the estimate of grain shipments was $1.05 million tons, including 600,000 tons of wheat, 150,000 tons of feed grains, 300,000 tons of rice and 10,000 tons of soybean meal. The new estimate assumed no soybean meal or feed grains would penetrate the embargo.

Iraq in the past was heavily dependent on imported grain, vegtable oil, meat and sugar. It grew only a quarter of the rice it consumed, for example. The government has announced steps to ecourage larger domestic production.

In late September, a Library of Congress report said Iraq was likely to see severe food shortges by the end of the year, which would make food rationing and smuggling ''vital elements'' in coping with the next few months.

The report also said Iraqis could adjust their diets by replacing imported

rice with potatoes, making bread out of barley instead of wheat and substituting locally caught fish for the livestock that has been produced with the aid of imported grain.

#90313u1719 11/09/1990 ~United Press International

FULTON, MO (NOV. 9) UPI - Former President Ronald Reagan paid a visit Friday to the site of Winston Churchill's famed ''Iron Curtain'' speech on the first anniversary of the fall of the Berlin Wall to dedicate a monument sculpted from the wall by Churchill's granddaughter.

Under sunny skies, Reagan spoke about the changes in Europe since Churchill's 1946 speech, focusing on the fall of communism and its most famous symbol, the Berlin Wall.

''Today, we rejoice in the demise of the Berlin Wall that was permanently breached just one year ago,'' Reagan told a crowd of about 5,000 people, many of them students at Westminster College.

The college was the site of Churchill's ''Sinews of Peace'' address, in which he coined the phrase ''Iron Curtain'' to describe the emerging Communist bloc.

Churchill's granddaughter, artist Edwina Sandys, used eight concrete sections of the Berlin Wall to make up the 11-foot-by-32-foot monument called ''Breakthrough.'' Sandys went to East Germany shortly after the wall was opened and persuaded the government to donate the wall sections for the sculpture.

Flanked by the U.S., German and British flags, and with a statue of Churchill looking out over the crowd, Reagan praised the British statesman's vision.

''Out of one man's speech was born a new Western resolve,'' Reagan said, ''not warlike, not bellicose, not expansionist - but firm and principled in resisting those who would devour territory and put the soul itself into bondage.''

The former president praised the work of Soviet President Mikhail Gorbachev in helping to break down the barriers between East and West.

''Last month, Germany itself was reunited in the shadow of the Brandenburg Gate, and under the democratic umbrella of NATO,'' Reagan said.

Reagan reminded the crowd he had gone to Berlin in June 1987 and called on Gorbachev to ''tear down this wall.''

''Was he listening? Whether he was or not, neither he nor the rulers of Eastern Europe could ignore the much louder chants of demonstrators in the streets of Leipzig and Dresden and dozens of other German cities, '' he said.

Prior to his address, Reagan was awarded an honorary degree of doctor of laws by the college.

Before Reagan spoke, Sandys told the crowd the story of how she conceived and created the sculpture.

''A year ago, like everyone else in the world, I was glued to the television screen watching the Berlin Wall fall,'' she said. ''I thought wouldn't it be wonderful to make a sculpture out of the Berlin Wall and wouldn't it be wonderful to bring it to Fulton.''

Sandys cut the gigantic figures of a man and woman in eight concrete sections of the wall, representing the breakthrough of freedom.

The side facing the crowd had been on the West Berlin side and was painted with brightly colored graffiti. The side that had faced East Berlin remained blank.

TORONTO (NOV. 9) UPI - Campeau Corp. said Friday it appointed as chief executive officer and president Stanley H. Hartt, a lawyer and former aide to Prime Minister Brian Mulroney.

A company statement said the corporation's board of directors will likely appoint Hartt a director and chairman of the board at its next meeting, the date of which was not announced.

Hartt replaces interim chief executive officers James D. Raymond and Gary M. Goodman, who continue to serve as directors of the corporation. They were appointed on an interim basis to the office of the chief executive on Aug. 10, 1990.

Hartt, 52, has served as Prime Minister Brian Mulroney's chief of staff and as a deputy Canadian finance minister. He is currently a partner in the law firm Stikeman Elliott. He will move to Toronto in his new job.

Campeau Corp.'s business plan was stalled July 30 when then-chairman Robert Campeau decided not to seek approval from shareholders to sell most or all of the company's Canadian real estate assets.

Two weeks later, Robert Campeau was removed as chairman and chief executive officer. Robert Despres was appointed interim chairman and a two-member office of chief executive was established.

Shareholders have yet to be asked to approve a resolution that would allow the business plan's real estate asset disposal program to proceed. Robert Campeau remains a leading shareholder and a director of the company he founded more than four decades ago.

One of Campeau's largest creditors, Edward J. DeBartolo Corp. of Youngstown, Ohio, recently decided not to renew a notice arrangement with Campeau. Campeau said DeBartolo would no longer have to give the company nine days notice before taking action to collect on a $480 million loan to Campeau that is in default.

#90313u1763 11/09/1990 ~United Press International
(NOV. 9) UPI - Notre Dame is No. 1 but Tennessee is favored entering their Saturday game that will help determine the national title.

The No. 8 Volunteers are slight favorites because of the home field and Notre Dame's first-half struggles in a victory over Navy last week.

''I would have to say we're an underdog,'' said Fighting Irish Coach Lou Holtz who would always like to see his team the underdog. ''For us to win the game would be an upset. We will learn something about ourselves.''

Those who vote for the national championship will learn a lot, too. Notre Dame takes a 7-1 record in against Tennessee, and the Irish could be heading for an Orange Bowl showdown with No. 3 Colorado if they get past the Volunteers. Tennessee, 5-1-2, has its eye on the Sugar and Fiesta Bowls.

''It will be the game,'' Tennessee running back Roland Poles said. ''If we beat Notre Dame, it's got to help us in the polls and the bowls.''

Coach Johnny Majors' Volunteers have not lost a November game in six years. But Notre Dame has some history of its own, including three national titles, seven Heisman Trophy winners and 89 All-Americans since 1926. The Irish have won 76 percent of their games in 101 years of playing football. That percentage is the best in the nation.

If the Irish falter Saturday, No. 2 Washington will look to take over the top spot with a victory at home over UCLA. Washington, 8-1, has already clinched a Rose Bowl trip.

The Huskies are led by quarterback Mark Brunell, who has 1,847 yards of total offense, and running back Greg Lewis averages 136.5 yards per game. Washington

has outscored opponents 263-64.

''It's a good group of guys who prepared well and hung in there week after week and put up some numbers that are absolutely incredible,'' Huskies Coach Don James said. ''Only the old Oklahoma and Nebraska teams used to win this way. I think we're in real good position (to win the national championship.)''

UCLA is struggling at 4-5.

No. 3 Colorado can seal the Big Eight crown and automatic Orange Bowl berth by defeating Oklahoma State Saturday at Boulder, Colo. No. 5 Iowa can clinch the Big Ten title with a home victory over co-No. 24 Ohio State, and No. 6 Brigham Young can seal the Western Athletic Conference and Holiday Bowl trip with a victory at No. 21 Wyoming.

No. 6 Georgia Tech plays home against Virginia Tech, No. 9 Virginia plays at North Carolina and No. 10 Nebraska plays at Kansas.

Elsewhere, it's Cincinnati at No. 11 Florida State, Houston at No. 12 Texas, No. 13 Auburn at Southern Miss, No. 15 Illinois at No. 17 Michigan, No. 18 Oregon at California, Maryland at No. 19 Penn State, Boston College at No. 20 Louisville, Pacific at No. 23 Fresno State and Stanford at co-No. 24 Arizona.

#90313u1764 11/09/1990 ~United Press International

(NOV. 10) UPI - While part of the mission of the New York Giants and San Francisco 49ers is keeping their minds off each other until they meet in three weeks, the two AFC teams with one loss keep an eye on each other.

The Miami Dolphins and Buffalo Bills play again Dec. 23 in Buffalo. They are tied for the AFC East lead with 7-1 records, and the Dolphins won their earlier meeting in Miami.

''We control our own destiny,'' Bills defensive end Bruce Smith said. ''Miami has to come up here and play. So if we screw it up, it's our fault. But I don't see us screwing it up.''

The Bills have won six straight and the Dolphins five. Buffalo plays home against Phoenix Sunday and the Dolphins are on the road against the New York Jets.

The Dolphins are favored by a field goal against the 4-5 Jets; the Bills are two-touchdown favorites over the 2-5 Cardinals.

''The team has, to this point, kept very good perspective,'' Bills Coach Marv Levy said. ''And I think it has been a more opportunistic team than in the past.''

The coaches of the underdogs sound the same about their chances.

''We'll show up and play 'em just like everyone else but we'll have to play well to contend with them,'' Jets Coach Bruce Coslet said.

From Phoenix Coach Joe Bugel: ''We have to play mistake-free football to even challenge.''

The Miami defense, 24th in the NFL last year, comes to East Rutherford, N.J., ranked No. 1 in the NFL. The unit has not allowed an offensive touchdown in eight quarters or a rushing TD in 20 quarters. The Dolphins offense leads the AFC in time of possession, averaging 32:19.

''We feel we're making strides with a better balanced offense and stronger defense,'' Miami Coach Don Shula said.

An 8-1 start would mark Miami's best start since it went 9-0 in 1984 and give the Dolphins as many victories as they had all of last year.

The Jets have won two straight for the first time this season and a third would put them at .500 and into contention for an AFC wild card spot.

The Cardinals face their fourth straight opponent with no more than one loss. They dropped a last-play 20-19 decision to the unbeaten New York Giants three weeks ago, fell to the 7-1 Chicago Bears 31-21, and were crushed 23-3 by the Dolphins last week.

''We've had to grow up real fast because it's kind of been like Murderers Row '' Bugel said. ''It's going to be another real big, big challenge for our young football team.''

In other games, Atlanta is at Chicago, Indianapolis at New England, Minnesota at Detroit, Seattle at Kansas City, Tampa Bay at New Orleans, the New York Giants at the Los Angeles Rams, Denver at San Diego, Green Bay at LA Raiders, and San Francisco at Dallas. Monday night, Washington visits Philadelphia.

At Anaheim, Calif., the Giants visit the team that put them out of the playoffs last year with an overtime play that put the Rams into the NFC Championship Game.

''We have a little hatred for these guys because of what they did to us,'' New York wide receiver Stephen Baker said.

The Rams, 3-5, have stumbled since and the 8-0 Giants are off to their best start in the 66 years of the franchise. The playoff loss is New York's only setback in its last 12 games. The Giants also recall last season's visit to Anaheim, when they came to the Big A with a 8-1 record and left 31-10 losers.

In 1988, they were pounded 45-31 by the Rams at the Meadowlands.

''I like to think we owe them one, maybe two,'' nose tackle Erik Howard said. ''We gave it all up against these guys last year. Hopefully, that will give us motivation this time.''

#90313u1771 11/09/1990 ~United Press International

WASHINGTON (NOV. 9) UPI - The streets are still empty and the campuses quiet, but opposition to President Bush's move to put the United States on an offensive footing in the Middle East is slowly organizing and building, activists said Friday.

''There is a shift of mood,'' said the Rev. Paul Sherry, president of the United Church of Christ, one of the most liberal mainline Protestant denominations.

Bob Musil of the Professionals Coalition for Nuclear Arms Control, a key cooridinating group for Washington antiwar lobbyists, agreed. Bush's announcement on Thursday that the United States would nearly double its forces in the Persian Gulf ''only confirms our worst fears,'' he said.

The build-up announced by Bush, said Musil, ''is precisely the wrong response to this crisis. This is not Grenada, this is not Panama, this is not Libya. This is serious war.''

And Dennis Doyon of the American Friends Service Committee in Philadelphia reported that his Quaker-based group was getting an increased number of calls from ''plain Americans'' suddenly fearful the nation will be plunged into war.

A number of peace groups and peace-oriented religious bodies were expressing concern about the increasing stridency of the administration rhetoric even

before Thursday's announcement.

On Thursday a group of 21 organizations took out a quarter-page advertisement in The Washington Post declaring ''war is not the answer'' and saying they ''emphatically oppose the United States taking any offensive military action in the current crisis.''

Among the signers of the ad were the Union of American Hebrew Congregations, a Reform Judaism organization; Americans for Democratic Action; SANE/FREEZE; Physcians for Social Responsibilty; Women's International League for Peace and Freedom and a number of religious denominations and agencies.

The American Civil Liberties Union and a number of other organizations are circulating a letter that calls on Congress to ensure that Bush follow constitutional constraints and that there be full congressional hearings before any military action is undertaken.

The Professionals Coalition - seasoned peace lobbyists in Washington - has hired a polling firm to measure public opinion on a host of gulf crisis questions over the coming weekend.

But some groups are ready to take to the streets in an effort to resurrect the mass mobilizations that marked the antiwar protests of the Vietnam era.

The Washington Area Coalition to Stop U.S. Intervention in the Middle East plans a Saturday demonstration in front of the White House under the broad slogan of ''civil rights before oil rights'' and will call for ''the unconditional, immediate and complete withdrawal of Iraqi troops from Kuwait'' as well as a ''nonviolent, diplomatic resolution to the conflict.''

Said Sherry, ''Restraint is so critical right now. Patience is so critical right now. But if the build-up continues, restraint will go by the boards, patience will go by the boards. ...

''Our concern is that increasingly we are placing ourselves in a position where war may become inevitable,'' he said.

#90313u1777 11/09/1990 ~United Press International

WASHINGTON (NOV. 9) UPI - President Bush, preparing for more bad news on the economic front, gathered with top advisers at Camp David Friday to look over the gloomy projections and to prepare for the next State of the Union address.

White House press secretary Marlin Fitzwater said that the president anticipated the fourth quarter economic forecast, which will be made public next week, will show a downturn in growth as a result of the Persian Gulf energy crisis. ''It will be a trying time in terms of growth,'' he said.

Fitzwater said that the 1.1 percent jump in wholesale prices was reflective of the energy crunch and jittery financial markets due to fears the gulf crisis may lead to war.

''The GNP (growth national product) will reflect the gulf crisis,'' Fitzwater told reporters.

He said that the president was in the preliminary stage of preparing his annual State of the Union address and the 1992 fiscal year budget. He said that Bush is looking for new incentives and proposals ''to get the economy back on its feet.''

He affirmed that Bush will attempt once more to get a cut in the capital gains tax, which Congress has twice rejected, to provide incentives for business.

The president told a news conference Thursday that the economy was in ''tough times now'' and he would be looking for ways ''to soften the blow.''

In looking over the election results in which voters displayed their disdain of new taxes, Bush vowed that the next time around he would not bend again and new taxes would be enacted over ''my dead veto.''

He acknowledged some regrets in reneging on his campaign pledge ''read my lips-no new taxes'' but said he believed ''it was the right thing to do'' to get the budget deficit reduction package approved.

WICHITA, KS (NOV. 9) UPI - Boeing Military Airplanes said Friday it received a U.S. Air Force contract that could be worth up to $120 million for continued installation work on KC-135 tankers. The work would continue for up to five more years.

The new contract calls for installation work on 40 tankers in 1991 for $23.5 million. Total installations during the five-year period would range from 166 to 211 tankers, depending on future defense budgets, Boeing said.

The installation work covers numerous structural and aircraft system modifications required to accomodate a particular type of engine, the CFM56, and its gross weight. Modifications include a reinforced wing structure and floor, strengthened main landing gear, deletion of the water injection system, and rearranged cockpit controls and displays.

Boeing said the modification also includes a number of improvements unrelated to the propulsion system. About 250 Boeing employees are assigned to the installation program. No new employment is expected for the new contract.

The KC-135 is the Air Force's primary tanker. With new engines, two KC-135Rs can do the work of three tankers with original engines, Boeing said. The Wichita branch of Boeing Military Airplanes is part of the Boeing Defense & Space Group based in Seattle.

ST. PETERSBURG, FL (NOV. 9) UPI - Federal regulators shut down long-troubled Florida Federal Savings Bank on Friday and created a new institution to assume the deposits and certain assets and liabilities of the $4-billion thrift.

Florida Federal sought in recent years to reduce its losses in the face of a scandal involving the government's guaranteed student loan program. The thrift was convicted in May on charges of defrauding the government by filing false student loan default claims, and was later ordered to pay $20.2 million in restitution and fines.

Prosecutors charged that Florida Federal bilked the government out of $18 million by billing the U.S. Department of Education for student loans it never tried to collect.

At the time of the fraud, the thrift was the second largest savings and loan association in the Southeast and the third largest provider of guaranteed student loans in the country.

The Office of Thrift Supervision said it shut down Florida Federal because the thrift was operating in "unsafe and unsound condition" with insufficient capital and no prospect of raising cash without government assistance.

The OTS said Florida Federal's losses were the result of the thrift's high level of non-earning assets, including foreclosed properties and delinquent development and commercial loans.

For the fiscal year ended June 30, Florida Federal posted a loss of $103 million. The loss for the fourth quarter eliminated the company's meager net worth of $1.3 million. Last month, the thrift reported an additional loss of $6.7 million for the first quarter ended Sept. 30.

At the time, Florida Federal's chief executive officer, John Sapanski, said the quarterly results represented the thrift's best performance since 1987.

The OTS appointed the Resolution Trust Corp. as receiver for Florida Federal. A newly created mutual association, Florida Federal Savings, was formed to continue the thrift's business. Regulators said Florida Federal held $2.5 billion in deposits in 238, 234 accounts. Deposits continue to be federally insured up to $100,000.

Florida Federal, which operated 88 branch offices and loan production facilities, was one of Florida's largest financial institutions, although its asset base had been shrinking in recent quarters. By Sept. 30, assets had fallen to $4 billion from about $5 billion as of June 30, 1989.

(NOV. 9) UPI - The guided-missile cruiser U-S-S Philippine Sea fired warning shots across the bow of a Sudanese-flagged cargo vessel today in enforcing the embargo against Iraq. Officials say sailors boarded and searched the ship before allowing it to proceed to a Jordanian port.

The State Department says Iraq freed three American male hostages today, but blocked the exit of two others who were assembled at a Baghdad hotel for a flight out of the country. There is NO explanation of why the Iraqi authorities stopped the two from leaving.

Former German chancellor Willy Brandt returned to Frankfurt today from a controversial visit to Baghdad with almost 200 hostages. The Germans were released after Brandt met with Iraqi President Saddam Hussein.

New York authorities say the accused assassin of right-wing Israeli Rabbi Meir Kahane was taking the controversial drug Prozac for depression. The drug has recently come under scrutiny amid mounting reports that it may actually spark violent or suicidal behavior in some patients.

The crime-plagued nation's capital is getting a new prison. The government today announced plans to build a one-thousand-bed facility to be built within site of the Capitol dome. The new prison is designed to help relieve severe overcrowding at the District of Columbia jail.

A Federal Election Commission official testified today that if allegations against former thrift owner Don Dixon are true, then he made a mockery of the federal laws limiting political campaign contributions. Dixon is named in a 38-count federal indictment in the BILLION-dollar failure of Vernon Savings and Loan in Texas.

Defense attorneys for Charles Keating today asked a judge in Los Angeles to dismiss the 42-count securities fraud indictment against the former head of Lincoln Savings and Loan and three co-defendants. And the judge told prosecutors that he has ''major concerns'' about one-half the charges.

Federal investigators are trying to confirm a report that a twin- engine plane that crashed in a heavy rainstorm in East Texas last night was low on fuel. All five people aboard were killed in the fiery crash near Nacogdoches.

BEIRUT, Lebanon (NOV. 9) UPI - The Lebanese army prepared 8,000 troops to take over and unify the devided capital at dawn Saturday to end more than 15 years of militia rule, official sources said.

Defense Minister Albert Mansour said Friday the government of President Elias Hrawi would not hesitate to call in Syrian military help if the army met resistance from the warring Christian and Moslem militias.

''There will be no weapon in Beirut other than the legitimate one,'' said Agriculture Minister Mohsen Dalloul, who maintains close contacts with the Syrian command.

The decision to establish a free militia-unified Beirut was announced Wednesday following a Cabinet meeting. An official statement said the ''Greater Beirut'' plan would be completed by midnight Nov. 19.

Military sources said the soldiers would deploy in key junctions of the city including its southern suburb, a hotbed of the fundamentalist pro-Iranian Hezbollah, and the Ashrafiheh neigborhood, a stronghold of the Christian Lebanese Forces militia headed by Samir Geagea.

The sources said the zero hour for the deployment was set at dawn Saturday. The soldiers have orders to shut down all militia offices and regain control of public facilities and buildings illegally occupied by militias or refugees.

Security sources said that according to the plan, troops would gradually deploy Saturday and militiamen withdraw with their light and heavy weapons outside Greater Beirut.

The Cabinet's statement did not set the boundaries of Greater Beirut, but Hrawi said it will include the capital and a 9-to-16 mile semi- circular area stretching to the Damour village in the south and the Kalb River in the north.

The sources said confiscating arms will go along with disbanding militias, which should be completed by March 21, 1991, the deadline set by Hrawi.

All militias based in Beirut have agreed to pull out from the capital and have given orders to their gunmen to facilitate the army's task.

According to the plan, troops would also have to lay hand on the Beirut port controlled by Christian militias since the outbreak of the civil war in 1975 and close other militia-held smaller ports south and north of the capital.

These small ports were mainly used to import arms to various warring factions

as well as trafficking drugs produced by Lebanon's opium growers in the Eastern Bekaa valley.

Reunification of the capital was the first step of an internationally recognized peace accord endorsed by Lebanese lawmakers in Taif, Saudi Arabia, in October 1989.

Its implementation was obstruced by rebel Christian leader Gen. Michel Aoun until Oct. 13, when he was ousted in a joint Syrian-Lebanese military operation.

Aoun sought refuge at the French Embassy in the Christian district of Hazmiyeh and was granted political asylum by France, but Hrawi's government insisted on putting him on trial.

The general remains at the emabssy pending a settlement over his fate.

MIAMI (NOV. 9) UPI - Alleging mismanagement, federal regulators filed a complaint Friday seeking more than $250 million in damages from the former chairman of CenTrust Bank and 15 other former officers and directors of the failed thrift.

The complaint, filed in U.S. District Court by the Resolution Trust Corp., charges David L. Paul, the flamboyant former chairman of CenTrust, and the others with breach of fiduciary duty, waste and mismanagement.

The Office of Thrift Supervision is seeking $30.9 million from Paul in a separate proceeding filed last month.

Federal regulators seized CenTrust in February, and officials now estimate that the bailout of the thrift will cost taxpayers $1.7 billion.

The RTC contends Paul and the other officers and directors allowed CenTrust's assets to be depleted through extravagent spending and through a highly speculative investment strategy that favored high-risk, high-yielding financial instruments known as ''junk'' bonds.

Also named as defendants in the complaint were: Peter K. Moser, Edward D.G. Davies, David Kunstler, Richard H. Judy, Perry Snyderman, Catherine Fahringer, Walter Shealy III, Angel Cortina Jr., Thelma Gibson, Earl Linch, Milton Wallace, Jay Weiss, Barry Schwartz, Alfred Teti and Jonathan Tyres.

#90313u1954 11/09/1990 ~United Press International

(NOV. 9) UPI - More tough talk in the Persian Gulf crisis today. Iraq reiterated its threat to blow up the Kuwaiti and Saudi Arabian oil fields, and British Prime Minister Thatcher said the military option will be used if Iraq does NOT withdraw from Kuwait. At the United Nations, the General Assembly's Committee for the first time ever, refused to put an item on the world body's agenda on request from a member state. Iraq had requested that the world body discuss the presence of U-S troops in the Persian Gulf area.

In Washington, the government today gave more signs of the impact of the U-N embargo against Iraq. The Agriculture Department says Baghdad may be able to import only 500-thousand metric tons of grain because of the international sanctions... half the amount projected one month ago. Before the invasion of Kuwait, the department had estimated that Iraq would buy five-point-one-Million tons of wheat, feed grains, rice and soybean meal in the current 12-month period.

President Bush apparently is bracing for more bad news on the economic front. White House spokeman Marlin Fitzwater says the president anticipates that the fourth-quarter economic forecast due out next week will show a downturn in growth as a result of the Persian Gulf energy crisis. And Fitzwater says Bush is looking for new incentives and proposals ''to get the economy back on its feet.'' Bush gathered with top advisers today at Camp David to look over the gloomy projections.

A federal judge in Miami is hearing arguments this afternoon on whether a network can broadcast government tapes of telephone conversations between Manual Noriega and his defense attorneys. Cable News Network obtained at least seven of the tapes in the drug-trafficking case of the depose Panamanian dictator. Noriega's lawyers are seeking a permanent injunction to bar C-N-N from airing any more of the tapes.

Former President Reagan today visited the site of Winston Churchill's famed ''Iron Curtain'' speech in Fulton, Missouri, to dedicate a monument sculpted from the Berlin Wall by Churchill's grand-daughter. The dedication comes on the first anniversary of the fall of the nortorious wall. Reagan spoke about the changes in Europe since Churchill's 1946 speech, focusing on the collapse of communism and its most famous symbol.

British Prime Minister Thatcher faced a new barrage of criticism today because of her Conservative Party's crushing defeat in two by- elections. The main opposition Labor Party won both elections, and in Bradford, the ruling Conservatives finished a humiliating third. Labor leader Neil Kinnock says the voters are telling Thatcher to quit. Thatcher has to call new elections before mid-1991.

#90313u1995 11/09/1990 ~United Press International

WASHINGTON (NOV. 9) UPI - The Office of the Comptroller of the Currency declared Friday that Freedom National Bank of New York was insolvent and appointed the Federal Deposit Insurance Corp. the institution's receiver.

The Harlem-based bank experienced significant deterioration in 1988 as a result of weak loan underwriting by former management and weak supervision by the board of directors and management, government officials said.

New management, hired in 1988, attempted to resolve the problems, and the comptroller's office obtained commitments from the board of directors addressing the bank's problems.

Despite the efforts of the directors and new management, the bank's deterioration continued and was exacerbated by the local economic downturn, officials said. The bank was unsuccessful in obtaining additional capital and losses mounted, exhausting the bank's capital and resulting in insolvency.

Freedom National Bank of New York, chartered in 1964, had assets as of Sept. 30 totaling approximately $110 million. The bank was a minority institution with its main office in Harlem and two branches in Brooklyn.

#90313u2025 11/09/1990 ~United Press International

WASHINGTON (NOV. 9) UPI - President Bush vetoed a bill Friday which would have made changes in the Orphan Drug Act, claiming the measure would endanger incentives for drug companies to develop medicines for rare diseases.

The legislation would have made changes in a law that created economic

incentives for drug companies to develop drugs for rare diseases and conditions.

The law ''by any measure ... has been a tremendous success,'' leading to the approval of a total of 49 new drugs for rare diseases and the development of 370 medicines, Bush said.

''These drugs have provided life-saving treatments for such terrible diseases as enzyme deficiency, which adversely affects the immune system of about 40 children nationwide,'' he said. ''Until the orphan drug was developed to treat these children, they had to spend their entire lives in the protection of an isolation bubble.''

But Bush said he had serious concerns about the changes, which were designed to close loopholes in the law that had allowed companies to make large profits from drugs that turned out to have bigger markets than originally predicted, such as AIDS treatments.

Bush said he was particularly concerned with the provision dealing with ''market exclusivity'' because it would modify the companies' exclusive marketing rights for a seven-year period.

''The certainty of this 7-year period is the basis of the economic incentive to attract drug firms to invest in orphan drugs,'' he said.

''I am aware that this bill was passed after a number of compromises among members of Congress,'' he said. ''I am extremely concerned, however, that individuals with rare diseases may suffer because of changes that bill would make in the incentives to develop new drug treatments.''

The veto was praised by some industry groups but criticized by organizations.

''Putting the profit margin of one corporation over the public health of the country is colder and meaner, not kinder and gentler,'' the AIDS Action Council said in a statement.

The Association of Biotechnology Companies, however, said the changes had been ''diluted to the point that they were virtually meaningless'' and the veto would open ''the door for making the ... act more effective.''

#90313u2128 11/09/1990 ~United Press International

NEW YORK (NOV. 9) UPI - The U.S. Treasury bond market, a record quarterly refunding operation behind it and prospects of further economic decline ahead, finished out the week Friday with modest gains but an optimistic posture.

One of the main reasons for positive market sentiment is the expectation that the Federal Reserve is increasingly under pressure to ease its short-term Fed funds rate and longer-term discount rate to stave off recession.

Such a lowering of interest rates can boost bond prices by making their fixed returns relatively more attractive - but only if the bond market is convinced that a Fed easing does not feed bond-bearish inflation.

The Federal Open Market Committee, the Fed's interest rate policy board, will meet Tuesday and could opt for another easing move. It lowered the Fed funds rate Oct. 29, to 7 3/4 percent from 8 percent.

Investors Friday kept their nerve in the face of wholesale inflation figures

which, taken at face value, were bearish, but when the effects of the Persian Gulf crisis were set aside, were actually somewhat bullish.

The government's closely watched Producer Price Index surged 1.1 percent last month on soaring energy prices, exceeding economists' predictions of a gain of just 0.7 percent. But energy and food aside, wholesale prices were unchanged in October after edging up 0.6 percent in September.

''From a core inflation standpoint the market is pretty constructive, '' said James Capra, a Shearson Lehman Brothers senior vice president.

While the market was edgy about the rising tone of U.S. and other leaders on the use of military force to drive Iraqi forces out of Kuwait. But Capra said most analysts think a Western offensive is two months off.

The newly issued benchmark 30-year bond, the 8 3/4 of 2020, closed at 101 08/32 to yield 8.61 percent, compared with an average price of 100 12/32 and yield of 8.71 percent at auction Thursday, a gain of 7/8 point.

Analysts said another reason for a bullish market at week's end was relief at the completion of the record $34.25 billion quarterly refunding - particularly the good results of the 30-year bond auction. The bond's yield was 16 basis points off the same issue's yield when auctioned in August.

That result and lowered market yields Friday were also good news for the wide economy, as fixed mortgage rates are pegged to the long bond.

Capra said many of the refunding issues ended up in the hands of dealers, not investors, but said Wall Street was not unhappy about that. Prospects are good for sales to institutional investors in the period ahead, he said.

''I think what's happening is that people have been very cautious about buying stuff because of concerns about the Middle East,'' he said. But ''as the market works its way up, people who are holding cash are being drawn into the market because prices are rising and they can't wait forever.''

Commented Mitchell Held, a Smith Barney analyst, in the firm's Credit Market Comment newsletter: ''Breezing through a record-size refunding auction ... and generally ignoring heightened tensions in the Persian Gulf ... some of the bulls began to come out of the closet and bought outright.''

Ten-year Treasury notes ended at 100 9/32 to yield 8.63 percent, against 99 28/32 and 8.52 percent at auction this week. Five-year notes ended at 101 22/32 to yield 8.07 percent, vs. 101 12/32 and 8.57 percent last week.

Three-year Treasury notes closed at 100, par, to yield 7.75 percent, compared with 99 30/32 and 7.78 percent at auction Tuesday. Two-year notes were at 100 08/32 to yield 7.61 percent, vs. 100 05/32 and 7.66 percent last week.

#90313u2135 11/09/1990 ~United Press International

NEW YORK (NOV. 9) UPI - Stocks were mixed this week, caught between hopes for lower interest rates and Mideast jitters, with the blue-chip Dow industrials down slightly but major indexes and the broad market higher.

The Dow Jones industrial average jumped 44.80 Friday to end the week at 2488.61 but lost 2.23 for the week, a 0.1 percent pullback.

Among broader market indexes, Standard & Poor's 500-stock index rose 1.83 to end the week at 313.74 and the New York Stock Exchange composite index added 1.10 to end the week at 171.17.

Advances led declines, 1,181-756, among the 2,168 NYSE issues traded this week. Weekly Big Board volume totaled 738,509,588 shares, down from 771,474,930 a week earlier and 743,959,360 a year ago.

Analysts said the market's mixed performance came as investors got caught between saber-rattling by principals involved in the Mideast crisis and improved prospects for lower domestic interest rates at the end of the week.

After moving sideways Monday and Tuesday, prices plunged Wednesday - when chances of war breaking out in the Mideast seemed to get stronger.

Remarks by British Prime Minister Margaret Thatcher touched off the rout. Speaking to Parliament, she issued a stern warning to Iraqi leader Saddam Hussein to get out of occupied Kuwait soon or be removed ''by force.''

The Dow plunged 44 points as traders feared conflict might break out. The Dow edged higher Thursday as the Treasury's quarterly refunding concluded with the sale of 30-year bonds.

The three auction sessions went well, with healthy demand for the securities, and on Friday, traders, relieved the government issues were sold without interest rates having to rise sharply, went on a buying spree.

The blue chips wiped out Wednesday's 44-point plunge on the strong feeling that the Federal Reserve's policy making panel would lean toward a rate cut at its meeting Nov. 13.

And news on Friday that the core inflation rate, excluding food and oil prices remained unchanged last month helped solidify the feeling the Fed had sufficient leeway to loosen credit policy further, allowing rates to fall enough to cushion the economic blow of a recession.

As the week ended, analysts said the market would take its cue from

expectations of looser credit.

Looking to the Veterans' Day week, Ricky Harrington, director of investment policy and asset management at Marion Bass Securities in Charlotte, N.C., said ''we'll extend the rally'' in stocks if, as he expects, Mideast tensions do not erupt.

''There's the hope that we're going to get lower rates,'' said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y.

''We need all the help we can get, we need better volume, but that's where hopes are pinned right now - lower rates,'' he said.

Also on Wall Street's wish list, he said, is a cooling of the Mideast situation, especially after the mid-week scare: ''Every time we get that kind of news and lower oil prices, the market reacts favorably. It got beat up when it looked like we would make a move.''

But even if the conditions needed for stocks to rally - a cooling of the Mideast crisis cools, interest rates and oil prices dropping - come together, Doran warned: ''It would still be temporary.

''There are still major problems out there. We have an economy slowing and corporate America is regrouping, trying to become more profitable. The cost of that is going to be layoffs and those types of things. Over the longer term it will be positive, but not over the next 2 or 3 months,'' he concluded.

#90313u2205 11/09/1990 ~United Press International

(NOV. 9) UPI - Secretary of State Baker has gone to Paris- the seventh leg of his tour of the Middle East and Europe to check out the support for possible military action against Iraq. Baker will meet NOT only with French leaders in Paris. He'll also meet with NATO Secretary-General Manfred Woerner Earlier today, Baker met with British Prime Minister Thatcher... who said she hopes Iraq will adopt a peaceful solution, and pull out of Kuwait.

Oil prices on the world's markets fell more than one-and-a-half dollars a barrel today. Trading speeded up in the final hour of an otherwise quiet day on an UNfounded rumor that Iraqi President Saddam Hussein had been overthrown. For the week, U-S crude lost a total of 11 cents a barrel and gasoline declined by less than a penny. Heating oil went up nearly three cents a gallon on the markets.

An UNsubstantiated rumor of an attempted coup in Iraq sent New York stocks climbing this afternoon. A bond rally tied to an UNexpected drop in interest rates also contributed to the gains on Wall Street. Bonds also rallied on news that inflation did NOT pick up in October. The government reported today that

producer prices, excluding the food and energy sectors, were UNchanged last month.

Arco Alaska has agreed to pay a 200-thousand-dollar fine for spilling oil on fragile tundra. Arco says it also will explore better ways of cleaning up such spills. The agreement with the state of Alaska was announced today. Up to 25-thousand gallons of crude oil spilled in August of 1989 when a pipeline valve failed near Prudhoe Bay.

The water supply in half the Latvian capital of Riga has been halted because a toxic chemical was released into a river. Latvian television says the toxic spill came from a defense factory in neighboring Byelorussia. The chemical is potassium cyanide, an extremely poisonous compound used in insecticides and metallurgy.

The Lebanese army has eight-thousand troops ready to take over and unify the divided capital at dawn. Official sources say the Leganese government WON'T hesitate to call in Syrian military help if the army meets resistance from the warring Christian and Moslem militias. The Lebanese troops plan to end more than 15 years of militia rule in Beirut.

Members of the United Nations Security Council watched a videotape today. The tape is of the Temple Mount incident in Jerusalem, which a Palestine Liberation Organization official says contradicts the Israeli assertion that Islamic religious leaders incited the violence that left 19 Palestinians dead. Israel claims rock-throwing demonstrators caused the confrontation.

The new Miss World is America's Gina Tolleson. She was judged more beautiful than 80 other women from around the world despite a bout with flu. Tolleson says her illness apparently was caused by London's inclement weather. The brown-eyed brunette from South Carolina is a student at the University of Georgia and hopes to work in broadcast journalism. She said she enjoys writing reading, gardening, tennis and tap dancing.

#90313u2218 11/09/1990 ~United Press International

DALLAS (NOV. 9) UPI - The Dallas Cowboys Friday signed former New England fullback Robert Perryman, club officials said.

Perryman, a four-year veteran from Michigan, started seven games this season for the Patriots before being released by the club on Monday.

Perryman rushed 32 times for 97 yards and a touchdown this year and caught 15 passes for 88 years with New England.

In 1989, he rushed for a career-high 562 yards and caught a career- high 29 passes for 195 yards. He was the Patriots' second-leading rusher behind Pro Bowler John Stephens the past two seasons.

New England selected Perryman in the third round of the 1987 draft.

#90313u2224 11/09/1990 ~United Press International

FORT LEWIS, Wash. (NOV. 9) UPI - Lt. Gen. Cah Waller, commander of I Corps and Fort Lewis, will temporarily assume duties as the Deputy Commander in Chief of U.S. Central Command Forward in Saudi Arabia, an Army spokesman said Friday.

The current commander in chief of American forces involved in Operation Desert Shield is Gen. H. Norman Schwarzkopf.

Waller, who will assume his new duties effective Wednesday, Nov. 14, served as Gen. Schwarzkopf's deputy commander at Fort Lewis from June 10, 1986, to July 26, 1987.

Waller's orders state that he will be gone for up to six months, after which he is expected to return to Fort Lewis, said Sam Cagle, deputy public affairs office at Fort Lewis. Waller assumed the command of Fort Lewis on Aug. 3, 1989.

The acting commander of I Corps at Fort Lewis in Waller's absence will be Maj. Gen. Thomas A. Tate, who is currently serving as the deputy commander, 2nd U.S. Army at Fort Gillem, Georgia. He was expected to arrive over the weekend.

#90313u2227 11/09/1990 ~United Press International

SAN FRANCISCO (NOV. 9) UPI - Grubb & Ellis Co., suffering from the effects of the national real estate slowdown, said Friday it would lay off 400 employees and close or franchise 15 offices.

The steps resulted in a $23.1 million third-quarter loss for the real estate company, which included a $15.3 million restructuring charge. The loss compared with a gain of $1.6 million, or 9 cents a share, in the third quarter last year.

Revenue in the third quarter slid to $81.6 million from $95.1 million in the year-earlier quarter.

For the first nine months of 1990, the company posted a net loss of $27.8 million, or $1.70 a share, on revenue of $243.1 million. That compared with net income of $163,000, or 1 cent a share, on revenue of $263.9 million in the first nine months of 1989.

The $15.3 million charge included a charge to goodwill and reserves for severance and closing costs. The company said it would reduce its workforce of 5,300 by 400 employees and salespersons in various operations nationwide.

The charge also included additional reserves for joint ventures and partnerships in the company's Texas operations.

#90313u2270 11/09/1990 ~United Press International

BREWSTER, Mass. (NOV. 9) UPI - Four dozen whales who tried to strand themselves on a Cape Cod beach were saved when aquarium workers succeeded in herding them back out to sea, officials said Friday.

The rescue is believed to be the first time anyone has been able to prevent a mass stranding of whales, said Colleen Coogan, a biologist with the National Marine Fisheries.

A local resident called the Cape Cod Aquarium last Saturday after spotting 46

whales milling around in shallow water off Paines Creek in Brewster on Cape Cod Bay, said Ian McMillan, associate director of the aquarium.

Workers from the nearby aquarium jumped into boats and began trying to herd the animals out to sea, using a variety of loud noises, McMillan said.

''It was still high tide. We were in the water in about 20 minutes,'' he said.''It was basically trying to divert them from them the beach by revving the (boat) engines, air horns and banging on the side of the boat.''

The whales tried three times to turn back to shore, but the boats managed to lead them out into deeper water, McMillan said.

Afraid the whales would try to strand themselves again, aquarium officials waited nearly a week to report the rescue. McMillan said officials now believed the whales would not try to strand themselves again.

McMillan called the successful rescue ''a question of timing'' in that aquarium workers were able to reach the animals soon after the attempted stranding and while the tide was still high.

Mass strandings of whales are not uncommon on Cape Cod, and the incidents increase in the winter, McMillan said. The largest Cape Cod stranding was in 1984, when 96 whales flung themselves on the beach in Eastham, he said. All of those animals died or were put to sleep.

The whales which tried to strand themselves in Brewster last weekend were of the pilot species, whose males can reach 25 feet in length, making them one of the smaller types of whales.

Marine biologists are not certain why whales strand themselves.

''There's a bunch of theories, from possible disease to magnetic anomalies in the Earth's crust,'' McMillan said.

#90313u2309 11/09/1990 ~United Press International

SAN FRANCISCO (NOV. 9) UPI - The San Francisco Giants Friday signed free agent pitcher Bud Black to a four-year contract.

Black, 33, played for both Cleveland and Toronto during the 1990 season, compiling a 13-11 record and a 3.57 earned-run average in 32 games.

The Giants had several pitchers go down with injuries last year and Giants' President and General Manager Al Rosen said the team was looking to strengthen its left-handed pitching in the offseason.

Black began his major league career with Seattle Mariners in 1981 before he was traded to the Kansas City Royals the following year. He spent six full seasons with the Royals, posting a career-high 17 victories in 1984.

Black has a career record of 83-82 and a 3.74 lifetime ERA.

(NOV. 9) UPI - The commander of U-S forces in Operation Desert Shield is getting help. The army says Lieutenant General Cah Waller, commander of I Corps and Fort Lewis, will be the deputy commander in chief. The commander in chief of American forces in Saudi Arabia is General H. Norman Schwarzkopf.

A New York City police source says the man who shot Rabbi Meir Kahane was taking an anti-depression drug, Prozac. There are reports Prozac touches off violent or suicidal behavior in some patients. However, the Prozac maker says clinical trials ''do NOT support a causal relationship between Prozac and violent behavior.''

The State Department WON'T comment on an allegation from former Panamanian

dictator Manuel Noriega's lawyer. He says taped phone conversations from Noriega's Miami jail were given to the U- S government, which gave them to the new Panamanian government, which in turn gave the tapes to C-N-N.

A judge has told federal prosecutors to re-write half of the counts against former Lincoln Savings and Loan owner Charles Keating. The judge in Los Angeles today said the counts fail to specify any crimes.

The Seabrook nuclear power plant in New Hampshire shut down automatically this afternoon. A tiny part in a steam generator on the non-nuclear side of the Seabrook reactor malfunctioned. Officials say there was NO risk to workers.

A recount gave the former mayor of Providence, Rhode Island... Vincent Cianci... an unbeatable lead today. But his political foes filed an objection, saying his criminal record for assaulting his wife's lover bars him from taking office.

Presidential candidates in Guatemala wound up their campaigns today. Voters will elect a new government in Guatemala Sunday. Guatemalan law forces candidates to end their campaigns 36 hours before the polls open.

Poland's six presidential candidates have scrapped plans for a nationwide televised debate. They failed to agree on the ground rules. The election in Poland will be November 25th.

The 25th anniversary of a giant blackout in the northeastern states was commemorated today. Lights outside the 15-story E-A-B Towers in Uniondale, New York, were turned off for one minute at 5:30 p-m. The 1965 blackout was caused by lightning striking a power station in Canada.

#90313u2474 11/09/1990 ~United Press International

(NOV. 9) UPI - A new assistant chief is on his way to help command the American forces in Saudi Arabia. Lieutenant General Cah Waller, commander of I Corps and Fort Lewis, will be deputy commander of Operation Desert Shield under General H. Norman Schwarzkopf. Waller's appointment was announced by the Army today, one day after the Pentagon said about 100-thousand additional G-I's will be sent to the Persian Gulf. Waller will begin his new duties Wednesday, long before the G-I's reach the gulf.

American forces are still halting ships for searches as they approach Iraq. The U-S-S Philippine Sea fired warning shots across the bow of a Sudanese-flagged cargo vessel today. American sailors boarded and searched the ship before allowing it to sail on to a port in Jordan.

The State Department says about 60 ailing American men are still being held hostage in Iraq or Kuwait. But Iraq let three more American men with medical

problems leave today. One of them was shot in the arm by Iraqi troops in Kuwait City.

The maker of the anti-depressant drug Proza... Eli Lilly... says clinical trials DON'T show Prozac causes violent behavior. But there are mounting reports Prozak may spark violent or suicidal behavior in some patients. New York City police say the man who shot Rabbi Meir Kahane was taking Proazc, once hailed as the ''wonder drug of the '90's.''

Pakistan's new prime minister, Nawaz Sharif, announced his new cabinet today. He brought back 10 officials from the regime of late military President Zia. Sharif took office Tuesday after his alliance's defeat of former prime minister Benazir Bhutto's party last month. Zia died in a mysterious plane crash two years ago and Bhutto succeeded him.

The dissident leader who helped bring down the government of Indian Prime Minister Singh will be sworn in as India's eighth prime minister tomorrow. India's president invited Chandra Shekhar today to form a new government. Shekar indicates he has enough parliamentary support to do it.

Aquarium workers in Brewster, Massachusetts, have saved four dozen whales. The whales tried to strand themselves on a Cape Cod beach... but aquarium workers herded them back out to sea. The rescue is believed to be the first time anyone has been able to prevent a mass stranding of whales. Marine biologists are NOT certain why whales strand themselves.

#90314d0120 11/10/1990 ~French/German News Agency

LOS ANGELES, (NOV 10) - Actor Marlon Brando is afraid to visit his daughter, who is recovering from a drug overdose in Tahiti, for fear that Tahitian authorities will not allow him to return to the United States to testify at his son's murder trial, a family lawyer said.

"It's an impossible decision for a father to make," said Robert Shapiro, an attorney for Mr. Brando's son Christian, who is charged with the May murder of Dag Drollet, the Tahitian lover of his half-sister Cheyenne.

Mr. Brando had planned to fly to his daughter's bedside after she was hospitalized last week for a drug overdose, but Mr. Shapiro said he had advised the actor against making the trip unless he received assurances from Tahitian authorities that he would be allowed to leave the French territory.

Mr. Shapiro said the actor had not received such assurances and was currently at his estate in Hollywood Hills.

French authorities want to question Mr. Brando about the murder of Mr. Drollet the son of a prominent Tahitian.

Cheyenne fled to Tahiti following the shooting of Mr. Drollet and later gave birth to the couple's son. She has been under a Tahitian court order not to leave the islands pending further investigation there of the murder.

The trial of Christian Brando has been indefinitely postponed by a California appeals court so it could consider prosecution requests to have Cheyenne testify at the hearing.

#90314d0140 11/10/1990 ~French/German News Agency

EASTERN SAUDI ARABIA, (NOV 10) - U.S. Marine Corps Lieutenant General Walter Boomer said Saturday that the first members of an additional Marine Expeditionary Force being sent to Saudi Arabia could begin to arrive in about two or three weeks.

Speaking at a ceremony at a Saudi port to celebrate the 215th anniversary of the Marine Corps, Lt. Gen. Boomer said the new U.S. forces to be deployed in the Gulf should "provide us with the capability to do whatever it is the president wants us to do."

The general, commander of the more than 30,000 Marines on the ground in Saudi Arabia, said that the 2nd Marine Expeditionary Force could begin to arrive in two or three weeks if it comes by ship, although some Marines were likely to be flown here.

President George Bush, in announcing he was sending significant additional forces to the Gulf region, said they would give the United States "offensive capability" in the event Iraq fails to withdraw peacefully from Kuwait.

Lt. Gen. Boomer said the possibility of an offensive would not require much new training, but only a "subtle shift."

He said the additional Marine force would probably not need any special training. "If need be, we can bring them up to speed very quickly," he said.

-30- 1460

#90314d0260 11/10/1990 ~French/German News Agency

AMMAN, (NOV 10) - Chinese Foreign Minister Qian Qichen reiterated Saturday his country's opposition to use of force in the Gulf as he met his Jordanian counterpart, Marwan al-Kassem, to discuss Iraq's invasion of Kuwait.

A Jordanian official said the two men agreed on the need to reach a negotiated solution to the Gulf crisis.

Mr. Qian later told reporters that he and his Jordanian counterpart rejected

Iraq's August 2 invasion and subsequent annexation of Kuwait.

Asked about a possible U.N. Security Council resolution on the use of force against Iraq, Mr. Qian said he could not define China's stand until the proposal was formally presented to the Security Council.

"Such a proposal can not be put forward before it has been the subject of intensive consultations and discussions," he said.

The Chinese foreign minister arrived Friday in Amman where he is expected to have talks with Jordan's King Hussein, as part of a Middle East tour devoted to the Gulf crisis.

He travels Sunday to Iraq for talks with President Saddam Hussein.

"I am not carrying any peace plan and I am not a mediator," Mr. Qian said here Friday. He has also been to Saudi Arabia and Egypt.

-30- 1399

#90314d0440 11/10/1990 ~French/German News Agency

RIYADH, (NOV 10) - Iraq's ruling Baath Party is using 23 billion dollars deposited in Swiss bank accounts to counter the international trade embargo since the invasion of Kuwait, an Iraqi opposition figure charged Saturday.

Saad Salah Jabr, quoted by the Saudi newspaper Asharq al-Awsat, said the funds were held in bank accounts under the names of foreign companies and non-Iraqi nationals.

"These funds are used as a principal source of financing for commercial transactions, carried out by third parties, on behalf of (Iraqi president) Saddam Hussein," the liberal opposition leader said.

The Iraqi Baath Party has taken five per cent of Iraq's oil revenues since the industry was nationalized in 1972, he said.

#90314d1820 11/10/1990 ~French/German News Agency
ANKARA, (NOV 10) - Turkey called on Iraq on Saturday to withdraw from Kuwait unconditionally "before it is too late".

Iraq should "move in the right direction before it is too late", Foreign Minister Kurtcebe Alpemocin said in a budget debate before parliament.

Mr. Alpemocin would not say whether Turkish troops would cross Iraq's northern border if allied troops massed in Saudi Arabia used force against Iraq on what would be the southern front.

He said that Turkey's action in the three-month Gulf crisis triggered by Iraq's invasion of Kuwait was aimed at discouraging "adventurous and dangerous" behaviour.

"Tensions created in the region by Iraq's invasion of Kuwait will not ease for a long time", the foreign minister said, adding that a withdrawal from Kuwait was not enough to restore lasting peace.

"We must also ensure that this will not happen again", he said.

Mr. Alpemocin said one measure to restore peace was to forego concessions to Iraq.

The United Nations Security Council has repeatedly called for unconditional Iraqi withdrawal from Kuwait.

#90314d2010 11/10/1990 ~French/German News Agency
BOMBAY, INDIA (NOV 10) - Chandra Shekhar, the new Indian prime minister, is something of a mystery to the country's businessmen, which explains some of the wobbles in the Indian stock market this week.

In the four days of trading on the Bombay Stock Exchange (BSE) -- Tuesday was a holiday -- the sensitivity index had moved up 84 points by Thursday and then fell 19 points Friday when Mr. Shekhar, 63, appeared certain to take over.

Overall the sensitivity index gained 69 points through the week to close at 1,392.5 Friday, while the national index, fuelled by early speculation that former premier Rajiv Gandhi might return to power in Delhi, gained 32 points to close at 686.9.

Mr. Shekhar, a socialist, has consistently railed against big business, but is also close to some of India's largest industrial houses.

He is reputed to have once said that all industrial investments above half a

million dollars should be made only in the public sector.

The business community is also wary because it will have to contend with another heavyweight avowedly against big business, deputy prime minister Devi Lal, who for years has advocated a move away from large induistries towards small village-oriented cottage industries.

But Chandra Shekhar's aides say that the prime minister has changed over the years and that he has many surprises up his sleeve for Indian business.

"He even wants to sell off some of India's public sector companies," says Kamal Morarka, a Bombay industrialist who is one of Mr. Shekhar's closest advisors.

#90314d2060 11/10/1990 ~French/German News Agency
NDJAMENA, (NOV 10) - Sudan-based troops of the Libyan Islamic Legion launched a violent attack against Chad early Saturday, officials said here in a communique.

Heavy fighting continued in the Tina region on the Chadian-Sudanese border, they added.

The government called on its people to "rise and crush the aggressor".

Decrying Libyan and Sudanese "duplicity" and a "will to destabilize", the communique said "hordes of mercenaries from the Sudanese province of Darfur were heavily and massively equipped".

Fighting erupted on the Chadian-Sudanese border late last year and last March and April, with Chadian government troops retaliating at targets more than 300 kilometres (180 miles) inside Sudan.

Chad has accused Libya of arming and training the Libyan Islamic Legion with assistance by Sudan, but Tripoli has said that Chadian government troops in fact clashed with maverick troops of former Chadian chief-of-staff Idriss Deby.

The Chadian government held Libya and Sudan "entirely" responsible for Saturday's attack and said it would use "all means to defend the integrity of the national territory".

Chadian and Libyan officials met in Tripoli last month to try to settle a longstanding dispute involving the Aouzou strip which is claimed by Libya.

#90314d2130 11/10/1990 ~French/German News Agency

BELFAST, (NOV 10) - Four men, including two policemen, were shot to death Saturday at a lake near Lurgan in southern Ulster in an attack in the style of the Irish Republic Army (IRA), police said.

The attack has not been claimed, however.

The four men had been duck-hunting on Lough Neagh, a large lake west of here.

The police victims were an inspector and a reservist of the Royal Ulster Constabulary. The two civilians had no connection with security duties.

A search party was sent out when the hunters failed to return home as scheduled. Their bodies were found in the afternoon at Lough Neagh lake.

Three of the victims were under a car. The fourth was laying near the vehicle.

Another car, which police suspect was used in the attack, was found burned near a neighboring village.

According to the British Press Association agency, 70 people have been assassinated this year in northern Ireland, including 11 from the RUC.

The report came after a bomb exploded in a bus here after passengers had been evacuated.

The driver asked passengers to get off the bus in the city centre after a passenger noted a suspicious parcel. He then drove the bus to a vacant area.

The bomb went off a few minutes later, gutting the bus but causing no casualties.

#90314d2340 11/10/1990 ~French/German News Agency

WARSAW, (NOV 10) - The Polish government will seek a stable rate of the zloty against the dollar and other leading western currencies next year, Finance Minister Leszek Balcerowicz said here Saturday.

Polish companies "can rely on the compliance with the basic principle of a stable currency rate", the minister said.

The zloty rate was set at 9,500 for a dollar on January 1 and has only varied by two per cent at any given time.

Owing to the excellent performance of the Polish currency, Warsaw did not have to draw from a one-billion dollar stabilizing fund set up by Western nations to help avert depreciation of the national currency.

Due to a substantial drop in imports, the export surplus was expected to total nearly four billion dollars by the end of the year.

Poland will gradually introduce a value-added tax for some industrial products starting January 1.

All consumer goods will be taxed by July, Mr. Balcerowicz said.

-30- 1150

#90314d2430 11/10/1990 ~French/German News Agency

JOHANNESBURG, (NOV 10) - South African Foreign Minister Pik Botha is to visit Prague this week to prepare the way for probable diplomatic relations with Czechoslovakia, the Johannesburg Star newspaper reported in its Sunday edition.

Quoting diplomatic sources, the report said Mr. Botha would fly to Prague after addressing the Hans Seidel Foundation in Munich, Germany.

The visit will further develop South Africa's rapidly-growing trade and diplomatic links with eastern bloc countries.

Pretoria has already established low-level diplomatic relations with Hungary and Poland and has set up formal trade links with Romania.

The most visible sign of the success of South Africa's diplomatic forays into Eastern Europe is a giant trade fair currently being held in Pretoria by over 100 Polish exporters, the first trade fair ever in South Africa by an eastern bloc country.

The new friendship with eastern and central European countries has been made possible by the collapse of communism and President Frederik de Klerk's far-reaching race reforms.

#90314d2520 11/10/1990 ~French/German News Agency

LISBON, (NOV 10) - Two Portuguese hostages arrived here Saturday via Amman, Jordan, a day after they were freed by Iraq.

Albano Fernandes and Manuel Santos were employed as workers by an Italian company and were allowed to leave Iraq when their contracts expired.

Their arrival was shown Saturday on television here.

A third Portuguese national left Iraq Friday with a group of German hostages freed during a visit by former German chancellor Willy Brandt.

Iraq still holds seven Portuguese among some 3,500 other nationals since it

invaded Kuwait last August.

SPEYER, GERMANY, (NOV 10) - Soviet President Mikhail Gorbachev wrapped up a successful two-day visit to Germany by a private stopover to the western Rheinland Palatinate, where he shook hands with cheering onlookers.

Plain-clothes security guards watched nervously as the beaming Nobel laureate deviated from the sightseeing schedule to this ancient cathedral city and plunged into the crowd of 10,000, with the giant figure of Chancellor Helmut Kohl in his wake.

The trip to Mr. Kohl's home region, followed by a private lunch with their wives and then a tete-a-tete at the chancellor's bungalow at nearby Oggersheim, signalled the bond that has developed between the two leaders.

On Friday, they signed a non-aggression treaty that declares an end to all conflict between the two World War foes. Their economy ministers also sealed a cooperation accord that Moscow hopes will pump Deutsche mark investment into the sickly Soviet economy.

But there were no signs that Mr. Kohl's government would yield to Soviet pressure to step up financial aid that, in this year of German unification, has already reached more than 20 billion marks (13.3 billion dollars).

NEW DELHI, (NOV 10) - A hijacked Thai Airways plane with an unspecified number of passengers on board landed in the eastern Indian city of Calcutta Saturday, the Press Trust of India (PTI) said.

Citing unnamed official sources in a brief despatch from Calcutta, the news agency said the identity of the hijackers or their number could not be ascertained.

A Thai Airways International employee in New Delhi said the airline was waiting for "some information" on the reported hijack. He said staff here were trying to reach their Calcutta office.

The plane was on a flight from Bangkok to Rangoon when it was hijacked, PTI said.

The plane's pilot repeatedly made the sign "H" with his fingers to security personnel, who threw a cordon around the aircraft, PTI said.

The hijackers warned security men not to get close to the plane, it said.

Jyoti Basu, the chief minister of West Bengal state which administers Calcutta was informed of the hijack and security measures were tightened, it added.

A passenger suspected to be the leader of the hijackers wanted to speak with the ambassador of either Burma or Thailand or an Indian government representative, PTI said in a later despatch.

Armed and wearing a red headband, he was pacing up and down the aisle of the hijacked Airbus A-320, it said.

A special commando force was deployed and the Calcutta airport control tower was in touch with the plane's pilot, PTI said.

TEHERAN, (NOV 10) - Turkish President Turgut Ozal arrived here Saturday for talks with his Iranian counterpart Ali Akbar Hashemi Rafsanjani on the Gulf crisis, the news agency IRNA reported.

Mr. Ozal was greeted at Mehrabad airport by President Rafsanjani and Foreign Minister Ali Akbar Velayati.

IRNA said the Turkish president would leave Sunday for Tokyo to attend the enthronement Monday of Emperor Akihito.

RIYADH, (NOV 10) - The six-nation Gulf Cooperation Council (GCC) will hold its next annual summit in the Qatari capital of Doha on December 22, the GCC's secretary general said here Saturday.

Abdallah Yacoub Bishara, who is a Kuwaiti, told Agence France-Presse that the summit would be dominated by the Gulf crisis and efforts to end the Iraqi occupation of his country.

The situation in the Gulf was moving "toward a military confrontation," he said, adding that GCC states "cannot wait a long time for the international embargo against Iraq to have effects."

Apart from Kuwait and Qatar, the GCC also groups Bahrain, Oman, Saudi Arabia and the United Arab Emirates. The organisation, founded in May 1981, held its last summit in Oman in December 1989.

Foreign ministers of the six Gulf countries are to meet on November 24 in Doha

to prepare the agenda for the coming conference of heads of state, Mr. Bishara said.

#90314u0073 11/10/1990 ~United Press International

BARTLETT, IL. (NOV. 10) UPI - The ringing telephone got to federal agents searching a suburban Chicago apartment for drug evidence, so they picked it up. The parties on both ends got more than they bargained for.

Agents from the U.S. Treasury Department's Bureau of Alcohol, Tobacco and Firearms left the apartment with 6 ounces of cocaine and $400 cash. What they didn't expect, however, were the arrests of three men who unwittingly placed their drug orders with the agents.

''This happens every once in a while, but to get five arrests at something like this is very unusual,'' said ATF spokesman Jerry Singer. ''We went in there with the intention of getting evidence for putting a federal court case together.''

In addition to the two men who shared the apartment, agents arrested three other men who called, then came over to the apartment looking for drugs. Ten others who either knocked on the door during the operation or were hanging out in the parking lot were detained.

#90314u0086 11/10/1990 ~United Press International

(NOV. 10) UPI - An official traveling with Secretary of State Baker says the Soviets are NO more optimistic than the Americans that the Persian Gulf crisis can be resolved without force. Baker is in Paris... planning to meet with NATO Secretary General Manfred Woerner Saturday to discuss the situation in the

gulf. Baker and Woerner also will discuss East-West relations.

Freedom National Bank in New York City has been shut down. The Federal Deposit Insurance Corporation closed it for insolvency. Mayor David Dinkins says Freedom National is the nation's largest minority- owned bank. Dinkins says the city had about 300-thousand-dollars in the bank, and the finance commissioner assured him the money was protected.

The nation's only black governor... Virginia's L. Douglas Wilder... is taking the first formal step toward running for president in 1992. Wilder created a campaign committee to explore his chances for higher office. Wilder is a one-time liberal who has moved right over the years to woo moderates.

Ireland has its first woman president. Mary Robinson is the seventh president for Ireland. She's a leftist who says she will extend ''a hand of friendship'' to Northern Ireland. Officials say Robinson handily defeated former Deputy Prime Minister Brian Lenihan.

Washington is going to get a new one-thousand-bed prison. The federal government announced plans to build the prison within sight of the Capitol dome. It's designed to help relieve overcrowding in the District of Columbia jail, which currently holds about 400 federal prisoners.

Environmental officials in Singapore have banned the import and manufacture of non-pharmaceutical aerosol products containing controlled chloro-fluorocarbons. Officials say they are trying to preserve ''the well-being of Mother Earth.''

Federal agents were searching a suburban Chicago apartment for drugs when they answered a ringing phone. The callers were trying to place orders for drugs. As a result, police left the apartment in Bartlett with six ounces of cocaine, 400 dollars and five men in custody.

Insomnia is almost epidemic in a residence hall at the University of Michigan in Ann Arbor. A four-foot snake named ''Dog'' is loose in the Couzens Residence Hall. The non-poisonous python belonging to two residents of the dorm slithered its way into the heating system last week.

-30- 2545

#90314u0092 11/10/1990 ~United Press International

(NOV. 10) UPI - British Prime Minister Margaret Thatcher declared military action is inevitable unless Iraq withdraws its invasion forces from Kuwait, and Iraq's president said he saw no signs of a peaceful solution to the gulf crisis.

Also Friday, the United Nations rejected an Iraqi request to discuss the presence of U.S. troops in the gulf region. Iraq, meanwhile, reiterated its

threat to destroy the oil fields in Kuwait and Saudi Arabia.

The U.N. General Assembly's Committee rejected Iraq's request a day after President Bush ordered another 150,000 U.S. troops to Middle East, bringing the total American ground forces to nearly 400,000 by early next year.

Thomas Pickering, U.S. Ambassador to the United Nations, said the Iraqi request ''distorts the truth, defies the Security Council and undercuts the Council.''

In Tehran, Iranian President Hojatoleslam Ali-Akbar Hashemi Rafsanjani said at Friday prayers he saw no signs of a peaceful solution to the crisis and called on Iraq to withdraw from Kuwait.

Rafsanjani repeated his concern that ''war may break out in the region'' and that ''there are no signs of a peaceful solution'' to the 3-month-old standoff.

Tehran Radio, monitored in Athens, quoted Rafsanjani as telling worshipers the presence of Iraqi troops in Kuwait was ''bringing major losses to the region, including the presence of foreign forces in the Persian Gulf.''

Despite Iraq's recent decision to capitulate to Iran's demands for a comprehensive peace settlement to their 1980-88, Rafsanjani pledged not to violate U.N. sanctions against Baghdad.

In London, Secretary of State James Baker met Friday with British Prime Minister Margaret Thatcher and Foreign Secretary Douglas Hurd as he neared the end of a seven-day, eight-nation Mideast-European tour to seek a mandate for the use of military force against Iraq.

Thatcher declared the ''military option'' will be used if Iraq does not withdraw from Kuwait. ''The peaceful solution would be for Iraq to get out of Kuwait. That is a matter for them. We hope they will do it. If not, we will have to take the military option and see that Iraq does leave Kuwait.''

Baker was to meet with NATO Secretary-General Manfred Woerner on Saturday in Paris to discuss the gulf situation, among other issues, the NATO press service said.

In Baghdad, Iraq reiterated its threat to destroy vital oil facilities in Kuwait and Saudi Arabia if attacked by the U.S.-led multinational force. It also said the region is on ''the brink'' of ''aid

Bush fueled speculation late Thursday that the United States is preparing for war by announcing he would send more troops to the region.

His announcement came as the Soviet Union toughened its stance when Foreign Minister Eduard Shevardnadze conceded that military force may be necessary to

liberate Kuwait.

The official Iraqi news agency, INA, quoted official newspapers as saying the gulf region is ''on the brink of a destructive war if Washington will take the risk of a military operation against Iraq.''

''The price of aggression on Iraq would be high and oil would be part of the price,'' INA said, quoting one newspaper as saying Iraqi troops would ''destroy the oil resources for which the Americans had come to plunder and control.''

Saudi Arabia, which contains about 25 percent of the world's known oil reserves, produces 8.2 million barrels of crude a day, most of it sent to the United States, Western Europe and Japan. Kuwait, prior to the Aug. 2 invasion, produced 1.5 million barrels a day.

INA also reported that Iraqi President Saddam Hussein met with an envoy from Cuban President Fidel Castro, who called for a peaceful settlement of the crisis.

The news agency quoted Iraqi officials as denying that Iraq is importing large amounts of medicine in response to an accusation by a U.N. official that Baghdad intended to use the medicine to make biological weapons.

#90314u0104 11/10/1990 ~United Press International
(NOV. 10) UPI - Defensive specialist Jan Erixon took an offensive role Friday night in helping the New York Rangers stretch their Patrick Division lead with a 3-2 victory over the New Jersey Devils.

Erixon scored a goal and added two assists in New York's three-goal first period. The win improved the Rangers to 13-6 and expanded their lead over second-place Washington to six points.

New York goalie John Vanbiesbrouck stopped 37 shots. John MacLean scored both goals for New Jersey, which suffered its fourth loss in five games.

Erixon's performance indicated that he has recovered from offseason back surgery, which had hampered him for the last three years.

''My strength has returned and I know where my linemates will be on the ice,'' Erixon said. ''Hockey is fun again.''

Erixon, normally assigned to the opposition's high scorer in a checking role, gave the Rangers a 1-0 lead at 4:41 of the first. He beat goaltender Chris Terreri with a 10-footer on his stick side after a rush with Brian Leetch and Mark Janssens.

Erixon then set up Darren Turcotte with a 15-footer in the slot at 13:28, giving the Rangers a 2-0 lead. Turcotte beat Terreri with a shot just under the crossbar.

With less than two minutes left in the period, Erixon and Turcotte set up defenseman James Patrick with a 15-footer that eluded Terreri on his far side, extending the Rangers lead to 3-0.

''A healthy Jan Erixon is a new dimension for this club, one I welcome very much,'' said Rangers coach Roger Neilson. ''He really played well tonight and the puck did what he wanted.''

New Jersey drew within 3-1 22 seconds into the second period when MacLean punched the punk into an open net behind goalie John Vanbiesbrouck. Kirk Muller started the play and Peter Stastny hit MacLean with a goal mouth pass.

MacLean got the Devils within 3-2 with his ninth goal of the season with 25 seconds left in the game. He backhanded the rebound of a point shot by Brendan Shanahan past Vanbiesbrouck.

''Our second goal was a rookie mistake by Jon Morris, and the third goal we got caught on,'' said Devils coach John Cunniff. ''Chris Terreri played well after the first period. I'm not disappointed with the effort we showed, we could have won.''

Elsewhere, Buffalo routed Vancouver 7-1 and Winnipeg edged Hartford 5-4.

Sabres 7, Canucks 1

At Buffalo, N.Y., Donald Audette and Dave Andreychuk each had two goals and an assist, powering Buffalo to a 7-1 victory over Vancouver. Doug Bodger added a goal and two assists to help the Sabres improve to 6-6-4 on the season. Buffalo is 6-2-2 in its last 10 games.

Jets 5, Whalers 4

At Winnipeg, Scott Arniel, Thomas Steen and Greg Paslawski each had a goal and an assist to lead Winnipeg to a 5-4 victory over Hartford. The loss stretched the Whalers' winless sreak to eight games, 0-7-1. Winnipeg was outshot 37-20.

#90314u0137 11/10/1990 ~United Press International

(NOV. 10) UPI - One of Secretary of State Baker's traveling companions says Baker is convinced the gulf allies will fight alongside G-I's if war is declared against Iraq. Baker surveyed opinion in the Middle East before flying to Europe to do more of the same. He's in Paris now, planning to meet with NATO Secretary General Manfred Woerner Saturday. Paris is the seventh stop on Baker's itinerary.

Men fired two grenades at the U-S Embassy compound in Manila Saturday. But officials say NO one was hurt and NOthing was damaged. U-S Embassy spokesman

Stanley Schrager says one of the grenades apparently fired from an M-16 rifle missed the embassy compound and fell into Manila Bay, where it exploded harmlessly. Schrager says another grenade fell on the driveway leading to the chancery, but did NOT explode.

The anti-depressant once hailed as the ''wonder drug of the '90's''... Prozac... is being questioned in the assassination of Rabbi Meir Kahane. A New York City police source says the Egyptian-born Moslem suspected of killing the founder of the Jewish Defense League had been taking Prozac. Eli Lilly, which makes the drug, says clinical trials DON'T show any evidence Prozac causes violent behavior.

The first anniversary of the collapse of the Berlin Wall was much more subdued than that day itself. The reason- the wall is gone. Officials On Friday laid the cornerstone of a memorial to the 77 people who were shot while trying to cross the wall between 1961 and last year. They also unveiled a bronze plaque commemorating the opening of the wall.

Former President Reagan stood beside chunks of the Berlin Wall in Fulton, Missouri, Friday. Winston Churchill's granddaughter created a sculpture out of the concrete. The sculpture is on the site of Churchill's 1946 ''Iron Curtain'' speech at Westminster College. Reagan praised Soviet President Gorbachev for his work in breaking down the barriers between East and West.

Church leaders in Alaska have reached an agreement with Soviet officials to build the first religious center in Magadan, a regional capital in the Soviet Far East. The archbishop of Anchorage, Francis Hurley, says the significance is the expression of openness in the Soviet Union and the Soviet people's interest in religion. The center will be ecumenical.

Lawmakers in Singapore have united behind a government crusade to ensure religious harmony. They passed legislation providing fines up to 10-thousand dollars and prison sentences for up to two years for people who create tension among members of different faiths. Clergymen say the law may stifle dissent. Opposition politicians charge it's a step towards a totalitarian state.

#90314u0176 11/10/1990 ~United Press International

(NOV. 9) UPI - The Portland Trail Blazers have a new weapon this season in their attempt to wrest the NBA title from the Detroit Pistons: Danny Ainge.

Ainge, traded by the Sacramento Kings to the Trail Blazers in August, came off the bench and scored 15 points and had three steals, helping Portland to a 113-101 victory Friday night over the Pistons.

The Trail Blazers recorded their 21st straight, regular season victory over the Pistons, whom they lost to in five games in the NBA Finals last season. Detroit won three straight games in Portland to capture the title.

But Portland added the 6-foot-5 Ainge, who entered his 10th NBA season averaging 12.4 points per game.

''Danny Ainge makes Portland a much deeper team,'' Detroit's Joe Dumars said.''He's a championship player and a respected backcourt player in this league. They were a good team anyway and he just adds to that.''

Terry Porter scored 28 points and Kevin Duckworth added 27 to keep Portland undefeated (4-0) this season.

''I didn't have to be sold on the idea that Portland was a great team, but now they have even more weapons,'' Detroit's Vinnie Johnson said. ''Danny Ainge brings a lot of experience and a lot of leadership to this club. He's got that championship quality.''

Portland appeared to have the game under control when they took an 89-68 lead into the fourth period.

But Detroit opened the quarter with a 12-3 run, with all 12 points coming on Johnson's four 3-pointers - a team record for one quarter. The last of Johnson's long-range bombs cut Portland's lead to 92-80.

The Pistons drew to within 104-95 with 3:50 left on a Joe Dumars' fast-break basket. But that was the closest Detroit could get.

''This was a tremendous win,'' Portland Coach Rick Adelman said. ''The first three periods were as good as we can be defensively. We were so active and it set the tone for the game.''

Elsewhere in the NBA, Chicago routed Boston 120-100, Milwaukee defeated Washington 108-100, Indiana iced Cleveland 122-107, Minnesota trampled Charlotte 106-77, Dallas defeated Orlando 111-99, Seattle slipped by Denver 135-129, the LA Lakers beat Sacramento 100-86, and Golden State outlasted Atlanta 143-128.

Bulls 120, Celtics 100

At Boston, Michael Jordan scored 25 of his 41 points in the second half and Chicago handed the Celtics their first loss of the season.

Bucks 108, Bullets 100

At Landover, Md., Ricky Pierce scored 25 points and Jay Humphries added 24 - 20 in the first half - to pace Milwaukee to its fourth straight victory sincesuffering a season-opening defeat.

Pacers 122, Cavaliers 107

At Indianapolis, Reggie Miller scored 27 points, 12 of them in the fourth quarter, to spark Indiana. Craig Ehlo led the Cavaliers with 21 points.

Timberwolves 106, Hornets 77

At Minneapolis, Tony Campbell scored 26 points and Minnesota snapped a three-game losing streak. The margin of victory was the largest in the Timberwolves' two-year history.

Mavericks 111, Magic 99

At Dallas, Rolando Blackman's 34 points helped rally Dallas over winless Orlando on a night in which the Mavericks lost two players to knee injuries. In the first quarter, forward Roy Tarpley collapsed on a rebound attempt with what was diagnosed as a slipped kneecap. The kneecap was popped back in place after Tarpley was carried to the locker room, but team doctor Pat Evans said the 7-foot forward would be lost for at least two weeks. Prior to the game it was decided guard Fat Lever would have to undergo arthroscopic surgery on his right knee next week, which will keep him out of action for three to six weeks.

Super Sonics 135, Nuggets 129

At Denver, Xavier McDaniel scored 27 points and Dana Barros contributed 21 off the bench to lead Seattle to its first victory over the Nuggets in the regular season since Nov. 30, 1985. Denver dropped to 0-5 under new Coach Paul Westhead.

Lakers 100, Kings 86

At Inglewood, Calif., Magic Johnson scored 25 points to lead the Lakers to their first victory of the season and keep Sacramento winless. James Worthy contributed 18 points and Vlade Divac pulled down a career- high 16 rebounds for the Lakers, who recorded their 42nd consecutive victory over the Kings at home, including two playoff games.

Warriors 143, Hawks 128

At Oakland, Calif., Chris Mullin scored 40 points to help Golden State hand Atlanta its first loss of the season. Mullin made 14 of 17 field goal attempts and was 12 of 15 from the free-throw line. He scored eight points during a 15-4 third-quarter run that helped the Warriors turn an 81-71 deficit into an 86-85 advantage.

#90314u0188 11/10/1990 ~United Press International

(NOV. 10) UPI - Around the world... around the clock... the latest news from U-P-I.

Kuwait's allies see NO way to get Iraq out of the occupied country without war. Iran's president said at prayers he saw NO signs of a peaceful solution. Iraq also said the region is on ''the brink'' of war.'' One of Secretary of State Baker's traveling companions said Soviet leaders are NO more optimistic than U-S officials that war can be avoided.

Baker is in Paris today... meeting with NATO Secretary General Manfred Woerner to discuss both the Persian Gulf and East- West relations.

The U-S Embassy in the Philippine capital was attacked today for the second time in 11 months. Two grenades were fired at the seaside embassy in Manila. But one missed the compound and the other grenade failed to explode. NO one was hurt... and NO damage was done.

The grenade attack occurred one day after the Philippines and the United States adjourned a second round of talks on the future of six U-S military bases.

Dissident leader Chandra Shekhar was sworn in as India's eighth prime minister today... three days after the resignation of the man he helped run out of office. Shekhar replaced V.P. Singh, who lost a parliamentary vote of confidence and resigned. Shekhar's deputy is a man Singh fired from the same job.

Lebanese army troops are fanning out over the Beirut area today... trying to end more than 15 years of militia rule. The Lebanese army wants to take the capital away from two warring militias- Christian and Moslem. Officials hope to have a unified and militia-free Beirut by November 19th.

The Chicago River had more than a few fish in it for awhile yesterday. An alleged bank robber threw about one-thousand dollars into the river as he tried to flee from police. A Citibank teller was held up. Police recovered about four-thousand dollars. But they are NOT sure they got all the money out of the river.

#90314u0197 11/10/1990 ~United Press International

SPEYER, GERMANY (NOV. 10) UPI - Several thousand people, waving banners and chanting ''Gorby, Gorby'' gave Soviet leader Mikhail Gorbachev a rousing welcome Saturday as he walked across the picturesque town square of Speyer to visit a 1,000 year-old cathedral.

''He's a great guy. He's made unification possible,'' said Heiner Grussrat, 74 who had stood for hours crushed in the tightly-packed crowd to catch a glimpse of the Soviet leader.

Heavy police protection was in evidence throughout the small central German town as a smiling, laughing Gorbachev walked across the square with German Chancellor Helmut Kohl after alighting from an armored bus.

The cathedral bells rang out at 1 p.m. as the officials waved to the enthusiastic crowd before entering the Romanesque building to view the tombs of eight German kings and emperors.

''It looks like he is more popular here than back home,'' said Grussrat, in reference to Gorbachev's sinking support in the Soviet Union, which is beset

by growing economic troubles.

A woman among the 2,000 to 3,000 people in the square held a banner bearing the words, in Russian, ''We wish you good health and all the best''.

''I think he needs it,'' said Monika Bauer, 47, pointing at her banner.

In a lone protest, one man held a Soviet flag with the hammer and sickle crossed out.

After visiting the cathedral, Gorbachev and his wife, Raisa, were due to travel to nearby Deidesheim, for a lunch that will feature Kohl's favorite dish of saumagen - stuffed pig's stomach.

In a somewhat obscure protest, presumably organized by an animal right's group two small aircraft circled over the square before Gorbachev's arrival, trailing banners that read ''Gorbynyet: Kohl's Saumagen'' and ''Love animals, don't eat them.''

The Gorbachev's are also due to visit Kohl's Oggersheim home in the Rhineland-Palatinate state, before flying back to the Soviet Union Saturday evening.

Friday, the two men signed a cooperation treaty that formalizes the new relationship between the Soviet Union and Germany that emerged during the past year of dramatic change.

''We have given up the Cold War as an instrument for the resolution of international problems and are now looking for a new instrument,'' Gorbachev told a news conference.

Speaking after the signing, Gorbachev said, ''We see a new role to be played by our two states in the restructuring of international relations - but there are also great dangers every time you turn around human relations.''

Kohl described Gorbachev's visit, which coincided with celebrations marking the first anniversary of the Nov. 9, 1989, opening of the Berlin Wall, as ''a milestone in the relations between our two people.''

Although Gorbachev is not expected to directly seek any German credits, economic relations and German assistance to the Soviet program of economic changes are the main focus of the visit.

Gorbachev thanked Kohl for urging Germans to consider Soviet troops stationed in eastern Germany as ''a friendly force.''

The 380,000 troops are to leave former East Germany within four years and it was not immediately clear whether the two leaders discussed the possibility of

speeding up the process as anticipated.

#90314u0215 11/10/1990 ~United Press International

MANILA, PHILIPPINES (NOV. 10) UPI - Attackers fired grenades at the U.S. Embassy and gunmen ambushed and killed three policemen in separate incidents Saturday on the eve of President Corazon Aquino's departure for Tokyo, authorities said.

Armed forces chief Gen. Renato de Villa placed the 159,000 troops on red alert - the maximum state of preparedness - on the eve of Aquino's departure Sunday to attend the enthronement of Emperor Akihito.

Aquino, who has crushed seven rebellions, has shrugged off threats of another coup attempt to fly to Tokyo as a gesture of gratitude for Japan's economic aid to her debt-strapped government.

U.S. Embassy spokesman Stanley Schrager said about 6:50 a.m. Saturday, two

grenades were fired at the U.S. Embassy, apparently by someone riding in a passing vehicle. One grenade fell into Manila Bay behind the embassy and exploded harmlessly, while another landed on a driveway but did not explode.

No one has claimed responsibility for the attack a day after the Philippines and the United States adjourned a second round of talks on the future of six U.S. military bases in the country.

Special U.S. negotiator Richard Armitage left Friday after the two- day talks on the bases, whose lease is due to expire on Sept. 16, 1991.

The communist New People's Army opposes a renewal of American basing rights and has vowed to attack Americans unless Washington withdraws its 14,500 servicemen from the Philippines.

Schrager refused to speculate on who might be behind Saturday's attack, the second attack on an embassy property in 11 months. Last December, two rifle-fired grenades hit the embassy's Seafront Compound, a housing and recreation center about a mile from the main embassy compound along Roxas boulevard. Schrager said it was presumed communist guerrillas were behind the December attack, but this had not been established.

Saturday evening, Philippine authorities said five men firing assault rifles from a four-wheel-drive vehicle killed three policemen in their patrol car in suburban Mandaluyong town. Two bystanders were wounded, police said.

Mandaluyong Mayor Benjamin Abalos said the attackers' vehicle came alongside the patrol car and peppered it with gunfire. Abalos said the assailants got out and kept firing at the police car before taking the policemen's guns and speeding away.

He said a passing police car chased the attackers and fired at them. The attackers' vehicle was found later with bloodstains inside.

It was not clear if the two incidents Saturday were related, but authorities said the violence signaled an attempt either by leftist or rightist rebels to destabilize the government during Aquino's two-day absence.

More than 40 bombings have hit the capital since Aug. 13. The incidents were blamed on rebel soldiers who have tried seven times to oust Aquino.

Friday night, two people were wounded when a bomb rocked the China Airlines office in Manila's downtown China Town.

CALCUTTA, IN (NOV. 10) UPI - A Thai Airways Airbus jet on a flight from the

Burmese capital city of Rangoon to Bangkok was hijacked Saturday and landed in the eastern Indian city of Calcutta, airport officials said.

Hijackers threatened to blow up the plane if anyone approached it, officials said. A tight security cordon was erected around the plane, which had more than 200 passengers on board, they said.

The hijackers took control of the Thai Airways Airbus as it was enroute from Rangoon to Bangkok, forcing the aircraft captain to India, where the plane landed at about 3:45 p.m. at Dum Dum airport in the West Bengal state capital city of Calcutta.

The Press Trust of India news agency said one of the hijackers, apparently the group's leader, wanted to speak to Burmese and Thai diplomats or with Indian government officials.

It said the pilot of the aircraft used his fingers to make the sign of an ''H'' to Calcutta airport security officials, who erected a security cordon around the plane.

No further details were immediately available, including the number of hijackers or their identity.

TOKYO (NOV. 10) UPI - Lenny Dykstra blasted a solo homer and Dave Stewart pitched a seven-hitter over seven innings Saturday, pacing a team of U.S. All-Stars to a 3-2 victory over Japanese All-Stars.

The U.S. major leagues stand 2-4-1 against Japanese teams in an eight-day Super Major Series. The final game is scheduled for Sunday at the Tokyo Dome.

Ken Griffey Jr. singled and scored the game-winning run in the eighth on reliever Kasuhiko Daimon's wild pitche.

Cecil Fielder, who played in Japan before joining the Detroit Tigers this year scored the first run on shortstop Takahito Ikeyam's throwing error in the fourth inning.

Dykstra's fifth-inning homer made it 2-0, but the Japanese tied it in the seventh on RBI hits by Atsuya Furuta and Koki Akiyama.

(NOV. 10) UPI - Portions of central Florida cleaned up Saturday from thunderstorms and tornadoes that damaged mobile homes and businesses, while

much of the area east of the Mississippi was plagued with heavy rain and lcoal flooding, the National Weather Service reported.

High winds were a problem in the high country of the Northwest.

Tornadoes touchdown Friday evening south of Sebring, Fla., damaging mobile homes, a dozen automobiles and commercial buildings. One person was slightly hurt.

Twisters downed power lines, trees and some buildings at Maitland and Sanford, Fla., injuring at least nine people, one of them seriously enough to warrant hospitalization. Another twister touched down near Daytona Beach.Rainwater was waist-high in Jacksonville, Fla.

Flood watches and warnings were raised for the mountains of northeastern Georgia, southwestern Virginia, portions of Pennslvyania, New Jersey, New York New Hampshire and much of Maine. A flood warning remained over western Washington

Rain also spread through Alabama, Mississippi, Tennessee, North and South Carolina, Maryland, West Virginia, Indiana and Ohio. It rained in lower Michigan, southern North Dakota and the Idaho Panhandle.

High wind warnings prevailed Friday in the high country of western Washington, eastern Montana, northeastern Wyoming and the foothills of Colorado.

#90314u0248 11/10/1990 ~United Press International
(NOV. 10) UPI - Secretary of State James Baker, finishing a foreign tour seeking a mandate for use of force against Iraq, met with French President Francois Mitterrand Saturday and affirmed the alliance against Iraq remained strong. Baghdad meanwhile slammed Baker as a warmonger.

Iraqi Foreign Minister Tariq Aziz, speaking at the end of Baker's eight-nation seven-day tour, also accused Baker of failing to raise the Palestinian issue during his Middle East-European tour, and slammed Washington for doing nothing to defend Lebanese sovereignty from Syrian intervention.

''Baker showed his true colors as a warmonger during his shuttle visits,'' Baghdad Radio quoted Aziz as saying. ''During these visits, he never once mentioned the numerous U.N. Security Council resolutions calling on Israel to withdraw from Arab lands.''

Aziz noted President Bush has said he is sending more troops for offensive purposes as part of the U.S.-led international force deployed in the Persian Gulf region after Iraq's Aug. 2 invasion of Kuwait.

As such, Aziz said Arab states like Egypt, Syria and Saudio Arabia ''can no longer hide behind the facade that they are defending peace ... for they are helping to prepare for war.''

Aziz, a Protestant Christian and one of Iraqi President Saddam Hussein's most faithful ministers, called on Arab states which have sent troops to the gulf to reconsider their position before it was too late ''if they really do not want to be a part of American designs for the region.''

Baker told reporters in Paris after 90 minutes of talks Saturday with Mitterrand that the international alliance confronting Iraq was ''strong and united, and will remain so,'' Arab radio stations said.

The U.S. envoy arrived in Paris late Friday from London, where Prime MinisterMargaret Thatcher said the military option would be used if Iraq remained in Kuwait. Paris was the last leg of an eight-nation, seven-day whirlwind quest for a mandate for the possible use of military force against Iraq.

Baker reportedly received reassurances from Britain, Saudi Arabia and Egypt that they are willing to go to war against Iraq if that is necessary.

But a recent opinion poll showed 51 percent of French people are against the idea of going to war with Iraq, a traditional ally of France.

And in Damascus, Syria - where Vice-President Abdulhalim Khaddam recently said Syrian troops in Saudi Arabia were deployed only to defend the kingdom and not to attack Iraq - three Arab foreign ministers continued talks for the second consecutive day Saturday.

The foreign ministers of Egypt, Syria and Saudi Arabia began talks on the crisis Friday and were to head for the Syrian Mediterranean resort of Latakia later Saturday to meet with Syrian leader Hafez al Assad.

Assad, vacationing in Latakia, has pledged to send as many as 20,000 Syrian troops and armor to Saudi Arabia. Egypt already has between 15, 000 and 20,000 troops in Saudi Arabia and the United Arab Emirates, and has pledged more troops and jet fighters.

''The three men are expected to discuss with Assad the options for resolving the gulf crisis,'' one Western diplomat said.

Baker, during talks earlier this week with Saudi leaders, formulated a provisional command structure in case of war, but Washington would still have to seek Saudi permission to attack Baghdad from Saudi territory.

In Amman, Chinese Foreign Minister Qian Qichen met Saturday with Jordanian leaders before planned talks in Baghdad with Saddam.

''These talks are crucial because (Qian) will probably be the last important politician from a country with a permanent seat on the Security Council to talk to Saddam, and explain to him the folly of his ways,'' Riyadh Radio said.

Amman Radio said Qian told reporters after talks with Jordanian Foreign Minister Marwan al Qassim that China opposed Iraq's occupation of Kuwait and was calling for intensified efforts to solve the crisis peacefully.

Qian, who arrived in Amman Friday from Saudi Arabia as part of a regional tour also said no draft resolution had been submitted to the United Nations to use military force against Iraq. ''Such a draft resolution needs detailed consultations and cannot be tabled for a vote easily,'' he said.

In Riyadh, Saudi newspapers carried extensive reports Saturday on King Fahd's promise to move toward greater democracy for the conservative kingdom. Riyadh Radio quoted Fahd, in power for eight years, as saying a final draft of plans to set up a central and provincial consultative council was being prepared.

The monarch made a similar pledge to create a consultative council two years after the eruption of the 1980-1988 Iran-Iraq war, saying he wanted to allow his countrymen a greater share in decision-making.

In the United Arab Emirates meanwhile, Kuwait's exiled Defense Minister Sheikh Nawaf al Ahmad al Sabah attended a graduation ceremony for hundreds of Kuwaiti volunteers who spent time in military training for what officials described as the eventual liberation of their homeland.

And in Cairo, Egypt's outlawed Moslem Brotherhood issued a statement callingthe foreign troop deployment ''a threat to the Islamic nation and a boost for the Zionist enemy.''

''We are opposed to Iraq's invasion of Kuwait, but we also oppose the presence of foreign troops in the region,'' the statement said. The group, however, said it would work for a peaceful solution to the crisis.

#90314u0250 11/10/1990 ~United Press International

ATLANTA (NOV. 10) UPI - Civil rights leaders and historians Saturday defended the late Martin Luther King Jr.'s place in history despite allegations the slain civil rights leader plagiarized during his academic career.

''It's inevitable with every hero that, as time goes by, people put in proper perspective their humanness and that's what's happening to Dr. King,'' said the Rev. Joseph Lowery, president of the King-founded Southern Christian Leadership Conference. ''Dr. King never claimed he was God.''

The revelations about King's writings, published Friday in The Wall Street Journal and subject of a news conference at Stanford Universityv, were based on the findings of an editorial board headed by Stanford historian and civil rights activist Clayborne Carson.

Divided by his allegiance to King and to uphold the truth, Carson said King, the winner of the 1964 Nobel Peace Prize, repeatedly used words and ideas from other scholars in his dissertation and other academic works.

''We found that there was a pattern of appropriation, of textual appropriation '' said Carson, 46, and a specialist on black history. ''By the strictest definition of plagiarism - that is, any appropriation of words or ideas - there are instances of plagiarism in these papers.''

The papers include those written while King was a student at Crozer Theological Seminary and at Boston University, where he earned his doctorate in theology in 1955.

Carson became involved in the King works as a result of being selected by

Coretta Scott King in 1985 to head the Martin Luther King Jr. Papers Project, a multi-volume collection of her husband's writings.

The findings were presented to the project's advisory board of scholars in October 1989 but Carson, as senior editor, said he decided not to make public any details until the first installment of the collected papers was published. The original date for publication was the end of this year.

King's dissertation, entitled, ''A Comparison of the Conceptions of God in the Thinking of Paul Tillich and Henry Nelson Weiman,'' appears to borrow many words from a disseration written three years earlier by Jack Boozer, under the same advisor at Boston University.

Boston University said it formed a committee to study the allegations but Carson defended King's reputation, saying his contribution was not as a scholar.

''His place in history is based on what he did after he left graduate school. His contributions can't be undermined by our new findings,'' he said.

Carson stressed that no one who has studied King believed he was a person without flaws or limitations.

''We recognize that he is a flesh-and-blood human being,'' he said. ''What makes him interesting to scholars is that he was a complex human being.''

Mrs. King was first made aware of the findings in 1989 during a meeting with the project's advisory board but has refused to comment on the information.

The revelations come a year after the public was treated to details of the preacher's extramarital affairs, documented in a book written by one of his closest confidants, the Rev. Ralph Abernathy.

The Abernathy autobiograpy, ''And the Walls Came Tumbling Down,'' infuriated the civil rights community with assertions that King spent parts of the night before his death with two different women.

Although dozens of books since his death have documented King's affairs, none elicited as much condemnation from the civil rights community as Abernathy's.

Paul Schilling, the only living member of the BU faculty committee that reviewed King's dissertation, is another defender.

''The thought Dr. King put into his work was original and displayed a clear, fair understanding of the material,'' said Schilling, who said he had no knowledge of plagiarism.

''He did most of the work on the dissertation while in Montgomery and during

the first year of an extremely busy pastorate,'' Schilling said.

#90314u0286 11/10/1990 ~United Press International

CALCUTTA, INDIA (NOV. 10) UPI - Four Burmese students hijacked a Thai passenger jet to India Saturday, held about 180 passengers hostage and threatened to blow up the plane to press their demand for the restoration of democracy in their country, officials said.

Thai Airways flight TG305 was enroute from Bangkok, Thailand to Rangoon, Burma when the hijackers forced the pilot to fly to the eastern Indian city of Calcutta, where the aircraft landed at Dum Dum airport at about 3:45 p.m., officials said.

The four hijackers threatened to blow up the plane if anyone approached the aircraft. They later released 25 of the 205 passengers on board on ''compassionate grounds,'' the Press Trust of India news agency said.

Some of the passengers said the hijackers were armed with explosives, officials said. An anti-hijacking squad and other security force units were deployed around the airport after the aircraft landed.

Officials said the hijackers, identified as four Burmese students, had announced six demands before the rest of the hostages would be released.

The demands included the immediate lifting of martial law in Burma, the cancellation of all military tribunals, the release of Burmese political prisoners and the restoration of democracy.

Thai and Burmese officials were called to the airport to talk with the hijackers.

The hijacking came while a U.N. official was in Burma to investigate human rights abuses.

Earlier this year, Burmese dissidents in Bangkok warned if the military junta in Burma failed to restore democracy, incidents such as hijackings could be expected.

Two Burmese students hijacked a Burma Airways plane to Thailand on Oct. 6, 1989, demanding the military release all political prisoners and return the country to democracy. The hijacking ended peacefully with the release of the 83 people aboard. The two hijackers were sentenced to prison terms in Thailand.

''We cannot rule out the possibility that the Burmese people will express their anger at the military's repression in even larger ways,'' said Tin Maung

Win, general secretary of the Democratic Alliance of Burma, a grouping of more than 20 anti-government organizations.

The Burmese military crushed pro-democracy movements in 1988, killing more than 500 people.

The military junta allowed elections in May, but after the main opposition party swept 80 percent of the seats in the legislature, it has refused to allow the legislature to meet and has arrested most of the party's leaders.

-30- 2743

#90314u0294 11/10/1990 ~United Press International

WASHINGTON (NOV. 10) UPI - Senate Democrats and Republicans are set to re-elect Sens. George Mitchell of Maine and Robert Dole of Kansas as their party chiefs for the 102nd Congress, but political and generational differences could set off some major battles for other leadership slots.

Dole, the pragmatic 67-year-old who has led the Senate GOP as both majority and minority leader since 1985, and Mitchell, a 57-year-old former judge who was first elected by the Democrats two years, are running unopposed.

So is assistant Senate Republican leader Alan Simpson, the articulate veteran from Wyoming whose rhetoric sparkles with both humor and flesh- cutting partisanship.

But the decision of Assistant Senate Democratic leader Alan Cranston, one of the Keating Five facing charges of putting pressure on federal regulators to delay closing a failing savings and loan, to step down from his post because of cancer, might set up a fight between the young and old Turks.

And among Republicans, election to chairman of the Republican Conference, the caucus of all GOP senators, is certain to be the scene of a clear-cut showdown between the left and right.

The party elections Tuesday are held in secret sessions behind closed doors and sometimes become as byzantine as the elevation of a pope, with only the white smoke missing.

Numerous senators have gone into the elections assured of enough commitments to win, only to find their support evaporate. Candidates campaign in a low-key manner almost year-around and secret ballots are cast on the basis of criteria such as politics, regionalism, favors and friendship.

The decision by Cranston, suffering from cancer of the prostate, not to run for Senate office two days before appearing before the Ethics Committee in a public hearing, would appear to have given Sen. Wendell Ford of Kentucky a clear road.

Ford, 66, ran against Cranston two years ago and has claimed the support of 35 out of the 56 Democrats, enough to win with votes to spare. That margin may have prompted Cranston, who claimed only 19 solid votes, to pull out.

But the withdrawal of Crantson, one of the Senate's premier liberals, has also prompted Sen. David Pryor, D-Ark., to ''explore'' the possiblity of going against Ford.

Ford is very much part of the Senate's ''old guard.'' Pryor, 10 years Ford's junior, is particularily popular with the Senate's younger members and could peel away votes from Ford.

If Pryor makes the races against Ford, his old post as third-ranked in the hierarchy. would open up. No one is expected to announce a decision unless Pryor makes a move.

But with Mitchell, and eastern liberal and Ford or Pryor, both border state moderates, in the leadership, the open spot could go to a westerner.

The Republicans have contests for four posts - chairman of the conference, secretary of the conference, chairman of the policy committee and chairman of the campaign committee.

The most intriguing is the attempt by Sen. Thad Chochran of Mississippi, a likeable conservative, to unseat as chairman of the conference Sen. John Chafee of Rhode Island, one of the last GOP liberals in the Senate.

In the other races, Sens. Dan Nickles of Oklahoma and Pete Domenici of New Mexico, both conservatives, are fighting to succeed the retired Sen. William Armstrong of Colorado as chairman of the policy committee; Sen. Christopher Bond of Missouri and Sen. Robert Kasten of Wisconsin are running to succeed Cochran as secretary of the conference; and Sens. Mitch McConnell of Kentucky and Phil Gramm of Texas want to take over the campaign committee.

-30- 3866

#90314u0299 11/10/1990 ~United Press International

WASHINGTON (NOV. 10) UPI - After years of facing indifferent sales clerks, wasting work days waiting for plumbers and being bumped off airplanes, most Americans think customer service has gone the way of doctor house calls.

But one expert says consumers still have the power to get what they want.

Peter Glen, author and professional speaker on the service industry, has spent years collecting horror stories of lousy customer service. He will tell you about the sales clerk who refused to take his money until her nails were dry, or the airline that paraded a dying amputee around its terminal strapped to a

baggage cart because it had lost his wheelchair, or the desk clerk at a pricey hotel who simply shrugged when told one of his rooms was crawling with cockroaches.

As detailed in his aptly titled book on the subject, ''That's Not My Department,'' to be published Nov. 15, Glen is plenty peeved about crummy service. But ''the thing that makes me the most angry is that people put up with it,'' says Glen.

''I think people think this is all there is,'' says Glen of the poor service and indifferent attitudes Americans are fond of complaining about but have come to accept.

Glen's message to the masses who obediently sit home seething while waiting hours for the furnace repairman is to ''stop whining.''

''Fight, don't whine, fight,'' says Glen. The victors are customers who are treated like customers.

How?

Glen himself has ''thrown fits'' in department stores when all polite attempts at gaining service have failed. He has fired off letters and marched into the offices of chief executives. He has plunked himself down and refused to budge until his needs are met. And most of the time, he says, it works.

But for the neophyte who is accustomed to walking into a store feeling more like a potential victim than a customer whose needs will be efficiently met, Glen has some start-up advice.

First, be prepared for bad service. ''Expect the worst,'' says Glen. ''Expect indifference, apathy, expect boredom and you will be more alert. ... I think you should be prepared on the way into Macys.''

The next step, says Glen, is ''not tolerating it. You do not have to put up with rudeness, with waiting endlessly.''

If, for instance, when you ask the price of a certain item, the clerk replies ''that's not my department,'' don't wander away meekly in search of real help. Stand your ground and politely remind the clerk he is an employee of the entire store, not just one department. The response may be sulky, but you will probably get what you want.

''I wouldn't start by threatening and throwing fits,'' says Glen. ''First of all, I would make an effort to do it nicely. It depends on how important it is to you. ... The second step would be to go higher (a supervisor) and the third step is to go higher (the boss).''

While Glen suggests a letter, or even a visit, to the owner or executive of a business to point out poor customer service, he also advocates letters lauding employees who provide good service. Both get across the point that good service is important to you, the customer.

''Most importantly,'' says Glen, ''I think when you find good service you should praise it.''

Lack of praise and respect for the lower level employees who usually charged with the most direct customer contact of any business are primary reasons for poor service, according to Glen.

Glen, who grew up hanging out in the retail outlets of his sportswear manufacturer father, says he preaches employee respect in the speeches he gives to retail and manufacturing executives around the country.

''First of all they can make sure that the company is very exciting to work at '' Glen says of bosses seeking to improve employee outlook.

''Ask your employees what they want,'' he says. ''Listen to them. ... I would push them hard to improve and I would recognize any sign of life and broadcast it to everybody.''

Glen points to department stores and airlines as particularly poor providers of customer service, but he also notes that the medical profession has the potential for truly disasterous consequences when employees such as nurses are sloppy, lazy or indifferent.

Glen reserves his gold star for best across-the-industry customer service to the performing arts.

''I think entertainers are in the service industry,'' he says. ''If I see a great performance, I'm going to applaud ... and performers will work very hard for you to get that.''

-30- 4732

#90314u0308 11/10/1990 ~United Press International

PARIS (NOV. 10) UPI - Secretary of State James Baker met with French President Francois Mitterrand Saturday at the end of a tour of the Middle East and Europe, and cited a ''strong consensus'' among members of the anti-Iraq alliance.

Baker, however, refused to say if France had agreed to join any military campaign against Baghdad.

The secretary of state left for Washington Saturday, ending an eight- day trip to align support for a possible military action against Iraq, officials said.

Baker boarded the flight at Orly Airport outside Paris after meeting with Mitterrand and French Foreign Minister Roland Dumas.

Baker met with Mitterrand for more than an hour amid reports Paris was backing away from backing the use of force in the Persian Gulf.

''We have built a consensus, we have increased pressure on (Iraqi President) Saddam Hussein, isolated him. But we have not yet succeeded in reversing his agression,'' Baker told a Paris news conference, referring to Iraq's Aug. 2 invasion of Kuwait.

Baker said during his trip, he discussed the U.S.-led military buildup against Iraq, as well as command and control arrangements with the leaders of Saudi Arabia, Bahrain, Turkey, the Soviet Union, China, England and France.

He said he discussed when it should be decided sanctions had been given a sufficient period of time to work, and how to proceed under the United Nations charter ''while maintaining a consensus and maintaining support for our actions.''

''So as we wrap up this trip, I feel we have a very strong consensus on our collective aims and on the need to resist partial solutions, to work together and stay together in this coalition and on the need to make all out actions credible if we are to succeed,'' he added.

The Secretary of State qualified his talks with Mitterrand and Dumas as ''very positive,'' but he refused to say if the French clarified their position on the use of force.

Dumas would say only ''for the moment, no one favors military action'' and said the French continued to hope the crisis would be ''resolved through diplomatic and peaceful means.''

The French position on the eventual use of force in the gulf has emerged in recent days as the most tricky question facing Washington at this stage in the 3-month-old crisis.

Paris, which has sent more than 5,000 soldiers and an armada of warships to the gulf, has made it clear it will not participate in any armed conflict unless it is approved by the U.N. Security Council.

But other leaders, including Soviet President Mikhail Gorbachev and Chinese Foreign Minister Qian Qichen, told Baker during his trip they would back a military solution only if it wins Security Council approval.

''It is in the context of the United Nations that we will continue to work,'' Dumas told reporters after meeting with Baker.

Mitterrand and other French officials believe a peaceful solution to the crisis is still possible and that any new Security Council resolution authorizing the use of force against Saddam should be delayed to allow the Iraqi leader to make concessions, according to diplomatic sources in Paris.

The French view was strengthened by Jordan's King Hussein, who reportedly told Mitterrand earlier this week that Saddam was weighing concessions ahead of the Security Council resolution.

Baker, however, went out of his way to stress that the anti-Iraqi coalition is united in rejecting partial solutions, such as allowing Saddam to keep some Kuwaiti territory if he agreed to withdraw from the Emirate.

Baker said the purpose of the trip had not been to draft a Security Council resolution authorizing the use of force, and admitted there were different views within the anti-Iraqi coalition on how long sanctions should be allowed to work before turning to the military option.

He said Washington would continue to consult with its allies on the timing of a Security Council resolution, but his comments appeared to indicate the United States was ready to wait several more weeks before returning to the United Nations.

Baker said the best way to achieve a political solution to the crisis was by applying military pressure on the Iraqi regime.

''The key is to send a clear and unmistakable signal to Baghdad that we are serious, and I think that we have sent that signal,'' he said.

Thursday, President Bush ordered that some 100,000 additional troops be sent to Saudi Arabia, including armored divisions and about 700 advanced MI-AI tanks.

Bush also said the reinforcements would give the multinational troops in Saudi Arabia an ''adequate offensive military option,'' officially changing policy for the United States from a defense to an offensive position.

#90314u0322 11/10/1990 ~United Press International

SAN DIEGO (NOV. 10) UPI - A federal immigration panel overturned a ruling granting bail to a Cuban intelligence agent who was arrested crossing the Mexican border to seek political asylum in the United States.

Juan Manuel Rodriguez-Camejo, 40, a major in Cuba's counterintelligence agency was to have been released on $7,500 bail Friday but the Board of Immigration Appeals in Washington ruled late in the day that Rodriguez-Camejo was too great a security risk to release.

''We are dealing with a master of deception who has been in the business for the past 24 years,'' Robert McCowan, an Immigration and Naturalization Service investigator, told The San Diego Union.

Rodriguez-Camejo remained at the Metropolitan Correctional Center in San Diego Saturday and his lawyer took the case to U.S. District Judge J. Lawrence Irving.

The INS ordered Rodriguez-Camejo deported Oct. 29 after he illegally crossed the Mexican border and tried for a third time to obtain political asylum in the United States for himself, his wife and 6-year- old daughter.

Rodriguez-Camejo's lawyer, Judith L. Wood of Los Angeles, said her client was truly defecting and had made no attempt to hide his identity.

She has also said Rodriguez-Camejo is considered a traitor by the Cuban government and faces certain death if deported.

But federal authorities declared Rodriguez-Camejo a security risk and said he is still a member of the Cuban counterintelligence service.

Family members in Beverly Hills have admitted that Rodriguiez-Camejo is an adroit spymaster who dealt a major blow to the CIA's espionage efforts in Cuba. Working as a double agent from 1979 until 1987, he placed 27 other Castro agents inside the American spy ring on the island.

They have also said that growing disillusionment with the Castro regime in recent years led him to defect, first to American diplomats in West Germany last spring and again at the San Ysidro border crossing in San Diego in mid-October.

He was rebuffed the first two times and then was arrested Oct. 28 by the Border Patrol as he and his family tried to slip across the border as illegal aliens.

After several hours of questioning by the FBI at a San Diego County hotel Oct. 29, Rodriguez-Camejo was ordered deported.

His wife, Mimna Montes de Oca Aldavert, 30, and daughter, Paola, are free on $2,000 bond each and living with his father-in-law, reportedly a wealthy businessman, in Beverly Hills.

MOSCOW (NOV. 10) UPI - Two trains struck a passenger bus at a railroad crossing in a Urals Mountains city Saturday, killing 16 people and leaving 13

people in critical condition, the official Tass news agency said.

The accident occurred at a railroad crossing in Sverdlovsk near an airport serving the city of 1.3 million people some 550 miles south of Moscow, Tass said.

''Sixteen people were killed and 13 injured and taken to hospital in grave condition as a result of a collision in Sverdlovsk of a passenger bus and two trains moving toward each other,'' Tass said.

The news agency did not say whether the crash victims were all passengers on the bus or whether the trains also carried travelers.

Sverdlovsk, the hometown and political base of Russian Federation leader Boris Yeltsin, is a major producer of heavy machinery and a main stop on the trans-Siberian railroad. It was called Ekaterinburg before the Bolshevik Revolution, and Czar Nicholas II, the last Russian monarch, was executed there with his family in 1918.

DALLAS (NOV. 10) UPI - Dallas Mavericks forward Roy Tarpley will be out of action for about three weeks but X-rays taken Saturday revealed he did not suffer serious injury when he fell Friday night during a game against the Orlando Magic.

Tarpley's right kneecap slipped out of place and he had to be carried from the court on a stretcher.

Doctors said, however, the kneecap was slipped back in place and that within a few minutes after the mishap Tarpley was walking around the locker room.

''There were no bone fractures, and the ligaments were tight,'' Mavericks physician Dr. Pat Evans said. ''It will be two weeks before he is over the soreness, and another week will be needed for rehabilitation.''

Tarpley was attempting to grab a rebound when the injury occurred. As he came down, his right foot hit the court at an awkward angle and he immediately collapsed.

He writhed around the court in pain and was still in obvious pain as he was carried to the locker room.

Tarpley's career has been plagued by run-ins with the NBA drug policy. He has twice been suspended for violations of that policy and one more would mean a permanent ban from the league.

He had averaged 24 points a game in Dallas's first three contests this season and had scored six points and grabbed six rebounds Friday night before the injury.

#90314u0338 11/10/1990 ~United Press International

CENTRAL SAUDI ARABIA (NOV. 10) UPI - An Iraqi MiG-25 Foxbat popped onto the radar screens flying high and fast toward the Saudi border. In moments it was at 60,000 feet and moving south at twice the speed of sound.

In an AWACS surveillance plane over Saudi Arabia, the warplane's aggressive behavior caused a buzz of activity. U.S. officers identified the Foxbat, verified its speed, determined its altitude and plotted its course.

By the time the warplane veered away - still inside Iraqi territory - the crew aboard the AWACS had moved U.S. F-15 fighter jets into position to intercept the plane if it crossed the Saudi border.

''When you have a high, fast flyer that can be a threat to us or our assets, that's when you have to pay attention,'' said 2nd Lt. Ted Meyer, 23, of Torrence, Calif., who directed the American fighters into place. ''At times it can be harrowing.''

For crews aboard the American AWACS planes sent to Saudi Arabia following Iraq's Aug. 2 invasion of Kuwait, such moments come often. ''We've been testing each other for the past 90 days,'' said Col. Tom Bliss, the AWACS wing commander. ''There's a lot of cat and mouse going on.''

The AWACS planes - who derive their name from the acronym for airborne warning and control system - are the eyes of the U.S. military in Saudi Arabia. Along with the Saudi AWACS, they circle continuously over the Arabian desert.

The planes constantly study the movement of airplanes in the region. Controllers aboard the AWACS can move U.S. warplanes to defend Saudi airspace, feed information to Army missile systems on the ground or notify the Navy of impending threats from the air.

''It is a major link in the command and control system (that coordinates U.S. forces),'' Bliss said.

The heart of the AWACS - and the device that gives it the distinctive look of a Boeing 707 carrying a massive Frisbee - is its radar systems. Combining both Doppler and pulse radars, the AWACS is able to look down and around from a platform 29,000 feet high.

When the radar detects an airplane, like the MiG-25 Foxbat, operators inside the AWACS identify it on a color video monitor and tag it with a name. Crew

members like Meyer saw the Foxbat on their screens as a tiny golden ''v'' above the purple line marking the border between Saudi Arabia and Iraq.

''When I first got into this job, I equated it to a big video game that didn't use quarters,'' Meyer said. ''I control the fighters, but not all the rest of the planes. That's a very basic analogy, but you can look at it like that.''

The speed of the planes are indicated by a path line on the radar screen. ''When the track starts going long ... it gets to be an item of real concern to the whole plane,'' Meyer said.

For controllers like Meyer, the immediate concern is to respond in a way to limit the threat. Through his headset, Meyer talked to the pilots in his area of responsibility.

''I tell my pilots, 'We have this track up here. He's a bad guy. He's tracking say, northwest,''' Meyer said. Using the information the controller gives them, the pilots move into the area, guided by the AWACS until they pick up the plane on their own radars.

The AWACS carries more than half a dozen radar screens with controllers assigned to various tasks, from communicating with airplanes in the multinational force confronting Iraq to informing ground weapon systems of the air picture.

The airplane also carries tactical officers, who know U.S. plans in the event of a conflict. And it has enough extra crew members to be able to give people a rest during the long flights, which frequently last for 16 hours.

Despite the amount of time the AWACS spend in the air, Bliss, whose planes are from Tinker Air Force Base in Oklahoma City, said there was little chance of becoming tired of the job.

''I gotta say in the last 90 days I have never been bored,'' he said. ''It doesn't get routine. It's a very dynamic environment. The enemy situation changes and the things he does change on a continual basis.''

Bliss said Iraqi planes have been known to slip in behind commercial airliners to hide from the radars. He also noted the Iraqis don't fly too much at night or on Fridays, the Moslem holy day, and their better pilots tend to fly French-made F-1 Mirages rather than the Soviet-made MiGs.

Although he's not been bored, Bliss said he was worried that his people will become fatigued because of the long hours in the air and the constant need to be ''at a tight edge on the brink of war.''

''We are concerned about the length of keeping the folks on the edge and keeping them up and ready to go to war,'' he said. ''We know there's a limited

time that you can do that before it will start wearing on morale and wearing on their physiological factors.''

Although the hours are wearing, the members of the AWACS crew remain busy. While not on duty, they munch on food from the airplane's refrigerator or drink coffee and soda pop. Some while away their spare time reading everything from ''Conan the Barbarian'' to documents marked ''Secret.''

Flying in an AWACS plane, said one crew member, is like flying in any other plane: ''Hours and hours of boredom and moments of sheer terror.''

#90314u0352 11/10/1990 ~United Press International

(NOV. 10) UPI - The State Department says Iraq has let three American male hostages leave the country. One was Miles Hoffman of Columbus, Georgia, who was shot in the arm by Iraqi troops last month. The two others also need medical attention. Department spokesman Richard Boucher says Iraqi officials said five Americans were in a hotel in preparation for their release. But two were later told they could NOT leave.

Philippines police report a band of 15 armed man massacred a farmer, his wife and four of their children in their sleep on the island of Mindanao. A 10-year-old boy was wounded. The six victims were wiped out with automatic gunfire. The four children killed were aged six to nine. The assailants fled into nearby hills. Authorities do NOT know if the assailants were guerrillas or thieves.

President Bush has vetoed changes in the Orphan Drug Act- the law that gives drug companies economic incentives to develop medicines for rare diseases. Bush called the law a success and said it has led to 49 new drugs for rare diseases. But he said he has problems with amendments designed to reduce profits if the drugs turn out to have bigger markets than originally expected.

For the second year in a row, American farmers are producing more vegetables than predicted. The Agriculture Department says supermarket prices will be held down this year because of the bumper crop. The department projects fresh vegetable prices will rise four to six percent this year... compared with five to seven percent for overall food prices.

An Argentine radio station says a suspected drug trafficker, Carlos Savignon Belgrano, has asked for asylum in the U-S Embassy in Buenos Aires. The station says Belgrano fears retaliation by a drug mob because he is also an agent working for the U-S Drug Enforcement Administration. An embassy spokesman refused to comment on the report.

A videotape was shown to the U-N Security Council yesterday to counter an Israeli claim that Moslem leaders incited violence that killed 19

Palestinians. Instead of encouraging violence, the Islamic leaders on the tape urged their followers to go inside and stay away from Israeli soldiers. Israeli authorities say the Moslems called for a ''holy war,'' but that is NOT heard on the soundtrack.

The federal government believes the nation's capital needs new prison space. The Bureau of Prisons has announced plans to build a one- thousand-bed prison within sight of the Capitol building. This will help relieve crowding in the D-C jail. Officials say its construction will help public safety by taking drug offenders off the street while they await trial. Washington has the nation's highest murder rate, sparked by a turf war between crack cocaine dealers.

#90314u0398 11/10/1990 ~United Press International

(NOV. 10) UPI - The Agriculture Department says the international embargo is hurting Iraq's food imports. Iraq may buy only 500-thousand tons of grain. Before the gulf crisis, the department said Iraq would buy five-Million tons this year.

Three American men who need medical attention were released yesterday by Iraq. The State Department says one was shot in the arm last month in Kuwait. Other hostages say he might lose his arm without advanced treatment.

A videotape provided by Palestinians was shown to the U-N Security Council yesterday to counter Israeli claims about the 19 deaths on Temple Mount. There was NO sign of Palestinian leaders inciting the violence.

Unidentified men threw two hand grenades at the U-S Embassy in Manila today. One did NOT explode and the other did NOT hurt anybody. NObody has claimed responsibility.

Berliners yesterday marked the first anniversary of the opening of the Berlin Wall. The anniversary was low key. The cornerstone was laid of a memorial to the 77 people who were killed trying to escape across the wall.

A lawyer for former Panamanian President Manuel Noriega says his office plans to prepare a motion to dismiss drug charges. The lawyer contends the government illegally taped Noriega's phone conversations from jail.

The government plans to build a prison in Washington, D-C, where a drug war is overfilling the district jail. Three sites are being considered- all within a mile of the U-S Capitol building.

Oil prices fell more than a dollar 50 cents a barrel yesterday. Trading quickened in the last hour because of a report Iraqi President Saddam Hussein was overthrown. The report was unfounded.

A recount gives Vincent Cianci the lead in the Providence, Rhode Island, mayor's race. But three voters have filed objections saying he can NOT serve because of a criminal record for assault. President Bush has vetoed an amendment to the Orphan Drug Act. He said the act encouraged development of drugs for rare diseases. But Bush objects to a change that would reduce profits for drugs that turn out to have a large market.

The government says fresh vegetable prices are rising more slowly than overall food prices. The reason is an abundant crop of vegetables. The harvest should be 10 percent greater than last year.

The water supply in much of the Soviet city of Riga was shut off yesterday because of a toxic chemical. Television reports said potassium cyanide was released from a factory and many fishes were killed.

Former President Reagan dedicated a statue sculpted from pieces of the Berlin Wall at Fulton, Missouri, yesterday. Reagan spoke of changes in Europe since Winston Churchill's 1946 speech in Fulton in which he coined the phrase ''Iron Curtain.''

#90314u0413 11/10/1990 ~United Press International

EASTERN SAUDI ARABIA (NOV. 10) UPI - Members of a U.S. congressional delegation visited American and Saudi troops in the desert Saturday and told reporters later that an Iraqi withdrawal from Kuwait was no longer sufficient to resolve the crisis.

Rep. John Murtha, D-Pa., and Rep. Stephen Solarz, D-N.Y., told a news conference that they and other members of Congress believed the Persian Gulf conflict could not be ended until Iraq's ability to produce chemical and nuclear weapons had been destroyed.

''What we ... find unacceptable is his potential to develop nuclear and biological weapons,'' said Murtha, the chairman of the House Defense Committee. ''Even if he moves out of Kuwait, we will still not accept that.''

''If he moves out of Kuwait unilaterally, we are also going to insist, the Congress will insist, that he not have this ability (of mass destruction) and that we be able to verify it,'' Murtha said.

Solarz, a member of the House Foreign Affairs Committee, said if Iraqi President Saddam Hussein were allowed to withdraw from Kuwait with his weapons of mass destruction intact, ''it would be a Pyrrhic victory indeed.''

''Saddam Hussein is a man who is determined to dominate the Middle East,'' Solarz said. ''He has gone to war two times in the past decade to achieve that

objective.''

The congressman said if the Iraqi president, whose forces invaded Kuwait Aug. 2, succeeded in ending the crisis with his military potential intact, he would be back in a few years as ''a more formidable danger and formidable foe than he is now.''

The congressmen made their comments after spending the day visiting U.S. and Saudi forces in the Arabian desert. Murtha, Solarz and Rep. Alan Mollohan, D-W.Va., also met with the general leading the American military forces in the region.

Murtha said many problems had been solved and the military situation had improved considerably since he first visited Saudi Arabia one month ago to see how the U.S. buildup was progressing.

He said getting uniforms and boots continued to be a problem, but ''the troops are getting their mail and the equipment seems to be in very good condition.''

''I found the troops exhilarated and excited one month ago. I found the troops sober and realistic today,'' said Murtha, who watched live fire exercises during the day. ''Now they have realized this is a much tougher situation,'' he added.

The Defense Committee chairman also said he was satisfied with the command and control of U.S. forces in the region.

Secretary of State James Baker met with Saudi King Fahd Monday and agreed on a two-tiered command and control structure, with joint Saudi and U.S. control of forces in the event of an attack on the kingdom and U.S. military officials in charge of any operation outside Saudi Arabia.

The agreement did not affect forces from countries that have not already placed their troops under American or Saudi command.

Murtha also told reporters the U.S. buildup had cost $2.6 billion so far. He said the cost of operations, not including the deployment of more than 100,000 additional forces, at $17 billion during 1990.

He said Saudi Arabia and Kuwait would pay for half that amount.

#90314u0485 11/10/1990 ~United Press International

MOSCOW (NOV. 10) UPI - The man accused of attempted assassination in a Red Square shooting on Revolution Day was active in anti-Communist politics and worked at a factory near Leningrad, reports said Saturday.

The reports also said the sawed-off shotgun allegedly fired by Alexander Shmonov was incapable of reaching President Mikhail Gorbachev or other Soviet leaders who stood atop the mausoleum of Vladimir Lenin when two shots rang out at the annual Nov. 7 parade.

Shmonov, 38, was charged Thursday with having committed a terrorist act under a criminal code specifying attempted assassination.

Newspapers already embroiled in a fall subscription drive are engaged in a knockdown, drag-out battle to provide their readers with the latest details of the sensational shooting incident at the heart of Soviet power on the country's most important holiday.

Shmonov installed pipes at the Izhorsky Factory Complex outside Leningrad, one of the country's largest plants, the Sovetskaya Rossiya newspaper said Saturday, contradicting earlier reports that he was unemployed.

''He was of middle-level skill, but his work did not cause any complaints and there was nothing to distinguish him from other common workers until he got involved with politics,'' Sovetskaya Rossiya said.

Shmonov, the newspaper said, worked in the spring 1989 parliamentary election campaign for Leningrad candidates from the radical Democratic Movement, which used local polls this past May to take over the municipal government in the country's second-largest city.

Shmonov distributed ''anti-Communist leaflets'' along with the son of the police chief in Kolpino, the city of 130,000 people southwest of Leningrad where the Izhorsky factory is located, it said.

The Komsomolskaya Pravda newspaper said Gorbachev and the other dignitaries at Red Square were not endangered by the shooting Wednesday because the gun was fired 650 feet from where they stood on the Lenin mausoleum.

''Though the incident was serious and there was a real threat to the lives of people nearby, it is necessary to point out that the shots did not present any threat to the people atop the mausoleum, even if the shots had been aimed,'' Komsomolskaya Pravda said.

''This is testified to by the technical characteristics of the gun and the distance,'' the newspaper said.

Komsomolskaya Pravda also said court-appointed physicians will determine whether Shmonov is of sound mental health.

The same newspaper, citing KGB sources, reported Thursday that Shmonov had told investigators he was planning an assassination on the Nov. 7 holiday, which celebrates the 1917 Bolshevik Revolution.

Shmonov's hand was seized just as he was firing the shotgun, it said. Soviet television showed footage of police dragging a man away after the shooting, which took place near the GUM deparment store across the large square from the mausoleum.

Foreign Minister Eduard Shevardnadze told journalists Thursday: ''Nothing serious was behind this incident. In such a large country as ours, it is always possible that something will happen somewhere.''

#90314u0507 11/10/1990 ~United Press International

(NOV. 10) UPI - Lebanese army troops began moving throughout Beirut today to bring an end to 15 years of fighting between Christian and Moslem militias. At daybreak, Shiite Amal militiamen began withdrawing from their positions in southern suburbs. Army troops are to be in command of all of Beirut by November 19th and the militias are to be out of the city by then. Lebanon's defense minister says if the army runs into trouble, the government will call in syrian military help.

Black South African leader Nelson Mandela says his African National Congress will step up mass protests to force an end of apartheid. Mandela returned yesterday from a tour of eight nations. He said the world is behind his movement. He says talks with the government will continue, but the A-N-C is NOT ready to stop protesting. President Frederik de Klerk has eased some restrictions against blacks. But some discriminatory legislation remains and the black majority still can NOT vote.

Leaders of Germany's Social Democratic Party met in Bonn today with Soviet President Mikhail Gorbachev to discuss the Persian Gulf crisis. Party Chairman Hans-Jochen Vogel says Gorbachev streesedthe efforts to find a peaceful solution. Vogel said- ''He was concerned that it was possible to determine the beginning of a military conflict, but NOT the consequences.''

Former Philippines first lady Imelda Marcos says she and the Philippine government have made progress in settling a multi-BILLION- dollar suit. The government is suing to get funds from five Hong Kong bank accounts. Marcos said the progress lies in the fact that yesterday's negotiation in Los Angeles was the first time her representatives and the government have talked. But the government lawyers report a number of conflicts still must be solved.

Opposition is quietly building to the military footing in the Middle East. The Reverend Paul Sherry, president of the United Church of Christ, said- ''There is a shift of mood.'' 21 organizations put an advertisement in the Washington Post Thursday saying ''war is NOT the answer.'' The American Friends Service Committee reports more and more calls from Americans fearful the United States will go to war.

Religious leaders in Alaska will build a religious center in the Soviet Far East. The center will be constructed in Magadan, a city of 150-thousand people dating from 1939. Unlike older Russian cities, it has NO religious history. The Alaska leaders have agreed with Soviet officials to build a multi-religion Christian center.

Officials of the Cape Cod Aquarium report they chased 46 whales back to sea and prevented them from becoming stranded on the beach. A resident called the aquarium a week ago and said the pilot whales were milling around in shallow water off Brewster, Massachusetts. Aquarium workers blew air horns and banged on their boats to scare off the whales. Three times the whales tried to swim to shore, but the workers led them into deeper water and to safety.

#90314u0575 11/10/1990 ~United Press International

CALCUTTA, INDIA (NOV. 10) UPI - Four Burmese hijackers released all the passengers on a Thai Airways jet they hijacked to India in an attempt to focus world attention on military repression in Burma, officials said.

All 204 passengers and 12 crew members aboard the hijacked Airbus plane were released after more than eight hours of negotiations between the Burmese student hijackers and Indian officials in the eastern Indian city of Calcutta.

''We do not intend any harm to the passengers or to the aircraft. We want the world to listen to our cries for liberty and democracy,'' said copies of a statement sent from the plane with the released passengers.

The passengers and crew were released after government officials promised the hijackers would be allowed to hold a news conference to press their demands for democracy in Burma.

Thai Airways flight TG305 was en route from Bangkok to Rangoon when the four hijackers, brandishing weapons, forced the pilot to fly to Calcutta, where the aircraft landed at Dum Dum airport at about 3:45 p.m., officials said.

An anti-hijacking squad and other security force units were deployed around the airport after the aircraft landed.

The hijackers initially threatened to blow up the plane if anyone approached the aircraft, the officials said. But later they said they did not intend to harm anyone and hijacked the plane to focus world attention on military repression in Burma.

The hijacking came while a U.N. official was in Burma to investigate human rights abuses.

Earlier this year, Burmese dissidents in Bangkok warned that if the military junta in Burma failed to restore democracy, incidents such as hijackings could be expected.

''We cannot rule out the possibility that the Burmese people will express their anger at the military's repression in even larger ways,'' said Tin Maung Win, general secretary of the Democratic Alliance of Burma, a grouping of more than 20 anti government organizations.

Officials said the hijackers had earlier demanded that six demands be met before the hostages would be released.

The demands included the immediate lifting of martial law in Burma, the cancellation of all military tribunals, the release of Burmese political prisoners and the restoration of democracy.

''We have been struggling for the last 25 years, but the world is not listening to us. Each time we have been answered by the bloody bullets of military oppression,'' said the statement.

The hijackers also demanded the release of two Burmese students imprisoned in a Thai jail for hijacking a plane last year.

The two students had hijacked a Burma Airways plane to Thailand, demanding that the military release all political prisoners and return the country to democracy.

The hijacking, like the latest one, ended peacefully with the release of the 83 people aboard. The two hijackers were sentenced to prison terms in Thailand.

Thai and Burmese officials were called to the airport Saturday to talk with the hijackers and a team of experts from New Delhi, including government officials and a psychologist, were dispatched to Calcutta.

The Burmese military crushed pro-democracy movements in 1988, killing more than 500 people.

The junta allowed elections in May, but after the main opposition party swept 80 percent of the seats in the Legislature, it has refused to allow the Legislature to meet and has arrested most of the party's leaders.

-30- 3686

#90314u0578 11/10/1990 ~United Press International

(NOV. 10) UPI - Secretary of State James Baker, finishing a foreign tour seeking a mandate for use of force against Iraq, met with French President Francois Mitterrand Saturday and affirmed the alliance against Iraq is ''solid.'' Baghdad meanwhile slammed Baker as a warmonger.

In Bonn, Germany, officials of the Social Democratic party said Soviet leader Mikhail Gorbachev told them in talks Saturday during a two-day visit to Germany that he wanted increased efforts aimed at finding a peaceful solution to the crisis.

''He was concerned that it was possible to determine the beginning of a military conflict, but not the consequences,'' party chairman Hans- Jochen Vogel said, adding Gorbachev appeared to believe that U.N. action against Iraq such as an economic embargo ''forms the basis for a political solution.''

U.S. military officials, for their part, reported a Marine was shot and killed while sleeping in his tent camp in Eastern Saudi Arabia. The Marine, a member of the 3rd Marine Regiment normally based in Hawaii, was struck by a bullet from another Marine's M-16 rifle on Friday afternoon.

The death of the Marine, whose name was withheld pending notification of relatives, was under investigation. Marines in the tent at the time were being questioned, according to a statement by the U.S. Central Command in Saudi Arabia.

Baker, wrapping up an eight-nation, seven-day tour of the Middle East and Europe, met for 90 minutes with Mitterrand Saturday. Before leaving Paris to return to Washington, he told reporters the international alliance confronting Iraq ''is solid, it is unified.''

The secretary of state, however, refused to say if France had agreed to join any military campaign against Baghdad. France's position has been in doubt, with a recent opinion poll showed 51 percent of French people are against the idea of going to war with Iraq, a traditional ally of France.

Baker arrived in Paris late Friday from London, where Prime Minister Margaret Thatcher said the military option would be used if Iraq remained in Kuwait. Paris was the last leg of a whirlwind quest for a mandate for the possible use of military force against Iraq.

Baker reportedly received reassurances from Britain, Saudi Arabia and Egypt that they are willing to go to war against Iraq if that is necessary.

Iraqi Foreign Minister Tariq Aziz, speaking at the end of Baker's tour, accused Baker of failing to raise the Palestinian issue during his Middle East-European tour. Aziz also slammed Washington for doing nothing to defend Lebanese sovereignty from Syrian intervention.

''Baker showed his true colors as a warmonger during his shuttle visits,'' Baghdad Radio quoted Aziz as saying. ''During these visits, he never once mentioned the numerous U.N. Security Council resolutions calling on Israel to withdraw from Arab lands.''

Aziz noted President Bush has said he is sending more troops for offensive purposes as part of the U.S.-led international force deployed in the Persian Gulf region after Iraq's Aug. 2 invasion of Kuwait.

As such, Aziz said Arab states like Egypt, Syria and Saudio Arabia ''can no longer hide behind the facade that they are defending peace ... for they are helping to prepare for war.''

Aziz, a Protestant Christian and one of Iraqi President Saddam Hussein's most faithful ministers, called on Arab states which have sent troops to the gulf to reconsider their position before it was too late ''if they really do not want to be a part of American designs for the region.''

And in Damascus, Syria - where Vice-President Abdulhalim Khaddam recently said Syrian troops in Saudi Arabia were deployed only to defend the kingdom and not to attack Iraq - three Arab foreign ministers continued talks for the second consecutive day Saturday.

The foreign ministers of Egypt, Syria and Saudi Arabia began talks on the crisis Friday and were to head for the Syrian Mediterranean resort of Latakia later Saturday to meet with Syrian leader Hafez al Assad.

Assad, vacationing in Latakia, has pledged to send as many as 20,000 Syrian troops and armor to Saudi Arabia. Egypt already has between 15, 000 and 20,000 troops in Saudi Arabia and the United Arab Emirates, and has pledged more troops and jet fighters.

''The three men are expected to discuss with Assad the options for resolving the gulf crisis,'' one Western diplomat said.

Baker, during talks earlier this week with Saudi leaders, formulated a provisional command structure in case of war, but Washington would still have to seek Saudi permission to attack Baghdad from Saudi territory.

In Amman, Chinese Foreign Minister Qian Qichen met Saturday with Jordanian leaders before planned talks in Baghdad with Saddam.

''These talks are crucial because (Qian) will probably be the last important politician from a country with a permanent seat on the Security Council to talk to Saddam, and explain to him the folly of his ways,'' Riyadh Radio said.

Amman Radio said Qian told reporters after talks with Jordanian Foreign Minister Marwan al Qassim that China opposed Iraq's occupation of Kuwait and was calling for intensified efforts to solve the crisis peacefully.

Qian, who arrived in Amman Friday from Saudi Arabia as part of a regional tour also said no draft resolution had been submitted to the United Nations to use

military force against Iraq. ''Such a draft resolution needs detailed consultations and cannot be tabled for a vote easily,'' he said.

-German politician Oskar Lafontaine of the Social Democratic Party called former Chancellor Willy Brandt's controversial trip to Baghdad, ''completely positive.'' Brandt, who met with Saddam this week, returned to Frankfurt Friday night with nearly 200 hostages formerly held by Iraq as shields against attack.

Brandt said after his arrival in Frankfurt that ''politics always fail when it is a question of all or nothing'' - apparently responding to criticism that such trips weaken the international alliance against Iraq. He added, ''I would still have been grateful if I had brought back only one.''

-Eleven Italians and three Portuguese were flown to the Jordanian capital of Amman Friday aboard an Iraqi airlines plane. All were employed in Iraq by Italian companies and said they did not know how they were selected for release by Iraqi authorities.

Arcadio Gramigni, one of the freed hostages, said the Italians were never treated badly by the Iraqis.

''But there is great tension,'' he said. ''There is fear that war could break out from one moment to the next, and the various movements of Iraqi armored troops in the streets of Baghdad testify to this.''

-In Cairo, more than 40 White House employees arrived in the Egyptian capital Cairo Saturday from Washington to prepare for Bush's arrival in Cairo on Nov. 21 during a tour of the region, state-owned Cairo Radio said. The report said the White House employees would coordinate with Egyptian officials on security protocol and other issues.

Bush and his wife Barbara are to spend Thanksgiving with American troops in Saudi Arabia on Nov. 22.

-In Riyadh, Saudi newspapers reported on King Fahd's promise to move toward greater democracy for the conservative kingdom. Riyadh Radio quoted Fahd, in power for eight years, as saying a final draft of plans to set up a central and provincial consultative council was being prepared.

-In the United Arab Emirates, Kuwait's exiled Defense Minister Sheikh Nawaf al Ahmad al Sabah attended a graduation ceremony for hundreds of Kuwaiti volunteers who spent time in military training to fight for their homeland.

-Egypt's outlawed Moslem Brotherhood meanwhile issued a statement calling the foreign troop deployment ''a threat to the Islamic nation and a boost for the Zionist enemy. We are opposed to Iraq's invasion of Kuwait, but we also oppose the presence of foreign troops in the region.'' The group, however, said it

would work for a peaceful solution to the crisis.

(NOV. 10) UPI - Attackers fired grenades at the U-S Embassy, and gunmen ambushed and killed three policemen in separate incidents in the Philippines today. Authorities say five men firing assault rifles from a four-wheel-drive vehicle sprayed the patrol car carrying the three policemen, then escaped with the officers' weapons in a Manila suburb. At the U-S Embassy, one grenade fell into Manila Bay behind the Embassy and exploded harmlessly. A second grenade landed in a driveway but did NOT go off.

Security sources in Lebanon say the pro-Syrian Shiite Amal militia began withdrawing from Beirut today, and Lebanese army troops began deploying in the capital. The regular army forces will oversee a plan to end 15 years of militia rule and re-unify the Lebanese capital city. The Amal fighters were seen heading for southern Lebanon in a convoy of cars and armored vehicles. Other militiamen are to withdraw to the Christian heartland in northern Lebanon.

Representatives of 12 nations are meeting in Indonesia today to try again to forge a peace agreement for Cambodia. Indonesian Foreign Minister Ali Alatas is hosting the conference and says any agreement will NOT be forced on the warring factions in the nation. The Cambodian government is NOT taking part. But the Indonesian host says the meeting is a preparatory stage to draft documents on which a peace agreement can be based.

The 15 members of the U-N Security Council watched an amateur videotape yesterday of the Temple Mount incident in Jerusalem. A Palestine Liberation Organization official says the tape contradicts an Israeli assertion that Moslem religious leaders incited the violence that claimed 19 Palestinian lives. Israel has refused to allow a U-N investigation of the incident, in which about 150 Palestinians were wounded.

President Bush met with his top budget advisers at the Camp David retreat in the Maryland mountains yesterday, looking over some gloomy economic predictions and beginning work on his next ''State of the Union'' address. White House spokesman Marlin Fitzwater says the president anticipates that the fourth-quarter economic forecast will show a downturn in growth because of the Persian Gulf crisis.

Police in Cairo are hunting a ''kiss-and-drive'' lawyer who gave his girlfriend a kiss in public and then nearly crashed his truck. An Egyptian Interior Ministry spokesman says the 28-year-old lawyer moonlights as a truck driver. He says the public kiss violated local laws in the predominantly Moslem state. Police spotted the wobbly truck and stopped it but the lawyer fled. Authorities say they are confident they will get their man. In the

spokesman's words- ''He won't get far. We have his truck and his girlfriend.''

MANAGUA, NICARAGUA (NOV. 10) UPI - Former Contras and police clashed in a southeastern town leaving six dead and 35 wounded, after civilians and former rebels constructed barricades and took over a police station, officials said Saturday.

The former rebels against the Sandinista-led government, who disbanded after reaching an agreement with the democratically elected government of President Violeta Chamorro in June, have been protesting violently throughout the country in the last few weeks. They say they have not received the economic aid and land promised to them in U.N.- backed demobilization agreements.

Interior Minister Carlos Hurtado said six people were killed and 35 wounded, including nine policemen in various clashes Friday between former Contras and police.

Former Contras opened fire Friday on police who tried to remove a barricade constructed by protestors in the town of Nueva Guinea, about 190 miles southeast of Managua, Hurtado said.

Ex-Contras and civilians also attacked Nueva Guinea's local police station.

''Former Contras and civilians of the town attacked a police station and were held back with gunfire,'' Hurtado said. ''Several people were killed or wounded including nine policeman.''

Armed former Contras also stormed the police headquarters in the town of La Concepcion, some 25 miles south of Managua, local radio reported.

''Former Contras have taken over the Sandinista police headquarters in La Concepcion,'' the radio station said. The ex-Contras also set up barricades and blocked roads surrounding the town.

No casualty figures were immediately reported.

#90314u0654 11/10/1990 ~United Press International

(NOV. 11) UPI - DIGEST:

Auto Racing

Grant King, a former owner of race cars in the Indianapolis 500, has pleaded guilty to federal charges related to auto theft and the sale of stolen

vehicles. King, 58, also told U.S. District Court Judge Sarah Evans Barker he would continue to cooperate with a federal investigation of a multi-state auto and truck theft ring.

Basketball

Dallas Mavericks forward Roy Tarpley will be out of action for about three weeks but X-rays revealed he did not suffer serious injury when he fell Friday night during a game against the Orlando Magic. Tarpley's right kneecap slipped out of place and he had to be carried from the court on a stretcher. ... The Minnesota Timberwolves acquired power forward Bob Thornton from Philadelphia for a 1991 second-round draft pick. Thornton, 6-foot-10 and 225 pounds, is a five-year NBA veteran out of California-Irvine. He has averaged 3.1 points and 2.6 rebounds per game while playing for the New York Knicks and Philadelphia. The Timberwolves released guard Jim Thomas to make room on the roster.

Bowling

Pete Weber of Florissant, Mo., captured his 15th Professional Bowlers Association title with a 213-206 win over Doug Kent of Canandaigua, N.Y., in the nationally televised finals of the $150,000 Toyota Classic Saturday at Richmond Heights, Mo. The hometown favorite, Weber earned the $27,000 first prize in his second triumph before a St. Louis crowd.

Boxing

The Association of Boxing Commissions of America voted to notify boxing's three major governing bodies it will not recognize the stripping of any of heavyweight champion Evander Holyfield's titles if he fights George Foreman as planned. The ABC is comprised of state boxing commissions from throughout the country and headed by Nevada State Athletic Commissioner Duane Ford. ... South Korea's Yoo Myung-woo successfully defended his World Boxing Association junior flyweight title for the 16th time with a unanimous 12-round decision over challenger Leo Gamez of Venezuela.

Golf

Defending champion Jose Maria Olazabal of Spain shot a 3-under-par 69 to take a five-stroke lead after three rounds of the $1 million VISA Taiheiyo Masters in Japan. Bernhard Langer of Germany also shot a 69 to move into a tie for second with Masahi Ozaki and Shigeki Maruyama.

Tennis

Boris Becker has a 50-50 chance of playing in next week's ATP Tour Championships because of his thigh injury, the German news agency DPA reported. Becker retired from the Paris Open final against Stefan Edberg last week after suffering the injury.

Weightlifting

The International Weightlifting Federation passed severe doping penalties at its meeting in Budapest, Hungary. As of Jan. 1, 1991, athletes tested positive for drugs will be given a life-long ban, and the athlete's national federation will be suspended from the IWF for one year. If more than one athlete from a country tests positive, the national federation will receive a two-year suspension.

NAPLES, Italy (NOV. 11) UPI - Pope John Paul II met the youth of Naples in the stadium of the Napoli soccer club Saturday at a rally marked by singing and dancing and a chorus of soccer crowd chants.

At least 60,000 young men and girls filled the San Paolo stadium to near-capacity and another 40,000 watched the pope on giant screens rigged up in public gardens outside the soccer ground.

The rally was the highlight of the second day of the pope's five-day visit to Naples and eight nearby cities. It was the longest single visit of the 93 trips John Paul has made inside Italy since he was elected head of the Roman Catholic Church in October, 1978.

As the pope drove into the stadium and made two circuits in his glass-topped ''Popemobile'' the crowd sang ''O Sole Mio'' and waved thousands of small white and yellow flags, the papal colors. There were also light blue flags, the color of the Napoli soccer team led by Argentine Diego Maradona.

While the pope watched from a platform, large groups of youths and girls performed Tarantella dances and a dance depicting the parable of the Good Samaritan, which was the theme of the rally.

The performances were accompanied by soccer chants from the grandstands. The crowd waved banners with slogans such as ''We have hope,'' a reference to the phrase ''Naples has need of hope'' which the pope uttered in his first speech after arriving in the poverty and crime-ridden city Friday.

In his speech at the stadium, the pope again referred to the scourge of violence by the Camorra - the Naples equivalent of the Sicilian Mafia - which has claimed nearly 200 victims this year.

''In modern culture, positive elements are mixed up with worrying symptoms of social unrest, an insidious crisis of values, of loneliness and many other signs of a widespread spiritual malaise,'' the pope said.

Listing various forms of violence in human behavior he said: ''It is violence to lead others into evil, by word and example, by hidden persuasion and with the promise of easy earnings.''

As the means of opposing ''such a culture of death,'' he urged solidarity in building the future of the poverty-ridden city.

''The protagonists of this action of renewal must be above all the young people, called upon to make themselves the builders of a new society,'' he said.

During the day, the pope also visited a plant of the Ansaldo steel company which makes trains and rolling stock for the state-run railroads, where he addressed 8,000 workers. He also toured offices of the Aeritalia aviation firm at Naples airport.

Sunday, John Paul is scheduled to visit the city's overcrowded Poggioreale prison and will hold an open-air mass in the central Piazza del Plebiscito.

#90314u0749 11/10/1990 ~United Press International

FREETOWN, Sierra Leone (NOV. 11) UPI - Leaders of Liberia's interim government were expected to arrive in the capital Monrovia Sunday to attempt to take control of the country torn by civil war and famine, sources said Saturday.

Thousands of Monrovians have been demanding the arrival of the interim leaders from nearby African states as the only way of beginning the reconstruction of the beleagured city.

The long-awaited arrival comes as the West African state faced growing problems of starvation and a total breakdown of administration in the capital, currently divided between rebels, government forces and the five-nation West African peacekeeping force sent to Liberia on August 24.

Bishop Ronald Diggs, the interim government's vice president, arrived in Monrovia aboard a Nigerian army helicopter Saturday. The interim president, Amos Sawyer, will arrive either by helicopter or aboard a Ghanaian naval gunboat on Sunday.

Sawyer was in the Ghanaian capital of Accra putting together the details of the interim administration before the government set up in exile nearly three months ago is installed in Monrovia.

Sawyer, whose government is made-up of Liberian politicians from political parties largely sent into exile by the late President Samuel Doe, faces a fresh military offensive by Charles Taylor's National Patriotic Front of Liberia.

Taylor's forces attacked the peacekeeping force in the town of Fendel Friday and appear to be making headway against the West African troops, witnesses said.

Sawyer's government is relying upon the peacekeeping force, which was sent by the Economic Community of West African States, to protect it in the event of attacks by Taylor's army. Taylor formed his own government three weeks ago

with himself as president and has refused to talk with the interim government.

Rival rebel leader Prince Johnson, meanwhile, said Friday he would not allow all the appointed members of the interim government to come with the new administration. Johnson, whose forces control half of Monrovia's city center, appears to have refused entry to two members of the interim government who he considers to have been too close to President Doe.

Gbai Bala, a leading member of Doe's National Democratic Party and Bacchus Matthews, a former foreign minister under Doe, have both been told by Johnson not to return to Liberia.

Johnson controls the port area as well as the hotel where the interim government is expected to stay. His refusal to allow the two members to take up their places in the administration is a blow to the new government.

Relations between Johnson and the new government are expected to be difficult, according to local political observers. The rebel leader has insisted the Doe forces still in the Executive Mansion and the nearby Barclay Barracs should be removed so that his forces can become the new Liberian army.

There are currently up to 5,000 people living in Doe's former mansion and the barracks, most of them Doe loyalists and members of his Krahn Tribe. Johnson's forces captured, mutilated and tortured Doe to death Sept. 9.

#90314u0772 11/10/1990 ~United Press International

BEIRUT, Lebanon (NOV. 10) UPI - Shiite Moslem militia fighters abandoned positions in and near Beirut Saturday and withdrew from the city as Lebanese army troops sought to establish a militia-free unified Beirut, witnesses and sources said.

The pro-Syrian Shiite Amal gunmen evacuated all military positions in Beirut's southern suburbs, but rival Hezbollah fundamentalists maintained visible military presence in the mainly Shiite region, witnesses said.

A convoy of 40 military vehicles, including jeep-mounted cannons and rocket launchers, and 100 Amal gunmen rolled southward along the coastal highway, the witnesses said. They said the force retreated to the militia's main bases in southern Lebanon.

Amal chief Nabih Berri, who described the plan ''as a golden line in Lebanon's history,'' said Friday he gave orders to his militiamen to gather their light and heavy weapons and leave Beirut.

Amal sources said the movement, Lebanon's largest Moslem militia, would keep open some 20 offices in the city for securing what they called social services.

Lebanon's various militia groups have provided medical and social services throughout 15 years of civil war because of the absence of government public activities.

Simultaneously, the Druze Progressive Social Party evacuated positions in the town of Choueifat, 7 miles southeast of Beirut. Witnesses said six military trucks, laden with cannons and ammunition, were seen moving to the Druze-inhabited Shouf Mountains.

In the east Beirut neighborhood of Ashrafiyeh, Christian militiamen loyal to Samir Geagea clad in khaki military fatigues and totting automatic guns roamed roads and alleyways.

''We are ready to pull out of east Beirut,'' said Eddy Abi Al Lamaa, the militia spokesman, in an interview at the LF main barracks near the militia-policed Beirut port.

''It's up to the government to set the zero hour for dissolving all militia manifestations,'' Lamaa said. ''We have good intentions and we will respond positively.''

A general atmosphere of relaxation prevailed throughout the eastern sector of the city, but marks of damage inflicted by two destructive rounds of violence remained visible.

Deposed Christian Gen. Michel Aoun had launched two military operations against the Syrians and Geagea's militia after he seized power in September 1988.

Aoun, who was ousted by a Syrian-Lebanese force Oct. 13, has taken up refuge at the French Embassy. The government had called on France to hand him over to face trial, but Paris rebuffed the request.

Heavy traffic jammed several roads in Ashrafiyeh as civilians shopped from vegetable stands, groceries and butcher shops.

Christian political sources said army troops of Gen. Emile Lahoud earlier Saturday took over six buildings occupied by gunmen loyal to the breakaway Lebanese Forces militia of Elie Hobeika in the Metn area.

The troops would expand their deployment to Ashrafiyeh and the port region within a few days, the sources said.

Hobeika was toppled by Samir Geagea in 1986 after he signed a Syrian-sponsored peace treaty with rival Moslem militias to end the civil war.

The Cabinet announced Wednesday that a demilitarization plan - called

''Greater Beirut'' - will establish a militia-free and unified Beirut.

President Elias Hrawi had said the government-controlled 9-to-16-mile zone was scheduled to stretch from the Kalb River, 8 miles north of Beirut, to the town of Damour, 11 miles south of the capital.

According to the plan, army troops were to shut down all militia offices and buildings occupied illegally by gunmen.

Official sources said confiscating arms will go along with disbanding militias which should be completed by March 21, 1991.

''By midnight Nov. 19, all militias should have completed withdrawal from Greater Beirut area and handed over bases to Army regulars,'' said a Defense Ministry source.

Defense Minister Albert Mansour said Friday the government would not hesitate to call in Syria's military help if the Lebanese Army meets resistance from the warring Christian and Moslem militias.

#90314u0854 11/10/1990 ~United Press International

(NOV. 10) UPI - Secretary of State Baker today declined to say whether France has agreed to join any military campaign against Iraq in the Persian Gulf. But Baker told a news conference after talks with French officials in Paris that a ''strong consensus'' exists among allies in Operation Desert Shield in Saudi Arabia. Baker wrapped up a week-long trip to eight nations in Paris, where he boarded a plane for the flight back to Washington, D-C.

The Iraqi foreign minister, meanwhile, attacked Baker as a ''war- monger'' and blasted him for NOT raising the Palestinian issue during his trip. Iraqi Foreign Minister Tariq Aziz also slammed the United States for doing nothing to defend Lebanese sovereignty against Syrian intervention.

Four Burmese students hijacked a Thai Airways jetliner on a flight from Bangkok, Thailand, to Rangoon, Burma, today and ordered the plane to land at Calcutta Airport in India. The hijackers threatened to blow up the plane to back their demand for the restoration of democracy in their homeland. The Press Trust of India news agency reports that the sky pirates released 25 of the 205 passengers on board the plane on what are termed ''compassionate grounds.'' The demands reportedly include the immediate lifting of martial law in Burma and the release of all Burmese political prisoners.

Dissident leader Chandra Shekhar took the oath of office today as the eighth prime minister of India. The solemn ceremony in New Delhi came three days after the resignation of V-P Singh, the man Shekhar drove from office.

New Pakistani Prime Minister Nawaz Sharif announced the portfolios of his Cabinet members today. The assignments put officials from the regime of the late military president Mohammad Zia-ul Haq in key ministries.

The State of Alaska announced that Arco Alaska, Incorporated, had agreed to pay a 200-thousand-dollar fine for spilling oil on fragile tundra and to explore better ways of cleaning up such spills. The agreement announced yesterday covered the spill of 25-thousand 200 gallons of crude oil on one-point-four acres of tundra in August 1989.

#90314u0883 11/10/1990 ~United Press International

NEW YORK (NOV. 11) UPI - The Daily News denied Saturday it was recruiting the homeless to sell newspapers during a bitter strike begun more than two weeks ago.

Numerous press reports in the past week dubbed the strikebound tabloid, ''New York's homeless paper'' and said the News had been recruiting at city homeless shelters.

The reports said the publication's management was giving away bundles of newspapers to the homeless, as well as handing out subway tokens to shelter residents and telling them to report to the newspaper's East 42nd Street headquarters.

Homeless advocates have spoken out against the practices, decrying the pitting of those without homes against strikers without jobs.

''This is the lowest form of exploitation possible,'' said Mary Brosnahan, executive director of the Coalition for the Homeless.

Lisa Robinson, a spokeswoman for the tabloid's management, Saturday repeated a statement she made a week earlier, saying, ''We are not targeting the homeless. We have not gone into shelters. The Daily News is not doing that.''

But, she added, ''I'm not sure why anybody would have any problem with anybody who wants to make extra money selling Daily News (copies).''

The News, whose workers struck Oct. 25, cannot be found on most newsstands around the city, with news dealers citing either fear of striker retribution or support for the striking workers.

The News management has charged the unions are condoning striker violence, but the unions say the newspaper's specially hired security guards are creating trouble.

On Friday, one guard was arrested and charged with assault after a union

supporter said she and five other women were assaulted by men in the black jumpsuits worn by the News security forces.

The woman, Estela Vazquez of the hospital workers union Local 1199, said the women had paid a homeless vendor $60 for his unsold stack of Daily News copies and were tearing up the papers and dumping them in a trash basket when they were attacked.

#90314u0934 11/10/1990 ~United Press International

WARSAW, Poland (NOV. 10) UPI - An exhibition in memory of Marshal Jozef Pilsudski, the first leader of an independent Poland, opened Saturday under the patronage of Solidarity chairman and presidential candidate Lech Walesa.

The exhibition is a part of Nov. 11 independence day observances held for the first time since communists seized power in Poland in 1944.

Walesa, chairman of the exhibition's organizing committee, was not present at the opening ceremony due to presidential campaign meetings he had scheduled in Lodz, 75 miles from Warsaw.

Stefan Melak, one of the exhibition organizers said that, when asking Walesa's patronage, the committee had in mind historical parallels between the current presidential campaign and the times when Pilsudski was in power.

However, the exhibition was also viewed as supporting Walesa's candidacy.

Walesa, Prime Minister Tadeusz Mazowiecki and four minor candidates are competing in Poland's first free presidential elections Nov. 25 after former communist Gen. Wojciech Jaruzelski yielded to calls for his resignation.

#90314u0944 11/10/1990 ~United Press International

PRAGUE, Czechoslovakia (NOV. 11) UPI - Czechoslovak leaders met privately Saturday in an attempt to reach a compromise on dividing powers between the federal government and the Czech and Slovak national governments.

The hastily scheduled two-day meeting in the western Slovak city of Modra brought together the premiers of the three governments with representatives from the major political parties in an effort to solve the divisive question.

At issue is an agreement reached last Monday by the premiers to transfer much of the federal government's regulatory, administrative and taxation powers to the Czech and Slovak national governments.

The compromise would give most powers to the republics, leaving the federal

government with responsibility only for defense, central economic policy, foreign affairs, transportation and energy and raw materials.

But some federal government ministers fear the compromise strips the federal government of too much power, as well as necessary tax and other revenues.

If a new compromise cannot be reached, Prime Minister Marian Calfa could lose his government's support, precipitating a government crisis, say other politicians.

At a break in the discussions, federal Finance Minister Valclav Klaus told journalists he was certain the meeting would end positively for all.

''It is not necessary to dramatize the current situation. Everybody is searching for a pragmatic transitional solution,'' said Klaus.

#90314u1106 11/10/1990 ~United Press International

MIAMI (NOV. 11) UPI - A federal appeals court Saturday refused to overturn an injunction prohibiting Cable News Network from airing taped telephone calls former Panamanian Gen. Manuel Noriega made from jail to his attorneys.

The 11th U.S. Court of Appeals in Atlanta issued an 18-page ruling, denying CNN's contention that it had a constitutional right to air the tapes secretly recorded by the government.

CNN President Tom Johnson said the network would appeal the decision to the Supreme Court.

U.S. District Judge William Hoeveler Thursday issued a temporary injunction barring broadcast of the tapes just hours after CNN aired segments of seven tapes it obtained. Hoeveler extended the injunction to 10 days after CNN on Friday aired more of the tapes during its ''The World Today'' program.

Noriega's lead defense attorney, Frank Rubino, said airing the tape breaches the confidentiality of attorney-client conversations. He also said making the tapes public would jeopardize a fair trial for Noriega, charged with drug trafficking.

Asked what action he would take against CNN for violating the injunction, Hoeveler told reporters outside of court there were a variety of measures available, including fines.

Rubino Saturday asked Hoeveler to declare CNN in contempt of court for airing

the tapes. But before Hoeveler could rule on the contempt issue, CNN filed a motion asking Hoeveler to remove himself from the portion of the Noriega case dealing with the tapes. CNN attorneys said Hoeveler prejudiced himself by speaking to reporters about the case.

''We are surprised that Judge Hoeveler has commented outside the courtroom on CNN coverage and his considerations concerning possible contempt proceedings '' Johnson said.

Hoevler said he would let the chief judge decide whether his comments to the reporters were inappropriate.

The segment of the tape played Friday contained a discussion between Noriega and a legal secretary in Rubino's office, during which Noriega discussed witnesses in his case.

''Fortunately, they played a very small portion of that conversation, '' Rubino told The Miami Herald. ''That doesn't make it right. But there is no question that they violated the court order.''

Rubino also said he will request that drug charges against Noriega be thrown out, because the government tapes violate Noriega's constitutional rights to client-attorney confidentiality and a fair trial.

Justice Department officials have denied taping any privileged conversations. It is government policy to record all inmate phone conversations, except those between prisoners and their attorneys.

Rubino also revealed Friday that his law firm's investigation into how CNN obtained the tapes indicates the news network got them from the Panamanian government, which had received them from the State Department.

He said the State Department acquired copies of all tapes of Noriega's phone conversations from the Metropolitan Correctional Center, where he is being held pending trial on cocaine trafficking charges.

The State Department gave them to the Guillermo Endara government in Panama, which in turn made them available to a CNN reporter, Rubino said.

The State Department would not comment on Rubino's allegations.

Rubino would not reveal the sources of his information, but said he believed they were reliable. If the information is proven true, it should be grounds for a mistrial, said Rubino.

A 1988 Miami federal indictment against Noriega and 15 other defendants charges them with providing a drug trafficking and money laundering sanctuary for South American drug smugglers. A simultaneous indictment in Tampa accuses

him of conspiring with a smuggler to import more than a million pounds of marijuana.

He surrendered in the Dec. 20, 1989, U.S. invasion of Panama and was brought to Miami to stand trial, which is scheduled to begin Jan. 28. If convicted in Miami, he faces a maximum penalty of 145 years in prison and a $1.1 million fine.

#90314u1140 11/10/1990 ~United Press International

(NOV. 11) UPI - So much for the Rose Bowl having any influence on the national championship race.

Both No. 2 Washington and No. 5 Iowa suffered their second losses of the season Saturday, relegating the granddaddy of the bowls to also-ran status and leaving the Orange Bowl as the likely site to decide the national title.

Greg Frey threw a 3-yard touchdown pass to Bobby Olive with one second to play lifting co-No. 24 Ohio State to a 27-26 victory and handing Iowa its first Big Ten loss. At Seattle, Brad Daluiso kicked a 43-yard field goal with 10 seconds left, giving UCLA a 25-22 upset over Washington.

Daluiso's game-winning kick killed any national-title hopes for the Huskies, 8-2, who were hoping to win their last two games while top- ranked Notre Dame stumbled down the stretch.

''The national championship is dead,'' Washington Coach Don James said.

The winning kick set up by Eric Turner's interception at midfield and a 21-yard pass from redshirt freshman Tommy Maddox to Sean LaChapelle.

Maddox engineered the win, which improved the Bruins to 5-5 overall and 4-3 in Pacific-10 Conference play. The redshirt freshman completed 23 of 41 passes for 239 yards and two touchdowns.

''I knew if you just keep working hard, good things are going to happen,'' Maddox said. ''We just said we're going to play 60 minutes and let the outcome be what it is.''

UCLA Coach Terry Donahue said Maddox ''has never acted like a freshman. I've never been around a player who handles pressure like he does.''

Maddox's favorite traget was Scott Miller, who caught 7 balls for 92 yards.

The Huskies, 6-1 in conference play, rallied to tie the score 22-22 with 2:36 remaining.

The Huskies, frustrated by the UCLA defense throughout the game, got a break on Miller's fumble of a punt and Washington's recovery at the UCLA 37 with just over three minutes to go.

On fourth-and-5, Mark Brunell lofted a pass over the middle to Mario Bailey, who slipped out of a hold by Turner, caught the ball while backpedaling and tumbled into the end zone for a TD.

After the ball was moved half the distance to the goal because of pass interference against Turner, Brunell scored from 1 yard out for a two-point conversion.

The Huskies regained possession after stopping the Bruins on downs, but Turner picked off a Brunell pass at midfield and LaChapelle put the Bruins in position to win with a catch down the right sideline for 21 yards. Daluiso's game-winner came three plays later.

At Iowa City, Iowa, the Hawkeyes likely wished they had saved some points from last week's 54-28 victory over Illinois.

''We had them on the ropes but we couldn't put them away,'' Iowa Coach Hayden Fry said. ''We'll bounce back.''

Olive's last-second score was the only lead of the game for the Buckeyes, who trailed 26-14 at one point in the fourth quarter.

''I'm extremely proud of this team,'' Ohio State Coach John Cooper said. ''I don't think I've been around a better comeback than we had today.

''At the end of the game it was our two-minute drill. Frey completed a couple of big passes and then he found Bobby (Olive) open and Bobby made that great catch.''

The Buckeyes took over on the Iowa 48-yard line with 59 seconds remaining. Frey completed 4 of 6 passes in the game-winning drive, culminating in Olive's second TD reception of the game.

Despite the loss, the Hawkeyes remain the Big Ten front-runners for the Rose Bowl, thanks to No. 17 Michigan's 22-17 victory over No. 15 Illinois.

--- AROUND THE COLLEGE SCENE ---

Elsewhere Saturday in the Top 10, No. 1 Notre Dame outlasted No. 8 Tennessee 34-29, No. 3 Colorado blasted Oklahoma State 41-22, No. 6 Brigham Young ripped No. 21 Wyoming 45-14, No. 7 Georgia Tech nipped Virginia Tech 6-3, No. 9 Virginia beat North Carolina 24-10 and No. 10 Nebraska crushed Kansas 41-9.

Also, No. 11 Florida State overwhelmed Cincinnati 70-21, No. 13 Auburn fell to

Southern Mississippi 13-12, California upended No. 18 Oregon 28-3, No. 19 Penn State defeated Maryland 24-10 and No. 20 Louisville held off Boston College 17-10.

In night games, No. 12 Texas was at home against Houston, No. 23 Fresno State welcomed Pacific and co-No. 24 Arizona played host to Stanford.

No. 4 Miami, No. 14 Mississippi, No. 16 Clemson and No. 22 Texas A&M were idle this week.

At Knoxville, Tenn., Ricky Watters rushed for a career-high 174 yards and two touchdowns and Rod Smith intercepted a pass at the goal line with 46 seconds left for Notre Dame. Raghib Ismail added a 44-yard TD run for the Fighting Irish.

At Boulder, Colo., Darian Hagan passed for a school-record four touchdowns and Eric Bieniemy ran for 148 yards and a TD for Colorado. Bieniemy, who carried 22 times, set a school single-season rushing record with 1,513 yards and improved his own school career rushing record to 3,825 yards.

At Laramie, Wyo., Ty Detmer recorded his 21st consecutive 300-yard passing game and Peter Tuipulotu ran for three touchdowns to lead Brigham Young. Detmer completed 35 of 50 passes for 484 yards, including TD passes of 13 yards to Mike Salido and 26 yards to Andy Boyce.

At Atlanta, Scott Sisson kicked his second straight game-winning field goal with eight seconds remaining to lift Georgia Tech over Virginia Tech. The field goal was Sisson's second of the game, coming after two misses earlier.

At Chapel Hill, N.C., Shawn Moore passed for 236 yards and two touchdowns to lead Virginia. One of the scoring passes was to wide receiver Herman Moore, who set an NCAA season record with at least one TD reception in nine straight games. The receiver finished with five receptions for 99 yards.

At Lawrence, Kan., Johnny Mitchell caught touchdown passes of 35 and 28 yards and Scott Baldwin scored on runs of 67 and 2 yards to boost Nebraska. The Cornhuskers defeated Kansas for the 22nd consecutive season in posting their 22nd straight nine-victory year.

At Tallahassee, Fla., Lawrence Dawsey caught two scoring passes and Amp Lee and Paul Moore each ran for two touchdowns to lead Florida State. Terrell Buckley scored on an 83-yard interception return and set up another Seminoles touchdown with a 50-yard punt return.

At Auburn, Ala., Brett Favre threw a 10-yard touchdown pass to Anthony Harris with 46 seconds to play for Southern Mississippi. The Golden Eagles overcame a 12-0 lead with two fourth-quarter TDs.

At Ann Arbor, Mich., J.D Carlson kicked a school record-tying five field goals and freshman Ricky Powers rushed for 113 yards to lead Michigan. Carlson kicked two 18-yard field goals, a 19-yarder, a 28- yarder and added a 51-yard kick at the end of the first half.

At Berkeley, Calif., Anthony Wallace scored on runs of 6 and 63 yards and the California defense forced five turnovers to upset Oregon. Ducks quarterback Bill Musgrave missed most of the game after reinjuring his right shoulder.

At University Park, Pa., Leonard Humphrie returned an interception 74 yards for a touchdown and Tony Sacca's 30-yard scoring pass to David Daniels snapped a third-quarter tie for Penn State. Leroy Thompson ran for 132 yards for the Nittany Lions.

At Louisville, Ky., Mark Sander returned an interception 29 yards for a touchdown and Louisville picked off four other passes to beat Boston College. Louisville improved to 9-1-1, their best record since Lee Corso's 1972 team went 9-1.

LIMA, Peru (NOV. 11) UPI - The U.S. Embassy warned Americans Saturday to avoid downtown Lima near government buildings, foreign embassies, and popular restaurants and night spots because of increased terrorism.

The warning noted this weekend is the American Veterans Day national holiday weekend and urged U.S. citizens in Peru to stay away from places ''where foreigners gather ... because of the increased MRTA violence ... at or near U.S. facilities and locations frequented by American citizens.''

The leftist MRTA, or Tupac Amaru Revoluntionary Movement, is Peru's second largest insurgency. It is based mostly in urban areas and is known to plant bombs and kidnap prominent businessmen.

Peru's largest rebel group, Shining Path or Sendero Luminoso, is also the hemisphere's most fanatic insurgency. It has extended along the spine of the Andes and into major cities since its first violent act ten years ago.

Shining Path's guerrillas consider themselves the vanguard of Maoist world revolution and, in the central jungle, some of its rebels are believed allied with cocaine traffickers.

Peru is the world's No. 1 grower of coca, the raw ingredient used in making cocaine, and the source of 60 percent of cocaine smuggled into developed countries, experts say.

Official estimates show more than 19,000 people have died in political

violence in Peru since 1980.

LOS ANGELES (NOV. 10) UPI - Two movie stuntmen working on a new Disney film were injured early Saturday when a routine stunt went awry on a set near the Griffith Park Observatory, police said.

One man, Jim Maderas, 46, was in critical condition with a head injury following the 3 a.m. accident in which he fell and struck a tree. He was scheduled to undergo several hours of surgury, a spokeswoman at County-USC Medical Center said.

The other man, Michael Sorna, 25, was in fair condition with cuts on his face suffered during a 25-foot fall.

The two were filming a chase sequence near the Observatory for the new Disney film, ''The Rocketeer,'' when the accident occurred. To give the effect of being chased, the pair was being pulled by an invisible cable attached to an off-camera truck, police Sgt. John Johnston said.

One of the stuntmen was wearing a special-effects rocket pack on his back that the other was pretending to grab as they skimmed across the grass. The pair crashed through a balsa wood fence as planned, but a mattress that was intended to break their fall instead sent them up in the air and over an incline.

The men fell an estimated 25 feet into a wooded area adjacent to the Observatory. Sorna landed in bushes and Maderas hit a tree, police said.

Johnston said the stunt appeared to be a fairly routine movie special effect.

''It's just a miscalculation of a stunt,'' Johnston said.

Disney representatives could not immediately be reached for comment.

TEHERAN (NOV. 11) - Iran is to stage joint air-sea military exercises in the Gulf next month to prepare in case of war in the region, the Iranian navy's commander announced here Sunday.

Rear Admiral Ali Shamkhani said the ten-day manoeuvres, code-named "Victory," would start on December 12.

Around 50 missile-boats, frigates and gunboats, as well as helicopters and hundreds of speedboats, are to take part in what he called Iran's largest ever joint air-sea exercises.

The manoeuvres will cover a zone of 30,000 square kilometres (12,000 sq. miles), including Iranian islands opposite the United Arab Emirates in the southern Gulf, the Strait of Hormuz and the Gulf of Oman.

"The aim of the military games is to keep the armed forces ready with a view to any unexpected situation in the region with regards to the mass presence of foreign naval fleets," Rear Adm. Shamkhani said.

The Iranian news agency IRNA also quoted him as denying "rumours that Iran was collaborating with one of the parties involved in the Persian Gulf crisis."

A U.S.-led multinational force deployed in the Gulf following the Iraqi invasion of Kuwait on August 2. The main task of foreign navies to date has been to help implement an international trade embargo against Iraq.

CAIRO (NOV. 11) - The Egyptian foreign ministry Sunday urged Israel to pull out its troops from southern Lebanon in accordance with United Nations Security Council resolution 425 passed in 1978.

The country's news agency Mena quoted a communique as saying Egypt was ''very concerned'' about a statement by Israeli Defence Minister Moshe Arens, who said Israel would not allow the Beirut government to extend its authority to areas it (Israel) occupies in southern Lebanon.

Arens said last Thursday in the Israeli self-proclaimed ''security zone'' in southern Lebanon that Israel would prevent the Lebanese army from taking control of areas it occupies as long as the security of its northern border was not guaranteed.

The minister was speaking after inspecting Israeli positions and units of the Israeli-backed militia South Lebanon Army, which is led by renegade Lebanese Christian army general Antoine Lahad.

The Egyptian foreign minisry said Arens' statements showed that Israel was using the excuse of its security in order to refuse an Israeli withdrawal from southern Lebanon.

The Lebanese government must be supported in its bid to implement the Taif peace accord, which was signed by a majority of Lebanese deputies in Saudi Arabia last year. The Egyptian ministry pointed out that this peace agreement included an Israeli pullout from southern Lebanon.

COPENHAGEN (NOV. 11) - The Danish Progress Party, the right-wing group known for its strong stance against taxes, broke up Sunday when the party's founder Mogens Glistrup announced the establishment of a new party.

The Progress Party has 16 seats in parliament and between 2 and 5 of its Mps were expected to follow Glistrup into his new party, to be called ''The Party of Well-Being''.

The decisions were taken Saturday at a secret meeting between Glistrup and some 60 members of the Progress Party. Glistrup, the party's honorary chairman for life, had been involved in a power struggle with its present political leader, Pia Kjaersgrd. She favours a more moderate profile.

Glistrup founded the Progress Party in 1971 on a wave of tax discontent. At the time he owned Denmark's largest law firm, specialising in tax cases. His party made a landslide entry into the Danish parliament, the Folketing, in 1973, gaining the second largest number of seats.

In 1983 he was sentenced to three years in prison for tax fraud, and expelled from parliament. After serving 18 months of his sentence, he was released in 1985, and re-elected to the Folketing in 1987.

BAGHDAD (NOV. 11) - Chinese Foreign Minister Qian Qichen arrived in Baghdad Sunday for talks with Iraqi officials on the Gulf crisis, Baghdad Radio reported.

It said Qian, who was received at the airport by Iraqi Foreign Minister Tarek

Aziz, will stay for two days in Baghdad.

The Chinese foreign minister is expected to meet Iraqi President Saddam Hussein to discuss ways of promoting a peaceful settlement to the Gulf crisis spawned by Iraq's August 2 invasion of Kuwait.

Qian had come from Amman where he discussed the same issue with Jordan's King Hussein and Foreign Minister Marwan Qasem.

Iraq is the last leg of Qian's four-nation tour which included Saudi Arabia and Egypt where he also conferred on the Gulf crisis with U.S. Secretary of State James Baker.

Qian said before a scheduled meeting with Saddam that it was too early to determine if China would support a U.N. Security Council resolution to use force in the Gulf crisis.

He told reporters before leaving Amman that China opposed the Iraqi occupation of Kuwait and supported intensified efforts to find a peaceful solution to the crisis.

#90315d4220 11/11/1990 ~French/German News Agency

LONDON (NOV. 11) - Iraqi President Saddam Hussein said in an interview with ITN television here Sunday that he was ready for comprehensive talks on security in the Middle East.

Questioned on whether Iraq would leave Kuwait, Mr. Hussein said, "We are ready to enter into deep dialogue as to the requirements for security in our region."

"We are confident that these parties will reach serious and deep solutions to all the issues, in the forefront of which will be the Palestinian question."

Mr. Hussein also said the whole world disagreed with British Prime Minister Margaret Thatcher over the issue of Iraqi compensation for damage caused in Kuwait after the August 2 invasion.

"Mrs. Thatcher says this -- has she consulted with the world, which she says is against us? Has she consulted the world before she made this statement against us?" Mr. Hussein asked.

The Iraqi president said there was no support in the world for that view.

The interview was to be broadcast by CNN television late Sunday.

#90315d4230 11/11/1990 ~French/German News Agency

JERUSALEM (NOV. 11) - About 10,000 Palestinans from the Israeli-occupied territories will be banned in a few weeks from entering Israel for an indefinte time, a senior Israeli official said here Sunday.

The head of the administration in the occupied West Bank and Gaza Strip, Shmuel Goren, said these persons were connected with acts of violence or had been conviced.

An estimated 130,000 Palestinians from the territories work inside Israel's pre-1967 borders. Most of them earn less than Israeli citizens and many have been hired illegally.

Goren said the planned move aimed at cutting down the number of Palestinian attacks in Israel. Eleven such attacks have been carried out during the past

three weeks in Israel and Jerusalem.

A palestinian knifed an Israeli policeman and seriously injured him in Jerusalem's Old City Saturday. Another Arab tried to kill his Israeli employer with an axe in Jerusalem the day before.

A wave of knifing against mainly Israeli security forces in Israel and Jerusalem began shortly after Israeli forces killed between 16 and 21 Palestinians on the Temple Mount in annexed Arab East Jerusalem on November 8.

These actions were ordered by the underground Palestinian uprising (Intifada) leadership, which is linked to the Tunis-based Palestine Liberation Organization.

Goren claimed the current wave of violence was connected to a rise of Islamic fundamentalism in the West Bank.

#90315d4290 11/11/1990 ~French/German News Agency

TOKYO (NOV. 11) - An age-old Japanese tradition will be enacted before a worldwide audience Monday, when the 56-year-old Emperor Akihito solemnly declares his accession to the Chrysanthemum throne.

On his way to becoming Japan's 125th emperor, Emperor Akihito, the eldest son of the late emperor Hirohito who died in January 1989, will take his place on the throne at one p.m. (0400 GMT) and deliver his first imperial address.

The emperor, dressed in traditional costume from the Heian era (794-1185) will have by his side the Emperess Michiko, wearing a 12-ply kimono and sitting on a slightly smaller throne.

The ceremony, in front of 2,500 guests including 500 foreign dignitaries and their wives, should not last more than half-an-hour. Many of those invited will have to watch the event on televisions due to the scarcity of seats in the main hall.

The greatest care has been taken with the preparations for the enthronement, the first under Japan's post-war constitution that made the emperor a purely symbolic figurehead instead of the "living god" of the past.

During Emperor Hirohito's enthronement in 1928, the prime minister paid homage from the bottom of the staircase leading to the throne, which was set in an octagonal structure with a black, gilded roof, decorated with a magnificent phoenix.

This time, however, Japanese Prime Minister Toshiki Kaifu will stand level with Akihito when he hails him by calling "banzai" three times.

The rest of those present will then echo the cry which means "Long Live The Emperor."

That seemingly unimportant detail has sparked a long debate, with opposition groups attacking the "banzai" ritual for its military overtones -- it was the Imperial Japanese army's war cry in World War II.

The official ceremony of enthronement clears the way for seven banquets and about 20 Shinto rites, culminating late November 22 with the overnight ritual of "daijosai."

-30- 2129

#90315d4320 11/11/1990 ~French/German News Agency

BONN (NOV. 11) - In just two days last week, Chancellor Helmut Kohl laid what he hopes will be the foundations for a rebirth in relations between newly united Germany and eastern Europe.

On Thursday, he met with Prime Minister Tadeusz Mazowiecki of Poland and vowed to speed the signature of a treaty to recognise the Oder-Neisse line, the Polish-German border that is bitterly contested by Germans expelled from eastern territories after World War II.

The following day, he and President Mikhail Gorbachev signed a 20-year treaty of "Neighbourship, Partnership and Cooperation" -- effectively a non-aggression pact that aims at removing any lingering Soviet fears of German nationalism.

The message, to the two countries that were the biggest victims of Nazism, was clear: Germany is stable and democratic, a guarantor of European peace, and a rugged source of support for eastern economies.

But many doubts and anxieties lie behind the shining rhetoric, the banquets and champagne toasts.

The main one: that the Soviet Union will unravel way before the great treaty comes up for renewal.

As summarised by the liberal weekly Die Zeit on the eve of Mr. Gorbachev's visit: "There is no Soviet Union any more. What does his signature represent?"

The perception of many in the West is that the Soviet Union teeters on the brink of chaos, as its component republics demand ever-increasing doses of sovereignty and the centralised command economy breaks down.

Mr. Gorbachev could be left behind, a tragic, empty figure, using his new presidential powers himself to issue decrees that no one obeys anymore.

As he said goodbye to Mr. Gorbachev, Mr. Kohl made a little pitch for Soviet unity, describing the Germans and Soviets as "two great peoples" destined for a greater role in world politics.

But German officials express worry at how the future cooperation is to work out in a country where traditional central authority is splintering.

Another concern in Bonn, and in German business circles, is the task of righting the eastern European economies at a time of stringency.

Faced with rising energy costs triggered by the Gulf crisis, and burdened with the bill of German unification, Mr. Kohl made it clear that, for the time being at least, his purse-strings have been drawn tight.

He has already promised more than 20 billion marks (13.3 billion dollars) this year to secure the Soviet military withdrawal from East Germany.

He met Mr. Gorbachev's repeated, though muted, appeals for help with vague commitments and a pledge to send a "high-level team" of experts to review the Soviet Union's progress towards a market economy.

German industrialists and other political leaders did not mince their words Saturday, warning that the Kremlin must not be half-hearted in its reform effort.

Social Democrat election challenger Oskar Lafontaine warned Mr. Gorbachev that foreign investors would only put their money in the Soviet Union when modern infrastructure was in place, and they were reassured about the future of their investment.

A representative of German industrialists, Otto Wolff von Amerongen, told deputy premier Stepan Sitarian: "The harder you push, the better."

Hinting at widespread skepticism amongst German traders, he downplayed any perspective of an upswing in commerce with the Soviet Union.

"We'll be lucky if trade levels continue as they are," he said.

#90315d4350 11/11/1990 ~French/German News Agency

PARIS (NOV. 11) - Paris's shiny new opera house at the Bastille launches its first real season on Tuesday -- while still struggling to overcome the technical and staffing problems that have plagued it since its official inauguration last year.

The imposing glass and concrete structure was inaugurated by French President

Francois Mitterrand and a host of world leaders in July last year, amid celebrations marking the 200th anniversary of the storming of the Bastille prison -- which stood nearby.

But since well before that gala opening, the new opera has been stumbling from crisis to crisis, with the dramatic sacking of its musical director,

industrial conflicts and now the replacement of the director-general just ahead of Tuesday's opening of "Otello" starring tenor Placido Domingo.

In January last year, only six months before the official opening, opera president Pierre Berge -- the right-hand man of fashion designer Yves Saint-Laurent and a friend of French President Francois Mitterrand -- fired musical director Daniel Barenboim.

Mr. Berge complained that Mr. Barenboim was spending too much time abroad and that his program was "too elitist" for an opera intended to be "popular".

With the departure of Barenboim, and a number of other distinguished artists who walked out in sympathy with the conductor, the opera then remained without a musical director for five months until Korean-born Myung-Whun Chung agreed to take up the baton that many others had refused.

One jokes that circulated here last year about the 2.9 billion franc (600 million dollar) building went like this: What is the difference between the Titanic and the new Paris opera? The Titanic had an orchestra.

Problems with the innovatory mobile stage and on-stage lifts which marred an earlier production of Berlioz' "Les Troyens" (The Trojans) are still in the process of being sorted out, opera officials say.

BAGHDAD (NOV. 11) - Iraq announced Sunday it was having problems with grain supplies and that it would raise rice prices, as well as adopt stiffer penalties against speculators.

President Saddam Hussein chaired a meeting to discuss the economic problems, following the international trade embargo on Iraq in retaliation for its August 2 invasion of Kuwait, the Iraqi News Agency (INA) said.

It was the first time since the embargo was imposed three months ago that Iraq with a population of around 16 million people, has officially referred to speculation on the agricultural market and to supply problems.

The meeting decided to raise the price of rice, which is part of the normal daily diet in Iraq, and to "market all cereal products exclusively through

state channels," the agency said.

Stiffer penalties will be imposed on speculators, INA said, adding that the meeting was called after reports of "sluggishness on the part of some dealers in marketing grain through the state."

On September 3, Iraq announced rationing of nine staple foodstuffs, including flour, rice and sugar. It has also imposed rationing on a list of 15 medicines.

INA said the latest measures were being introduced "because of the reticence of certain merchants to sell their cereals through the state, to supply citizens with basic foodstuffs, and to improve the rationing system."

The meeting, also attended by several members of the powerful Revolutionary Command Council and government ministers, decided to form a committee to supervise its decisions.

Foreigners released by Iraq have reported, on their return home, severe shortages of rice, flour and milk in the country.

Baghdad has detained thousands of foreign nationals to deter an attack by the U.S.-led multinational forces that have deployed in the Gulf region since the invasion of Kuwait.

HARARE (NOV. 11) - Former rebel Rhodesian prime minister Ian Smith Sunday defied a government ban on ceremonies commemorating the fallen of the two world wars and laid his own wreath in central Harare.

Last week an ex-servicemen's organisation was told by the ministry of home affairs that the ceremony - which has been held all over the country every year since 1919 - would not be permitted this year because it coincided with the 25th anniversary of Smith's unilateral declaration of independence (udi) from Britain, a move that invoked United Nations sanctions against the colony and started a seven-year war waged by black nationalist guerrillas.

But Smith, 71, arrived Sunday morning in a dark suit with a Royal Air Force pilot's association tie - he was shot down over Italy during World War Ii - and laid a small wreath at the foot of the cenotaph in Harare Gardens, the site of the annual services.

''I came here to remember my fallen colleagues,'' he said after observing a short silence with four friends. ''Then I will celebrate what is to me the greatest day on the calendar (the udi anniversary).''

He said he expected government ministers would have ''more intelligence'' than

to attempt to stop udi celebrations by banning remembrance day services. Every year, he said, ''we have a magnificent celebration.''

NAIROBI (NOV. 11) - Rebels in the northern Ethiopian province of Eritrea on Sunday accused government troops of killing civilians and looting their property.

The clandestine radio of the Eritrean People's Liberation Front (EPLF), monitored here, said eight civilians had been killed in the Eritrean villages of Adi Golgol, Quahayin, Maytsemre and Berekit.

"Besides those killed, six others were shot and wounded in the same areas," the radio said.

It did not say when the events took place.

The EPLF has been fighting for Eritrean independence for nearly 30 years. The rebels hold the Red Sea port of Massawa and are fighting government troops around Asmara, the provincial capital.

BUCHAREST (NOV. 11) - The government is to reduce the amount of fuel it supplies unprofitable enterprises in a bid to cut its balance of payments deficit, according to an official statement carried Sunday by Rompress news agency.

Romania's coal production has plummeted by 50 per cent, while increased energy consumption and higher oil prices caused by the Gulf crisis have created a "serious imbalance between energy reserves and the needs of the economy", the statement said.

One of the sectors hit would be "industrial and inter-urban transportation", which faced a 10 per cent fuel cut.

However "supplies to the public" for "electricity and heating during the winter" would not be reduced, the statement said.

Prime Minister Petre Roman and ministers in charge of the economy made the decision Saturday and were to submit the proposal to the next full Cabinet meeting, the agency said.

Industry and Commerce Minister Anton Vatasescu put the balance of payments deficit at 1.2 billion dollars for the upcoming three months last October 10.

The government also plans to "suspend the turnover tax totally or partially for November and December" to encourage exports and increase its foreign exchange resources, the statement said.

The government said its reform programme "cannot succeed without immediate structural adjustments". Total or partial reduction of energy supplies or quotas allotted to non-profitable sectors would be the first stage of adjustments.

Meanwhile, a panel set up to promote democracy within the army denounced what it called a resurgence of communist influence within the armed forces.

The CADA committee and four dissident movements inside the army said after a meeting here that "ten months after the revolution" one of their "main demands has still not been clarified -- the role "played by" the army in those events".

Defense Minister Victor Stanculescu said last month that democratisation measures called for by CADA had already been implemented.

#90315d5290 11/11/1990 ~French/German News Agency

PARIS (NOV. 11) - Libya on Sunday officially denied Chad government allegations of its involvement in the fighting between Chad troops and rebels in the border area near the Sudan.

A statement issued by the Libyan embassy in Paris and reported by the Libyan news agency Jana said that Libya ''denies categorically that has anything to with what happened in eastern Chad''.

It said that Libya was responsible only for its own border with Chad and not for Chad's borders with other states.

''The statement reaffirmed that what is taking place in Chad is a tribal conflict and a civil war,'' Jana reported. ''No islamic batallion exists and allegations to this effect are a mere lie.''

The statement called on Chad ''not to drag Libya's name in every time'' internal conflicts and problems erupted in Chad.

The denial followed accusations made by Chad that heavily-armed ''hordes of mercenaries'' of the Libyan islamic legion had launched an attack in the Chad government-rebel conflict.

The rebels accused the Chad government forces of having penetrated 45 kilometres inside Sudanese territory. The rebels said they drove the government troops back.

The rebels are led by former Chadian chief of staff Idriss Deby, who fled to Sudan with about 1,000 followers after a failed coup attempt against President Hissene Habre in early April 1989.

At the end of 1989 and again last March and April, Chad government forces pushed as far as 300 kilometres inside the Sudan to try to defeat the rebels.

JERUSALEM (NOV. 11) - The Israeli government may agree to receive a United Nations envoy whose mission would be limited to examining relations between Israel and its occupied territories, Foreign Minister David Levy disclosed here Sunday.

Mr. Levy, quoted by state radio following a cabinet meeting, said contacts on the possible mission were underway with the United States.

The Jerusalem Post newspaper predicted Sunday that the envoy would be the personal representative of U.N. Secretary General Javier Perez de Cuellar, Jean Claude Aimee.

But Mr. Levy stressed that Israel still rejected a mission backed by the Security Council that would look specifically into the October 8 clashes between police and Palestinians here that left 18 Palestinians dead.

The government has refused to cooperate with any such U.N. team, arguing that to do so would compromise Israeli sovereignty over Jerusalem.

Israel's refusal to accept the mission triggered international criticism, notably from its principal ally the United States.

Diplomatic sources quoted in Washington Saturday said that under a proposal worked out with U.S. officials and Israeli Ambassador Zalman Shoval, Mr. Perez de Cuellar would refrain from publicly linking the envoy's proposed trip to the October 8 killings.

Mr. Shoval, according to government sources, warned Prime Minister Yitzhak Shamir in a message that failure to reach a compromise with Washington on the mission could harm U.S.-Israeli relations.

#90315d5970 11/11/1990 ~French/German News Agency

MOSCOW (NOV. 11) - Soviet President Mikhail Gorbachev and Russian Federation President Boris Yeltsin met Sunday to discuss coordinating economic reforms on the national and republican levels, television reports said.

The Russian parliament meanwhile gave a first reading to legislation authorizing private property in the Russian Federation, Interfax news agency reported.

Results of the private Kremlin meeting which lasted more than two hours were not immediately available.

Interfax press agency said the talks were held in a "constructive atmosphere".

The union draft outlining future relations between the Soviet Union's 15 republics is to be published before Thursday and will then be submitted to individual republics, according to Soviet officials.

Soviet Prime Minister Nikolai Ryzhkov, Russian Federation Premier Ivan Silayev and the deputy speaker of the Russian parliament, Ruslan Khasbulatov, joined the talks later, officials said.

The meeting came after Russia, the biggest Soviet republic, launched a 500-day programme of sweeping economic reforms on November 1.

The programme was hammered out under the guidance of Mr. Yeltsin and Mr. Gorbachev earlier this year.

But facing opposition from the Soviet parliament and Mr. Ryzhkov, Mr. Gorbachev agreed to a more moderate programme last month that was largely based on a blueprint earlier submitted by the Soviet premier.

Relations between Mr. Gorbachev and Mr. Yeltsin soured following Soviet parliament approval for the programme, and the Russian leader lambasted the president for lacking leadership in introducing a free-market economy.

Tass news agency Sunday asked if the "road to the market economy will be covered together or separately".

"Reforms, notably those that are aimed at firming the ruble can only work if they are carried out in the entire nation", Tass said, adding that "results can only be achieved if Soviet and Russian leaders cooperate".

"Gorbachev and Yeltsin must understand that their continuing disputes harm their popularity", Tass said, quoting a statement by legislator Leonid Blizhnov after Wednesday's Russian revolution festivities.

The Russian parliament meanwhile approved state-owned, municipal and private property, each on a legal par with the two other forms of property.

A Soviet parliament vote last September only authorized cooperative property, prompting Sergei Shakhrai, head of the law committee, to state Sunday that the

Russian parliament was "pushing the national law to its logical limits".

The Russian bill said "the State must not usurp rights on the entire national territory" but will be on a par with any citizen, foreigner, legal entity and municipal council in acquiring real estate.

Foreign companies and associations will not be allowed to buy landed property, according to the bill, but may rent it.

The project also said that sales or rents will be made under control of municipal councils to avert skyrocketting prices.

Councils will also be authorized to declare contracts null and void if they are found to have been subject to speculation.

JERUSALEM (NOV. 11) - An Israeli soldier was shot and lightly wounded Sunday by gunfire from a car registered in the occupied territories, army sources reported.

They said the incident occurred near the Israeli settlement of Beth El on the occupied West Bank, after which the army set up roadblocks and called in reinforcements.

The soldier was standing at a bus stop when a passenger in a slowly moving car opened fire, the army said, adding that the vehicle left the scene in the direction of Nablus further north.

The victim was taken to Hadassah hospital in Jerusalem where his life was said not to be in danger.

Elsewhere, Israeli troops opened fire Sunday to disperse a demonstration on the Gaza Strip, wounding three Palestinians in Nusseirat refugee camp, Palestinian sources reported.

Clashes between troops and demonstrators also erupted in Shatti refugee camp on the Gaza Strip and in the West Bank communities of Ramallah and Tulkarm, where no casualties reported.

In Nablus in the northern West Bank, two petrol bombs were hurled at an Israeli army patrol while a third incendiary device was thrown at a military jeep in Bethlehem.

There were no reported injuries in any of the three petrol bomb attacks.

NAPLES, Italy (NOV. 11) - Pope John Paul II voiced a message of support and encouragement for AIDS victims worldwide during a visit to Poggioreale prison in this southern Italian city Sunday.

Meeting with ill and infected prisoners at the close of a three-day visit to Naples, the pope urged AIDS victims everywhere not to "abandon the fight".

Prisoners cheered him and kissed his hand.

One young narcotics dealer, speaking on behalf of AIDS convicts at the prison, appealed to the Roman Catholic Church "to help us find honest work when we get out of jail so we can re-integrate into society".

The pope said he had taken their appeal to heart but called on the prisoners to oppose violence and the desire for "easy profit".

He added: "I hope you find the spiritual strength not to give in and to find yourself".

Poggioreale, believed to be Europe's most over-crowded prison, has 2,026 inmates in facilities built to house half that number. Six hundred of them are drug addicts, and 80 per cent are less than 30 years old.

Justice Minister Giuliano Vassalli, who accompanied the pope during his visit there, told about 300 convicts at the prison chapel that the government planned a series of Draconian, but temporary, measures to crack down on crime following complaints from the public about offenses "by prisoners prematurely set free".

AIDS is an incurable disease transmitted through blood, especially through sexual contact, and which destroys the body''s ability to fight infection.

#90315d6080 11/11/1990 ~French/German News Agency
BAGHDAD (NOV. 11) - Iraq on Sunday said an Arab summit proposed by Morocco must be preceded by "serious consultations" and must not be held under foreign threats against Baghdad.

Official Iraqi television described Baghdad's demands as conditions for its participation in a summit on the Gulf crisis called for earlier Sunday by King Hassan II of Morocco.

Iraqi television called for "serious preliminary consultations among the different parties to the Gulf crisis" and said the summit must not take place "under threats against Iraq by foreign forces."

King Hassan appealed for "an exceptional summit" to secure a peaceful settlement to the Gulf crisis, sparked by Iraq's August 2 invasion of Kuwait.

He said the gathering would be held on the basis of "decisions made by the international community."

The United Nations Security council has approved 10 resolutions against the invasion and has demanded an immediate and unconditional Iraqi withdrawal.

#90315d6090 11/11/1990 ~French/German News Agency

PARIS (NOV. 11) - French Foreign Minister Roland Dumas Sunday warned Iraqi leaders to take the situation in the Gulf very seriously.

"Every day that passes without anything really serious happening on the Iraqi side aggravates the situation", Mr. Dumas said in a radio talk show.

"Iraqi leaders would be well advised to take the situation very seriously", he said.

His comments came as a French air base commander announced in Saudi Arabia Sunday that French warplanes would begin combat patrols soon in the Gulf.

Mr. Dumas met in Paris last week with U.S. Secretary of State James Baker. They are believed to have discussed U.S. concerns about confusion over the French role in the U.S.-led alliance against Iraq's occupation of Kuwait.

Mr. Dumas pledged on the radio Sunday that France would not "sway off the road laid out by the United Nations" in handling the Gulf crisis.

A U.N.-approved embargo of Iraq following its invasion of Kuwait on August 2 should however be given time to become effective, he cautioned.

Mr. Dumas suggested that the United Nations examine a resolution on the use of force against Iraq. There was some time left before taking that step, he said, adding: "We must use this time to make reason prevail".

Mr. Dumas also welcomed an invitation by King Hassan II of Morocco for a special Arab summit to find a peaceful solution to the Gulf crisis.

He said however that it was "very difficult to envisage a useful Arab summit" because of a deep rift among Arab nations over Iraq's occupation of Kuwait since August.

The king had said that Iraq could not "possibly just wipe Kuwait off the map with a stroke of a pen and turn it into one of its provinces...just as it is

impossible for the Kuwaiti people to lose their identity overnight and become...Iraqi."

Exiled Kuwaiti Prime Minister Sheikh Saad Al-Abdallah Al-Sabah said recently that he did not think another Arab summit could serve any purpose "as long as the Iraqi regime is not prepared to withdraw from all Kuwaiti territories and allow the legitimate government to return."

Soviet Presient Mikhail Gorbachev and Iraqi President Saddam Hussein have also suggested that an Arab summit should try to resolve the Gulf crisis.

#90315d6220 11/11/1990 ~French/German News Agency

Worcester, MA (NOV. 11) - World top-ranked Steffi Graf of Germany defeated arch-rival Gabriela Sabatini of Argentina 7-6, 6-3 here Sunday to win the final of a 350,000-dollar women's professional tennis tournament.

Sabatini, who had beaten Graf in the final of the U.S. Open, took a 3-1 lead in the opening set Sunday before Graf got into the match. Deadlocked at 6-6, they played a tiebreaker which Graf won 7-5.

Graf broke Sabatini to go up 2-1 in the second set and it was never again closer than 4-3 for Graf. It was Graf's 20th victory in 24 meetings with Sabatini and brought the German her 54th tournament title.

Graf, 21, received a 70,000-dollar winner's purse.

#90315d6360 11/11/1990 ~French/German News Agency

BAGHDAD (NOV. 11) - Iraqi President Saddam Hussein met Sunday night with his top aides to study a call made by Morocco's King Hassan Ii for an extraordinary Arab summit on the Gulf crisis, it was reported here.

Baghdad Radio said Saddam chaired a joint meeting of the Iraqi Revolutionary Command Council, the country's highest policy-making authority, and the Regional Command of the ruling Baath Party, ''to discuss the sudden declaration by King Hassan Ii calling for convening an extraordinary Arab summit in Morocco''.

A statement issued after the meeting implicitly criticised King Hassan for failing to consult with the Iraqi President on the proposed summit.

The statement said previous calls for Arab summit meetings had always been preceded by intensive consultations among Arab leaders on topics to be discussed in order to ensure their success.

The main party concerned with the issue that would be discussed at the proposed summit has not been consulted, said the statement broadcast by Baghdad Radio.

It stressed that the proposed conference could not be successful while efforts were underway ''to set the political stage for an American-Zionist aggression on the Arab nation''.

What is required to ensure the success of the proposed summit, the statement said, ''is serious consultations among the main parties concerned with the (Gulf) issue''.

The statement demanded that the proposed summit should not be held under pressure of ''the threats of foreign armies which have desecrated the sanctities of the Arabs and Moslems in Najd and Hijaz (Saudi Arabia)''.

It also said that a venue for the summit should be convenient for the Iraqi President to enable him to attend.

WASHINGTON (NOV. 11) - Secretary of State James Baker will brief Canadian External Affairs Minister Joe Clark Tuesday on the situation in the Gulf, the State Department said Sunday.

Mr. Baker will meet with Mr. Clark during a one-day trip to Bermuda, department spokeswoman Margaret Tutwiler said in a written statement.

During an eight-day diplomatic mission that ended Saturday, Mr. Baker met with officials from nine countries in the Middle East and Europe to discuss sanctions against Iraq following its August 2 invasion of Kuwait and the U.S. military buildup in the region.

"The secretary will brief Minister Clark on those meetings and they will discuss the Persian Gulf in general," Miss Tutwiler said.

#90315d6390 11/11/1990 ~French/German News Agency

BONN (NOV. 11) - Former West German Chancellor Willy Brandt does not rule out a second trip to Iraq after returning Friday from Baghdad with 174 Western hostages, he told a German daily.

''I would like for others to act first. The hostages will not get out alone,'' he told the newspaper General-Anzeiger in an interview to be published Monday.

Mr. Brandt said Iraqi President Saddam Hussein was not trying to gain time by

freeing hostages in small groups but wanted to show that ''if the United States finally decides to wage war, it will have to sacrifice its citizens.''

Iraq is holding some 3,500 Westerners, among them over 1,000 Americans, to protest the U.S.-led military alliance in the Gulf. The alliance wants Iraq to end its occupation of Kuwait since an invasion August 2.

Mr. Brandt said the international anti-Iraqi coalition was solid and that he feared ''Saddam Hussein does not realize to what degree he is isolated.''

Mr. Brandt was asked about governments negotiating directly with Iraq. He answered: ''Ask the French government what its position is. All the French have been evacuated.''

Paris has denied having held any talks, even secret ones, with Iraq about the hostages.

#90315d7220 11/11/1990 ~French/German News Agency

TOKYO (NOV. 12) - Five Japanese, French and U.S. companies have won an order to build a coal-fired power plant with a capacity of 300,000 kilowatts in the Philippines, the Nihon Keizai Shimbun said Monday.

The leading Tokyo financial daily said of the total cost -- 45.4 billion yen (349 million dollars) -- 40.4 billion yen (310 million dollars) would be financed by the Japanese government's yen-denominated loan to the Philippines through the Overseas Economic Cooperation Fund.

The largest ever Japanese yen loan to the Philippines will be made in response to Philippine President Corazon Aquino's request during her first visit to Japan in 1986, it said.

The power plant is to be built at Calaca, about 120 kilometers (72 miles) north of Manila with its completion slated for 1994, the newspaper said.

Marubeni Corp., a leading Japanese trading company, and CGE Alsthom of France are to supply generators and turbines

#90315e0004 11/11/1990 ~Latin America New Agency

RIYADH (NOV. 11) EFE - Iraq has extended until November 20 the deadline for native-born Kuwaitis to take out Iraqi citizenship or else be treated as +foreigners+ in their occupied homeland, the Saudi daily Al Nadua reported Sunday.

The Iraqi edict affects some 270,000 people who formerly enjoyed full rights

of citizenship in Kuwait. They were originally given until October 31 to formalize Iraqi nationality, after Iraq annexed Kuwait as its 19th province.

Another 300,000 Palestinians living in Kuwait when Iraqi troops invaded the country August 2, and some 120,000 foreign- born permanent residents mainly from the Indian sub-continent, were not affected by the decree.

Citing refugees fleeing Kuwait, the paper said that food, medicine, water and electricity were all in short supply, and Iraqi troops were building defensive fortifications and missile sites in preparation for an imminent war.

-30- 1087

#90315e0013 11/11/1990 ~Latin America New Agency

WASHINGTON (NOV. 11) EFE - U.S. Secretary of State James Baker said Sunday that pressure would be increased to force Iraq's withdrawal from Kuwait and that the deployment of extra U.S. troops to the Gulf was a "clear signal" to Iraqi President Saddam Hussein.

Baker returned to Washington on Saturday after a week-long tour of the Middle East and Europe where he tried to obtain support for a possible military blow against Iraq.

Baker said the alliance of nations opposed to Iraq's invasion and annexation of Kuwait was solid and that there was a strong concensus on what is being done to pressure Saddam.

The military option was raised at each of Baker's stops in Bahrain, Saudi Arabia, Egypt, Turkey, the Soviet Union, Britain and France.

But some U.S. officials, who wished to remain anonymous, said France would prefer to wait and see if United Nations economic sanctions would persuade Saddam to withdraw before considering military action.

French Foreign Minister Roland Dumas has deplored the U.S. decision to send 200,000 extra troops to the Gulf and recently said +no one has yet started to discuss military action+.

The thrust of Baker's tour was to gain broad agreement for a possible U.N. Security Council resolution authorizing an armed strike against Iraq if trade sanctions failed and Baghdad continued its occupation of Kuwait.

He met with the representatives of the four other countries which with the United States make up the permanent membership of the Security Council -- Britain, France, the Soviet Union and China -- including Chinese Foreign Minister Qian Qichen who arrived in Baghdad on Sunday.

Any of the five permanent members can veto a Security Council resolution and

China's support was considered essential for any military option to go ahead.

China wants Iraq to withdraw from Kuwait and has supported all U.N. resolutions against Iraq, but is reluctant to approve a resort to arms, diplomatic sources said.

Qian met Baker in Cairo and was believed to be carrying a message from Washington to Saddam warning him of the danger of war if Iraq did not abandon Kuwait.

The Soviet Union, which has not sent troops or equipment to the multinational forces arrayed against Iraq in the Gulf, has said it would support a U.N. resolution authorizing military action but said it would be better to wait for two or three months to see if sanctions work.

#90315t1437 11/11/1990 ~ts
MOSCOW (NOV. 11) TASS - MEMBERS OF THE PRESIDIUM OF THE SOVIET COUNCIL OF MINISTERS MET THE PRIME MINISTERS OF THE BALTIC REPUBLICS ON SATURDAY. THEY DISCUSSED THE COMPLETION OF BLUEPRINTS OF THE PLAN AND BUDGET OF THE SOVIET UNION AND UNION REPUBLICS FOR 1991, SAYS A REPORT CIRCULATED HERE TODAY.

TAKING INTO ACCOUNT THE SPECIAL FEATURES OF THE COMING YEAR, WHICH WILL BECOME THE INITIAL PERIOD OF THE ECONOMIC REFORM PLAN PASSED BY THE SOVIET PARLIAMENT PARTICIPANTS IN THE MEETING STRESSED THE NEED FOR COORDINATED ACTIONS AND THE PARTICIPATION OF THE REPUBLICS IN THE IMPLEMENTATION OF THESE TASKS.

MEMBERS OF THE PRESIDIUM OF THE SOVIET COUNCIL OF MINISTERS POINTED OUT THAT UNTIL A NEW UNION TREATY IS SIGNED, THE RELATIONSHIP BETWEEN THE CENTRE AND THE REPUBLICS SHOULD BE BASED ON SOVIET LAWS, PRESIDENTIAL DECREES AND SOVIET GOVERNMENT RESOLUTIONS.

THE FORMATION OF UNION, REPUBLICAN AND LOCAL BUDGETS IN ACCORDANCE WITH PRINCIPLES AND PROVISIONS OF THE SOVIET LAW ON THE TAXATION OF ENTERPRISES, ASSOCIATIONS AND INSTITUTIONS IS OF SPECIAL IMPORTANCE. IT IS ALSO IMPORTANT TO PRESERVE AND DEVELOP IN EVERY WAY BUSINESS TIES BETWEEN ENTERPRISES AND REGIONS OF THE COUNTRY AND TO ENSURE THE FULFILMENT OF THE STATE ORDER AND CONTRACTUAL COMMITMENTS FOR GOODS DELIVERIES.

REPUBLICS SHOULD COORDINATE THEIR ACTIONS IN PURSUING A SINGLE CURRENCY POLICY AND FIXING PRICES, ESPECIALLY OF FOODSTUFFS AND OTHER CONSUMER GOODS, THEY STRESSED.

HOWEVER, LITHUANIAN PRIME MINISTER KAZIMERA PRUNSKENE AND HER ESTONIAN COUNTERPART EDGAR SAVISAAR, WHO SPOKE AT THE MEETING, OPPOSED THE SOVIET GOVERNMENT STAND ON ALMOST ALL THESE ISSUES. THEY REDUCED THE WHOLE COMPLEX OF ECONOMIC, CURRENCY, BUDGET AND FINANCIAL RELATIONS TO TRADE EXCHANGE OR, AS THEY PUT IT, A "TRADE DEAL". AT THE SAME TIME, THEY IGNORED ALL-UNION LEGAL ACTS REGULATING ECONOMIC ACTIVITIES IN THE COUNTRY.

MEMBERS OF THE PRESIDIUM OF THE SOVIET COUNCIL OF MINISTERS, WHO ATTENDED THE MEETING, SUGGESTED THAT REPRESENTATIVES OF THE BALTIC REPUBLICS TAKE PART IN THE WORK OF THE UNION-REPUBLICAN CURRENCY COMMITTEE, WHICH WOULD COORDINATE THE ACTIONS OF ALL UNION REPUBLICS AIMED AT THE FORMATION AND RATIONAL DISTRIBUTION OF CURRENCY RESOURCES, FOR THE SAKE OF ENSURING THE STABLE DEVELOPMENT OF THEIR ECONOMIES IN 1991.

DESPITE OBVIOUS ECONOMIC EXPEDIENCY, LITHUANIAN GOVERNMENT LEADERS DID NOT ATTEND A SESSION OF THE UNION-REPUBLICAN CURRENCY COMMITTEE HELD TODAY. IT DISCUSSED, AMONG OTHER THINGS, THE FORTHCOMING IMPORTS OF RAW AND OTHER MATERIALS FOR LIGHT INDUSTRY, MEDICATION, SOME FOODSTUFFS AND CONSUMER GOODS. THIS REFUSAL WILL CERTAINLY JEOPARDISE THE WORK OF MANY ENTERPRISES OF THE LIGHT AND FOOD INDUSTRIES IN LITHUANIA. THE ATTITUDE OF THE LITHUANIAN LEADERS IS UNCONSTRUCTIVE, PRIMARILY FROM THE POINT OF VIEW OF NORMAL FUNCTIONING OF THE ECONOMY AND THE SETTLEMENT OF SOCIAL PROBLEMS IN THE REPUBLIC.

SUMMING UP THE RESULTS OF THE DISCUSSION, PRIME MINISTER NIKOLAY RYZHKOV EXPRESSED HOPE THAT AT THE CONCLUDING STAGE OF THE WORKING OUT OF THE 1991 PLAN AND BUDGET COMMON SENSE WOULD GAIN AN UPPER HAND AND MUTUALLY ACCEPTABLE SOLUTIONS WOULD BE FOUND JOINTLY WITH THE BALTIC REPUBLICS.

#90315u0022 11/11/1990 ~United Press International

(NOV. 11) UPI - The United States this week plans to flex its muscle right at Iraq's door step. A U-S official says in Newsweek magazine that a Marine battalion will stage an amphibious assault within range of Iraqi Silkworm missiles, near the border between Saudi Arabia and Kuwait.

According to the official, the exercise was planned- quoting now- ''intentionally to raise the ante to show we have the capability and we're ready to take it right to their border.''

That word comes as Iraqi President Saddam Hussein announced he's ready to negotiate a settlement to the tense standoff in the Persian Gulf. But Saddam says he'll negotiate only if the Palestinian problem is also on the agenda.

Japanese authorities say suspected leftist radicals opposed to the enthronement tomorrow of Japan's 125th emperor set a series of fires and launched several small missles at U-S and Japanese military bases. NO one was hurt in the attacks.

Urban guerrillas have vowed to disrupt the enthronement celebration at the heavily-guarded Imperial Palace in Tokyo. Palace officials say the attacks did NOT slow preparations for the elaborate ceremony. An army of 37-thousand police officers have been deployed around the capital to prevent attacks.

The countdown clocks are ticking toward Thursday's blastoff of the space shuttle Atlantis to boost a military satellite into orbit. The countdown began on time tonight at the Kennedy Space Center.

THOUSAND OAKS, CA (NOV. 11) UPI - A plumber accidentally sparked a $7 million fire that swept through a new apartment complex Saturday just weeks before it opened, destroying 242 units and injuring two firefighters, authorities said.

The fire broke out at The Knolls, an apartment complex near Avenido de Los Arboles and Erbes Road about 3 p.m. Flames quickly consumed 21 buildings containing 242 apartments, Ventura County Fire spokeswoman Rhonda Roller said.

Despite efforts by more than 240 firefighters from five fire agencies, two water-dropping helicopters and 10 hand crews, the wind- whipped flames spread to nearby brush and burned five acres before the fire was extinguished five hours later, the fire spokeswoman said.

The fire caused $7 million damage to the $40 million unoccupied complex, scheduled to open Dec. 1. A portion of the complex was undamaged.

Two firefighters were injured, the most serious requiring hospitalization for smoke inhalation. Several private cars and a fire engine were damaged.

Roller said the fire accidentally was started by a plumber soldering some metal pipes.

During the fire, a water valve broke, causing a drop in water pressure which

temporarily hampered firefighters' efforts.

Smoke from the fire was visible from the Ventura and Moorpark freeways and caused traffic to slow on both thoroughfare.

Some of the firefighters were to remain at the scene throughout the night to monitor hot spots.

BELGRADE, Yugoslavia (NOV. 11) UPI - Voters cast ballots Sunday in the opening round of unprecedented multi-party elections for the assembly of the Macedonian Republic, the first electoral test of federal Prime Minister Ante Markovic's pro-reform political alliance.

Polling booths opened at 7 a.m. across the southernmost of Yugoslavia's six republics and were to remain open until 7 p.m. First results were expected Monday evening or Tuesday morning.

The early turnout was reported to be light. Some 1.3 million people were eligible to cast ballots for the 120-seat single-chamber legislature.

A second round of voting is set for Nov. 25 for districts in which no candidate wins more than 50 percent of the first-round votes. In such cases, runoffs will be held between the top vote-getters.

More than 1,140 candidates from 16 political parties and 39 independents were running in the elections, the first of their kind staged in Macedonia since the creation of the republic by the victorious Yugoslav communist forces at the end of World War II in 1945.

Attention was focused on the performance of the Alliance of Reformist Forces, a coalition of progressive parties forged by Markovic in July to promote his Western-style political and economic reform program over resistance by the leaderships of the major republics of Croatia, Slovenia and Serbia.

Analysts said that while the Macedonian contests are the least significant of a series of upcoming elections, the alliance's showing could influence its prospects in contests for the assemblies of Bosnia- Hercegovina, Serbia and Montenegro and for the federal Parliament.

The alliance's main rivals in Macedonia are a coalition of nationalist groups, a party representing the republic's 337,200-strong ethnic Albanian minority and the ruling communists. No party is expected to win a majority of seats.

Markovic is regarded as the only politician with a concrete program to transform Yugoslavia into a Western-style democracy and overcome heated nationalist passions that have stoked fears that the multi-ethnic nation of 23 million could dissolve in civil war.

The nationalist Croatian and Slovenian administrations and the communist regime of Serbia have been trying to undermine Markovic's program because they fear its success will reduce their power and gain him enough popular support to implement a new federal constitution creating a strong central government.

Federal authorities currently lack the power to impose policies on the republics.

Macedonia is the third republic to hold multi-party assembly election this year, prompted by the collapse of strong central communist rule, rising nationalism and the demise of socialism across much of Eastern Europe.

The elections in Bosnia-Hercegovina are set for Nov. 18, with a second round scheduled for Dec. 2. Serbia and Montenegro are to hold single-round polls on Dec. 9, while no date has been decided for the federal contests.

Croatia and Slovenia held Yugoslavia's first multi-party polls in 45 years in April.

(NOV. 11) UPI - James Baker headed back to Washington Saturday, while Iraq slammed the U-S secretary of state as a warmonger. Iraqi Foreign Minister Tariq Aziz said Baker failed to raise the Palestinian issue during his tour that took him through the Middle East and Europe. Aziz, noting that additional U-S troops are being sent to the Persian Gulf, also said it's obvious that some Arab states are helping Washington- in his words- ''prepare for war.''

California fire officials say a fire sparked accidentally by a plumber caused about seven-Million dollars to a 40-Million-dollar unoccupied complex in Ventura County. Two firefighters were injured fighting the blaze that consumed 21 buildings... destroying 242 units. The wind-whipped flames spread by a nearby brush, burning five acres before getting extinguished five hours later.

Virginia Governor Douglas Wilder is NOT saying whether the University of Virginia football team should accept a bid to play in the Fiesta Bowl. But the

nation's first elected black governor confirms the Virginia Cavaliers have been extended a bid to the Fiesta Bowl in Tempe, Arizona. The school has called a meeting Sunday to decide whether to play in the New Year's Day game in light of Arizon'a rejection of establishing a Martin Luther King Junior holiday.

Florida has banned the sale of a nutritional supplement following reports of serious health consequences linked to the substance known as G-H-B. Florida doctors say seven people in the state needed emergency treatment after using G-H-B. The emergency order also cited 16 cases of G-H-B-related health problems in California, including seizures and deep coma. About 30 cases have been reported in Florida, California and Georgia.

A report published Sunday in Tokyo says a major Japanese steelmaker is looking into a BILLION-dollar steel project in Iran. A daily newspaper says Kobe Steel is conducting a feasibility study on the project at the request of the Iranian government. The proposal calls for a giant steel plant with an annual output capacity of about five-Million tons of steel at the mouth of the Persian Gulf.

JOHANNESBURG, South Africa (NOV. 11) UPI - Authorities imposed emergency regulations and a curfew on the black township of Atteridgeville Sunday to quell rioting in which two people died and 25 were injured.

Law and Order Ministry Spokesman Leon Mellet said the emergency regulations for Atteridgeville and the adjacent Saulsville townships on the outskirts of Pretoria had been imposed Sunday under an order published in a special edition of the Government Gazette.

Demonstrators fought running battles with police in the township Saturday following the suspension of power because of non-payment of electricity bills. Atteridgeville residents had been boycotting payments to protest poor municipal services.

Two youths, aged 11 and 18, were killed Saturday. Police spokesman Maj. Ray Harrald said they had been shot in their homes but denied police involvement in their deaths.

The nearby Kalaphong Hospital reported 25 other people injured, all suffering wounds from shotgun. Seven remained hospitalized Sunday.

Harrald said youths stoned police vehicles and hurled gasoline bombs during the day Saturday, promping police to fire tear gas, rubber bullets and birdshot.

During the police action Saturday, police also fired tear gas to break up a

crowd dancing on one township street only to discover they had attacked a wedding reception.

Under the regulations, a 9 p.m. to 4 a.m. curfew is imposed and police have special powers to keep the streets clear of bystanders, search and arrest.

#90315u0164 11/11/1990 ~United Press International

TOKYO (NOV. 11) UPI - Prime Minister Toshiki Kaifu and Foreign Minister Taro Nakayama met Sunday with foreign leaders who came to attend the enthronement of Emperor Akihito.

Indonesian President Suharto and eight other guests flew into Tokyo's Haneda and Narita airports amid the tightest-ever security Sunday. About 80 dignitaries are expected to arrive during the day, the Foreign Ministry said.

About 60 guests, including Britain's Crown Prince Charles and Princess Diana, arrived Saturday.

Representatives from 158 countries and two international organizations will attend Monday the accession ceremony to be held in accordance with the traditional Shinto religious rites at the Imperial Palace, the Foreign Ministry said.

Iraq was not invited to show Japan's protest against its invasion and occupation of neighboring Kuwait in early August.

Police launched a massive security operation, deploying 27,000 uniformed officers and plainclothesmen in the capital city to prevent terror action by leftist radicals who have vowed to disrupt the ceremony.

The leftists, who are opposed to the emperor system, set off home- made bombs at a police dormitory in Tokyo last week, killing one officer and wounding eight others.

Police said security will be tightened further Monday by mobilizing an additional 5,000 men.

Main streets near the palace, foreign embassies and hotels have been cleared of parked cars and barricades have been built at strategic points.

Tight traffic regulations near the airports and central Tokyo will remain in force until Thursday, police said.

Most guests were airlifted to the guesthouse from the airport by helicopter provided by the Self-Defense Force, police said.

Nearly 100 scheduled domestic flights in and out of Haneda Airport will be cancelled from Saturday through Wednesday, airport officials said.

Hungarian President Arpad Goncz, in his meeting with Prime Minister Kaifu, expressed hope that Japan and other Western nations will provide aid to Hungary to help ease the impact of international economic sanctions against Iraq on the country's economy, the Foreign Ministry said. He said Hungary suffered an economic loss of about $500 million as a result of the embargo, the ministry said.

Goncz also urged Western nations to relax restrictions on exports of strategic goods to the former socialist countries, it said.

Kaifu, in his meeting with Romanian President Ion Iliescu, pledged Japan's economic assistance to Romania to support the country's moves toward democracy and a free-market economy, the ministry said.

CALCUTTA, India (NOV. 11) UPI - All 204 passengers who were released after two Burmese pro-democracy students hijacked a Thai Airways Airbus and forced it to land in India were flown to their original destination of Rangoon, Burma Sunday, police said.

They said the passengers were in a reasonably good mood despite their harrowing ordeal that began Saturday afternoon when two Burmese students, claiming to be armed with explosives, hijacked Thai Airways flight TG305.

The flight was en route from Bangkok to Rangoon when the hijackers forced the pilot to fly to India and land at Calcutta's Dum Dum airport.

The hijackers said they were armed with explosives and threatened to blow up the plane if anyone approached, but it was later learned that the two students had made fake bombs by wrapping wire around bars of soap.

All 204 passengers and the 12-member crew were eventually released after some eight hours of negotiations between officials and the hijackers.

Police in Calcutta said Sunday that the released passengers were flown to their original destination of Rangoon on another Thai Airways jet.

The hijackers, identified as Ye Marn, 24, and Ye Htinkyaw, 22, students at Rangoon University, said they hijacked the plane to focus world attention on military repression in Burma.

Passengers and crew were released unharmed after authorities promised to allow the youths to hold a news conference.

''We have succeeded in our mission to draw world attention,'' said one of the hijackers at the news conference. ''We need international support for our struggle.''

The hijackers said they were seeking the lifting of martial law in Burma, the end to all military tribunals, the release of Burmese political prisoners and the restoration of democracy.

Police said the hijackers were in custody in Calcutta awaiting a court appearance. The plane that was hijacked and its crew were at the Calcutta airport waiting for departure clearance from the Indian government.

TOKYO (NOV. 11) UPI - Two men on a motorcycle lobbed two small bombs over the wall of a U.S. consul general's official residence Sunday, the eve of enthronement of Japan's new emperor, police said.

The two bombs exploded just after 6 p.m., breaking a window pane at the home of Consul General Gregory Johnson in Kobe, 300 miles west of Tokyo, but causing no other damage and no injuries, police and U.S. Embassy officials said.

David Monk, deputy press attache for the U.S. Embassy in Tokyo, said he could not confirm whether Johnson was at the residence at the time of the blasts.

A Japanese guard at the home, who is an employee of a private security company telephoned the police at 6:22 p.m., a Hyogo Prefecture Police spokesman said.

The guard told police two men on a motorcycle raced away from the house shortly before he heard the explosions, the spokesman said.

The bombs broke a window in the entrance hall of the residence, the spokesman said.

The blasts came one day before Japan was to crown Akihito, the son of wartime leader, Emperor Hirohito, as the 125th emperor of Japan.

Leftist radicals opposed to the emperor system have vowed to march on the Imperial Palace Monday to disrupt the ceremony.

Police blamed leftists for setting two time bombs at a police dormitory in Tokyo that exploded Nov. 1, killing one officer and injuring six people.

Asked if the bombing at the consul general's residence may be related to the enthronement, Monk said, ''I don't want to speculate. It is an awful long way

from Tokyo.''

Police said they could not tell whether it was related to the enthronement, but added they had begun their investigation.

EASTERN SAUDI ARABIA (NOV. 11) UPI - A U.S. Marine was shot and killed while sleeping, and investigators were questioning two other Marines who were in his tent at the time of the incident, the U.S. military reported.

The slain Marine was a member of the 3rd Marine Regiment based in Hawaii, but his name was withheld pending notification of next of kin, the military said in a statement.

The statement said the soldier was sleeping in the tent about 3:10 p.m. Friday when he was struck in the head by a single bullet from another Marine's M-16 rifle.

Two Marines in the tent at the time of the incident were being questioned by investigators, the statement said. No other details were available.

#90315u0189 11/11/1990 ~United Press International

(NOV. 11) UPI - A Chinese envoy said before a scheduled meeting with Iraqi President Saddam Hussein Sunday that it was too early to determine if Beijing would support a U.N. Security Council resolution to use force in the Persian Gulf crisis.

Foreign Minister Qian Qichen, on a tour of the Middle East that included a meeting with U.S. Secretary of State James Baker last week in Cairo, flew Sunday morning from Amman to Baghdad, where he was met at the airport by Iraqi Foreign Minister Tariq Aziz, Cairo radio said.

Qian told reporters before leaving the Jordanian capital that China, emerging as a possible key player in the gulf crisis, supported efforts to find a peaceful solution to the standoff between Iraqi troops and a U.S.-led multinational force deployed to the region following Iraq's Aug. 2 invasion of Kuwait.

The Chinese foreign minister had reportedly indicated earlier to Baker, and Arab leaders aligned against Iraq, that China would not veto a military resolution in the U.N. Security Council, of which it is a permanent member.

Baker, meeting Saturday with French President Francois Mitterrand, wrapped up a foreign tour in which he sought a mandate to use force against Iraq, which

has resisted all pressure to withdraw from the occupied emirate.

Qian said in Amman that no draft resolution calling for military force had been submitted to the Security Council, but was quoted by Cairo radio as saying ''a war would be a catastrophe, not just for the region but for the entire world.''

Vice President Dan Quayle discussed the possibility of such a resolution with U.N. Secretary-General Javier Perez de Cuellar Sunday in Tokyo, where they are attending the enthronement of Emperor Akihito, a senior U.S. administration official said. The official, who asked not to be identified, would not say if the U.N. chief supported the proposed resolution, but said ''the striking thing was the degree of accord.''

Cairo radio said Qian may travel from Baghdad to Jeddah to discuss the outcome of his meeting with Saddam with the Saudi royal family, which has sent mixed signals about their support of a possible military strike against Iraq.

''These talks are crucial because (Qian) will probably be the last important politician from a country with a permanent seat on the Security Council to talk to Saddam, and explain to him the folly of his ways,'' Riyadh radio said Saturday.

Amman radio said Qian told Jordanian officials China opposed the Iraqi occupation of Kuwait and supported intensified efforts to solve the crisis.

In Bonn, Germany, Soviet leader Mikhail Gorbachev reportedly told German leaders ''he was concerned that it was possible to determine the beginning of a military conflict, but not the consequences.''

Officials of the Social Democratic Party said Gorbachev said during a two-day visit to Germany that he wanted increased efforts to find a peaceful solution to the crisis.

Turkish President Turgut Ozal, who has been a strong supporter of economic sanctions against his neighbor Iraq, met Sunday with Iranian President Akbar Hashemi Rafsanjani in Tehran to discuss developments in the gulf, the Iranian news agency IRNA said.

Ozal was quoted as saying ''the ball is in Iraq's court'' and that he hoped that Saddam would move to withdraw his troops and prevent bloodshed.

On Saturday, U.S. military officials said a Marine had been shot and killed while sleeping in his tent camp in eastern Saudi Arabia and that the bullet had come from another Marine's M-16 rifle. Details were not reported.

#90315u0194 11/11/1990 ~United Press International
GUATEMALA CITY (NOV. 11) UPI - The polls opened peacefully Sunday in Guatemala, where more than 3.2 million voters were choosing a successor to President Vinicio Cerezo amid a call by leftist rebels for an election boycott.

Some voters will walk for as much as 10 hours to reach the nearest polling place to choose among 12 presidential aspirants. Voters will also elect congressional deputies and municipal authorities in 90 percent of Guatemala's 330 townships.

The polls opened about 7 a.m. and were to close at 6 p.m. Results are expected to be announced late Sunday or early Monday.

Leftist rebels have urged Guatemalans not to vote, saying that elections will not resolve the country's economic and political problems.

Most voters seem apathetic and frustrated after a campaign marked by political violence and the failed aspirations of a former military leader to regain power.

Dozens of political party activists and several elected officials have been shot dead in street attacks in the weeks leading up to the election.

An estimated 100,000 people have been killed and another 40,000 kidnapped in nearly 30 years of political violence in the Central American nation.

The latest polls show Jorge Carpio Nicolle, a newspaper publisher of the National Center Union Party and former Guatemala City Mayor Alvaro Arzu Irigoyen of the center-right National Party of Advancement as front runners.

If no candidate wins a majority of the vote, the top two contenders will face off in a second round Jan. 6.

Other leading candidates are Jorge Serrano Elias, a former adviser to Rios Montt, and Alfonso Cabrera Hidalgo, a former foreign minister and candidate for the ruling Christian Democratic Party who spent the final weeks of the campaign receiving treatment in the United States for an inflamed pancreas.

Debate has focused on inflation, currency devaluation and the relatively small fiscal deficit. The major candidates strongly favor neo-liberal economic policies, although none have proposed significant reforms to the country's skewed distribution of wealth.

The landslide victory of Cerezo, 47, as president in 1985 ended 16 years of military governments marred by charges of electoral fraud and gross human rights abuses.

With Cerezo ready to hand over the leadership to another civilian in January, this year's campaign focused instead on the political comeback of retired army Gen. Efrain Rios Montt.

Rios Montt came to power in March 1982 in a military coup, and he ruled the country with force for 16 months until being overthrown by the army in 1983.

Rios Montt was the leading candidate in opinion polls before the courts ordered his name removed from the ballots because of a constitutional ban on former coup leaders from holding the office of president or vice president.

An opinion poll in March by the Guatemalan Free Enterprise Chamber showed 37 percent of those surveyed favored a military government and 42 percent preferred a civilian president.

Another poll, published in September by the Association for Research and Social Studies, showed 39.3 percent of Guatemalans did not care who wins the election and 22.4 percent cared little.

As in the 1985 election, the army has not participated in the campaign and its 65,000 members cannot vote. But one recently retired army general and a foreign military attache said resentment toward Rios Montt runs deep in the high command.

Cerezo has weathered at least two coup attempts since May 1988, after which government activity began to slow and political violence rose dramatically,

according to diplomats and human rights observers.

#90315u0200 11/11/1990 ~United Press International
MADRID, Spain (NOV. 11) UPI - A Spanish company has signed an agreement to export 2 million condoms a month to the Soviet Union and build a $10 million factory capable of producing 30 million prophylactics a year, officials said Sunday.

''No site has been chosen yet for the factory,'' said Juan Jose Delgado Andreu president of Derivados de Latex. ''It will probably be in the south, where the climate is mild.''

The first 2 million condoms are to be shipped in December. The company said the factory will cost $10 million and 100 percent of its financing will come from Spanish sources. The planned output of 30 million condoms a year is expected to give a boost to contraceptive efforts in the Soviet Union, where condoms are in short supply.

The deal is part of an agreement by Spain to provide $1.5 billion in credit and investment funds to the Soviet Union.

President Felipe Gonzalez signed the agreement in October during Soviet President Mikhail Gorbachev's visit to Spain.

#90315u0201 11/11/1990 ~United Press International
BOULDER, CO (NOV. 11) UPI - More than 100 University of Colorado students became ill over the weekend after eating meals from several campus kitchens, officials said Sunday.

Fifteen students were treated Friday at a local hospital and another 65 at the on-cmpus Wardenburg Student Health Service. Another 30 were treated Saturday, campus spokeswoman Linda Baird said.

Nausea, vomiting and diarrhea were the common complaints, she said.

Students got sick after they ate a variety of foods served by several college dormitories, Baird said.

''Saturday night and Friday were terrible,'' she said. ''They really don't know if it was mayonnaise, chicken fried steak or a lot of different things.''

The Boulder Health Department was investigating.

Most students became badly dehydrated from vomiting and diarrhea, were given

intravenous doses of up to three liters of dextrose and sent home to recuperate, Baird said.

#90315u0205 11/11/1990 ~United Press International

EASTERN SAUDI ARABIA (NOV. 11) UPI - It may not be home, but a posh little complex dubbed ''Desert World'' with a swimming pool, volleyball court and snack bar is giving American and British GIs a little slice of heaven after weeks of living in sand.

''I'd always heard of mirages out in the desert so I figured this must be one '' said Marine Lance Cpl. Ted Henson, 20, of Houston, as he sunned beside the swimming pool during a day of rest and relaxation Sunday. ''It's really nice out here.''

''It's like putting a little piece of the States over here,'' added Marine Sgt. Lewis Perales, 24, of Detroit. ''We come in, we see people just lounging around and partying and stuff like that. It was almost like being back home ... just relaxing, chilling out, having fun.''

The complex, loaned to U.S. and British forces by the Saudi government, was opened to give troops a break from the tedium of working continuously since they arrived as part of the multinational force confronting Iraq.

The enclosed facility houses two swimming pools, one of which is still being refurbished, a snack bar, ping pong tables, volleyball courts, video movie rooms, a commissary, a gift shop and a bank of telephones for calling home.

''It provides a means for rejuvenating our Marines mentally and to get them into an atmosphere where they can unwind,'' said Marine Lt. Col. Gary Wilson, who is in charge of the complex, which was dubbed ''Desert World'' by the staff.

''It's very, very important, I'd say, for their psychological well- being,'' he added. ''It just provides another outlet in an environment that is fairly limited in opportunities to interact with society itself or have some form of entertainment.''

Wilson said between 500 and 700 British and American soldiers, both men and women, visited the complex each day and the number was expected to rise to 1,200 by the time both swimming pools are operational.

''We're making a definite effort to get those individuals who are up on the front lines, so to speak, to get them back here and that's working well,'' he said.

Soldiers arriving at the complex shed their uniforms and their weapons at the

front door. The only military equipment that comes into the complex with each soldier is a gas mask, and even military rank disappears in the dressing room.

''If someone comes in and he's a general ... he's treated like everyone else '' said Marine Cpl. Todd Mahoney, 21, of Powers, Mich., a staff member at the complex.

For troopers who live and work in the desert and rarely stray beyond their camps, a break in the routine and a chance to step out the military heirarchy for a day is a welcome opportunity.

''It's really nice for morale,'' said 3rd Class Petty Officer Charles Munoz, a 25-year-old Sea Bee from Stockton, Calif. ''It keeps our morale high because being stuck in camp all the time like we were, just working seven days a week, really got monotonous really fast.''

''You just want to get away from the sand most of the time,'' said Marine Cpl. Paul Buda, 23, of Milford, Conn. ''You're in the middle of the sand everywhere you go. You eat in sand, you work in sand, you sleep in sand.''

''Right here you've got all this nice, good cement and stuff like that,'' he added, patting the concrete terrace around the swimming pool. ''It helps a lot.''

For the British and American troops who staff the complex, boosting the morale of the soldiers is their sole job.

''Probably one of the most gratifying things I've ever done is to work here and see the effect that it has,'' Wilson said. ''When you watch the young men and women come in the front gate sort of downtrodden and stressed out ... and by the end of the day, many of them from all services will come up to me and say how appreciative they are to be able to visit the facility and use it for a day.''

#90315u0206 11/11/1990 ~United Press International

MOSCOW (NOV. 11) UPI - NATO commander Gen. John Galvin arrived Sunday in the first visit to the Soviet Union by the military head of the Western alliance.

Galvin, who was met at the airport by the chief of Soviet military staff Gen. Mikhail Moiseyev, immediately hailed the changes in the Moscow-led Warsaw Pact.

''The main difference now in the relations of the leaders of the two military blocs is the openness, the sincere desire to seek compromises on all questions '' Galvin said.

The Soviet Union has conceded the Warsaw Pact is an anachronism as a military

alliance and believes that both NATO and the Warsaw Pact should be turned into political institutions.

Galvin will meet both President Mikhail Gorbachev and Foreign Minister Eduard Shevardnadze, who brought about the end of the Cold War in Europe.

He will also visit the Ukrainian cities of Kiev, Yalta and Sevastopol and a naval base on the Black Sea. He will also visit Leningrad.

Galvin's agenda also includes a stop at the military academy of the Soviet General Staff, which trains high ranking Soviet officers. He was invited to the Soviet Union by Defense Minister Dmitri Yazov.

Galvin's visit was preceded by another unprecedented trip by NATO chief Manfred Woerner in July, who told Gorbachev Moscow is now viewed as a partner in a new European order.

Woerner was the first NATO secretary-general to make an official visit to the Moscow.

#90315u0209 11/11/1990 ~United Press International

BANGKOK, Thailand (NOV. 11) UPI - Vietnamese Communist Party leader Nguyen Van Linh said Vietnam's long-broken relations with the United States and China are beginning to mend after a series of high-level visits.

Linh, in an interview with the Japanese television company NHK released Sunday said the meeting in Washington last month between Secretary of State James Baker and Vietnamese Foreign Minister Nguyen Co Thach has speeded movement towards full relations.

''Late as it was, the meeting ushered in a new period, letting bygones be bygones,'' Linh said.

He said improved relations depended in part on joint efforts to find a political solution to the conflict in Cambodia.

Linh, noting the Vietnam War ended more than 15 years ago, said the pace of normalization was too slow.

''There are obstacles that must be removed by the United States itself,'' he said, including the Cambodian problem and the search for Americans still missing from the war.

He said the Cambodian problem was still difficult, but the question of missing servicemen ''has been largely resolved thanks to our goodwill towards the American people.''

He said the American people and American businessmen were eager for better relations with Vietnam, but the U.S. administration was still reluctant.

''I am sure this reluctance will finally be overcome,'' he said.

Linh said relations were also improving with China.

''Even brothers will quarrel from time to time, (but) now contacts have been made for the two countries to settle their differences,'' he said.

Linh said a private visit he made to Beijing in September helped improve relations. He said shooting along the Sino-Vietnamese border had stopped and cross-border trade was thriving.

''In the future, economic, scientific and technical experts will exchange visits, too,'' he said, predicting full restoration of relations would come soon.

#90315u0213 11/11/1990 ~United Press International

NEW YORK (NOV. 11) UPI - A veteran customs inspector shot and killed one suspected mugger, and police nabbed a second who wrestled the agent's gun away and fired - but missed him - in front of his Brooklyn home early Sunday.

U.S. Customs Inspector Richard Ryan, 59, of Greenpoint, was ''pretty well beat up'' when accosed by two thieves just before 1 a.m. in front of his home, he said.

''My face is all swollen, and my hands and fists are cut up'' from the fight with two suspects, he said. ''I got some stitches at the hospital.''

Ryan, a U.S. Customs employee for 28 years, the last 15 at John F. Kennedy Airport, was accosted and beaten by two men in front of his home, prompting Ryan to draw his .357 weapon and shoot one of the assailants, identified as Noel Rivera, 30, of Brooklyn, said a spokesman for police, Officer Scott Bloch.

Rivera was pronounced dead on arrival at Bellevue Hospital.

Meanwhile, a second suspect, identified as Gilbert Exquilin, 26, had wrestled with Ryan and managed to steal away Ryan's weapon, turning it on the agent and firing twice - but missing his both times, Bloch said.

Nevertheless, Exquilin was nabbed shortly after by police who found him carrying the agent's gun and wallet. It was not known how much money Ryan was carrying.

Exact charges against Exquilin were not immediately released.

Ryan declined to talk about some of the details of the harrowing experience, saying he was heading to the 94th Precinct to talk to detectives working on the case, but adding: ''I'm feeling pretty good now.''

#90315u0220 11/11/1990 ~United Press International

(NOV. 11) UPI - Around the world... around the clock... the latest news from U-P-I.

Secretary of State Baker is NOT saying whether France agreed to join any U-S-led military campaign against Iraq. Baker headed back to Washington Saturday after talks with French President Mitterrand. Baker's stop in Paris ended a seven-day, eight-nation tour of the Middle East and Europe.

Sources say the leaders of Liberia's interim government are expected to arrive in the capital of Monrovia Sunday to attempt to take control of the nation. The leaders from nearby African states will have to solve the problems of starvation and a complete breakdown of administration in the capital.

Ireland's highest court will decide this week whether an Irish prisoner should be turned over to British authorities to face terrorism charges. Demond Ellis is staging a hunger strike to prevent his extradition. Ellis says he will starve himself to death before such an order can be carried out.

The University of Virginia has called a meeting Sunday to decide whether the school's football team should play in the Fiesta Bowl in Tempe, Arizona, on New Year's Day. The decision has turned into a controversial one because of Arizona's rejection of establishing a Martin Luther King Junior holiday.

The slain civil rights leader is also the topic of another controversy because of reports he plagiarized during his academic career. But civil rights leaders and historians are defending King's place in history. The president of the Southern Christian Leadership Conference says- ''Dr. King never claimed he was God.''

A state-appointed committee in Johannesburg, South Africa, has dismissed claims by two former policemen on alleged death squad activity. The panel described as ''false'' and ''self-serving'' claims by the officers that they assassinated anti-apartheid activists. A judge is expected to issue a separate report on the allegations soon.

A former owner of race cars in the Indianapolis 500 says he will co- operate with a federal investigation of a multi-state auto and truck theft ring. Grant King made the pledge while pleading guilty in an Indianapolis court to federal charges related to auto theft and the sale of stolen vehicles.

A court in Du Page County, Illinois, will decide if a boy who paid 12 dollars for a 12-hundred dollar baseball card can keep it. A shop owner says a clerk who had NO knowledge of baseball sold the card to Brian Wrzesinski. The youth said- ''People go into card shops and try to bargain all the time.''

#90315u0286 11/11/1990 ~United Press International

ATLANTA (NOV. 11) UPI - November may bring thoughts of Thanksgiving and Christmas shopping, but it also is the time Americans should protect themselves against one of the top 10 disease killers, influenza.

That's the advice from the federal Centers for Disease Control, the agency that monitors flu outbreaks across the country and issues recommendations on how to ward off the influenza virus.

Widespread outbreaks of flu usually don't start until December, according to the CDC's immunization practices Advisory Committee. Therefore, November is the best time to get flu shots, which usually take about two weeks to protect against the flu virus.

The CDC said, however, that vaccination programs ''may be undertaken as soon as current vaccine is available if regional influenza activity is expected to begin earlier than December.''

Last year, the United States experienced its worst flu epidemic in five years with outbreaks beginning in early December. Federal health officials estimated the death toll at 52,000, about 10,000 more than in non-epidemic years.

In some weeks, more than 1,000 people died of influenza and its principle complication, pneumonia.

This flu season, the CDC expects three viruses to circulate in the continental United States - A-Taiwan, A-Shanghai and B-Yamagata, named for the places where the viruses were first identified.

The A-Taiwan virus is a relative of the Russian flu that first hit this country in the 1970s, causing widespread illness.

A-Shanghai represents an antigenic ''drift'' from the flu virus that caused influenza pandemics in 1957, 1958 and again in 1968 and 1969.

Although all flu viruses are capable of causing much sickness and even death, the A-Shanghai virus is generally considered to be the most deadly of the three.

In its recommendations for the upcoming flu season, the CDC's Immunization

Practices Advisory Committee said a vaccine made of killed virus will be available in doctor's offices, health clinics and other health care settings to protect against all three strains.

Flu vaccinations are especially recommended for those over 65, residents of nursing homes and other facilities housing people of any age with chronic medical conditions, and adults and children with chronic disorders of the pulmonary or cardiovascular systems, including children with asthma.

Vaccines also are recommended for anyone who has required medical followup or hospitalization during the preceding year because of chronic medical conditions, and children or teenagers receiving longterm aspirin therapy.

Immunizations also were recommended by the CDC for household contacts and health care providers who come in contact with the elderly and those chronically ill.

The CDC urged that vaccine not be administered too far in advance of the influenza season ''because antibody levels (the protective agents in the vaccine) begin declining within a few months.''

The drug amantadine, the CDC said, is recommended to prevent or lessen the effects of flu under certain conditions but ''is not a substitute for vaccination.''

Influenza illness is characterized by abrupt onset of fever, aching, sore throat and dry cough.

At least 10,000 excess deaths have been documented in each of 19 different U.S. flu epidemics in the period 1957-1986, the CDC said. Over 40,000 flu-caused deaths occurred in each of three of these epidemics.

Pointing up the vulnerability of the elderly to influenza, the CDC said that approximately 80-90 percent of the deaths attributed to pneumonia and influenza were among people over 65 years of age.

#90315u0298 11/11/1990 ~United Press International

PITTSBURGH (NOV. 11) UPI - Stormie Jones, the plucky young Texan who underwent the world's first heart and liver transplant, died Sunday after suffering what doctors said might have been a rejection of her second transplanted liver.

Stormie, 13, of White Settlement, Texas, died at 9:52 a.m. at Pittsburgh Children's Hospital, six years after the landmark operation, hospital spokeswoman Toby Trosky said.

''Physicians are uncertain on the cause of death. She will be undergoing an autopsy,'' Trosky said.

Stormie was admitted Saturday morning to All Saints Episcopal Hospital in Fort Worth, Texas, after experiencing nausea, vomiting and dehydration. Doctors recommended that Stormie and her mother, Lois ''Susie'' Purcell, return to Pittsburgh Children's Hospital for evaluation.

The child, who captured the hearts of people nationwide because of her persistent spunk in dealing with her health problems, was flown by commercial airline to Pittsburgh Saturday night.

She was admitted to Children's Hospital in serious condition suffering flu-like symptoms including a sore throat and low-grade fever, Trosky said.

''This was quite a shock for everyone,'' Trosky said of the child's death.

A family friend in Texas said Stormie had not been feeling well for several days.

The girl had suffered repeated health problems and been forced to return to the Pennsylvania hospital several times. Doctors there had managed to stabilize her condition each time through a change in medication.

She received the original heart-liver transplant at the Pittsburgh Children's Hospital in 1984. But hepatitis damaged that liver and a second organ was transplanted last February.

Another bout with hepatitis damaged the new liver in July.

-30- 1957

#90315u0334 11/11/1990 ~United Press International

CAPE CANAVERAL, FL (UPI) - Engineers readied the shuttle Atlantis Sunday for the start of its countdown to blastoff Thursday night on a secret mission to put a satellite in orbit that may be used to spy on the Persian Gulf.

Shuttle countdowns typically begin three days before takeoff, but NASA managers decided to start Atlantis's one day early, sources said, because of Air Force plans to launch a Titan 4 rocket Monday night from the Cape Canaveral Air Force Station that will interrupt work at the shuttle pad.

While the status of Titan launch preparations Sunday could not be immediately determined, Atlantis's countdown remained on schedule to begin at 10:30 p.m. EST. If all goes well, the shuttle's five-man, all- military crew will fly to the Kennedy Space Center Tuesday for final preparations.

''We don't have any issues or problems we're tracking that would get in the

way of a launch Thursday night,'' NASA spokeswoman Lisa Malone said Sunday. ''We're all looking forward to seeing Atlantis launch.''

As usual with such military missions, details about the flight are secret, including the exact launch time. NASA will only say the shuttle is scheduled for takeoff sometime between 6:30 p.m. and 10:30 p.m. Thursday.

But sources who requested anonymity said takeoff is planned for 6:46 p.m. and that the shuttle can be launched as late as 8:12 p.m. if problems prevent an on-time liftoff.

At the controls for launch will be commander Richard Covey, 44, an Air Force colonel, and co-pilot Frank Culbertson, 41, a Navy commander. Their crewmates are Marine Col. Robert Springer, 48, Air Force Lt. Col. Carl Meade, 39, and Army Maj. Charles Gemar, 35.

The mission duration also is classified, but usually reliable sources said the 37th shuttle flight is scheduled to last three days, 23 hours and 55 minutes, resulting in a landing Nov. 19, at 3:41 p.m. PST, at Edwards Air Force Base in California's Mojave Desert.

Atlantis originally was scheduled for launch in mid July, but the flight was put on hold when a hydrogen leak was detected during a fueling test June 29.

At least two such leaks were blamed for grounding the shuttle Columbia in May and September, but both spaceships have since been repaired and NASA hopes to launch Columbia's seven-man crew on a long- delayed astronomy mission in early December.

Atlantis's flight represents the last fully classified Department of Defense shuttle mission currently on the books, the result of a post- Challenger decision to build a fleet of powerful Titan 4 rockets to give the Air Force independent access to space for high-priority payloads.

While two more military shuttle missions are planned for 1991, the payloads of both have been declassified, allowing the Air Force to do away with an expensive security program that cost $80 million a year to implement.

Titan 4 operations, however, will continue to be fully classified, as are details about Atlantis's mission.

The Titan believed to be set for launch Monday will be making the program's third flight, the first since a successful mission in June. Blastoff originally was set for Sept. 9, but the flight was delayed at the T-minus five-minute mark by a technical glitch.

While the identity of the payload is classified, it may be a $160 million Defense Support Program early warning satellite capable of detecting enemy

missile launches with a sophisticated infrared telescope.

Aviation Week & Space Technology magazine reported last month that Atlantis would be launched into an orbit carrying it 28.5 degrees to either side of the equator and that the shuttle's cargo is a photo- reconnaissance satellite that may be used to monitor conditions in the Persian Gulf region.

But several space experts have questioned that conclusion, saying the shuttle's reported orbit would not allow its satellite payload to fly over the heart of Iraq.

John Pike, a space policy analyst with the Federation of American Scientists, has speculated that Atlantis may be carrying an electronic eavesdropping satellite capable of intercepting military and civilian communications.

But such satellites typically operate in 22,300-mile-high orbits, requiring the use of an ''inertial upper stage'' booster to carry them from the low-Earth orbit of the shuttle to the desired altitude.

A reliable source said Atlantis's payload was not equipped with an ''IUS'' booster, lending credence to the Aviation Week conclusion.

#90315u0346 11/11/1990 ~United Press International
(NOV. 11) UPI - TODAY'S PEOPLE:

MAKING OF A MARTIAL ARTS MYTH: Martial arts movie star Steven Seagal seems to have trouble separating myth from reality. He recently appeared on Arsenio Hall's talk show and said he spent a lot of his youth in Brooklyn but his mother, Pat, told People magazine that he was born in Lansing, Mich., and lived outside Detroit before moving to Fullerton, Calif., when he was 5. Seagal also has portrayed himself as an urban street kid but his mother says he suffered from asthma and was ''a puny kid back then,'' even though he started thriving once they moved from Michigan. The People story also casts doubt on Seagal's claim to have studied in Japan with Morihei Uyeshiba, the founder of the aikido form of martial arts who died in 1969. But Terry Dobson, a fifth-degree black belt who studied with Uyeshiba from 1961 until 1969, says ''That story is bull. (Back then) I never heard of Steven Seagal.'' Sources familiar with the CIA also say Seagal's claim to have been a CIA adviser is improbable.

SAGET ON VIDEOS: Bob Saget, host of ''America's Funniest Home Videos, '' says he prefers the spontaneous videos over the set-ups. ''To be honest, I'm suspicious of all of them,'' says Saget, whose favorites are the tapes featuring children and animals. ''I'm a comedy professional and some videos

look too well-planned to make me laugh. But some people on the show think they're funny so we use them.'' The video show and his role on the sitcom ''Full House'' often result in long workdays for Saget. ''I work six days a week all the time,'' he said. ''The writers for home video come here to my office (above the ''Full House'' sound stage) to work with me during days when I'm light in 'Full House.' ''I'll be here as late as 1 a.m. on Monday nights doing the voice-overs. ''

RELAXING ROBIN: Robin Williams has a burning need to perform but his wife, Marcia, says he can let go at home. ''When he's a home he relaxes, '' she told The New York Times. ''He shuts down that performing part of himself, though of course it comes back in flashes. And he's finally able to extend the relaxation to friends and others he meets so he can carry on more ordinary sit-down conversations. There are times now when he can relax enough to know he's loved even when he's not being funny.''

SAINT EVA MARIE: Chalk up another honor for Academy and Emmy Award- winning actress Eva Marie Saint. The American Association of State Colleges and Universities will presented its Distinguished Alumnus Award to the Bowling Green (Ohio) State University alumna for lifetime achievement at a dinner in Boca Raton, Fla., Nov. 20. Saint is being cited for her contributions to the cultural life of the nation and for her work behind the scenes in support of the arts. She will be join former President Lyndon Johnson, author James Michener, former first lady Rosalynn Carter and former congresswomen Barbara Jordan and Shirley Chisholm as a recipient of one of the most prestigious honors in higher education.

#90315u0376 11/11/1990 ~United Press International

NEW YORK (NOV. 11) UPI - Striking Daily News employees and other trade unionists Sunday were gearing up for a door-to-door campaign in Queens and Brooklyn to plead with home subscribers to drop the newspaper, a union official said.

''Strikers from the News and members of local hospital unions will be going from house to house, asking people to drop their subscriptions,'' said George McDonald, head of union's umbrella organization, the Allied Printing Trades Council.

The door-to-door strategy was the brainchild of Dennis Hughes, a staff member of the state AFL-CIO, and was expected to use members from a number of AFL-CIO affiliates, McDonald said.

The campaign was scheduled to get underway in Queens by Tuesday and to branch into Brooklyn later in the week, McDonald said.

Strikers and sympathizers Sunday were also getting ready for a free distribution of one million free copies of ''The Real News,'' an eight- page alternative tabloid carrying angry denunciations of News management written by striking city room reporters.

''We're going to have everybody in the labor movement distributing it at locations all over the city on Monday,'' McDonald said.

The publication was printed by striking printers and includes stories by Mike McAlary and Jack Newfield, two columnists who joined the strike when it began on Oct. 25 and were later hired away by other newspapers. McAlary has gone to the New York Post and Newfield to the New York Observer.

McDonald also said he sent telegrams to Mayor David Dinkins and Police Commissioner Lee Brown Sunday morning, asking them to plead with News publisher James Hoge to stop employing guards from Special Response Corp. of Towson, Md.

The guards - versed in martial arts and dressed in black jump suits, ski masks and combat boots - were hired to protect non-union drivers delivering the papers. Special Response Corp. brochures advertise a ''Private Army... When You Need It Most... Special Response Team.''

McDonald said he had complained to the mayor and the commissioner that the guards were trained in martial arts techniques outlawed by New York state Law.

McDonald also said he had received a tip that Daily News management was planning to employ grammar school age children to distribute the paper next week.

News officials could not immediately be reached for comment on the union's claims.

This week controversy has surrounded the alleged use of homeless people to hawk Daily News editions written by management and strike breakers.

''When this thing is over, they (managment) will throw the homeless and the children aside, like they've thrown their own workers aside,'' McDonald said Sunday.

On Saturday Daily News spokeswoman Lisa Ronbinson denied the paper had recruited the homeless to sell the management-supported editions.

On Sunday a replacement reporter in the newspaper's city room said, ''Morale is about as high as you could expect among the staff that is here.''

Some Newspaper Guild employees, including photographers and sportswriters, have crossed picket lines. However, most city room reporters have sided with striking members of the other 10 unions employed at the News.

The strike began Oct 25 after News officials fired 200 drivers who left their job at the News' Brooklyn plant during a dispute over whether a union member claiming a medical disability could sit down while working.

Management has maintained the 200 workers initiated the strike and were not fired.

#90315u0387 11/11/1990 ~United Press International

KIEV, UKRAINE, U.S.S.R. (NOV. 11) UPI - The Ukraine is a big producer of wheat, potatoes, milk, meat and sugar beets in the Soviet Union but when it comes to buying a loaf of bread there, the old East European saying applies:

''There'd be a shortage of sand in the Sahara if it was in a communist country.''

With its 52 million people, the Ukraine is rich in natural resources such as gas and coal and its famous fertile black soil. It produces 20 percent of the

wheat, 15 percent of potatoes, 25 percent of milk and meat and 60 percent of sugar beets on a territory comprising 2.7 percent of the Soviet Union.

Yet bread is often unavailable, milk has to be grabbed quickly in the morning, butter is on sale only sporadically and basic vegetables such as onions or potatoes are of poor quality.

Fruit is a rarity although there are big orchards around Kiev.

Ukrainian communist authorities blame shop managers and swindlers for chronic food shortages in the republic but are reluctant to believe that a market economy might solve the problem.

After foodstuffs, cigarettes and matches are the most sought-after goods, and long lines of cars wait patiently in front of gas stations.

''I don't want these three apples for my child. Can you give me some better ones?'' a housewife asked a street vendor. Most apples found in Kiev were small and covered with black blemishes.

Nadieja Kucenko, an architect and mother of one son, said she cannot prepare meals for the family because trying to buy ingredients is too time-consuming.

''It would take me at least four hours (every day) if I wanted to do shopping '' she said.

''Sugar has been rationed for about 1 1/2 years and in some other cities so are soap and washing powders,'' she said during an interview over coffee.

Her family manages because her husband has meals in the factory canteen, her son gets lunch in school and, ''I have sandwiches from time to time,'' she said.

Kucenko said her family has grown accustomed to the situation but visitors are another problem.

''Recently I had a visitor who was a vegetarian, so I had almost nothing to offer him,'' she said.

The communist authorities recently launched an inspection in shops and stores and the results, which were published in the Communist Party paper Kievskey Vyeskin, blamed profit-greedy managers for the shortcomings.

Kievskey Vyesnik reported that the Interior Ministry and prosecuting authorities found some 200 cases of goods being hidden in shops during a three-day inspection.

The report also said that in the southwestern Ukraine region of

Dnyepropyetrovsk alone, the inspections uncovered 16 tons of butter, 15 tons of meat and 1,700 pounds of sugar.

''In one shop some 3,700 cigarettes were found,'' said the newspaper.

The figures reported in the newspaper were high, but the amount of goods discovered by the inspectors would not begin to solve the problem of not enough goods.

Deputies in the Ukrainian Supreme Soviet, or parliament, opened a discussion recently on the economic crisis. One of the remedies suggested was a swift transition to a market economy.

No explanation was given how the plan would be implemented in the republic, where not a single private enterprise or small workshop exists.

The communist deputies, who have majority in the Supreme Soviet, demanded a freeze on capital investment to free up money for producing consumer goods. But such conversion measures take years and never worked in other East Bloc countries before their communist systems collapsed.

One deputy proposed a fine of 5,000 rubles on tourists who take foodstuffs or other products to other republics, but another, from the independent Rukh movement, laughed it off.

#90315u0414 11/11/1990 ~United Press International

JOHANNESBURG, South Africa (NOV. 11) UPI - President Frederik de Klerk has announced the first major Cabinet shuffle of his 13-month-old administration, citing heavy workloads on ministers directly involved in his racial reform program.

The reorganization included the appointment of the last South African Administrator-General of Namibia, Louis Pienaar, as minister of a newly created portfolio, the streamlining of other ministries and the shifting of control over development aid, environmental issues and information.

In the weekend announcement, de Klerk said he intended to reduce the burden on ministers directly involved in his plan to begin formal negotiations with black leaders on a post-apartheid constitution.

Among the major benificiaries were four members of his inner circle who are key players in the negotiation process, the restructuring of the sanctions-strapped economy and security.

Minister of Constitutional Development Gerrit Viljoen, Law and Order Minister Adriaan Vlok and Finance Minister Barend Du Plessis each gained a deputy

minister, and Minister Stoffel van der Merwe, who is responsible for black education, had his portfolio trimmed.

''The negotiation process is making high demands of ministers in general and for some it has meant a considerable increase in their work- load,'' de Klerk said.

Pienaar, 64, left Namibia the day after the South African- administered territory gained independence on March 21 in a U.N.- suspervised program. On his return to South Africa, he was named the government's chief censor as chairman of the Publications Appeal Board.

De Klerk appointed Pienaar as Minister of National Education and Environmental Affairs, taking portions of portfolios from two other ministers. The national education portfolio had been under Home Affairs Minister Gene Louw, who was already burdened with overseeing the mammoth state-run South African Broadcasting Corp.

Environmental affairs had been previously under Minister Gert Kotze, along with water affairs. Kotze has been sharply criticized on a number of key environmental issues.

De Klerk said some aspects of forestry would be added to Kotze's portfolio, making him Minister of Water Affairs and Forestry.

In another significant move, de Klerk assigned the Deputy Minister of Constiutional Development, Rolf Meyer, to become the deputy minister of Information Services covering the Bureau for Information and the National Intelligence Service.

De Klerk, on assuming the presidency had abolished the information ministry and placed it under his own office. De Klerk said the move was intended to ''reduce the state president's administrative burden.''

#90315u0416 11/11/1990 ~United Press International

SKANEATELES, NY (NOV. 11) UPI - The organizer of the eighth annual Short Fat Guy Road Race said Sunday an unexpected development forced him to shorten the course: his racers are aging.

''We've shortened the course from 3.1 miles down to 2-point something,'' said Dick Perry at ''race headquarters'' - Morris' Grill in the Finger Lakes village of Skaneateles.

The change also eliminated the course's hills, but all seven shortcuts were intact, Perry said.

What alerted Perry to the ''age factor'' that shortened the race?

''I looked at 'em. They looked like the dickens,'' Perry said.

Another change is the race's starting line. This year it will begin on a pier jutting over Skaneateles Lake - the first time the short fat guys have ever run over water, Perry said.

He worried about the structure's ability to support the racers.

''It's been tested by engineers, but it's never been tested by short fat guys '' Perry said.

Shortly before the 1 p.m. starting time, the racers were getting their T-shirts, doing warm-ups that consist mostly of ''rubbing,'' and signing disclaimers saying ''if they have a heart attack it ain't our fault,'' Perry said.

The field of 49 runners includes about a dozen women and a man who ran last week's New York City Marathon, Perry said. But Perry had doubts as to whether that runner meets the qualification for the race, which mandates a runner's waist size must be 4 1/2 inches longer than his inseam.

''He says he's bulked up enough. I'm just about to put the ruler on him. We may make him run on one leg,'' Perry said.

Another new feature for this year's race is an addition to the fare supplied at the race's mid-point rest stop, which offers the runners beer, Twinkies and cigars.

''This year we've got Italian bread and butter. We think it'll go over real well,'' he said.

#90315u0446 11/11/1990 ~United Press International

(NOV. 11) UPI - A federal appeals court has refused to overturn an order that prohibits Cable News Network from airing tapes of General Manuel Noriega's telephone conversations. The network says it has a constitutional right to broadcast them and will appeal to the Supreme Court. The former Panamanian strongman is in a Miami jail awaiting trial on drug charges. The tapes are of calls Noriega made from jail to his lawyers.

Democrat Senator George Mitchell and Republican Senator Robert Dole will be their party leaders in the next session of the Senate. Both are running unopposed. Assistant Senate Republican leader Alan Simpson is also unopposed. The only contest will be for assistant Senate Democratic leader. Senator Alan Cranston has stepped down because of cancer. Senators vote on their leaders

Tuesday.

Florida authorities have banned sales of the nutritional supplement G-H-B. Doctors said seven people needed emergency treatment in Florida because they used it. G-H-B- gamma hydroxy butyrate- is a white powder used by body builders to enlarge their muscles. They consider it safer than anabolic steroids. The Florida authorities say it causes slow heart beat, shortness of breath and dizziness.

The 204 passengers who were on a Thai Airways Airbus that was hijacked yesterday have flown to Rangoon, Burma, their original destination. Their Thai plane was hijacked while flying from Bangkok to Rangoon and forced to land in Calcutta, India. The hijackers were two Burmese students who said they were protesting Burmese military repression. The passengers and 12 crew members were released and the passengers flew to Rangoon today on another plane.

Six people were killed yesterday in a clash between former rebels and the police in southeastern Nicaragua. 35 people were wounded. Officials say the rebels- former Contra fighters- and civilians attacked a police station and the police fired at them. Former Contras have been protesting against the Nicaraguan government's failure to give them land they were promised.

Political leaders of Czechoslovakia met yesterday to discuss giving some of the federal government's powers to the two republics that make up the nation- Czech and Slovak. An agreement was reached last week to give the republics administrative and tax powers. But a government crisis may result because some federal ministers fear the central government will lose too much power.

The U-S Embassy in Peru has warned Americans to avoid some areas in downtown Lima. The Embassy says they should stay away from government buildings, foreign embassies and some popular restaurants and night clubs because of the threat of terrorism. The embassy says the danger may be greater this weekend because of the American Veterans' Day holiday.

#90315u0479 11/11/1990 ~United Press International

NEW YORK (NOV. 11) UPI - Vandals in Brooklyn's Greenpoint section knocked the head off a statue of a popular Polish priest opposed to communism, then scrawled pro-communist slogans on the sculpture, police said Sunday.

At 7:30 a.m. Sunday passersby noticed the head was missing from a statue of Father Jerzy Popieluszko, located in a square in the heavily Polish neighborhood, said Officer Scott Bloch, a police spokesman.

On the base of the statue the vandals had spray-painted the Polish words, ''Za Lenina, Za Stalina,'' Bloch said.

''Loosely translated by members of the Polish community that means, 'For Lenin For Stalin,''' the policeman said. ''Apparently some Polish communists are still active in the Greenpoint area.''

Bloch said the vandalism probably took place late Saturday.

Father Roman Gorowski, assistant pastor of St. Stanislaus Church in Greenpoint said Father Popieluszko served as a chaplain to the Solidarity labor movement and had been assassinated by members of Poland's communist government in Torun Poland in 1984.

Four members of the Polish secret police were given jail terms in February 1985 for the slaying of the priest, whose funeral was attended by more than 200,000 people.

''He was a friend of (Solidarity founder) Lech Walesa,'' Gorowski said. ''The most important thing to remember about him is that he was killed because he was against the system of communism. He told the communists that they lie, they steal, and there is no justice in Poland. And they killed him.''

Bloch said there were no suspects and police in the 94th Precinct were investigating the vandalism.

#90315u0519 11/11/1990 ~United Press International

WASHINGTON (NOV. 11) UPI - Top congressional Democrats signaled cautious backing for President Bush's military buildup in the Persian Gulf Sunday, accepting the possibility it could be the prelude to war against Iraq.

But the Democrats, who have been briefed by the president, said Bush is still keeping his options open, hoping that the sanctions and the increase in troop strength by 200,000 will convince Sadam Hussein to pull out of Kuwait.

''I take this to be the use of the threat of war to prevent war,'' Senate Demoratic leader George Mitchell said during an interview on ''This Week with David Brinkley'' (ABC).

Rep. Les Aspin, D-Wis., chairman of the House Armed Services Committee, and Rep. Lee Hamilton, chairman of the House Intelligence Committee, also backed the military buildup.

Hamilton, appearing on ''Meet the Press (NBC), said for the U.S. threat to Hussein to be ''credible, you have to have the power to get him out'' and Aspin said, if war comes, the stronger the force, the ''quicker'' America can win with a reduced cost in lives.

Sen. Claiborne Pell D-R.I., also interviewed on ''Meet the Press,'' was the strongest dissenter, charging that Bush has moved ''too far, too fast'' and said that the president should not take further action without authorization from the United Nations, except if Americans are attacked.

Saying that the United State should not be the ''sole policeman'' in the Middle East, Pell proposed that Bush begin rotating the troops ''and sit it out'' while diplomatic efforts continue.

Despite persistent suggestions, none of the top Democrats supported the idea of calling back Congress to hold a debate on whether to go to war against Iraq. Mitchell and Aspin agreed that it would do no good to debate a ''hypothetical'' proposal.

Mitchell said that although Bush can respond to an emergency, such as an attack on American troops, he added that under the Constitution the president has ''no authority'' to begin a war against Iraq without a formal declaration by Congress.

Hamilton and Aspin agreed that the moment for making the ''awful choice'' of

going to war would come sometime between January and the end of March.

Aspin said that if no progress is made on negotiations, at some point Bush will give Hussein an ultimatitum and, if there is no response, there will be a war against Iraw.

The chairman of the House Armed Services Committee noted that war has always been ''the final option'' in the event Saddam did not relent, adding ''You ought to try a lot of things before you get there. But if it comes to that, if Saddam Hussein just will not move, my choice would be yes, that we should go to war.''

Hamilton said the United States is not yet at the ''critical point'' when a decision must be made ''to get in our get out.''

But he said the policy of forcing Hussein out of Kuwait, diplomatically or militarily, must be accomplished or ''the world community has lost and he (Hussein) has won.

''If we're not strong enough and willing enough to do it, we lose,'' Hamilton said, adding that the United States should not give up on the sanctions - ''the sanctions are beginning to hurt.''

Hamilton also said it would be a ''mistake to set an ultimatum'' and added that the decision to go to war should be based on a ''running judgement'' of the situation.

-30- 3586

#90315u0522 11/11/1990 ~United Press International

DALLAS (NOV. 11) UPI - Protests may halt plans by state officials to use a front-end loader to exhume graves in a turn-of -the-century black cemetery, Freedmen's Memorial Park, a city planner and a black-history activist said.

The state ''is not looking at all the issues involved,'' planner Ron Emrich said at a weekend forum sponsored by Black Dallas Remembered, which has spearheaded Freedmen's preservation efforts. ''We are at a critical point in how Freedmen's cemetery is handled.''

The turn-of-the-century graves, uncovered during the North Central Expressway expansion project, would be scooped up and reburied at an undetermined site, he said.

''We have not found any credible argument for this procedure,'' costing less or being more effective, Emrich said. The procedure ''should be done by hand by sensitive human beings, carefully assuring remains are kept together appropriately.''

The newly discovered graves are in a cemetery originally thought to be used by black Dallas pioneers from the 1860s to 1925. But as excavation for the widening of North Central progressed, archaeologists discovered remains believed to those of slaves.

State Highway Department spokesman Jay Kemp acknowledged that use of a front-end loader was being considered but said the fate of the graves is not set.

''A decision has not been made,'' Kemp said of the state-funded project. ''It's up to the black community. They need to decide a technique where everyone will be happy.

Black community members prefer manual excavation of each grave after it is located, said Mamie McKnight, president of Black Dallas Remembered, Inc. Under this method, graves would be opened by archaeologists, their contents catalogued and the remains reburied in wooden boxes.

''We're taking a definite stand,'' said McKnight. ''Any other method than individual handling is insensitive. We're going to push for it.''

She indicated that the state had not given the black community power to choose a reburial method. ''We don't make the final decision,'' she said, ''but we'll sure make a lot of noise.''

#90315u0528 11/11/1990 ~United Press International

(NOV. 11) UPI - University of Virginia officials decide today whether the football team will play in the Fiesta Bowl in Tempe, Arizona, on New Year's Day. Controversy has arisen because of Tuesday's vote in Arizona turning down a state holiday in memory of Martin Luther King. Virginia Governor Douglas Wilder is black, but says he will NOT tell the university what to do.

Vice President Dan Quayle and U-N Secretary General Javier Perez de Cuellar met in Tokyo today and U-S officials say they agreed to continue working to get Iraqi forces out of Kuwait. A senior official said they discussed a possible U-N resolution authorizing force against Iraq. He did NOT say if Perez de Cuellar supports it. Quayle and the U-N chief are in Japan for tomorrow's coronation of Emperor Akihito.

U-S military officials in Saudi Arabia say a Marine in the Desert Shield force was shot and killed. The unidentified Marine was sleeping in his tent in eastern Saudi Arabia Friday. He was shot by a bullet from another Marine's M-16 rifle. Other Marines who were in the tent are being questioned. The Marine belonged to the 3rd Marine Regiment, which is normally based in Hawaii.

Lebanese militia fighters began their withdrawal from Beirut yesterday. Shiite

Amal gumen evacuated military positions in the southern suburbs of Beirut. But witnesses say their rivals, the Hezbollah fundamentalists, remained. A spokesman for a Christian militia in east Beirut said its soldiers were ready to pull out.

Two small bombs exploded today at the home of a U-S consul general in Japan, but did little damage. Two men on a motorcycle threw the bombs over a wall outside the house in Kobe. The explosion broke a window pane. The consul general in Kobe is Gregory Johnson. Police say they do NOT know if he was at home at the time.

Fire raced through a new apartment complex in Thousand Oaks, California, yesterday and destroyed 242 units that were to open next month. Damage was seven-Million dollars. A fire department spokeswoman says a plumber soldering pipes started the fire by accident. More than 240 firefighters fought the spectacular fire. Two were injured.

Lost dog posters are common in Manhattan. Frequently they offer a modest reward. Kathy Daley put up hundreds of fliers after her Maltese dog, Emma, wa lost last month. The reward she offered is two ringside seats to next month's Mike Tyson-Alex Stewart fight in Atlantic City. She says if she does NOT get her dog back, she will see a fight for the first time in her life.

#90315u0535 11/11/1990 ~United Press International

SAN SALVADOR, El Salvador (NOV. 11) UPI - A year after a massive guerrilla offensive brought El Salvador's civil war to the capital, rebels said Sunday they are ready and able to launch another large-scale attack.

''After a year, we have more strength and better conditions to advance in victory,'' the rebels said in a Sunday broadcast on their clandestine station, Radio Venceremos.

''Our guerrilla units are ready and are poised to act at any moment in any part of the national territory,'' said the latest broadcast of the Farabundo Marti National Liberation Front or FMLN.

This weekend, some 40 fresh recruits slithered through the bush at a secret training center in Chalatenango province, taking instruction in guerrilla warfare from veterans of the decade-old conflict between the FMLN and successive U.S.-backed governments.

In San Jose Las Flores, 34 miles north of San Salvador in the FMLN stronghold of Chalatenango, a rebel commander known as Haroldo spoke of military and political gains resulting from the fiercest fighting of the war.

''We have grown stronger since November 11, 1989,'' said Haroldo. ''We have

consolidated our zones of control despite a constant presence of the armed forces.''

As the 35-year-old rebel spoke, government helicopters could be heard shooting rockets at elusive rebel forces who harrassed a large army patrol operating some 3 miles north of the town.

On the political front, Haroldo said last year's offensive led to serious talks aimed at ending the civil war and related political violence that has claimed the lives of more than 72,000 Salvadorans, most of them civilians.

The offensive ''convinced everyone that negotiation was essential,'' Haroldo said. ''The existence of dual powers in El Salvador is real.''

Contacts between the FMLN and the conservative administration of President Alfredo Cristiani were formalized after the offensive and the United Nations has mediated peace talks with a specific agenda.

The dialogue, begun in May, has bogged down with disagreement over the amount of military reform required to permit the guerrillas to lay down their weapons and continue their struggle for socialism as a political party.

The rebels are calling for a deep purge of the politically powerful armed forces to be followed by eventual replacement of the military with a civilian police force.

Pointing to its constitutional mandate, the tight-knit armed forces refuse to consider being replaced by a police force and military leaders insist they can do their own housecleaning to remove human rights abusers.

The FMLN's threat to use large-scale military action in an attempt to revitalize the talks was present in the thoughts of many Salvadorans on Sunday one year to the day after San Salvador and other major cities became battlegrounds for the first time.

A rebel offensive would mean the immediate disbursement of part of U.S. military withheld by Congress to pressure Cristiani's government into seeking serious progress at the talks.

In his weekly homily, Archbishop Arturo Rivera y Damas noted that the offensive brought to the capital a reality that people living in the Salvadoran countryside have suffered throughout the war.

But noting the civilian casualties caused by combat in San Salvador's most populous neighborhoods, Rivera y Damas said it should not happen again.

Hundreds of civilians are thought to have been among some 2,000 people killed in the offensive.

#90315u0611 11/11/1990 ~United Press International
(NOV. 11) UPI - The Chinese foreign minister said before a meeting with Iraqi President Saddam Hussein that it is too early to determine if Beijing will support a U-N Security Council resolution to use force in the Persian Gulf crisis. Chinese Foreign Minister Qian Qichen flew from Amman, Jordan, to Baghdad today to meet with Iraqi officials. He told reporters that China supports efforts to find a peaceful solution to the crisis.

The 13-year-old recipient of the world's first heart and liver transplant is back in Pittsburgh Children's Hospital, where she received the new organs in 1984. Stormie Jones of White Settlement, Texas, was admitted to a Fort Worth hospital yesterday, and a family friend said the child had NOT been feeling well for several days. Doctors decided she should return to the Pittsburgh hospital to determine whether her body is rejecting the transplanted liver.

New York City police say they are investigating a tip that the accused assassin of right-wing Rabbi Meir Kahane may have practiced target shooting with a retired Connecticut police officer. A police spokesman says a report linked the gunman and an unidentified retired officer. But he added that the retired policeman is NOT a suspect in the shooting. He says authorities only want to question the man, whose exact location is NOT known.

Heavy turnout is reported today in the first round of unprecedented multi-party elections for the Macedonian Assembly. The balloting today in the Yugoslav republic could determine the fate of federal Prime Minister Ante Markovic and his pro-reform alliance.

Pope John Paul visited with convicted drug dealers, underworld killers and common criminals today during a visit to Europe's most crowded prison. The pontiff made the prison visit at the mid-point of a five-day pastoral visit to Naples, where he delivered his traditional noon prayer before an enthusiastic crowd of 150-thousand people. The pope hugged convicts and said they should NOT give up hope of returning to a crime-free life.

Prime Minister Toshiki Kaifu and Foreign Minister Taro Nakayama are meeting with foreign dignitaries arriving in Japan for the enthronement of Emperor Akihito. Indonesian President Suharto and either other guests arrived in Tokyo today. Britain's Prince Charles and Princess Diana arrived yesterday, as Japanese police deployed 27-thousand uniformed and plainclothes police in the city to guard against threatened terror action by leftist radicals.

#90315u0676 11/11/1990 ~United Press International
(NOV. 11) UPI - U-S officials say Vice President Quayle agreed with U-N

Secretary- General Javier Perez de Cuellar to keep working through the United Nations to get Iraq out of Kuwait. Quayle met with Perez de Cuellar for about two hours aboard Air Force Two in Tokyo, where the vice president will attend tomorrow's enthronement of Emperor Akihito.

Chinese Foreign Minister Qian Qichen says it is too early to tell if China will support a U-N Security Council resolution to authorize military action to drive Iraq from Kuwait. Qian flew today from Amman, Jordan, to Baghdad for talks with Iraqi President Saddam Hussein.

NATO commander General John Galvin arrived in Moscow today on the first visit to the Soviet Union by the military head of the Western alliance. Galvin was invited to the Soviet Union by the Russian defense minister. On his arrival, Galvin immediately hailed changes in the Moscow-led Warsaw Pact and praised the openness and what he termed ''the sincere desire to seek compromise on all questions.''

Vietnamese Communist Party chief Nguyen Van Linh says his nation's long-broken relations with the United States and China are beginning to mend after a series of high-level meetings. In an interview with a Japanese T-V company released today, Linh said the mending with the United States was speeded last month at a Washington meeting between Secretary of State Baker and the Vietnamese foreign minister. He said the conflict in Cambodia and the search for Americans still missing from the Vietnam War are still obstacles to better relations.

Truck and taxi drivers today joined a six-day-old transport strike that is causing chaos through much of the most populous province in Pakistan. Bus drivers in northeastern Punjab Province began the strike on Tuesday. The drivers are protesting an Islamic law under which they must pay the equivalent of 77-hundred dollars in compensation to the families of anyone they kill in a road accident or face imprisonment or execution.

The Boulder, Colorado, Health Department is investigating possible food poisoning at the University of Colorado this weekend. More than 100 University of Colorado students became ill over the weekend after eating a variety of meals from several campus kitchens. A campus spokeswoman says the students complained of nausea, vomiting and diarrhea.

#90315u1039 11/11/1990 ~United Press International

NEW YORK (NOV. 12) UPI - Trans World Airlines Sunday proposed a merger with Pan Am Corp., provided Pan Am does not come to an agreement with United Airlines first, airlines officials said.

The merger proposal, contained in a letter from TWA to Pan Am, recognized that Pan Am has a binding agreement in principle with United for the sale of

various Pan Am international routes and other assets.

Pan Am said the agreement with United Airlines may be terminated if it is not completed on or before Nov. 14.

The TWA merger proposal is conditioned on the termination of the United agreement.

Pan Am spokeswoman Pamela Hanlon called the receipt of the letter a ''significant development,'' but added that Pan Am's ''focus of attention remains completing the agreement with United.''

TWA's letter also proposed that it purchase the Pan Am Shuttle on or before Dec. 31, 1990.

A merger between Pan Am and TWA would require regulatory approval, and the sale of duplicative international routes, such as London, Paris and Rome, on terms agreeable to both airlines, said Hanlon.

Under TWA's proposal, Pan Am Corp. shareholders would receive $1 per share in cash in the merger, and $2 per share in face value of preferred stock or promissary notes containing terms to be negotiated.

According to TWA's letter, the proposal is open through Nov. 16, and contemplates a merger by March 31, 1991.

#90315u1329 11/11/1990 ~United Press International

(NOV. 11) UPI - King Hassan of Morocco offered to host an emergency meeting of Arab leaders to discuss the Persian Gulf situation but the official Iraqi news agency says the idea has already been rejected. It quotes Iraqi officials as saying the conference could be a front for what it calls ''American-Zionist aggression against Iraq.''

Word of the Iraqi rejection of the king's offer came even as Saddam Hussein told British television interviewers that he is ready to negotiate over the crisis. But Saddam also attached his condition that the Palestinian question be added to the agenda... and that condition has been rejected repeatedly by the Western allies in Operation Desert Shield.

Americans honored veterans of wars past and present today... the official Veterans Day, though the legal holiday is tomorrow. In Minnesota, there was a reunion of World War One veterans, while the Vietnam Veterans Against the War group staged a protest in Chicago against U-S involvement in the Persian Gulf.

13-year-old Stormie Jones died at Pittsburgh Children's Hospital this morning... the same facility in which she became the world's first heart and liver transplant recipient. Doctors said the girl may have suffered a heart infection but the exact cause of death has NOT yet been determined.

Contract talks between U-S-X Corporation and the United Steelworkers of America are in recess, with NO date for resumption scheduled. The union announced today that the bargaining was suspended late last night after union negotiators rejected the latest company proposal, which did NOT include a wage increase.

New York City police say vandals in the Greenpoint section of Brooklyn knocked the head off a statue of a popular Polish priest opposed to communism and scrawled pro-communit slogans on the sculpture.

The federal Centers for Disease Control in Atlanta says it's time for Americans to get their flu shots. Officials say flu outbreaks usually begin in December, so November is the best time to get the vaccine, which takes about two weeks to fully protect a person from the virus.

-30- 2272

#90315u1397 11/11/1990 ~United Press International

(NOV. 11) UPI - The Arab world appears to be intensifying moves for a peaceful solution to the Persian Gulf crisis. King Hassan of Morocco today offered to hold an emergency meeting of Arab leaders on the crisis. He also called on Arab leaders in a speech broadcast by Moroccan television to give peace ''its last chance.'' But Iraq is already rejecting the proposal. The official Iraqi News Agency quotes officials as saying the summit could be- quoting- '' a cover for American-Zionist aggression against Iraq.''

Meanwhile, President Bush is reported willing to consider what one official called a ''messy compromise'' to resolve the Gulf crisis. A senior U-S official tells Newsweek magazine that under the compromise, Iraq would withdraw from Kuwait without preconditions. But the official says the United States would NOT interfere if fellow Arabs later wanted to meet Iraqi demands for a Persian Gulf port or part of a Kuwaiti oilfield. And he says there would be ''NO reward'' to Iraq.

In another development, a published report says a U-S Marine battalion plans to practice an amphibious assault this week within range of Iraqi Silkworm anti-ship missiles. The report quotes a U-S official as saying the exercise would take place near the border between Saudi Arabia and Kuwait. The official reportedly says the exercise was planned- quoting now- ''intentionally to raise the ante to show we have the capability and we're ready to take it right to their border.''

At Cape Canaveral, Florida, engineers are getting the shuttle Atlantis ready for the start of its countdown to blastoff Thursday night on a secret military mission. The shuttle's five-man, all-military crew reportedly will put a satellite in orbit that may be used to spy on the Persian Gulf. Sources say NASA managers are starting Atlantis's countdown tonight, one day early because of Air Force plans to launch a Titan-4 rocket tomorrow night from a nearby launch pad.

Guatemalans went to the polls today to choose a successor to President Vinicio Cerezo. The peaceful election ended a bloody campaign in which dozens of political party activists and several elected officials were shot dead in street attacks in the weeks leading up to the balloting. There were NO reports of incidents today... although most voters appeared apathetic and skeptical their vote could alter the country's course.

In Moscow, the man who fired two shots in Red Square on Revolution Day is in custody on charges of attempting to commit a terrorist act. The Soviet news agency Tass reports today that the man was disarmed by a plainclothes policeman. The officer says he was standing in the square when he noticed a man about three yards away had whipped out a double- barreled hunting rifle. Soviet President Gorbachev and other leaders were standing atop the Lenin tomb on the other side of the square when the shots rang out.

#90315u1543 11/11/1990 ~United Press International

(NOV. 11) UPI - An aide to President Bush reportedly says there's NO indication that Iraq's Saddam Hussein is wearing down or changing his mind in the Gulf standoff.

Meanwhile, a senior U-S official is quoted in a published report as saying President Bush is willing to consider what he termed a ''messy compromise'' to resolve the crisis. But he says there would be NO reward to Iraq for pushing the Middle East toward war.

The report also says a U-S Marine battalion plans to practice an amphibious assault this week within range of Iraqi Silkworm anti-ship missiles. It says the exercise near the border between Saudi Arabia and Kuwait was planned ''intentionally to raise the ante'' to show U-S capability.

In Tokyo, the government prepares to crown its 125th emperor tomorrow. But on the eve of the enthronement of Emperor Akihito, authorities say suspected leftist radicals opposed to the move set a series of fires and unleashed scattered burts of gunfire around the city.

Fires broke out at five Shinto shrines and several train stations in the Tokyo area. Bullets were fired at four Japanese Self Defense Force bases and one U-S base. NO one was injured in any of the attacks.

South African authorities today imposed emergency regulations and a curfew on two black townships near the capital of Pretoria. The move was aimed at quelling anti-government rioting that left two people dead and 25 wounded yesterday.

In another development, South African President Frederik de Klerk announced the first major Cabinet shuffle of his 13-month-old administration. De Klerk cited heavy workloads on ministers directly involved in his racial reform program as reason for the reorganization.

-30- 1872

#90315u1682 11/11/1990 ~United Press International

(NOV. 11) UPI - Iraqi President Saddam Hussein reportedly says he's prepared to negotiate a settlement to the Persian Gulf crisis if the Palestinian problem is on the agenda. Saddam told British television interviewers that he's confident that ''serious and deep solutions'' can be reached on all issues, including the Palestinian question.'' Saddam has said before he will consider withdrawing from Kuwait if the Israelis withdraw from the territories and Syria withdraws from Lebanon.

Trans World Airlines is proposing a merger with Pan Am Corporation. Airlines officials say T-W-A issued the merger proposal in a letter to Pan Am. The merger proposal is conditioned on the termination of a binding agreement in principle with United Airlines for the sale of various Pan Am international routes and other assets. Pan Am says the agreement with United may be terminated if it is NOT completed on or before November 14th.

The world's first heart-liver transplant patient is dead. 13-year-old Stormy Jones, the Texas girl who captured the hearts of Millions when she underwent the operation, died today after suffering what doctors said might have been a heart infection. The freckle-faced teen-ager died at Pittsburgh Children's Hospital, six years after the landmark heart- liver operation. She later underwent a second liver transplant when the first organ was damaged by hepatitis.

Contract talks have broken off between U-S-X Corporation and the United Steelworkers of America. A union official says negotiations were suspended late yesterday after the union rejected the company's four- year proposal that did NOT include wage increases. The union representing 18-thousand steelworkers in seven states says the company's proposal fell ''woefully short of settlements the union reached with other major steel producers.''

A union officials says striking employees at the New York Daily News and other trade unionists are gearing up for a door-to-door campaign in Queens and Brooklyn to plead with home subscribers to drop the newspaper. The campaign is scheduled to get underway in Queens by Tuesday and to branch into Brooklyn

later in the week.

#90316b0009 11/12/1990 ~Business Wire

AUSTIN, TEXAS (NOV. 12) BUSINESS WIRE - In an unprecedented move that will impact elementary science education nationwide, the Texas State Board of Education Saturday adopted a videodisc-based curriculum program as a ''textbook.''

The program, ''Windows on Science,'' will compete with two traditional textbooks for more than $40 million in state textbook funds. This is the first time a program employing instructional technology has competed directly with textbooks in a state adoption.

With the board decision, school districts in Texas now can purchase ''Windows on Science'' for implementation in the 1991-1992 school year. ''Windows on Science'' was developed by Optical Data Corp. of Warren, N.J.

''Two years ago, Texas challenged the publishing industry with a call for innovation,'' said William E. Clark, president and CEO of Optical Data. ''We were the only publisher that responded. I believe the vote today will prove to be the Lexington-Concord of a revolution which will redefine the textbook industry.

''I applaud the leadership role Texas has taken in the search for more effective teaching strategies and instructional resources. They have used their adoption process as a catalyst for positive change.

As a key textbook adoption state, their action gives great impetus to a trend we see developing nationwide - the demand by state agencies, school districts, educators and the public for greater variety, value and effectiveness in the materials used in classrooms.''

To qualify for adoption, ''Windows on Science'' was required to meet stringent state specifications. The program provides complete coverage, in English and Spanish, of state-mandated content for elementary science education in grades one through six. It also actively develops student process skills. Finally, it is priced competitively with a set of classroom textbooks.

Optical Data Corp. is the leading producer, publisher and distributor of educational videodiscs. More than 7,000 schools nationwide use Optical Data products in daily instruction. The company also distributes educational videodiscs for ABC News InterActive, Apple Computer and the National Geographic Society.

For more information, contact Pam Herber or Ingrid Patton at Optical Data Corp., 30 Technology Drive, Warren, NJ 07059, telephone: 908/668-8092

(Saturday); 908/668-0022; or 800/248-8478.

#90316b0012 11/12/1990 ~Business Wire

LAS VEGAS, NV (NOV. 12) BUSINESS WIRE - Exabyte Corp. (NASDAQ: EXBT) once again extends the boundaries of tape technology with the announcement of data compression on its EXB-8500 8mm Cartridge Tape Subsystem.

Already offering the largest storage capacity, fastest transfer rate and quickest search rate in its form factor, the EXB-8500 with compression will offer sustained transfer rates up to 2.5 MB/sec. and storage capacities up to 25,000 megabytes (25 GB). High-speed search also will achieve effective search speeds of up to 187.5 MB/sec.

The data compression option offered by Exabyte, subject to the completion of appropriate license rights, will incorporate the IBM algorithm as set forth in the ANSI Document X3B5/90/254, and currently implemented in IBM's Improved Data Recording Capability (IDRC).

Exabyte's implementation of data compression offers data integrity verification not offered by any other helical scan recording vendor. After data is compressed, it is decompressed immediately and compared to the original data prior to being written on the tape.

This Compression Integrity Check ensures that the failure of any electronic component within the compression implementation will not compromise the integrity of the data written to tape.

"We chose the IBM algorithm because we needed a compression algorithm that offered the speed and efficiency to support our current products as well as the high-performance 8mm products we are designing for the future," said Exabyte President and Chief Executive Officer Peter Behrendt.

As a de facto standard in the high-performance systems environment, the IBM algorithm will be implemented as an option on all future 8mm drives. "This announcement widens the already considerable advantage our products enjoy over any competitive products.

"It reaffirms our commitment to enhance our customers' investments by offering a complete and extendable line of 8mm products - a line that will ensure ongoing media interchange, continued configuration flexibility and unequalled growth paths," Behrendt added. Selectively invoked by software commands, data compression on the EXB-8500 will:

- Increase storage capacity up to five times
- Increase effective transfer rates up to five times
- Increase effective search speeds up to five times
- Reduce backup times
- Reduce data cartridge requirements
- Reduce tape mounts

#90316b0013 11/12/1990 ~Business Wire

LAS VEGAS (NOV. 12) BUSINESS WIRE - EXABYTE Corp. (NASDAQ:EXBT) announced that it has signed an exlcusive joint development agreement with Sony Corp. for a half-high deck mechanism.

This agreement formalizes more than a year's worth of shared development efforts, which have already resulted in several prototypes half-high 8mm drives.

The program will produce a half-high version of the popular EXB-8200 8mm Cartridge Tape Subsystem, with a storage capacity of 2,500 megabytes (2.5 GB) and a transfer rate of 246 kilobytes per second (KB/sec.). Also under development is a half-high version of the EXB-8500 8mm Cartridge Tape Subsystem, with double the capacity and the transfer rate of the EXB-8200. Both drives currently are packaged in the industry-standard full-high 5-1/4 inch form factor.

Both the EXB-8200 and the EXB-8500 half-high products will have the option of using data compression, as will all future 8mm drives. Data compression will provide up to five times the capacity, transfer rates and search speeds, depending on the data to be compressed.

The data compression option offered by EXABYTE, subject to the completion of appropriate license rights, will incorporate the IBM algorithm as set forth in the ANSI Document X3B5/90/254, and currently implemented in IBM's Improved Data Recording Capability (IDRC). This implementation of data compresison offers a Compression Integrity Check (tm) not offered by any other helical scan recording vendor.

The first EXABYTE 8mm cartridge tape subsystem in a half-high form factor will be available in the second half of 1991.

EXABYTE Corp., based in Boulder, Colo., develops, manufactures and markets a complete line of high-capacity 8mm cartridge tape subsystems for data storage. The company markets its 8mm products to original equipment manufacturers,

value-added resellers, system integrators and distributors for unattended backup/restore, journaling, archiving, data interchange, software distribution imaging and data acquisition.

#90316b0014 11/12/1990 ~Business Wire

LAS VEGAS, NV (NOV. 12) BUSINESS WIRE) - A desktop cartridge handling subsystem (CHS) capable of random or sequential 8mm tape backup operations was introduced Monday by Exabyte Corp. (NASDAQ: EXBT).

"The EXB-10i Cartridge Handling Subsystem is ideal for the LAN environment, where selective restore capability is a requirement," said Exabyte President and Chief Executive Officer Peter Behrendt. "This extension of our product line for unattended backup gives Exabyte customers additional flexibility in meeting end-user needs."

The EXB-10i CHS incorporates either an EXB-8200 or EXB-8500 Cartridge Tape Subsystem, offering native storage capacities of 25 gigabytes or 50 gigabytes, respectively, in less than a square foot of desk space. A robotic cartridge handling mechanism accesses up to ten cartridges - either sequentially or randomly.

Random access is achieved through the SCSI-2 interface with a subset of the command set for the previously announced Exabyte EXB-120, a cartridge handling subsystem that offers up to 580 GB of data storage. Robotics in the EXB-10i CHS are identical to those in the EXB-10 CHS, which provides sequential access only.

Beta shipments of the EXB-10i CHS will begin in first quarter 1991. Production shipments are scheduled for second quarter 1991. Single-quantity price to OEMs and system integrators, without drive and cartridges, is $3,195 (U.S.). Exabyte will upgrade EXB-10 units for $295 (U.S.) in second quarter 1991.

Exabyte Corp., based in Boulder, Colo., develops, manufactures and markets a complete line of high-capacity 8mm cartridge tape subsystems for data storage. The company markets its 8mm products to original equipment manufacturers, value-added resellers, system integrators, and distributors for unattended backup/restore, journaling, archiving, data interchange, software distribution imaging and data acquisition.

#90316b0015 11/12/1990 ~Business Wire

LAS VEGAS (NOV. 12) BUSINESS WIRE - EXABYTE Corp. (NASDAQ:EXBT) Monday announced a new high-speed search feature that will enhance the performance of the highly successful EXB-8200 8mm Cartridge Tape Subsystem.

EXABYTE also increased the mean time between failure (MTBF) of all models of the EXB-8200 by more than 30 percent to 40,000 hours. The increase was based on reliability data collected on more than 150,000 units in the field. MTBF is the number of hours between equipment failures that require maintenance intervention.

The high-speed search functionality on the EXB-8200 allows the host to locate a pre-defined position on tape quickly. Searching over half of a 2.5 gigabyte tape with an average access time of 85 seconds, the EXB-8200 now achieves high-speed search at speeds up to 15 megabytes per second.

''With its new optional feature, the EXB-8200 is the perfect solution for our customers who need fast search speeds, particularly in PC LAN environments,'' said Peter Behrendt, EXABYTE president and chief executive officer.

''The product's very high storage capacity, fast transfer rate and rapid search speed combine to offer users unparalled tape backup and restore capabilities. The introduction of this new feature demonstrates our continued determination to meet our customers' requirements for high-performance backup and rapid restore operations.''

The high-speed search feature further extends the performance of the EXB-8200, which has a storage capacity of 2,500 megabytes (2.5 gigabytes) and a transfer rate of 246 kilobytes per second. Packaged in a standard 5-1/4 inch form factor, the EXB-8200 also includes an integrated SCSI controller (in single-ended or differential drives), onboard error correction code and error recovery procedures, and integrated speed-matching buffer.

To achieve the high-speed search functionality, two high-speed search commands were added to the EXB-8200; SHOW BLOCK and FIND BLOCK. These commands allow the product to position to a given logical point of tape very quickly. Driver development is required. An additional feature, abbreviated filemarks, may be used to delimit groups of recorded user data, and take up only 23 tracks each or about 184 kilobytes of data space.

Production shipments are scheduled for December 1990. OEM quantity pricing of the EXB-8200 with high-speed is US $1,665. High-speed search upgrades to existing EXB-8200s will be available in June 1991.

EXABYTE Corp., based in Boulder, Colo., develops, manufactures and markets a complete line of high-capacity 8mm cartridge tape subsystems for data storage. The company markets its 8mm products to original equipment manufacturers, value-added resellers, system integrators and distributors for unattended backup/restore, journaling, archiving, data interchange, software distribution imaging and data acquisition.

#90316b0021 11/12/1990 ~Business Wire

ENGLEWOOD, CO (NOV. 12) BUSINESS WIRE - U S WEST (NYSE:USW) announced Monday that it has proposed to U S WEST NewVector Group Inc. (NASDAQ:USWNA) a transaction in which U S WEST would acquire the 19 percent of NewVector it does not currently own in a stock-for-stock, tax-free merger.

Upon consummation of the merger, each of the approximately 9.7 million shares of common stock of NewVector not owned by U S WEST would be converted into the right to receive 0.95 shares of U S WEST common stock.

Based upon closing prices as of Nov. 9, 1990, the total consideration paid to NewVector's public shareholders would be approximately $350 million, or $36 per share, representing a 33 percent premium over the average market price of such shares over the last 20 trading days.

''Our proposed acquisition of the publicly held minority shares in NewVector is an attractive opportunity for both companies and their shareholders,'' said Howard P. Doerr, executive vice president and chief financial officer of U S WEST.

''Based on a value of $36 per share, NewVector stock will have had a compound annual rate of return of over 25 percent since it was first issued in April 1988. This is better than virtually any other cellular investment over the same period.

''The premium being offered also compares favorably with other acquisitions of public minority interests. In addition, since NewVector shareholders will receive U S WEST stock, they will continue to share in the upside of the cellular business at home and abroad,'' he said.

''When we made a minority of NewVector shares available in 1988,'' Doerr noted ''cellular was commonly viewed as a totally separate market from our more traditional telecommunications markets.

''Because of advances in technology, U S WEST believes that a broad range of radio-based technologies could be utilized across multiple markets in the future. With this exchange of stock, U S WEST will have additional flexibility to take advantage of continuing technological advances in these areas.''

U S WEST anticipates that the merger would cause minimal dilution.

Consummation of the proposed merger is contingent on approval of the transaction by an independent committee of outside directors of NewVector, the full board of directors of NewVector and the holders of two-thirds of the voting securities of NewVector, and upon the effectiveness of a Registration Statement to be filed with the Securities and Exchange Commission relating to the shares of U S WEST common stock to be issued in the merger.

U S WEST owns approximately 81 percent of the outstanding shares of NewVector.
  The shareholders of U S WEST will not be required to vote on the merger.

     #90316b0031 11/12/1990 ~Business Wire
LOS ANGELES (NOV. 12) BUSINESS WIRE) - A staggering one in every ten West Los Angeles office buildings - including some owned by Japanese investors - have had "for sale" signs hung on them during the past six months, adding fuel to one of the most competitive investment markets of the past ten years, according to an estimate released by Westmac Commercial Brokerage Co.

Timothy C. Macker, president of the West Los Angeles brokerage firm, disclosed that the amount of office product now on the market in such places as Beverly Hills and Westwood includes some so-called "trophy" properties purchased during the office building boom of the 1980s by Japanese and domestic syndicators and investors.

"A major reason explaining this unusual condition is the credit crunch peculiar to commercial real estate financing," said Macker. "Historically, buildings have been financed with lesser equity than is required today. Lenders want to see borrowers invest 20 percent to 40 percent hard dollars today while values of buildings have flattened."

The average number of buildings for sale during a normal real estate cycle is approximately four percent - or four in every 100 buildings, Westmac reported. A jump in that rate to ten percent, which in West Los Angeles equates to roughly two million square feet of existing office space for sale, is a new

record, the firm said.

"Opportunities for purchasing office buildings in West Los Angeles have never been greater," said Macker. "I don't think there has ever been as large a range of building types or a more economic time to enter the market."

According to Macker, buildings for sale range from Class A high rises to small owner-user facilities, as well as the growing list of trophy properties so highly regarded by Japanese and other foreign investors during the past ten years.

"We are definitely seeing some of the larger Japanese firms that acquired high-profile properties in the 1980s putting those buildings up for sale," Macker noted.

"They are finding that the reversal in their own domestic financial conditions - not to mention the costs associated with such operating costs as asbestos removal, fire sprinkler installation and handicapped requirements on older buildings - have become untenable even for them."

However, the brokerage firm also noted that West Los Angeles may not be as hard hit by the growing inventories of office product as other adjacent markets because much of its geography falls under various local height and density restrictions.

#90316b0052 11/12/1990 ~Business Wire

CHICAGO (NOV. 12) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) announced Monday the engagement of Bear Stearns & Co. Inc. and BT Securities Corp., a division of Bankers Trust Co., as Bally's financial advisors and investment bankers.

They have been engaged to perform a variety of services, including the restructuring and/or refinancing of some or all of the outstanding debt securities of Bally Grand Inc. (which operates the Bally's Las Vegas Casino Resort and Bally's Reno Casino Resort in Nevada), and the proposed divestiture of certain of Bally's products and services businesses.

Bally also announced that it has retained Manufacturers Hanover Trust Co. as Bally's financial advisor in connection with the proposed sale of Life Fitness Inc., a subsidiary of Bally that designs, manufactures, distributes and sells fitness equipment.

Bally also announced the decision to discontinue its efforts to sell Bally's

Health & Tennis Corp. and to discontinue dividend payments on the company's Series D Convertible Exchangeable Preferred Stock.

In addition, Bally announced that Richard Gillman, a director of Bally and chief executive officer of Bally's Casino Group, has been elected president and chief operating officer of Bally, replacing Roger N. Keesee, who resigned as president, chief operating officer and as a member of the company's board of directors.

Finally, Bally announced that it has reached an agreement with the Rank Organisation to terminate the previously announced purchase by Bally of The Clermont Club casino in London.

On Oct. 12, 1990, Bally announced its decision not to make a scheduled Oct. 15 1990 interest payment of approximately $18.4 million on the Bally Grand 11 1/2 percent First Mortgage Notes due 1996 in the outstanding principal amount of approximately $320 million. The board stated, at that time, that it would use the 30- day grace period provided by the indenture governing these notes to perform a complete review of the financial condition and operations of Bally and its subsidiaries and to develop a comprehensive plan.

Bally has been in communication with representatives of certain of its lenders and certain holders of debt securities of Bally Grand Inc., including a committee representing certain holders of the Bally Grand 11 1/2 percent First Mortgage Notes, concerning a possible restructuring of the Bally Grand debt and intends to pursue those discussions.

Bally also may determine to purchase debt securities of Bally and its subsidiaries from time to time in the open market or in private transactions, subject to the availability of financing and the availability of securities at prices deemed acceptable to Bally.

In addition, notwithstanding these developments, Bally fully intends to have the company's Nevada casino operations continue as a viable entity.

Bally Manufacturing Corp. is a world leader in the gaming and fitness industries with four casino hotels, a nationwide network of fitness centers, and a complete line of gaming equipment and systems, fitness equipment and lottery products and services.

LAS VEGAS (NOV. 12) BUSINESS WIRE - LINK Technologies Inc., a leading designer and supplier of computer terminals, Monday unveiled the MC6, the most

technically advanced offering in its state-of-the-art, comprehensive lineup of computer display products.

As LINK's first monochrome graphics terminal the MC6 offers advanced graphics features, as well as ease of customization characteristic of all the company's terminals.

''The power, flexibility, and full-featured design of the MC6 promise to make it a terminal that can grow with today's dynamic distributed processing environments,'' stated Chuck Comiso, president of LINK Technologies Inc.

In addition to industry standard ASCII, ANSI, PCTerm emulations, the MC6 offers powerful Tektronics Graphics, and Hercules Graphics personalities to give users considerable graphics potential.

The product's simultaneous connection to two hosts with full page or split screen display and concurrent update provides powerful screen capabilities.

Interchangeable keyboards, compatibility with many multi-user systems and advanced screen functionality are other major strengths of the MC6.

Keyboards options include either ANSI, ASCII or Enhanced PC layout. Up to 16K bytes of non-volatile function key memory is available for keyboard customization.

The MC6 is designed for use with a wide range of popular multiuser systems, including UNIX, VMS, PC MOS and Concurrent DOS.

LINK's new MC6 terminal will be displayed at Comdex, at Booth No. 2390 in the South Hall of the Las Vegas Convention Center.

LINK Technologies Inc. is an independent operating subsidiary of Wyse Technology, which merged with the company in 1987. LINK became the fastest-growing and second largest independent terminal company in the world within just five years of its founding in 1983.

#90316b0054 11/12/1990 ~Business Wire

FREMONT, CALIF. (NOV. 12) BUSINESS WIRE - On Aug. 6, Safeway introduced the ultimate convenience for grocery shoppers in the Bay Area -- ''Safeway Express'' will now be expanded to include Benicia, Vallejo, cities in the North Bay and Santa Cruz and Monterey counties.

Over an additional 1 million residents, or 441,000 households in Napa, Sonoma,

Monterey, Santa Cruz counties, will now be able to take advantages of the service (by placing their order by telephone or by fax machine) and receive the same day or next day service.

This is the first complete home delivery service that provides the ability to shop by phone from a full-service supermarket selection from over 30,000 items all at the same price a customer would pay if they were doing the shopping themselves.

Items from the store's specialty departments are also available including the bakery, deli, fish market, produce and floral departments and pharmacy.

''Serving our customers is of primary importance to us and the home delivery service is a convenience that no other chain in Northern California offers. These areas have been added to better serve our customers in time for the holiday season,'' stated George Unti, senior vice president and division manager.

The home delivery service will begin in these areas on Tuesday (Nov. 13).

Shoppers Express, based in Bethesda, Md., has successfully worked with other leading supermarket chains in developing the shop-by-phone industry including A&P, Kroger and the Washington D.C. and Portland, Ore., divisions of Safeway Inc.

Safeway Inc. is the third largest grocery chain in the United States, operating 876 stores, 220 in Northern California.

     #90316b0055 11/12/1990 ~Business Wire
MOUNTAIN VIEW, CA (NOV. 12) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) Monday announced the Amethyst controller, a new PostScript printer controller board based on the 16 MHz Am29000 RISC microprocessor from Advanced Micro Devices.

The Amethyst controller is the fourth member of Adobe's family of RISC-based controllers, which the company expects to play an important role in helping its customers set new price/performance standards for PostScript printers and typesetters through the 1990s.

The new controller, targeted for application in low- to medium-speed raster printers, can be configured by original equipment manufacturers (OEMs) with varying amounts of RAM and ROM to meet a variety of performance requirements. The amount of RAM can vary between two and 32 megabytes; the amount of ROM

between one-half and six megabytes.

The controller can accept input through RS-232 and RS-422 serial ports, through a Centronics parallel port, and via AppleTalk. It also support the Small Computer Systems Interface (SCSI), which enables users to connect an optional hard disk to a printer.

''The combination of Adobe's industry standard PostScript Controller and AMD's 29K Family of RISC processors is an attractive option for printer OEMs,'' said Subodh Toprani, AMD's director of marketing for the 29K. ''The 29K Family offers printer manufacturers a wide range of performance. Using Adobe's 29K-based Amethyst controller to shorten product development cycles, we see printer companies migrating to RISC for their new printer products in 1991 and beyond. We are excited about the Adobe Systems and AMD collaboration.''

''We are pleased to be able to offer a PostScript controller based on AMD's AM29000,'' said Dr. Carolyn Bell, Adobe's director of engineering. ''Adobe now offers the widest range of RISC-based PostScript controllers, which means we offer OEMs and Adobe-designed controller that can meet virtually any price/performance objective they may have for a PostScript output device.''

Adobe supplies controllers to printer and imagesetter OEMs (original equipment manufacturers), who incorporate them into their products. Nearly 40 licensed OEMs are currently shipping more than 120 PostScript software products.

Other members of Adobe's RISC-based controller family include: Emerald, based on the R3000 microprocessors from MIPS Computer Systems; Ruby, based on Intel's i960K series embedded processor; and Sapphire, based on the XL-8220 processor from Weitek.

Adobe Systems Inc., founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, is headquartered in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays. In addition, the company develops and markets a line of application software products. Revenues for 1989 were over $120 million.

For more information on the AMD AM29000 processor, contact Kevin Kerner at 800/292-9263, ext. 3, or dial direct 512/462-5651. For more information about Adobe's PostScript controllers, contact Adobe Systems at 415/961-4400.

#90316b0056 11/12/1990 ~Business Wire

FREMONT, CALIF (NOV. 12) BUSINESS WIRE - GRiD Systems Corp. Monday entered a new and growing market with the introduction of its first network server -- the GRiD 486ei-25/SVR.

The new EISA (Extended Industry Standard Architecture) system is based on the Intel 80486 microprocessor and features nine expansion bays to give users up to four gigabytes of storage to accommodate the most active single processor networks.

The GRiD network server will be demonstrated at the COMDEX/Fall '90 trade show (Booth 1990) Nov. 12-16 in Las Vegas.

GRiD President Alan Lefkof said, ''This is an important step in our strategy to provide total systems solutions. The network server complements our full line of desktop and laptop computers and gives users a complete family of GRiD products to solve their computing problems.

''The 486ei-25/SVR is one of the most advanced all-purpose network servers in the market. It can be configured to meet all networking applications -- file services, communications and database services or as a gateway to other resources. With its combination of memory, software and storage capacity, it ranks as the most efficient system in the network server arena.''

Designed to support the industry's leading network operating systems software, the GRiD server is positioned to play a central role in serving companies' departmental functions and as a distributed computing server for state and federal agencies. The open architecture supports networks based on MS-DOS, OS/2 and UNIX.

GRiD manufactures and markets laptop, pen-and-display and desktop computers, electronic mail and networking systems. GRiD, which has a worldwide direct sales and support organization, demonstrates products at 50 GRiD Systems Centers and sells products through application-specific value added resellers.

GRiD is a wholly-owned subsidiary of Tandy Corp., Fort Worth, Texas. Tandy is a leading manufacturer and distributor of consumer electronics and computers. A New York Stock Exchange company, Tandy has sales in excess of $4 billion annually.

LAS VEGAS (NOV. 12) BUSINESS WIRE - LINK Technologies Inc., a leading

designer and supplier of computer terminals, Monday demonstrated two new terminals, the MC70 and MC320, featuring color capabilities and DEC compatibility, respectively.

Combined with a feature-rich, ergonomic design characteristic of LINK's comprehensive lineup of computer display products, these two new terminals address the particular needs of users for flexible, reliable and cost-effective distributed computing solutions.

With 64 foreground and 64 background colors, the MC70 is one of the only high quality, reasonably priced color terminals on the market today.

In addition, the MC70's ANSI, ASCII and Tektronics Graphics personalities meet the growing demand for flexibility and computing power.

Other key MC70 features include:

- Virtual terminals - vertical and horizontal split screen, with simultaneous update;

- 74 Hz refresh with full overscan;

- One serial RS232/RS422 port up to 76.8K baud;

- One serial RS232 port up to 38.4 baud; and

- 80, 132 and 161 column display.

The MC70 is priced at $1,295 including keyboard, and is available immediately. The MC320 offers true DEC VT320 and VT220 compatibility, with very high definition DEC 320 compatible 15 X 12 cell size and DEC 220 compatible 10 X 20 cell size.

With clustered brightness and contrast controls under the front bezel, and green, amber or white flat screen with full overscan, the MC320 sports an aesthetic, ergonomic design.

In addition, the MC320 offers 85 Hz and 60 Hz refresh rates, and two serial RS423 ports which are DEC MMJ and RJ11 compatible.

The MC320 is priced at $499 including keyboard, and is available immediately.

LINK's MC70 and MC320 terminals will be displayed at Comdex, at Booth 2390 in the South Hall of the Las Vegas Convention Center.

LINK Technologies Inc. is an independent operating subsidiary of Wyse Technology, which merged with the company in 1987. LINK became the fastest-growing and second largest independent terminal company in the world

LOS ANGELES (NOV. 12) BUSINESS WIRE - Arden Group Inc. (NASDAQ/NMS:ARDNA) announced Monday that its board of directors has elected to redeem on Dec. 17, 1990, all of the issued and outstanding shares of the company's preferred stock, Series A, par value $15 per share, at the redemption price of $25 per share plus an accrued dividend in the amount of 10 cents per share for the period Dec. 1-17.

Payment of the redemption price will be made on or after the Dec. 17 redemption date upon satisfaction of the requirements set forth in the notice of redemption and related documents to be sent to all holders of preferred stock on or before Nov. 17. After Dec. 17, all rights with respect to the preferred stock will terminate, except the right to receive payment of the redemption price without interest.

No dividends will accrue on the preferred stock after the redemption date. As of Nov. 8, 1990, there were 131,691 shares of preferred stock issued and outstanding.

#90316b0070 11/12/1990 ~Business Wire

LAS VEGAS (NOV. 12) BUSINESS WIRE - Z-Nix Company Inc. Monday introduced its battery-powered Cordless Super Mouse.

The two-button mouse uses infrared technology for cordless operation and is the first cordless mouse to feature a long-life rechargeable battery for uninterrupted use.

The Cordless Super Mouse comes with two rechargeable batteries and a recharging stand. Each battery provides for eight hours of continuous work. The mouse uses infrared signals similar to those in videocassette recorders (VCRs) to transmit from the mouse to the receiver. The recharger is the receiver and easily plugs into the serial port on the central processing unit.

The mouse has an effective range of eight feet and operates at angles up to 45 degrees.

The Cordless Super Mouse has a resolution of 400 counts-per-inch (CPI) and a built-in intelligent driver, so users can tailor the motion of the cursor to individual preference. One user may want the cursor to race across the screen with only a slight movement of the mouse; another may change it to a slow cursor to maintain pinpoint control over movement.

According to Frank Yeh, vice president of sales and marketing for Z-Nix, the steadily growing popularity of graphics applications such as CAD/CAM and desktop publishing and the emergence of graphical user interfaces (GUIs) such as Motif and Windows 3.0, will drive the continued growth of the input devices market.

The Cordless Super Mouse will be available Nov. 20 for a suggested retail price of $179. The mouse can be used with 80286- and 386-based IBM PCs and compatibles. The Cordless Super Mouse will be sold through Z-Nix's worldwide distributors.

Z-Nix is a supplier of advanced computer input devices and has headquarters in Pomona, Calif. The Cordless Super Mouse is the newest addition to Z-Nix's existing line of input devices, including: the Super Mouse II, The FasTrak trackball and the Z-Scan hand-held, grey-scale scanner.

SAN FRANCISCO (NOV. 12) BUSINESS WIRE - THE GOOD GUYS! (NASDAQ:GGUY) Monday announced that for the fiscal year ended Sept. 30, 1990 the company's net income was $7,368,000, a 86 percent increase from fiscal 1989.

Earnings per share were $1.53 on 4,831,000 weighted average shares outstanding. Fiscal 1990 sales increased 51 percent to $293,967,000, with comparable store sales up 23 percent from year ago levels.

The company's net income for the fourth quarter ended Sept. 30, 1990 was $1,336,000, a 48 percent increase from the fourth quarter ended Sept. 30, 1989.

Earnings per share were 25 cents on 5,268,000 weighted average shares outstanding. As previously announced, sales for the fourth quarter ended Sept. 30, 1990 were $78,732,000, an increase of 51 percent from the fourth quarter ended Sept. 30, 1989, with comparable store sales rising 16 percent from year ago levels.

''On all fronts, fiscal 1990 was an outstanding year for us,'' commented Ronald A. Unkefer, chairman and chief executive officer.

''During the year, we had exceptional same store sales growth and opened our first stores in Southern California -- a new market for THE GOOD GUYS! that will help fuel our growth for years to come.''

''We now have six stores open in the Los Angeles area, bringing the total number of THE GOOD GUYS! locations to 30,'' Unkefer continued.

Also, the company announced two additions to its board of directors: Howard Lester, chairman and chief executive officer of Williams-Sonoma Inc. and John E. Martin, president and chief executive officer of Taco Bell Corp.

''We are delighted to welcome these two distinguished business leaders to our board and look forward to their contributions and insights,'' concluded Unkefer.

THE GOOD GUYS! is a leading specialty retailer of consumer electronics, operating stores in California and Nevada, and markets a broad range of high-quality, name-brand products.

#90316b0086 11/12/1990 ~Business Wire

NEW YORK (NOV. 12) BUSINESS WIRE - The following is a summary of a presentation Monday at the New York Society of Security Analysts by officers of Diagnostic Products Corp. (NYSE:DP).

Sidney Aroesty, president and chief operating officer of DPC, reviewed the changing technology in the principal market of immunodiagnostics, which DPC serves worldwide. Aroesty stressed the truly international scope of DPC's operations, and the expected emergence of the common market (EEC 92).

DPC is making investments in the future to be able to become a significant player in this market, which will by far constitute the largest single market for DPC's products, stated Aroesty. Aroesty also stated that large investments in new technology are expected to triple DPC's potential markets over those in which the company successfully operated in the past.

Dr. Sigi Ziering, chairman and chief executive officer, mentioned that the worldwide immunodiagnostic market amounted to $2.4 billion, or 22 percent of the total diagnostic market, with a compounded rate of growth of 12 percent. DPC offers the most extensive menu of tests of any company, stated Ziering, and is well entrenched in certain segments as the market leader.

Historically, the company has experienced valleys and peaks in earnings in accordance with new product introductions and changes in technology. Long-term, Ziering stated, it remains the company's objective to achieve rates of growth of at least 20 percent in both earnings and revenues. Ziering indicated that these objectives are both reasonable and achievable.

DPC is the world's leading independent manufacturer of immunodiagnostic kits. Representing state-of-the-art technology derived from immunology and molecular biology, these kits can measure hormones, drugs and other medically important substances present in body fluids and tissues at infinitesimal concentrations.

They provide information vital to the diagnosis and management of thyroid disorders, diabetes, infertility, infectious diseases, allergy, drugs of abuse and certain forms of cancer. In the five years ended in 1989, sales increased at a compounded growth rate of 28 percent, to $60.3 million. Net income increased at a compounded growth rate of 40 percent to $15.2 million.

#90316b0108 11/12/1990 ~Business Wire

HOUSTON (NOV. 12) BUSINESS WIRE - Panhandle Eastern Corp. (NYSE:PEL) Monday announced that Dennis R. Hendrix, 50, has been elected chairman, president and chief executive officer by the company's board of directors.

Hendrix replaces Philip J. Burguieres who resigned due to a personal health problem.

Hendrix served as president and chief executive officer of Texas Eastern Corp. from 1986 until 1989 when the company was acquired by Panhandle Eastern. He joined Texas Eastern as president and as a member of the board of directors in November 1985 and served in that capacity until being elected chief executive officer in June 1986.

Before joining Texas Eastern, he had been a member of the Panhandle Eastern Corp. board of directors.

In accepting his resignation, the board expressed appreciation to Burguieres for his hard work, dedication and the invaluable contributions he made to the corporation during a period of significant transition and change within the pipeline industry.

The board stated that as a result of Burguieres' leadership during the past year, this corporation is solidly positioned to be more competitive and to better serve our customers in the years ahead. While Burguieres' health

problem has not responded to medication, his doctors are confident the condition is reversible within a period of several months.

Hendrix has worked in the energy industry since 1973 when he joined Texas Gas Resources Corp., Owensboro, Kentucky, as assistant to the president. In 1975, he became executive vice president, and in 1976, he was named president and chief operating officer. Two years later he became president and chief executive officer and in 1983, was elected chairman of the board.

Following the acquisition of Texas Gas Resources Corp. by CSX Corp., Hendrix was named vice chairman and a director of that company in 1984. For a short time before joining Texas Eastern Corp., he was executive vice president and director of Halliburton Co. in Dallas. A graduate of the University of Tennessee, Hendrix earned his bachelor of science degree in 1962 and a master's degree in business administration from Georgia State University in 1967.

Hendrix serves as a director of the Texas Medical Center, Harris County Children's Protective Services Foundation (chairman), United Way of the Texas Gulf Coast, Forum Club of Houston, and the Museum of Fine Arts. He is a former national chairman of Junior Achievement Inc., and continues to serve that organization as a board member.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets. Founded as Panhandle Eastern Pipe Line Co. in 1929, the company built Trunkline Gas Co. in 1951 and acquired Texas Eastern Corp. in 1989.

The company also operates a large liquefied natural gas plant in Lake Charles, Louisiana. Panhandle Eastern Corp. is one of the 15 companies that make up the Dow Jones Utility Average.

#90316b0111 11/12/1990 ~Business Wire

LOS ANGELES (NOV. 12) BUSINESS WIRE - Tiger Media, a leading software publisher for CD-ROM-based systems, Monday announced that its award-winning multimedia entertainment title, ''Airwave Adventure: The Case of the Cautious Condor,'' will be available for the Tandy 2500 XL personal computer with CD-ROM drive peripheral.

''Condor,'' a 1930s-style murder/mystery drama specifically developed for an optical disc format, is an intricate and sophisticated program providing the

highest level of challenging entertainment. The product is now available for $49.95 through the Radio Shack Express Order Software division joining Tandy's strong line-up of CD-ROM-based multimedia entertainment and educational software products.

The product, which is an interactive adventure targeted to adults, offers players the opportunity to solve a murder/mystery in the genre of a classic Agatha Christie-style story. Using colorful, vintage comic book cartoon-drawn characters and scenes, ''Condor'' provides hints through conversations and the tones of the characters' voices allowing players to choose from more than 1,500 possible paths to find the murderer.

''By introducing 'Condor' for Tandy's 2500, we are finally able to show mainstream consumers what multimedia can do,'' said Laura Buddine, president and chief executive officer of Tiger Media. ''Many CD-ROM titles today are conversions of products developed for other systems. Because Compact Disc offers capabilities beyond those of any other format, 'Condor' is at least one order of magnitude larger than any other entertainment software product ever produced for a computer.''

The product, which took more than two years to develop, uses 300 megabytes of program, including three hours of audio and more than 800 high-resolution, full-color images. To run ''Condor'' in a conventional manner would take hundreds of floppy disks.

Tiger Media has headquarters at 5801 E. Slauson Ave., Suite 200, Los Angeles, Calif. 90040; 213/721-8282.

#90316b0113 11/12/1990 ~Business Wire

LAS VEGAS (NOV. 12) BUSINESS WIRE - Ventura Software Inc. will be demonstrating Ventura Publisher's cross-platform capabilities during COMDEX/Fall 1990.

All four editions of Ventura Publisher (DOS/GEM, Windows, Macintosh and OS/2) will be interchanging files and chapters across a Novell network in booth no. 1142, East Hall.

''Ventura Publisher's ability to share files and chapters across four of the most popular computing platforms opens a whole new world of business possibilities for current and prospective Ventura users,'' said Larry Gerhard, president and chief executive officer of Ventura Software Inc.

''Today, nearly everyone with a PC is a desktop publisher. Businesses can now

strengthen their publishing efforts based on Ventura Publisher's multi-platform editions running on most popular hardware systems.''

On Oct. 30, Ventura Software Inc. announced plans to support IBM Corp.'s OS/2 version 1.3, which includes reduced memory requirements and Adobe Systems Inc.'s Type Manager support. Ventura Publisher, OS/2 Presentation Manager Edition will take full advantage of OS/2 version 1.3 features and will be available during fourth quarter 1990.

The Macintosh Edition of Ventura Publisher will also be available by year end. Ventura Publisher, Windows Edition has been shipping since the third quarter and Ventura Publisher, DOS/GEM Edition has been available since June 1990.

Ventura Software Inc., a Xerox company, is a leading supplier of publishing forms processing and database software solutions. Ventura Publisher and FormBase are currently available for IBM PCs and compatibles. By year end 1990, Ventura Publisher will also be available for the Apple Macintosh platform and in 1991 will be offered for the UNIX platform running under OPEN LOOK.

The company markets its software solutions through a worldwide dealer network of more than 6,000 outlets. Ventura Software Inc., formerly Xerox Desktop Software, has its headquarters in San Diego.

#90316b0114 11/12/1990 ~Business Wire

LAS VEGAS (NOV. 12) BUSINESS WIRE - Six months after the shipment of Microsoft Windows graphical environment version 3.0, Microsoft has seen broad-based acceptance of the technology and substantive progress in companies' implementation of Windows-based personal computing solutions.

''We were overwhelmed and pleased by the initial response to Windows version 3.0,'' said Brad Silverberg, vice president of the systems division at Microsoft. ''What is more important, however, is the real progress made in the integration of Windows version 3.0 by corporate users, software developers and hardware equipment suppliers and the positive impact Windows has had in the business of resellers.

''From the first shipment, Windows version 3.0 has been well accepted by users and developers alike,'' Silverberg added. ''While the movement of the industry from a character-based to a graphical user interface is not a process

that happens overnight, we are very pleased with the demonstrated commitment to Windows version 3.0 to date. We are seeing the Windows environment move rapidly from trial to implementation.''

More than one million copies of Microsoft Windows version 3.0 have been shipped since the product's announcement. Many resellers report that excellent sales of Windows version 3.0 have caused a significant boost in their business overall.

''I've never seen a software product hit the ramp so quickly and maintain its momentum,'' said Bruce Fredrickson, vice president of technology and marketing strategy for Ingram Micro D. ''By the end of October we had sold more than 125,000 units of Windows version 3.0. I think this clearly indicates the market appetite for an intuitive graphical interface. Microsoft Windows version 3.0 gave the market a boost, and the next step will be the upturn in Windows version 3.0 applications.''

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems, network products, languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

LAS VEGAS (NOV. 12) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX), Monday announced plans to make its leading line of information management software products available on Digital Equipment Corp.'s recently introduced applicationDEC 433MP multiprocessor platform.

The new platform, unveiled in October, will run the SCO UNIX System V version of the UNIX operating system.

Informix also announced that Wingz, its multi-platform graphic spreadsheet with the HyperScript graphical programming language, is now available for the DECstation family of RISC-based computers running Digital's ULTRIX operating system. Wingz, which is available for leading graphical desktop environments, runs under the Open System Foundation's Motif graphical interface on Digital's DECstation line.

Digital's applicationDEC 433MP is a multiprocessor 80486 system running the SCO UNIX System V version of the UNIX operating system. The new platform is targeted for small- to medium-sized businesses.

Informix products for the new platform are currently planned to include the Informix-OnLine mainframe replacement database engine. OnLine is the first database engine to combine fault tolerant, online transaction processing performance with multimedia capabilities. With OnLine, users can integrate information objects such as scanned and digitized images, voice, graphs, facsimiles and word processing documents into an SQL-based relational database.

Other Informix products currently planned for availability on the new system include Informix-SE, Informix's SQL database engine for decision support applications, and Informix's full line of application tools. These tools include the Informix-4GL family of fourth generation programming tools that dramatically reduce application development time; Informix-SQL, a menu-driven relational database management system; and the Informix-ESQL family of development tools for embedding SQL into C and COBOL programs.

All of these Informix products are also currently scheduled for availability this quarter on Digital's applicationDEC 316+, 325 and 333, 80386-based multiuser platforms running SCO UNIX Version V.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

SAN FRANCISCO (NOV. 12) BUSINESS WIRE - The Sharper Image (NASDAQ:SHRP), the San Francisco-based specialty catalog/retailer, is opening its first store in Buffalo, New York -- its 74th nationally -- at the Walden Galleria on Thursday Nov. 15.

''The Buffalo store is geared up for the holiday gift-giving season,'' said Craig Womack, chief operating officer and executive vice president of retail at The Sharper Image. A couple of the more unusual items at the store will be a knight's suit of armor and a fully refurbished 1944 Coke Machine.

Located in the Walden Galleria at One Walden Galleria, the new store will be open from 10 a.m. to 9:30 p.m., Monday through Saturday, and noon to 6 p.m., Sunday. Store manager Jerry Jacobi can be reached at 716/681-1772.

The Sharper Image is a specialty retailer of a unique selection of innovative and high-quality products that are marketed through its colorful monthly catalogs and expanding retail network which now totals 74 stores nationwide and seven internationally.

The company offers a wide variety of products, including consumer electronics, communications, health and fitness, recreational and novelty items.

SEATTLE (NOV. 12) BUSINESS WIRE - Aldus Corp. Monday announced that Aldus Persuasion for Windows, the company's recently announced desktop presentations program, will ship in the second quarter of 1991.

The product was previously expected to be available at the end of 1990.

Aldus Corp. (NASDAQ: ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to Persuasion, the company's product line includes its flagship product, Aldus PageMaker, as well as Aldus FreeHand and Aldus PrePrint. Products from Aldus subsidiary Silicon Beach Software include SuperPaint, SuperCard, Super3D, and Digital Darkroom. Aldus distributes both product lines through an international network of more than 16,000 dealers and distributors.

#90316b0133 11/12/1990 ~Business Wire
SAN DIEGO (NOV. 12) BUSINESS WIRE - Cipher Data Products Inc. Monday announced that it has adapted its F880ES and low-profile M995 GCR tape drives for use by IBM AS/400 value-added resellers (VARs).

The availability of the two tape drives assures that reliable data interchange file transfer and backup can now be accomplished on models B-10, 15, 20 and 25 of the AS/400 system. According to Cipher officials, these economical drives are compatible with the IBM 9347 and 9348 original equipment tape drives and offer equal performance.

Cipher's F880ES-400 drive is a refinement of the industry's best-selling Phase Encoded (PE) tape drive. With special cable, firmware and connectors developed for the AS/400, the drive is comparable to IBM's 9347, but is priced 40 percent less. The F880ES-400 drive offers storage capacity up to 92 megabytes and is powerful enough to burst data as fast as four megabytes per second depending on the operating system or file server.

The M995-400 drive is compatible with IBM's 9348 and can be used across AS/400 models B-10 to B-70. The drive features a Group Coded Recording (GCR) format that delivers a data storage capacity of up to 270 megabytes and offers a

choice of ANSI/IBM 1600/6250 recording densities in a compact 8-3/4-inch-high configuration.

The addition of an embedded Small Computer Systems Interface (SCSI) to the tape drive provides fast backup, and a 270 MB storage capacity recording at high-density 6250 bpi minimizes reel changes to further shorten backup time. The company expects that the M995-400 tape drive will be particularly attractive to integrators since it is priced approximately $3,000 less than the competing dual density GCR drive.

Cipher's vice president of marketing, Ken Cruden, said that Cipher's successful history of supplying product to IBM was of assistance in these product adaptations. ''We have applied the experience gained in providing open reel drives to IBM for higher models of the AS/400 as well as for the 9370 and System 36 computers.

Cipher Data Products Inc. is a leading innovator and supplier of removable information storage solutions. Founded in 1968, the company designs, manufactures and markets a broad range of half-inch magnetic tape open reel and cartridge drive systems providing interchange, data backup and storage for a wide variety of computers.

Cipher is the choice of the world's leading computer companies and the largest supplier of phase-encoded tape drives to major computer systems companies. The company has headquarters in San Diego, and is a subsidiary of Archive Corp., based in Costa Mesa.

#90316b0138 11/12/1990 ~Business Wire

AGOURA HILLS, CA (NOV. 12) BUSINESS WIRE - Traditional Industries Inc. (NASDAQ/NMS:TRAD), a California-based direct marketer of photographic packages to consumers, announced that it is currently meeting and negotiating with new lenders in the context of advanced negotiations with its current commercial lenders.

The purposes of the meetings are to accomplish a complete restructuring of current bank debt and to provide the basis for additional working capital prospectively. While the company is optimistic that the negotiations will be successful, final agreement has not yet been reached and there can be no certainty that the negotiations will successfully conclude.

Imperial Bank, one of the current lenders, recently filed litigation seeking collection of its debt. Imperial and Traditional are negotiating in the context of the negotiations for a complete restructuring of the bank debt.

Although the company is optimistic regarding settlement, there is no certainty that an agreement will ultimately be consummated.

In a separate action, former director William D. Walsh filed for collection of an unsecured debt totalling approximately $3.5 million, which he claims to be due him. The company has retained counsel in regard to this matter.

Traditional has engaged in discussions with the Federal Trade Commission, which two weeks ago announced that it had filed an application seeking to find the company in contempt of the Consent Decree previously signed.

If the company is unable to resolve its differences with the Federal Trade Commission through informal discussions and negotiations, it will petition the District Court for a formal hearing on the matter as promptly as possible. The company is hopeful of an early and favorable resolution of the action, but this cannot be assured.

The company has not yet undertaken its annual audit for the year ending June 30, 1990, because of a lack of funding but it plans for this undertaking just as soon as the proposed banking restructuring is completed, which may offer the prospect of additional funding and working capital.

In the meantime, unaudited results indicate revenues for the last quarter of fiscal 1990, the quarter encompassing April 1, 1990, to June 30, 1990, at an approximate $9 million level. The level of revenues for the first quarter of 1991 fiscal year, encompassing July 1, 1990, through Sept. 30, 1990, is somewhat lower.

However, because of interest charges and a level of general and administrative charges which are high by historical standards, the company continued to lose money in these quarters, the exact losses subject to auditor review.

Management, in an effort to reduce the level of losses, and possibly obtain profitability, is in the process of developing a detailed plant to significantly reduce general and administrative expenses.

The process, however, cannot be fully accomplished until restructuring is completed and the excessive, non-operating legal and consultant expenses associated with both the financial restructuring and the FTC investigations are eliminated.

SEATTLE (NOV. 12) BUSINESS WIRE - Aldus Corp. (NASDAQ: ALDC) Monday reported

that it will file an S-3 registration statement with the Securities and Exchange Commission on Tuesday, Nov. 13, regarding the sale of up to 981,000 shares of common stock by former shareholders of Silicon Beach Software Inc.

The stock is being registered persuant to registration rights granted the selling shareholders in connection with the acquisition by Aldus of Silicon Beach Software in February 1990.

Charles and Hallie Jackson, founders of Silicon Beach Software, intend to sell up to 880,000 shares of Aldus common stock within 90 days of the effective date of the registration. They acquired 1,088,533 shares of Aldus common stock as a result of Aldus' acquisition of privately held Silicon Beach Software. The Jacksons intend to sell shares to fund their interest in amateur athletics and to diversify holdings. Two other former shareholders of Silicon Beach Software intend to sell up to an additional 101,000 shares under the registration statement, also to diversify holdings. None of the selling shareholders is active in Silicon Beach Software or Aldus Corp.

Aldus Corp. creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to Aldus PageMaker, the company's flagship product, the Aldus product line includes Aldus Persuasion, Aldus FreeHand and Aldus PrePrint. KANSAS CITY, MO (NOV. 12) BUSINESS WIRE - U.S. Sprint Monday announced General Electric Co. has extended its 1988 service contract with U.S. Sprint through June 1993.

The three-year extension increased General Electric's contract commitment for Virtual Private Network (VPN), FONCARD travel card, videoconferencing, 800 services, and private line products.

New service under the contract includes a custom audioconference bridge, which can connect up to 150 locations on one conference call. The customized package will provide General Electric employees with personal operator service to coordinate General Electric conference calls.

"General Electric has one of the most advanced internal telecommunications teams in the world. U.S. Sprint is proud to be a partner with General Electric and to continue and expand our service commitment to them," said U.S. Sprint President Ron LeMay.

"U.S. Sprint has consistently provided General Electric with outstanding service and competitive pricing," said Stan Welland, manager of corporate telecommunications for General Electric. 'We have been particularly impressed with U.S. Sprint's advanced network capabilities and its ability to provide us with new customized features and technologies."

Welland noted General Electric's expanded service agreement with U.S. Sprint is a key part of its multi-vendor strategy in telecommunications. "By deploying a multi-vendor network, we've enhanced our network survivability in the event of an emergency," Welland said.

U.S. Sprint has developed several customized features and first-time service offerings for General Electric over the past two years. Among these are universal cellular phone and FONCARD access to U.S. Sprint's virtual private network. This service provides GE employees while on the road with convenient seven-digit dialing access to U.S. Sprint's network.

U.S. Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. U.S. Sprint provides a comprehensive array of voice, data and video communications products and services on the nation's only all-digital, fiber-optic network.

PORTLAND, OR (NOV. 12) BUSINESS WIRE - Industrial Funding Corp. (NASDAQ:IFDCA), announced Monday that it is closing regional offices in Atlanta and Dallas that were opened in the last year, curtailing market development activities in the Rocky Mountain region, and reducing headquarters staff that supports the field organization.

''The current economic conditions and uncertain financial markets suggest to us that it is unwise to continue investing in the long-term development of new markets and supporting non-essential overhead. Industrial will concentrate on its primary markets; the Pacific Northwest, California, and the Midwest,'' said Joseph M. Costello Jr., president and chief executive officer.

''We expect that the 25% reduction in staff to 170 employees will lower overhead expenses in fiscal 1991 by 20% relative to fiscal 1990 expenses,'' Costello stated.

Industrial Funding is a finance company that serves the needs of creditworthy smaller companies, primarily through the leasing of productive equipment.

#90316b0232 11/12/1990 ~Business Wire

SAN JOSE, CA (NOV. 12) BUSINESS WIRE - The Complete PC and Calera Recognition Systems Monday announced a bundling agreement to offer The Complete Page Scanner with WordScan, Calera's omnifont OCR software.

The bundled product, available from The Complete PC, is scheduled to ship Nov. 30, at a suggested list price of $999, representing a savings of $495 off the list prices of the two separate products.

''Many users purchase our sheetfed scanner for use with OCR applications,'' said William F.X. Grubb, president and chief executive officer of The Complete PC, ''because of its fast speed, compact size and affordable price. Now, they can get the best sheetfed scanner and OCR software on the market for a very attractive price.''

In addition to the bundle, The Complete PC will offer a stand-alone version of WordScan to support its full line of desktop scanners, The Complete Page Scanner, The Complete Page Scanner/GS and The Complete Flatbed Scanner, for a suggested list price of $595.

WordScan, based on Calera's industry standard, omnifont OCR, is a software-only, Windows 3.0 compatible product which supports 286 machines and higher. WordScan can read virtually any printed document directly into your word processor, page layout, database or spreadsheet program. It offers advanced text recognition features, yet at the same time is easy to install and use.

Advanced features include a Preview Window which displays a complete page image where you can select just what you want to recognize. Special dictionaries enhance accuracy and allow WordScan to read ''less than perfect'' documents that other OCR cannot read, such as faxed documents.

Built-in dot matrix recognition makes it easy to read even draft-quality, dot-matrix documents. WordScan's deferred processing feature allows users to scan pages at one time and defer OCR until later.

The Complete Page Scanner is fast, compact, easy to use and captures a page in less than 15 seconds.

In addition to WordScan, the scanner comes with The Complete PC's SmartScan graphics editing software which lets users scan, crop, scale, rotate and pixel edit images. The Complete Page Scanner scans an image in either black and white (for text) or in three different dithering patterns to simulate 64 shades of gray.

The Complete PC, founded in July 1986, is the recognized leader in personal communications and imaging products. The Complete PC is the manufacturer of The Complete Answering Machine, The Complete Fax family of products and The Complete PC scanner family for both MS-DOS and Macintosh personal computers. The Complete PC's products are available nationwide at over 2,000 computer resellers.

Founded in 1982 as The Palantir Corp., Calera Recognition Systems is the leading manufacturer of OCR systems and scanners for use in the office environment. Calera manufactures products for many leading platforms including IBM PC and PC compatibles, PS/2 with Micro Channel Architecture, Sun workstations, Apple Macintosh and VAX and is compatible with all leading scanners and software applications.

GLENDALE, CA (NOV. 12) BUSINESS WIRE - B. Wayne Hughes, chairman of the board of Storage Properties Inc. (ASE:PSA) announced Monday that the company generated revenues of $2,063,000 and net income of $1,789,000, or 60 cents per common share, for the nine months ended Sept. 30, 1990.

Revenues for the third quarter totaled $790,000 and net income equalled $690,000, or 21 cents per share. The company's operations commenced in September 1989.

The company's advisor has guaranteed that quarterly cash distributions on all outstanding common shares will be 25 cents per share through June 23, 1993. A 25 cent per share quarterly distribution was paid Oct. 15, 1990 and the next distribution is anticipated on Jan. 15, 1991.

All of the proceeds of the company's initial common stock offering are expected to be committed by the end of 1990. As of the end of the third quarter, some capital remained uncommited.

The Brooklyn, N. Y., facility began producing rental revenues in mid-October. This property secures one of the company's first mortgage convertible loans (FMCL). The company has made FMCLs on a total of four operating self-storage facilities and on one self-storage facility which is expected to commence operations in December 1990.

Also, in September 1990 the company acquired, through a joint venture, 62.5 percent of a leasehold interest in a self-storage facility located in Hillside N.J. An Affiliate of the company owns the remaining 37.5 percent of the leasehold interest.

The board of directors announced its intention to discontinue the Dividend Reinvestment Plan at such time that an orderly transition can be effected. This action will eliminate the potential dilutive effect of issuing shares under current stock market conditions. The company will also benefit from eliminating the costs of administering the plan.

Storage Properties is a real estate investment trust (REIT) organized in March 1989, and has invested primarily in nonrecourse loans to PS Properties Advisors Inc. (the Advisor), an affiliate of Public Storage Inc. The loans are secured by first mortgages or deeds of trust on properties that are in operation or being developed as self-storage facilities.

The company has enetered into agreements for the right to acquire properties securing the loans during a specified period. The company's objectives are to preserve and protect its invested capital, provide for cash distributions from

operations, and realize capital appreciation of its properties.

PUEBLO, CO (NOV. 12) BUSINESS WIRE - CF&I Steel Corp. (NASDAQ:CFIP) announced Monday that it has substantially completed negotiations to obtain a $10 million financing arrangement with Congress Financial Corp. that is subject to final documentation and satisfaction of certain conditions.

The company anticipates obtaining bankruptcy court approval for this financing on or about Nov. 30, 1990. Because this is a post-petition obligation which is secured by receivables and inventory, it is necessary to allow 15 days for certain creditors to respond to this arrangement. The company anticipates that all parties concerned will be receptive to this agreement.

Separately, the company indicated that it had adequate cash flow to meet its necessary operating requirements for the foreseeable future.

CHANDLER, AZ (NOV. 12) BUSINESS WIRE - Inter-Tel Inc. (OTC:INTL) Monday announced that its subsidiary, Inter-Tel Communications Inc., had signed a letter of intent to acquire the business and assets of Creative Telesystems Inc. of Riverside, Calif.

Creative Telesystems was founded in 1972 by David Rude, president, who has 22 years experience in the telecommunications industry. Creative Telesystems, with sales volume of over $1 million, last year was named outstanding small business of the year by the Riverside Chamber of Commerce. David Rude will join Inter-Tel in an expanded management role.

Craig Rauchle, president of Inter-Tel Communications, stated that the addition of the Creative Telesystems team and the industry competence of David Rude would greatly enhance Inter-Tel's ability to provide superior business communications service to the greater Los Angeles area.

Inter-Tel has other direct sales divisions in California in Anaheim, Irvine, West Los Angeles, Ontario, San Diego and Hayward (San Francisco metropolitan area).

Inter-Tel is one of the leading designers, producers and marketers of business telecommunications software and systems in the United States and abroad. Inter-Tel produces digital electronic key, hybrid, and PABX systems which are totally software updateable with features such as least cost routing, voice mail, automated attendant and uniform call distribution.

IRVINE, CA (NOV. 12) BUSINESS WIRE - Westcorp (ASE:WES), a broadly based financial-services holding company whose principal subsidiary is Western Financial Savings Bank (NASDAQ:WSTF), Monday announced a 3 cent dividend for shareholders of record as of Nov. 21, 1990, payable on Dec. 14, 1990.

This dividend follows the announcement of third-quarter 1990 earnings of 17 cents per share, more than double the 8 cent share earnings for the comparable period in 1989.

In a related development, the bank also announced an offering of $150 million of auto receivable pass through certificates by its wholly owned subsidiary, Western Financial Auto Loans 2 Inc. These certificates, Series 1990-1, due March 1996, have a coupon rate of 8.5 percent and were priced at 115 basis points over the ''two year'' Treasury to yield 8.81 percent.

Western Financial is the principal subsidiary of Westcorp, a diversified financial-services company. Donaldson, Lufkin & Jenrette is sole manager of this offering which includes a guarantee of timely interest payment and of ultimate payment of the principal provided by Financial Security Assurance Inc.

This guarantee ensures the certificates will be rated in the highest category by at least one nationally recognized rating agency.

Western Financial Savings Bank operates 24 retail bank branches, nine real estate loan offices and five automobile finance centers throughout California. The bank also offers consumer finance services across the state through Westcorp Financial Services, a wholly owned subsidiary with 27 offices.

BALTIMORE (NOV. 12) BUSINESS WIRE - TRW received a special award from the

Space Telescope Science Institute, Baltimore, for its ''outstanding contributions to the Hubble Space Telescope science mission operations'' from 1981 to 1990.

The company is the system developer for the Science Operations Ground System (SOGS), responsible for scheduling astronomy observations and processing science data from Hubble.

Dr. Peter Stockman, deputy director of the Spcae Telescope Science Institute, presented the award to Judy Helbling, TRW SOGS project manager, at a ceremony in Baltimore.

SOGS was built by TRW's Systems Development Division, Redondo Beach, Calif. Begun in 1981, SOGS was delivered to NASA's Goddard Space Flight Center, Greenbelt, Md., in 1986. Two main computers are located at Goddard and provide planning and scheduling and real-time support of observations.

A high-speed data link connects Goddard to the nearby Space Telescope Science Institute, where a cluster of four SOGS computers supports astronomers. Since 1986, TRW has provided ongoing SOGS technical support, including software development and engineering.

''The teamwork and expertise provided by TRW since the installation of SOGS at the Space Telescope Science Institute five years ago has been a major element in the success of this system,'' said Dr. Riccardo Giacconi, director of the Institute, in a letter announcing the award.

''TRW engineers and computer scientists have established this capability to guide the Hubble Observatory through its commissioning and early science programs. The dedication and imagination of the TRW staff helps assure the promise of restoring the most critical scientific capabilities through future improvements in science operations.''

CLACKAMAS, ORE. (NOV. 12) BUSINESS WIRE - Technology Applications (Thailand) Ltd. has acquired a majority interest in Code-A-Phone Corp., an international marketer of consumer and commercial telecommunications products.

Terms of the transaction were not disclosed.

Technology Applications (Thailand) manufactures advanced surface-mount electronic assemblies and systems for the computer and telecommunications industries. The company has produced several models of Code-A-Phone cordless telephones since 1988.

''This is an alliance of strengths, matching Technology Application's leading-edge manufacturing and research-and-development resources with brand-name Code-A-Phone's recognition in U.S. and international marketing networks,'' said Michael Driscoll, chief executive officer of Technology Applications. ''Essentially, we are vertically integrating two companies with distinct strengths, resulting in financial and significant strategic advantages to both.''

Through the recapitalization agreement, Technology Applications acquires majority interest in the company, with Merrill Lynch Interfunding retaining a significant minority position. The company previously was a closely held private corporation.

Driscoll said the alliance will strengthen Code-A-Phone's market position through aggressive new-product development and improved manufacturing economies.

Technology Applications, formed in 1986, has engineering, manufacturing and testing facilities at its base in Bangkok, Thailand, and in Singapore. The company's client roster includes GTE, Seagate Technology, Smith Corona, NEC and Goldstar.

In a related move, the company recently added significantly to its R&D capabilities by acquiring the telephonic and radio frequency research operations of PSQ Scientific, a leading cordless telephone design facility, based in Indianapolis, Indiana, USA.

Code-A-Phone Corp. has been a leader in telecommunications products since 1958 when it pioneered development of telephone answering devices. Today, the Clackamas-based company markets a broad line of telecommunications products internationally.

#90316b0608 11/12/1990 ~Business Wire

WOODCLIFF LAKE, NJ (NOV. 12) BUSINESS WIRE - BMW's 1991 525i sports sedan,

equipped with a new 24-valve engine and improved automatic and manual transmission choices, debuts Monday at a press conference at the Red Fox Inn in Middleburg, Virginia, hosted by Karl Gerlinger, president and chief executive officer of BMW of North America, Inc.

BMW's 525i is the most economical 5-Series model, in a line that includes the more luxurious and high-powered 535i and an ultra-high-performance model, the M5.

The new 2.5-liter, in-line six-cylinder engine is virtually maintenance free, and delivers 21 more horsepower than the 1990 525i with a slight improvement in fuel efficiency.

The new engine's mechanical layout (six cylinders in-line) and displacement (2.5 liters) are the only elements that haven't changed for 1991. Major engine refinements include the addition of dual overhead camshafts, four valves per cylinder, and hydraulic valve lifters.

Compared to its predecessor, an engine that developed 168 horsepower, the 1991 version delivers 189 horsepower. The torque rating has been increased by 10 percent.

Four-valve-per-cylinder engines are not new at BMW; the company's experience with them goes back almost 25 years, primarily in the realm of motorsports and limited production, high-performance vehicles. The 525i engine, however, is BMW's first six-cylinder engine with four valves per cylinder that is designed for volume production.

Like all 1991 BMWs, the 525i has a new four-year, 50,000-mile limited warranty and a six-year, unlimited mileage warranty against corrosion perforation. The 525i's suggested retail price is $34,500 -- an increase of only 3.9 percent from last year. This best-selling 5-Series sports sedan is now available at BMW dealers across the United States.

#90316b0615 11/12/1990 ~Business Wire

SCOTTS VALLEY, CA (NOV. 12) BUSINESS WIRE - According to an independent survey conducted by Computer Intelligence of La Jolla, Calif., the Paradox relational database management system outsold all PC databases during the third quarter of 1990.

The survey, reported in the October 1990 edition of the PC Market Monitor, showed that during the quarter, Paradox captured a 34 percent share vs. the 22 percent share of its nearest competitor. Paradox is manufactured by Borland

International Inc. (NASDAQ:BORL).

In September alone, the study showed, Paradox caputured 44 percent of all DBMS purchases. The study also indicated that Paradox outsold its nearest competition by a margin of more than 2-to-1 during the last month of the quarter, according to the survey of 1,500 companies with 500 or more employees.

Computer Intelligence collects its data by surveying each month more than 1,500 sites with 500 or more employees through interviews about their actual PC computer software purchase activity.

All sources of product, including retail, direct and mail order, are included in the study. The maximum sampling error for the three-month average is plus or minus 2 percent with a confidence level of 95 percent.

While past performance is not necessarily indicative of future results, this study appears to indicate Paradox has emerged as the market leader, he added.

Borland International Inc., Scotts Valley, is a leading developer of business software and object-oriented programming langages and tools. Borland offers some of the world's most widely used PC software, including Turbo C++, Turbo Pascal with objects, Paradox, Quattro Pro and SideKick.

#90316b0616 11/12/1990 ~Business Wire

SCOTTS VALLEY, CALIF. (NOV. 12) BUSINESS WIRE - Borland International Inc. (NASDAQ:BORL) Monday announced the immediate availability of Paradox SQL Link support for Rdb/VMS, the strategic relational database management system from Digital Equipment Corp.

With Borland's Paradox 3.5 relational database manager as the client (front-end) application and Paradox SQL Link as the gateway, support for Rdb/VMS gives Paradox users transparent access to data residing on VAX VMS database servers.

''Digital is extremely pleased that Borland will be providing Paradox users connectivity to Rdb through SQL Services, a standard feature of Rdb,'' said Jim Steiner, manager of Database Systems' business development group at Digital, when the product was first announced in June. ''Now Paradox users will have a powerful integrated solution that transparently links their applications to Digital's Rdb information network.''

At the same, Borland formally announced future SQL connectivity support for the IBM DB2 database management system, via Micro Decisionware's gateway for DB2; Tandem's NonStop SQL database under its Guardian operating system; and Sybase Server under Unix. Previously shipped server support includes IBM OS/2 Extended Edition version 1.2, Microsoft SQL Server version 1.0 and higher, and Oracle Server version 6.0.

In addition to automatic translation of Paradox QBE and menu commands to the appropriate dialect of SQL, Paradox SQL Link allows PAL (Paradox Application Language) developers to build full-blown database applications with embedded SQL.

Support for Paradox SQL Link for Rdb/VMS is supplied by SQL Services, the standard interconnect feature of Rdb/VMS. Network interconnect is supplied via TCP/IP, DECNET or APPC/LU6.2.

Paradox SQL Link for Rdb/VMS has a suggested retail list price of $395. Paradox SQL Link for IBM, Microsoft and Oracle lists for $495. All versions of Paradox SQL Link require Paradox 3.5, sold separately for $795, suggested retail.

Borland International Inc. (Scotts Valley), is a leading developer of business software and object-oriented programming languages and tools. Borland offers some of the world's most widely used PC software, including Turbo C++, Turbo Pascal with objects, Paradox, Quattro Pro and Sidekick.

NEW YORK (NOV. 12) BUSINESS WIRE - New Line Cinema Corp. (AMEX:NLN) Thursday announced that it is forming New Line Home Video Inc. to handle the home video distribution of its own films and those of others.

In conjunction with the establishment of the home video division, New Line named Stephen Einhorn as president and chief executive officer of the subsidiary and appointed Michael A. Karaffa as senior vice president, sales and marketing.

New Line intends to release all of its theatrical productions, and other theatrical releases where it has acquired home video rights, through New Line Home Video. Additionally, New Line Home Video will explore the acquisition of theatrical and non-theatrical programs for distribution in the home video marketplace, and will manage New Line Cinema's existing library of titles.

New Line's formal entry into the home video industry is supported by the company's strong production, acquisition and theatrical distribution capabilities and the important home video values which its films possess.

As of September, New Line ranked seventh of twelve companies in terms of domestic box office market share with 5.8 percent of the domestic box office. Its releases have garnered over $180 million in box office revenues since the beginning of the year.

Three New Line titles, ''House Party,'' ''Heart Condition'' and ''Blood of Heroes,'' are currently amongst the top 50 video rentals, and ''Teenage Mutant Ninja Turtles'' have shipped over 7 million units at the sell-through retail price of $24.99.

Robert Shaye, chairman of New Line Cinema, commented on the new division, ''New Line believes the establishment of our own home video distribution will provide the company with important, additional economic and strategic advantages. New Line is, and has been, a significant supplier of product to the home video market for many years.

New Line Home Video will be located at New Line's New York corporate headquarters.

New Line Cinema Corp. is a leading independent producer and distributor of theatrical motion pictures.

LAS VEGAS (NOV. 12) BUSINESS WIRE - Tandberg Data A/S, formerly owned by Siemens A/S, has announced it has become an affiliate of Singapore-based Wearnes Technology at COMDEX/Fall (Booth 888 in the Convention Center).

Transfer of ownership was completed this past October when Siemens completed its sale of 40 percent of the outstanding shares of Tandberg Data A/S, based in Oslo, Norway. Wearnes has the option to purchase Siemens' remaining 18 percent ownership in Tandberg Data A/S.

Following the transfer of ownership, Per Otto Dyb was named president of Tandberg's North American operation, Tandberg Data Inc.

A nine-year veteran with Tandberg, Dyb previously served as vice president of marketing in Tandberg's Data Storage Division. He began his career at Tandberg in the company's Display Products Division.

Dyb reports directly to Hans Lodrup, chairman of the board of Tandberg Data Inc. and president and chief executive officer of the parent Tandberg Data A/S for the past five years.

Wearnes Technology is the technology arm of Wearne Bros. Ltd. Wearne Bros. Ltd. is a publicly held, international and diversified group of companies with headquarters in Singapore. Incorporated in 1912, Wearnes' 1989 annual revenues were in excess of $328 million.

Tandberg Data Inc. is a wholly owned subsidiary of Tandberg Data A/S, which is a member of the Wearnes network of high-technology companies. Tandberg Data is a leading international supplier of high-speed, high-capacity quarter-inch streaming tape drives and related products. Tandberg Data A/S has headquarters in Oslo, while Tandberg Data Inc. has headquarters in Westlake Village.

CHICAGO (NOV. 12) BUSINESS WIRE - SPSS Inc. Monday announced a significant new investment in its business by several major financial institutions that will position the company for long-term growth through accelerated new product development and expanded customer support.

The group of new investors was led by Morgan Stanley Venture Capital Fund L.P. which is sponsored by Morgan Stanley Group Inc. The other investors were Westinghouse Credit Corp.; Geocapital Partners, a venture capital fund affiliated with Broadview Associates; and Cooke & Andrews Investments Inc., which is an affiliate of SPSS' partner in Japan, Japan Systems Engineering Corp.

SPSS' senior management team remains the largest equity holder in the company.

SPSS is the second largest developer of statistical software in the world.

SPSS projects its 1990 revenue will be approximately $34 million. The 15-year-old, privately held, Chicago-based firm has more than 2 million mainframe, workstation and personal computer users worldwide.

Seven international sales offices have been added since 1984, with international operations representing in excess of 40 percent of total revenue this year.

The company has had an annual compounded growth rate during the past 10 years of 25 percent.

According to Nie, SPSS will launch a major development effort to product a new generation of statistical software products. SPSS will also develop a family of applied statistics products for non-statisticians, upgrade its existing products and boost its customer support activities.

MOUNTAIN VIEW, CA (NOV. 12) BUSINESS WIRE - Quickturn Systems Inc. announced Monday it has signed a multi-phased contract with a major semiconductor company for multiple RPM Emulation Systems to be used for new chip development.

The contract is valued at over $3 million; the name of the semiconductor company wasn't disclosed.

Quickturn Systems Inc. developed and markets the RPM Emulation System, the first ASIC system design validation tool to assure correct functionality before committing to silicon. ASIC netlists are automatically synthesized into hardware prototypes with Quickturn's reprogrammable hardware emulation technology.

ASIC emulations run in-circuit and eliminate the system designer's dependence on millions of functional vectors. Operating thousands of times faster than simulation accelerators, the RPM Emulation System does in minutes what accelerators take weeks to do. The RPM Emulation System complements existing ASIC design tools, reduces product development time, and gets products to market faster.

Quickturn Systems Inc., founded in 1987, is headquartered at 325 East Middlefield Road, Mountain View, Calif. 94043, 415/967-3300.

TALLAHASSEE, FLA. (NOV. 12) BUSINESS WIRE - One of the largest acreage tracts in the development pressured Golden Gate Estates region has been preserved Monday as part of the ''Save Our Everglades'' (SOE) acquisition project.

The Florida Department of Natural Resources purchased the Garrison tract from the nonprofit conservation organization, the Trust for Public Land (TPL).

TPL negotiated for the purchase of the 320 acres from the landowner in September 1989, thereby protecting it from development until State funds could be expended to permanently preserve it for the public.

Over 22,000 of the landowners in the SOE project, including the Garrison tract are located within the Golden Gate Estates section of the acquisition area, where parcels are generally no more than one acre in size. SOE encompasses almost 210,000 acres and over 25,000 landowners.

The purpose of the project is to provide watershed protection to several very significant natural areas: Big Cypress National Preserve, Fakahatchee Strand State Preserve and the Everglades National Park.

''Together, these protected lands provide some of the most unique habitat and biologically diverse communities on Earth,'' said Kevin Mooney, Field Representative for the Trust for Public Land.

The 320-acre Garrison property is located in the southwest section of Collier County, approximately 20 miles from Naples, Fla., separated from the Golden Gate Estate Subdivision by a branch of the Faka Union Canal. The property's location make it extremely sensitive and vulnerable to hydrologic changes.

Its preservation will help preserve 310 acres of valuable wetlands and will contribute to the State's attempts to stabilize the ecosystems of South Florida.

The Trust for Public Land is a national nonprofit organization that preserves land for the use and benefit of the public. With TPL's help, scenic, recreational, historical and ecological lands in Florida have been protected totaling over 77,000 acres in 19 urban and rural counties.

TPL's history in Collier County goes back to 1975. Since then we have protected almost 4,200 acres as part of Cape Romano Park and Fakahatchee Strand State Preserve.

DALLAS (NOV. 12) BUSINESS WIRE - More than 1,200 patients suffering from blocked coronary arteries have been successfully treated with an excimer laser angioplasty system, according to data presented Monday at the American Heart Association's 63rd Annual Scientific Session in Dallas.

The system used in these cases, the DYMER 200+, manufactured by Advanced Interventional Systems (AIS) of Irvine, Calif., is the first to be recommended for approval by the Food and Drug Administration's Circulatory Systems Devices panel.

Dr. Frank Litvack of Cedars-Sinai Medical Center reported an overall procedural success rate of 92 percent in lesions that had been treated during clinical trials for percutaneous Excimer Laser Coronary Angioplasty (ELCA).

Formal FDA pre-market approval is hoped for by the company sometime in the first part of 1991.

Dr. Litvack showed that ELCA's 92 percent success rate for long lesions (defined as greater than or equal to 20mm) is considerably higher than PTCA's success rate of less than 60 percent in long lesions.

LAS VEGAS (NOV. 12) BUSINESS WIRE - Librex Computer Systems Inc., Nippon Steel's new U.S. subsidiary, Monday introduced its first notebook computers to the U.S. market via a bold and innovative TV/print campaign emphasizing ''lifestyle'' over bits and bytes.

Enlisting the award-winning San Francisco ad agency Goodby, Berlin & Silverstein, Librex's innovative campaign depicts individuals using Librex computers in unique, alternate worksites.

Using the ''Freedom of One'' as a tagline, the new campaign touts the idea that, given the freedom of time and place, individuals can be more productive and creative.

In line with its philosophy of ''bringing the best together,'' Librex hired one of Britain's hottest advertising photographers, Nadav Kander, to shoot the print campaign. For its broadcast campaign, they recruited Clio award-winning TV commercial director, Eric Saarinen, perhaps best known for his distinctive Reebok spots.

''In creating the Librex campaign, our goal was to distinguish the company and its products from conventional computer advertising that focuses on technical specs,'' said Eric Horter, Librex vice president of sales and marketing.

''We wanted to create a mood, using visually arresting photography and psychologically appealing copy, that shows an evolution in work and lifestyles toward greater individual freedom and creativity.''

The print campaign will debut in PC Week, PC Magazine and Computer Reseller News. The innovative TV spots premier in Las Vegas on Nov. 11 during the morning and late evening news.

The campaign marks Nippon Steel's initial foray into the U.S. portable computer market and the debut of the Librex brand name.

Called the Librex 286 and Librex 386SX, the new notebook computers are ergonomically designed for maximum comfort, portability and enhanced productivity.

Librex Computer Systems Inc. was incorporated in June as an independent U.S. subsidiary of Nippon Steel Corp. to design, manufacture and market a broad range of computer products for the American market.

The company is located at 1731 Technology Drive, Suite 700, San Jose, 95110.

#90316b0634 11/12/1990 ~Business Wire

SAN JOSE, CA (NOV. 12) BUSINESS WIRE - Rasna Corp. and Parametric Technology Corp. have announced a joint product development and marketing partnership.

Under the agreement, the companies will integrate their mechanical design and optimization programs providing the capability to quickly analyze and optimize designs created with Pro/ENGINEER.

Rasna develops and markets the Mechanica family of design optimization software tools. Applied Structure, an easy-to-use structural analysis and shape optimization tool, is Rasna's flagship product.

Parametric Technology is the developer of the Pro/ENGINEER family of mechanical design automation tools which are based on a unique parametric

feature-driven solid modeling technology.

The partnership will produce the ability to take models created with Pro/ENGINEER and easily pass the model's geometry into Applied Structure for analysis and optimization. The combined capability will provide users with an extremely powerful, yet easy-to-use, approach to solving complex design problems.

Parametric Technology Corp. is the technology leader in the mechanical design automation industry. Its Pro/ENGINEER family of CAD/CAM/CAE software products provide manufacturing companies with unprecedented flexibility in the creation and analysis of new mechanical designs.

Pro/ENGINEER provides a unique capability which allows users to shorten new product time-to-market, reduce manufacturing costs, and improve product quality through the evaluation of multiple design alternatives.

Founded in 1987, Rasna Corp. is an innovator in MCAE software technology. The company develops and markets user-intuitive, design optimization software tools for mechanical design engineers. Applied Structure and Applied Motion are the first tools in the Mechanica family. Rasna's products are sold worldwide through resellers, strategic partners and OEM relationships.

LAS VEGAS (NOV. 12) BUSINESS WIRE - Librex Computer Systems Inc., Nippon Steel's new U.S. subsidiary, Monday introduced two notebook computers based on Intel's 80C286 and 80386SX microprocessors.

The introduction marks Nippon Steel's initial foray into the portable computer market and the debut of Librex brand portable computers.

The company will introduce its first products into the U.S. market via a bold and innovative TV/print campaign emphasizing ''lifestyle'' over bits and bytes. Using the ''Freedom of One'' as a tagline, the sophisticated campaign touts the idea that, given the freedom of place and time, individuals can be more productive and creative.

''We believe lightweight portable computers will have increasing influence on individual lifestyles,'' said Eric Horter, Librex vice president of sales and marketing. ''Like cellular phones, portable computers allow people to

communicate or access information at any time, virtually anywhere in the world.''

Produced by the award-winning San Francisco agency Goodby, Berlin & Silverstein, the Librex campaign features solitary individuals at alternate worksites, using Librex notebook computers against a series of expansive, contemplative landscapes.

Librex Computer Systems Inc. was incorporated in June as an independent U.S. subsidiary of Nippon Steel Corp. to design, manufacture and market a broad range of computer products for the American market.

The company is located at 1731 Technology Drive, Suite 700, San Jose, 95110.

#90316b0637 11/12/1990 ~Business Wire

MILPITAS, CALIF. (NOV. 12) BUSINESS WIRE - Logic Modeling Systems Inc., developer of the industry-standard LM-1000 hardware modeling system, Monday announced availability of the first models for the MIPS R3000A microprocessor and R3010A floating-point unit.

The R3000A Logic Model is the latest addition to Logic Modeling's extensive library of over 600 complex models that already includes the MIPS R3000 and R3010, plus the largest selection of models for 32-bit microprocessors available anywhere.

''MIPS is committed to providing state-of-the-art design tools for users of its architecture,'' said Prakash Chandra, product marketing manager at MIPS Computer Systems Inc. ''By enabling system simulation, Logic Modeling's products, like the R3000A Logic Model, provide companies with the capability to reduce design iterations and get to market faster.''

''Our customers tell us that model availability is the biggest roadblock to system simulation. The R3000A and R3010A Logic Models are the latest examples of Logic Modeling's commitment to providing designers with rapid access to full-functional models of popular, complex VLSI devices,'' said John Lenyo, product marketing manager for Logic Modeling.

Hardware modeling solves the simulation model availability problem for system and ASIC designers by allowing the physical VLSI device to be used to model its own behavior during design verification. Logic Models can execute actual

system code enabling thorough system verification. The LM-1000 hardware modeling system is platform- and simulator-independent.

Logic Modeling sells through OEM relationships with EDA vendors including Cadence, GenRad, IKOS, Mentor Graphics, Racal-Redac, Scientific Calculations, Siemens, Teradyne, Valid, Vantage Analysis Systems, Viewlogic Systems, Zycad Corp. and to companies with proprietary simulators. The MIPS-designed R3000A and R3010A devices are marketed by IDT, LSI Logic, NEC, Performance Semiconductor, and Siemens.

Logic Modeling Systems Inc. is a privately-held company, with corporate headquarters located at 1520 McCandless Drive, Milpitas 95035, telephone 408/957-5200.

SAN JOSE, CA (NOV. 12) BUSINESS WIRE - Rasna Corp. Monday announced it will port Applied Structure and Applied Motion to the Silicon Graphics Inc. IRIS 4D family of workstations.

The ported software is planned to be available in the first quarter next year.

Applied Structure and Applied Motion are Rasna's flagship products. Both are members of the Mechanica family of design optimization software tools. Applied Structure is a structural analysis and shape optimization tool. It provides fully automated design sensitivity and optimization features, making it quick and easy for a design engineer to find the best design of his/her part or product.

Applied Motion is a mechanism analysis and optimization tool. It provides static, assembly, kinematic, dynamic and inverse dynamic analysis functionality in a full 3D program. It also offers a fully automated design sensitivity feature which guides users to the optimized design.

Silicon Graphics Inc. is the leading manufacturer of high performance graphics systems, servers and software for visual processing applications. The company's products, which range from advanced project supercomputers to low-end desktop models and PC graphics subsystems, are used by engineers, scientists and creative professionals in design, analysis, manufacturing and simulation.

Founded in 1987, Rasna Corp. is an innovator in MCAE software technology. The company develops and markets user-intuitive, design optimization software tools for mechanical design engineers. Applied Structure and Applied Motion are the first tools in the Mechanica family. Rasna's products are sold worldwide through resellers, strategic partners and OEM relationships.

#90316b0641 11/12/1990 ~Business Wire

NEW YORK (NOV. 12) BUSINESS WIRE - BET, the support services company, Monday announced its results for the half-year to Sept. 29, 1990.

Revenue was up 17 percent and operating profit 11 percent, but the company was hit by high interest rates on its increased borrowings. Pre-tax profit fell by 5 percent and earnings per share by 7 percent. The interim dividend was raised by 6 percent to 4.25p.

Overall revenue in the first half of the year grew by 17 percent to 1.5 billion pounds compared with a year ago, with the core support services business up by 18 percent.

While the core business improved its margins and operating profit further, the severe downturn in the housebuilding, home improvement and advertising markets halved the contribution from Boulton & Paul, Anglian Windows, Thames Television and the smaller non-core operations, so that they produced only 8 percent of the total operating profit.

Total operating profit was up by 11 percent to 175.1 million pounds, owing to a 24 percent improvement from the core support services operations. This included doubled profits from North America, and 52 percent increase from continental Europe as well as an 11 percent increase from the U.K., more than offsetting a 34 percent reduction from other areas.

By activity, the key industrial and commercial services operations achieved the largest increase, with margins up in each area and each major service line.

Operating profit was up by 49 percent to 84 million pounds, or 52 percent of the support services total, with 10.1 million pounds of the increase coming from a first full six months' contribution by Hestair's personnel services. The textile rental, cleaning and security services all grew and Biffa's waste management business almost doubled its profit.

Operating profit from plant and construction services rose by 8 percent. Doubled profit from the expanded U.S. business and a strong performance from continental Europe more than offset a 13 percent decline in the U.K.

Underlying operating profit from distribution services rose by 6 percent but the total contribution fell by 7 percent as a result of the reduction to a minority stake of BET's interest in South African business, Unitrans.

SPARTANBURG, SC (NOV. 12) BUSINESS WIRE - TW Holdings Inc. (NASDAQ:TWFS) announced Monday that its subsidiary, Spartan Holdings Inc., has entered into an underwriting agreement with Morgan Stanley & Co. Inc. and Donaldson Lufkin & Jenrette Securities Corp. providing for the issuance of $225 million of guaranteed bonds secured by 387 company owned and operated Hardee's and Quincy's restaurants.

The bonds will bear interest at 10.25 percent and have a term of 10 years. The financing is expected to close on Nov. 15.

The bonds are unconditionally and irrevocably guaranteed by Financial Security Assurance (FSA). FSA is a monoline financial guaranty company established in 1985 for the purpose of guaranteeing debt obligations. The bonds will be rated Aaa by Moody's Investors Service and AAA by Standard & Poor's Corp.

TW Holdings also announced that it has completed the sale of the Rowe division of its Canteen Holdings subsidiary to a Houston-based corporation for $15 million in cash and a $2 million note. In addition, TW Holdings has completed miscellaneous asset sales for aggregate proceeds of $15.4 million. Aggregate cash proceeds from these transactions of approximately $30.4 million, together with $220 million of proceeds from the Hardee's/Quincy's mortgage financing announced today, are being applied to the prepayment of the bridge portion of the senior bank debt of TW Services. The remaining balance on the bridge loan facility, approximately $17 million, is expected to be retired prior to its Dec. 1, maturity from the proceeds of one or more other financing transactions currently in process.

TW Services, which became a wholly owned subsidiary of TW Holdings on Dec. 6, 1989, is the fourth-largest food service company in the United States based on 1989 revenues of $3.5 billion.

The company is engaged in contract food and vending services, recreational services and restaurant operations through its Canteen, Hardee's, Quincy's, Denny's and El Pollo Loco business units.

NEW ORLEANS (NOV. 12) BUSINESS WIRE - Freeport-McMoRan Oil & Gas Co. (NYSE:FMP), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), announced Monday that the previously announced plan of merger with FTX, whereby FMP will be merged into a wholly owned subsidiary of FTX, has been approved by holders of approximately 90 percent of FMP's common stock.

Upon completion of the merger, each outstanding publicly held share of FMP common stock will be converted into .3119461 of a share of FTX common stock resulting in the issuance of approximately 7 million FTX shares.

As previously announced, FTX's obligation to consummate the merger is subject to court approval of the settlement of certain lawsuits which were filed following the announcement of the proposed merger and the absence of any material objection to the settlement being filed.

As part of the settlement, FTX and the plaintiffs have agreed to use their best efforts to obtain court approval of the settlement in time to complete the merger on or before Nov. 15, 1990, the record date for the December dividends on the FTX common stock.

FTX is a leader in the exploration, mining, development, production, processing, and marketing of natural resources. Its assets include sulphur, phosphate rock, phosphate fertilizer products, oil and natural gas, copper, gold and other natural resources.

TOKYO (NOV. 12) BUSINESS WIRE - Clipper 4.5, the Japanese-character version

of Nantucket Corp.'s premier application development system, shipped Monday.

Nantucket also announced the opening of its Japanese subsidiary, Nantucket Japan, which is designed to service the rapidly growing Japanese market for Clipper.

''The Japanese software market has enormous growth potential, most of which is untapped,'' said Brian Russell, senior vice president of development of Nantucket Corp. and chairman of Nantucket Japan.

''With subsidiaries is West Germany, the United Kingdom, Canada, the Soviet Union, Belgium, Brazil and, now, Japan, as well as distribution agreements on every continent, Nantucket continues to be the leader in international sales of application development software.''

Russell will continue to guide the development of Clipper and will be based in the United States. Yutaka Sato, who has been named president of Nantucket Japan, will oversee the daily activities of that office. He comes to the company from Ashton-Tate Japan, where he was instrumental in setting up their Japanese office.

Reporting to Sato is Jim Swanner, vice president of operations in Japan. Prior to Nantucket, Swanner spent the past five years in the Japanese computer industry and was involved in establishing Nantucket Japan.

Nantucket Japan will conduct training seminars to distributors' sales representatives and dealers and will offer technical sessions for independent developers, corporate MIS managers, programmers and end-users.

The division will also provide local Clipper bulletin board systems for enhanced customer support.

The Japanese version of Clipper runs on NEC PC-9801 computers with 512K required memory, a system used by over 50 percent of computer users in Japan. Support for other machines is under development.

Software Japan, Softbank, Soft Wing and Futaba are among the Japanese firms that will distribute Clipper 4.5, at a retail price of 248,000 yen (US $1,650).

Nantucket Japan is located at 5-6-201, Yagumo 1-chome, Meguro-ku, Tokyo 152, JAPAN. The phone number is (03)725-8007, after Jan. 1, 1991, (03)3725-8007.

Founded in 1985, Los Angeles-based Nantucket Corp. is the leading developer of application development systems for microcomputers. Its flagship product, Clipper, is an open architecture application development system that includes user-extensible command and function sets, a compiler with a preprocessor, linker and a full set of development utilities.

POMONA, CA (NOV. 12) BUSINESS WIRE - Z-Nix Company Inc. and Microsoft Corp. announced Monday that they have resolved a dispute regarding license negotiations for Microsoft Windows that led to the Nov. 7 filing of a complaint in the federal court in Los Angeles.

Under the terms of the settlement, Microsoft will license Windows to Z-Nix through the end of 1991, at which time both parties will negotiate in good faith for renewal. The Z-Nix complaint will be dismissed and the two companies will mutually release each other from any claim related to the complaint.

In addition, Z-Nix and Microsoft affirmed that the February 1990 settlement of patent and trademark infringement claims against Z-Nix is a valid resolution of legitimate claims.

Z-Nix has withdrawn its allegations about Microsoft's conduct, as stated in its Nov. 7 news release.

''Now that our differences are resolved, Microsoft looks forward to a mutually beneficial business relationship with Z-Nix,'' said Richard Fade, director of OEM sales at Microsoft.

ANAHEIM, CA (NOV. 12) BUSINESS WIRE - Dennis I. Edwards has rejoined Distributed Logic Corp. -- a leading supplier of data storage, communications and other peripheral subsystems to the DEC, Sun and IBM computer markets -- in the newly created post of executive vice president.

Edwards rejoins the company following a one-year hiatus as chief operating officer of Future Domain Inc. In his new post, Edwards is responsible for DILOG's worldwide marketing and sales activities. He reports to John F. Wilson, DILOG president and chief operating officer.

Edwards had joined DILOG originally in 1981, as western regional sales manager. He was named North American sales manager in 1983 and became vice president of European sales in 1984. He was named senior vice president for worldwide sales in 1985 and held that post until his departure for Future

Domain in 1989.

Prior to his career at DILOG, Edwards held several sales and sales management posts with Ampex Corp., Microcomputer Systems Corp. and Digi-Data Corp.

For further information, contact John F. Wilson, president, DILOG, 1555 S. Sinclair St., Anaheim, CA 92806. Telephone: 714/937-5700.

ROCKVILLE, MD (NOV. 12) BUSINESS WIRE - GE Information Services, a leading global provider of network-based value-added application services and Data Exchange International (DXI), a leading software company specializing in Tariff Automation, have formed an agreement that will enable GE Information Services to provide tariff automation services to the ocean carrier and liner shipping conference industry.

GE Information Services will offer the DXI tariff software, called RateMaster, as part of GE's worldwide CARGO LINK Services, a recently launched family of computer and network-based services for the Trade Community. CARGO LINK provides information management capabilities such as Electronic Data Interchange, electronic mail and database access tailored to the needs of the parties involved in moving and managing cargo door-to-door.

In light of the US Federal Maritime Commission's move toward mandatory electronic tariff filing during 1991, this offering from GE Information Services represents a strategic solution for carriers and shipping conferences seeking a sophisticated solution to their US Trade and automation of their Tariff Management worldwide.

RateMaster provides international ocean tariff rating and management capabilities. It creates tariff entries in data element form and enables automatic electronic distribution to clients, authorities and agents almost anywhere in the world.

The RateMaster capabilities within the CARGO LINK Services include tariff creation, filing, retrieval, distribution, maintenance and updates. It makes use of technologies such as commodity indexes, keyword searching of commodities and tariff rules, global location validation and tariff records.

DXI's expertise to develop RateMaster was gained from within the maritime

industry, initially on tariff filing, retrieval and distribution within the Federal Maritime Commission regulated routes.

RateMaster is developed on UNIX and is available on GE Information Services' worldwide network or on a client's own UNIX computer.

Tariff data is used to create freight quotations, to perform statistical analysis and to calculate bottom line bill of lading rates.

GE Information Services, a division of GE Co. USA, is a global provider of network-based information services and support, headquartered in Rockville.

MARLBORO, MA (NOV. 12) BUSINESS WIRE - Stratus Computer Inc. (NYSE:SRA)(BSE:SRA) Monday announced that it has expanded its Asia-Pacific operations by signing distributors in Thailand, Indonesia and the Philippines and opening a sales subsidiary for Singapore and Malaysia.

Stratus also announced today that the Thailand and Indonesia distributors have sold Stratus XA2000 Continuous Processing Systems to financial services and retail firms in their countries. Together, the Indonesia and Thailand sales represent an approximately $15.3 million investment in computers from Stratus, as well as application software from the distributors and a software firm.

The distributors -- Solutions Corporation Ltd. of Thailand, P.T. Gemawidia Statindo Komputer of Indonesia, and Equitable Computer Services Inc. (Equicom) of the Philippines -- now market and support fault-tolerant Stratus systems in their respective countries.

Solutions has sold Stratus systems to ten securities firms in Thailand in a $14.2 million sale which includes Stratus hardware and application software from the distributor and a software firm. P.T. Gemawidia Statindo Komputer has installed Stratus systems at the Jakarta Stock Exchange, Plaza Indonesia, and Bank Sampoerna in Indonesia.

Together, these Indonesia customers have invested $1.1 million in Stratus systems from the distributor. Equicom, prior to becoming a Stratus distributor in the Philippines, installed its stock market data software on a Stratus system at the Manila Stock Exchange in 1989.

In addition, Stratus has opened a Singapore-based sales subsidiary for the marketing and support of Stratus' online transaction processing (OLTP) systems in Singapore and Malaysia. Stratus also recently announced that it has opened

a sales representative office in Beijing for marketing in China.

The new distributors have established their own state-of-the-art Customer Assistance Centers (CACs) by implementing Stratus' advanced online service technology. CACs are networked with Stratus systems at customer sites via Stratus' worldwide Remote Service Network (RSN) to provide around-the-clock online service and support.

Stratus' previously established operations in Asia-Pacific include wholly owned sales subsidiaries and CACs in Hong Kong, Japan and Australia, as well as distributors United Computer Inc. of South Korea; C. Itoh Techno-Science Ltd. of Japan; and Stratus Taiwan Corp. of Taiwan. Asia-Pacific Firms Base Critical Operations on Stratus Systems

Stratus Computer Inc. is a leading supplier of fault-tolerant systems for critical online applications. The company offers the broadest range of fault-tolerant systems and maintains the highest standard for computer reliability.

HACKENSACK, N.J. (NOV. 12) BUSINESS WIRE - The Alpine Group Inc. (ASE:AGI) Friday announced that its Alpine PolyVision, Inc. subsidiary named Drew E. O'Connell as president of its Retail Systems and Peripherals Group.

O'Connell has 16 years of experience in point-of-purchase, point-of-sale and other data display product markets, with a particular focus on the retailing industry. In 1988, he founded Epsi'lanne U.S.A., an electronic shelf label technology concern, which was sold in 1990 to Electronic Retail Systems International, a worldwide leader in the electronic shelf management industry. O'Connell then served as President of ERS. From 1976 to 1989, O'Connell served as Chief Executive Officer of The Vanguard Group, a national printing and marketing firm.

As President of Alpine PolyVision's Retail Systems and Peripheral Group, O'Connell is responsible for the marketing of PolyVisionTM panels primarily for use in electronic price tag systems, point-of-purchase and data displays in retail and other locations.

Steven S. Elbaum, chairman and chief executive officer of The Alpine Group, Inc. stated, ''The appointment of Drew O'Connell is an important step toward Alpine's objective to establish itself as a leading supplier of PolyVisionTM based electronic display media to supermarket, convenience store and other retailing markets.''

The Alpine Group, Inc. is a holding company with continuing operations in information display related businesses. Alpine is developing PolyVisionTM, a proprietary flat panel display technology, for commercial applications in a wide variety of markets. Flat panel display technologies are utilized for the electronic display of information and graphics on screens and other display media including video displays, outdoor and indoor signage, point of purchase displays, public information, instrumentation and other media.

Alpine's information display activities also include the manufacturer and sale of menuboard display systems and components to fast food, convenience store and restaurant markets through its Posterloid Corporation subsidiary and programmable controllers and other specialized products used in multi-image audio visual presentations through its Audio Visual Laboratories, Inc. subsidiary.

#90316b0666 11/12/1990 ~Business Wire

WALTHAM, Mass. (NOV. 12) BUSINESS WIRE - The Hitachi Group's Nissei Sangyo America (NSA), Ltd., a leading supplier of monitors and graphics controllers to OEMs and distributors, will unveil a low magnetic field 14-inch multi-scanning color monitor for business graphics at COMDEX/Fall 1990 in Las Vegas.

The company will also demonstrate software drivers that improve the capabilities of AutoCAD and Windows 3.0 when running on the ultra-high resolution Infotronic SGX and IGX intelligent graphic controllers.

NSA's 14MVX low magnetic field (LMF) color monitor complies with the world's most stringent electromagnetic emissions regulations for monitors in the office environment. These standards, set by the Swedish government, mandate a very low field of magnetic strength of .5 milligauss or less when emissions are measured 20 inches from the front of a screen.

The 14MVX/LMF offers additional ergonomic features such as silica anti-glare treatment, a full tilt-swivel base, and front panel controls. Incorporating high focus gun technology traditionally found only in high end CAD/CAE monitors, the 14MVX/LMf delivers a bright, sharp image that is virtually adjustment-free. The monitor also provides resolutions from VGA to 1024x768, horizontal scan frequencies from 30 to 40 kHz, and MAC II compatibility. The 14MVX/LMf is priced at $995.

AutoCAD and Windows

NSA will also debut software drivers for AutoCAD and Windows 3.0 at COMDEX. This is the initial roll-out of software drivers running via a TIGA II interface on NSA's Infotronic (INFO) SGX and IGX graphic boards.

The INFO SGX and IGX boards are high-resolution, high-speed intelligent graphic controllers. The SGX throughput is at 10 MIPS while the IGX has a processing speed of 6 MIPS. Therefore, the performance of AutoCAD and Windows on these boards is significantly improved. In addition to speed, the INFO SGX and IGX are compatible with DOS, UNIX, and OS/2 environments. The boards feature software-selectable resolutions with the SGX providing up to 1600x1280, IGX going up to 1280x1024.

AutoCAD, a display list driver for AutoCAD 10/11 as introduced by NSA, has unique enhancements such as ADICOLOR, a color presetting program, and Flush, a fast screen refresh that eliminates screen regenerations. The Windows driver gives users access to hundreds of business and CAD/CAM applications. Drivers are shipped at no additional cost with Infotronic controllers.

Additional Product Demonstrations

CM2187M - a 21-inch multi-scanning color monitor with a dual-function processor to program and store up to 30 display screen presets. The monitor features resolutions up to 1600x1200, and MAC II compatibility. It is priced at $4,495.

SuperScan Plus - a 20-inch multi-scanning color monitor adjusts to graphics standards from 30 to 64 kHz, is compatible with MAC II and offer resolutions up to 1280x1024. It is priced at $3,295.

SuperScript - a 20-inch monochrome graphics subsystem including both monitor and graphic controller. SuperScript provides ultra-high resolution at 1280x1024, and uses the TI TMS 34010 graphic processor. It is priced at $2,495.

INFO SGX and IGX - intelligent graphic controllers distributed exclusively by Hitachi/NSA in North America for Infotronic. Implementing Texas Instruments (TI) TMS34020 processor, the INFO SGX 1600 features VGA emulation with resolutions up to 1600x1280. The INFO IGX 1280 incorporates the TI TMS 34010 chip and provides VGA emulation as well with resolutions up to 1280x1024.

All models support single and dual screen modes, as well as Genlock and NTSC/PAL encoders. The INFO SGX 1280 is available at $4,295, and the INFO IGX is priced at $2,795.

Hitachi/NSA is demonstrating the 14MVX/LMF, AutoCAD and Windows 3.0 along with graphic controllers, monitors and subsystems at COMDEX BOOTH 2190 at the Sands Exposition and Convention Center, Las Vegas.

Nissei Sangyo America Ltd., the North American marketing/sales arm in The

Hitachi Group, handles computer products for Hitachi Yokahama works. NSA's Office Automation Division is headquartered at 800 South St., Waltham, Mass., 02154. The toll-free number in the United States and Canada is 800-441-4832.

Infotronic is a registered trademark of Infotronic S.p.A.

Windows is a trademark of Microsoft Corp.

AUSTIN, TX (NOV. 12) BUSINESS WIRE - HealthVest (ASE:HVT) Monday announced that it has formally demanded payment of certain indebtedness from Healthcare International Inc. (ASE:HII) and its subsidiaries which accrued during the standstill period between HealthVest and Healthcare.

As was announced last week, the standstill period expired on Oct. 31, and the two companies had reached an impasse in negotiations regarding an interim restructuring of the obligations of Healthcare and Healthcare's subsidiaries to HealthVest.

HealthVest also announced that it has formally demanded payment for past due rentals due Nov. 1 under certain leases between HealthVest and subsidiaries of Healthcare and under certain guarantees by Healthcare guaranteeing such leases after application of the payment received from Healthcare on Nov. 7. HealthVest noted that all of the leases between HealthVest and subsidiaries of Healthcare contain cross-default provisions.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers, and facilities offering other related health care products and services.

CHERRY HILL, NJ (NOV. 12) BUSINESS WIRE - Marvin Samson, president and chief executive officer of Marsam Pharmaceuticals Inc. (NASDAQ:MSAM) announced Monday that earnings for the quarter ended Sept. 30 were $90,400 (2 cents per share) on revenues of $2,625,300.

For the nine months ended Sept. 30, earnings were $1,000,500 (19 cents per share) on revenues of $8,214,700.

Net sales and income for the quarter ended Sept. 30 include $495,000 allocated to that period from a $1.5 million lump sum payment made by E.R. Squibb to the company in connection with the termination of the previous agreement between the company and Squibb.

The lump sum payment recognizes sales and income which would have been realized by the company had the agreement with Squibb not been terminated. The balance of the $1.5 million, $495,600, has been recorded as deferred revenue.

Samson stated that while the company cannot predict the effects on its revenues and earnings during the period of transition from distribution of its products by Squibb to distribution under its new agreement with Geneva Generics, the company may not achieve earnings from operations until meaningful sales of Geneva Marsam-labeled products occur.

Geneva Generics is currently bidding on behalf of Geneva Marsam on hospital and institutional contracts, the majority of which become effective during the first quarter of 1991.

Marsam Pharmaceuticals Inc. is an emerging leader in the development and manufacture of injectable drug products for the hospital and institutional marketplace, which are sold through an agreement with Geneva Generics Inc., a leading developer, manufacturer and distributor of quality generic pharmaceutical products. Geneva Generics is a subsidiary of CIBA-GEIGY Corp.

PLANVIEW, N.Y. and ARNHEM, the Netherlands (NOV. 12) BUSINESS WIRE - Geraghty & Miller, Inc. (NASDAQ: GMGW) and Heidemij, a leading European environmental firm, Monday announced the formation of a joint venture to introduce Heidemij's soil washing technologies to the U.S. market.

The patented soil washing system developed by Heidemij has been very successful in treating contaminated soils in the Netherlands and is a low cost alternative to current remedial treatments. The joint venture will unite Geraghty & Miller's assets in hazardous waste remedial action with the technology and operational experience of Heidemij.

The soil washing system, a physio-chemical method, addresses both organic and

inorganic contamination and has proven to achieve significant volume and toxicity reductions. In Holland, three kinds of cleaning technologies are in operation: thermal, biological and physio-chemical. The physio-chemical technology is the only one that can also remove heavy metals from polluted soils.

The process first determines the particle size/contaminant relationship and then focuses treatment on the key soil fractions. Heidemij is currently operating bench, pilot and full-scale plants. The production unit is modular and has a throughput capacity of 20 tons per hour. Heidemij's full-scale production plant has been in operation for over three years and has effectively processed more than 200,000 metric tons of contaminated soil.

Heidemij, headquartered in Arnhem, the Netherlands, is one of the oldest and largest environmental firms in Europe, with business units in consulting, engineering and remedial contracting, focused on land use development, infrastructure, environment and real estate information. In more than 50 developing countries, Heidemij is, through its subsidiary Euroconsult, one of the leading consulting engineering firms in rural development. Formed in 1888 Heidemij developed through the management of land recovery in the early 1900s and has continued to expand through soil treatment, environmental services and hazardous waste management.

Geraghty & Miller, Inc., based in Plainview, New York, is a full service environmental company that provides a wide spectrum of consulting, engineering hydrocarbon and remediation services. Founded in 1957, the Company is a leader in the development, management and protection of ground-water resources and the correction of ground-water contamination. The joint venture is currently operational. For more information, please contact John McCusker, Vice President-Finance, at 516/249-7600, or Michael J. Mann, Vice President, at 813/961-1921.

#90316b0675 11/12/1990 ~Business Wire

SCHENECTADY, NY (NOV. 12) BUSINESS WIRE - General Electric and Stewart & Stevenson Services Inc. announced an agreement which provides for Stewart & Stevenson to become the exclusive supplier of packages for GE Power Generation's worldwide sales of GE's newest aeroderivative gas turbine, the LM6000.

''Stewart & Stevenson has succcessfully supplied turbine generator sets using

other GE aeroderivative gas turbines for eight years and this agreement will further develop and enhance the outstanding relationship that exists between the two companies,'' said Delbert L. Williamson, vice president, GE Industrial and Power Systems Sales. ''We also can continue to combine our unique skills to bring exceptional products to the market.''

The LM6000 is a derivative of GE's most powerful and reliable aircraft engine, the CF6-80C, and will be the most efficient simple cycle gas turbine in the world when it is available in early 1992. Rated at 40 megawatts, the LM6000 has thermal efficiency greater than 40 percent. It also employs a unique direct-drive concept that provides for higher efficiency and lower cost. GE believes the markets for the LM6000 will include utilities and independent power producers in various applications.

With two primary divisions, Stewart & Stevenson has had three consecutive years of more than 27 percent revenue growth. The Engineered Power Systems Division designs, manufactures and markets equipment using diesel or gas turbine engines supplied by independent producers.

The company's packaged equipment is sold worldwide for use in many diverse markets, including military and commercial electrical power generators, aircraft ground support equipment, marine propulsion, and oilfield service equipment. The Distribution Division markets industrial equipment and related parts manufactured by other companies, and provides in-shop and on-site repair services for such products.

GE Power Generation is a world leader in the design and manufacture of steam and gas turbine generators, power delivery equipment and systems and air quality control systems. The company is experiencing a rapid growth in the demand for its gas turbines, combined cycle systems and related products. This trend, which is expected to continue through the 1990's, exists as utilities and non-utility generators seek to fill the worldwide need for incremental peaking and base load power generation.

NEW YORK (NOV. 12) BUSINESS WIRE - B+H Ocean Carriers Ltd. (ASE: BHO) announced Monday that its Board of Directors had declared a dividend of $.80 per share, payable on November 30, 1990, to shareholders of record on November 21, 1990.

The dividend is paid from the Company's Available Cash Flow for the third quarter of 1990. The Company's third quarter performance reflected a substantial year-to-year increase in drydocking costs, the loss of revenues

from increased off-hire days, and a reduction in COTCO pool charter rates, partially offset by an increase in PROTRANS pool charter rates.

The Company expects to complete the drydocking of two bulkcarriers in the final 1990 quarter.

The Company operates seven handy-size dry bulkcarriers and six product tankers.

TUSTIN, CALIF. (NOV. 12) BUSINESS WIRE - Trimedyne Inc. (NASDAQ:TMED) announced Monday it received approval from the U.S. Food and Drug Administration (FDA) to market its new pulsed Holmium ''cold'' laser system for removing plaque (fatty deposits) from peripheral (leg) arteries as an alternative to bypass surgery, balloon angioplasty and amputation.

This represents the first marketing approval granted by the FDA for a pulsed laser system able to vaporize blockages in a blood vessel, even hard, calcified deposits, without creating excessive heat.

The new pulsed Holmium cold laser emits extremely rapid, high-energy laser pulses, which are transmitted through a catheter containing a tiny optical fiber. The catheter is inserted into an artery in the thigh ands is advanced through the body's arterial system to the blockage over a guidewire, like a monorail train.

The Holmium laser is able to vaporize the plaque, even calcified deposits, creating a larger channel and restoring blood flow.

Trimedyne is testing the new Holmium cold laser system in an FDA approved clinical trial for removing blockages in the coronary arteries of the heart at 10 medical centers in the United States and two medical centers in England. Trimedyne expects to expand its coronary trial to several additional medical centers in other foreign countries.

Howard K. Cooper, president and chief executive officer of Trimedyne commented: ''We began testing in our Holmium cold laser system in patients suffering with totally and partially blocked leg vessels in January 1990 and have obtained excellent results. Many of these patients would have been faced with bypass surgery or leg amputation.''

Cooper continued, ''We believe our Holmuim cold laser system is the most advanced product available today for removing blockages from leg arteries.''

Trimedyne is a leading manufacturer of proprietary lasers and laser catheters for use in surgery and for removing blockages from blood vessels.

#90316b0684 11/12/1990 ~Business Wire

SANTA CLARA, CALIF. (NOV. 12) BUSINESS WIRE - 3Com Corp. Monday announced 30 day availability of its LinkBuilder manageable hub product line, providing customers with a flexible tool to build system solutions spanning the network from the desktop through the wiring closet to the Wide Area Network (WAN) and across the enterprise.

With the LinkBuilder family of products, 3Com has expanded its connectivity offerings to include manageable hubs and fiber optic solutions. LinkBuilder, based on SynOptics' LattisNet System 3000 architecture, is available from 3Com in a variety of configurations, with the base unit starting at $1,995. 3Com's LinkBuilder product line provides customers with a standards-based product, supported by 3Com's expertise in networking and connectivity for local and wide area networks.

''Our new LinkBuilder manageable hub product line is an important element of our connectivity offering. It complements 3Com's adapters, MultiConnect, internetworking and network management product lines, creating a comprehensive standards-based connectivity solution,'' said Eric Benhamou, president and chief executive officer of 3Com Corp.

''With this connectivity solution, we are able to further simplify the complexity of data networking for our customers.''

The LinkBuilder product allows network administrators to control and monitor workstation to hub connections, traffic loads, and network security, and enhances network availability for mission-critical applications. LinkBuilder is the central point for connecting structured, multi-media Ethernet networks, including wiring systems comprised of IEEE 802.3i (10BASE-T) fiber optic, and coaxial cabling.

Available modules include 10BASE-T, thin coaxial, and fiber-optic Ethernet connectivity modules along with retiming and Simple Network Management Protocol (SNMP) based network management modules.

3Com Corp. is a leading independent global data networking company providing multivendor connectivity that spans organizations and businesses worldwide. The company designs, manufactures, markets and supports a wide range of networking systems based on industry standards and open system architecture.

NEW YORK (NOV. 12) BUSINESS WIRE - B+H Maritime Carriers Ltd. (ASE:BHM) announced Monday that its Board of Directors had declared a dividend of $.30 per share payable Nov. 30 to shareholders of record on Nov. 21.

The dividend is being paid from the Company's Available Cash Flow for the third quarter of 1990. The Company's third quarter performance reflected a year-to-year increase in the size of the fleet and higher vessel operating expenses in respect to three vessels. Revenue was impacted by increased off-hire days, substantially due to the loss of M/T LIVI, and by a decline in COTCO average pool charter rates, offset by an increase in PROTRANS average charter rates.

As reported earlier, one of the Company's product tankers, M/T LIVI, was declared a Constructive Total Loss by the Company's insurance representative in Oct. 1989. The company is in the process of finalizing a claim with its underwriters for $14.7 million and will record amounts received in excess of the vessel's net book value when its insurance claim is finalized.

The company expects to drydock a bulkcarrier and a product tanker in the fourth quarter.

The company now operates five handy-size dry bulkcarriers and four product tankers.

NEW YORK (NOV. 12) BUSINESS WIRE - B+H Bulk Carriers Ltd. (NASDAQ: BULKF) announced Monday that its Board of Directors had elected not to pay a quarterly dividend covering the three- month period ended Sept. 30.

Today's action, which is similar to that taken at the end of this year's second quarter, reflects a substantial year-to-year decrease in third quarter 1990 operating results, reported last week, due primarily to a decline in the charterhire earnings of its bulkcarriers and to the higher operating expense of three of the Company's vessels.

The company, which operates seven handy-size dry bulkcarriers, expects to drydock one vessel in the fourth quarter.

LOUISVILLE, KY (NOV. 12) BUSINESS WIRE - Rally's Inc. (NASDAQ:RLLY), the fastest growing hamburger chain in America and the nation's largest double drive-thru hamburger chain, reported record financial results for the first quarter ended Sept. 30.

In its prior year, which ended July 1, the company reported earnings on both an actual and proforma combined basis in order to reflect, on a proforma basis the impact of the company acquiring, on Oct. 19, 1989, 26 Rally's restaurants operating in the New Orleans; Birmingham, Ala.; and Central Indiana markets.

For the quarter ending Sept. 30, revenues rose 94 percent on an actual basis, and 20 percent on a proforma basis, to $19.7 million compared with $10.2 million and $16.4 million on an actual and proforma basis, respectively, in the prior year.

Net income grew 96 percent on an actual basis, and 20 percent on a proforma basis, to $1.4 million compared with $.7 million and $1.1 million on an actual and proforma basis, respectively, in the prior year. Earnings per share of 20 cents for the current quarter were 10 percent higher on an actual basis and 15 percent higher on a proforma basis than the prior year earnings per share of 18 cents and 17 cents, respectively.

Systemwide sales increased 28 percent to $45.9 million compared to $35.8 million in the comparable quarter in the prior year. The company and its franchisees opened 18 stores in the quarter ended Sept. 30, finishing the quarter with 245 units in operation. At Nov. 12, there were 255 units in operation in 23 states.

OMAHA, NE (NOV. 12) BUSINESS WIRE - Northern Border Pipeline Co. announced that it has accepted a certificate to construct and operate a 20,000 horsepower compressor unit designated as Compressor Station No. 10 in Clark County, S.D., and to install and operate an additional 12-inch meter run at the Ventura Meter Station in Hancock County, Iowa.

The facilities are estimated to cost $16 million and should be completed and ready to be placed in service by November 1991.

Northern Border will use the facilities to transport firm volumes of natural gas totaling 150 million cubic feet per day (MMcf/d) for Salmon Resources

Limited (30 MMcf/d) and Western Gas Marketing Limited (120 MMcf/d) as agent for TransCanada PipeLines Limited.

The additional 150 MMcf/d of transportation service will reduce the existing shippers' cost of service by approximately 10 percent, from the current 40 cents per Mcf to 36 cents per Mcf.

According to Northern Plains Natural Gas President Larry L. DeRoin, construction at the site, 17 miles west of the city of Clark, South Dakota, will begin as early as mid-November.

The Northern Border Pipeline Co. is a general partnership which includes subsidiaries of four major energy companies: Enron Corp., Houston; TransCanada PipeLines Limited, Calgary; Panhandle Eastern Corp., Houston; and The Williams Companies Inc., Tulsa.

MANSFIELD, MA (NOV. 12) BUSINESS WIRE - Codex Corp. Monday announced the expansion of its baseline professional services.

The expanded offerings include value-added services with a range of options to suit individual requirements. "With Codex's migration to total networking solutions provider, our service organization provides the skills needed to plan, implement, and support our customers' sophisticated networks," said Tom Cook, vice president of U.S. Customer Service.

Codex's expanded service offerings span the range of product support and maintenance and provide customers a single point of contact with networking experts.

The 11 expanded offerings include cabling, installation, network configuration educational, on-site hardware, unit exchange, EZ exchange, software, critical systems, depot maintenance, and cooperative maintenance services. Codex's new services are currently available and are priced based on individual customer use.

"We are laying a foundation of these services today with a building-block approach. This allows our customers the flexibility to choose the options which best suit their requirements, without forcing a one-size-fits-all solution," added Cook.

Codex's custom-designed services are divided into the three phases of the

customer service life cycle: planning, implementation, and support. Customers can sustain their specifically-configured networks according to one or several of the service products available.

"Today's businesses rely upon their data and voice networks to remain competitive," said Cook. "With network availability requirements increasing, customers want competent professionals to plan, implement, and support their networks. Codex brings a rich history of technical excellence and service quality to the customer with these expanded professional services."

Codex Corp., a subsidiary of Motorola Inc., is a leading supplier of network products and integrated network solutions. The company operates in 51 countries through its nine international subsidiaries and an established distributor organization. Offerings include network management systems, T1/E1 switches, X.25 networks, multiplexers, DSU/CSUs, modems, LAN internetworking devices, and professional services.

DECATUR, AL (NOV. 12) BUSINESS WIRE - William D. Powell, president and chief executive officer of First Federal Savings Bank, Decatur, (NASDAQ/NMS:FFSD), Monday announced that the board of directors has unanimously approved the formation of a holding company with First Federal as the principal subsidiary.

Under the proposed agreement and plan of reorganization, the existing shares of First Federal's stock will automatically be converted into an equal number of shares in the new holding company. This will result in the new holding company owning all the outstanding shares of First Federal.

The plan for formation of the holding company is subject to the approval of the Office of Thrift Supervision and stockholders of First Federal.

Powell stated that the holding company structure has been adopted by many financial institutions because it provides more flexibility in terms of future

diversification of business activities. No specific acquisitions or mergers are currently pending nor has the proposed holding company formulated any specific plans to engage in other lines of business after it commences operations.

First Federal is a federally chartered, and FDIC-insured savings bank operating six full-service offices in north Alabama. The common stock of First Federal Savings Bank is traded in the NASDAQ National Market System under the symbol FFSD.

#90316b0712 11/12/1990 ~Business Wire

NEW YORK (NOV. 12) BUSINESS WIRE - American International Group Inc. (AIG) has announced that it has received insurance licenses in both Poland and Hungary.

Local Polish and Hungarian partners will participate with several AIG subsidiaries in the new joint venture companies. In both countries, the shareholders' initial capital subscriptions have been paid and the formal process of registering the companies has begun.

In Poland, two AIG subsidiaries and Bank Polska Kasa Opieki S.A. (''Bank Pekao'') have received the first two insurance licenses issued in Poland to companies with foreign participation since the recent inception of the new Polish insurance law. The licenses, Numbers 1 and 2, were granted on Oct. 30.

The two Polish joint-venture companies will be owned 55 percent by the AIG subsidiaries and 45 percent by Bank Pekao. The licenses were issued for the formation of First American Polish Life Insurance and Reinsurance Co., S.A., which will offer life insurance products and the First American Polish Insurance and Reinsurance Co., S.A., which will write general insurance lines and personal accident insurance products.

Each company will be owned 27.5 percent by American Life Insurance Co. (ALICO) and 27.5 percent by AIU Insurance Co.

Bank Pekao is one of the largest Polish commercial and savings banks. It has extensive domestic and a number of foreign branches.

In Hungary, one AIG subsidiary and four Hungarian partners are proceding to incorporate their joint venture company, First American Hungarian Insurance Co., RT. (''FAHIC''), pursuant to the permission granted by the Hungarian Council of Ministers.

FAHIC will write life insurance, general lines and personal accident products. It will be owned 52 percent by ALICO, 35 percent by The Hungarian Cooperative Savings Bank (''MTB''), 11 percent by the Association of Iron, Metal and Electrical Energy Industry (''VASAS''), 1 percent by the Association of Civil Servants Union (''KSZ'') and 1 percent by the Federation of Chemical Workers (''VSZ'').

MTB has an extensive network of over 260 savings coopertives throughout Hungary. The three trade unions have a combined membership of more than 700,000 workers.

AIG's special representative for Poland, Thomas Mintoft-Czyz, will serve as president of both new Polish companies and will be based in Warsaw. Dariusz Cieslikiewicz, director, Economics and Organization Department of Bank Pekao, will be first vice president.

AIG and Bank Pekao are proceeding with the registration of the two companies in accordance with Polish law. They are hopeful both companies will be fully operational by early 1991.

Edward J. Bush, AIG's special representative for Hungary, will serve as president of FAHIC and will be based in Budapest. Registration is proceeding in accordance with Hungarian law and the partners expect FAHIC also will be fully operational by early 1991.

AIG is the leading U.S. based international insurance orgnaization and the largest underwriter of commercial and industrial insurance in the United States.

American International Group Inc.'s common stock is listed on the New York Stock Exchange, as well as the stock exchanges in London, Paris and Tokyo.

#90316b0713 11/12/1990 ~Business Wire

PROVIDENCE, RI (NOV. 12) BUSINESS WIRE - Outlet Communications Inc. Monday announced an 88 percent improvement in its operating results for the 1990 third quarter.

Outlet's net loss in the quarter was $268,000, or 4 cents per share compared to last year's net loss of $2,216,000, or 34 cents per share. This was a net improvement of $1,948,000, or 88 percent. The improved results are a reflection of Outlet's recently completed re-structuring wherein certain broadcast properties were sold and the proceeds were applied to reduce outstanding debt.

In addition, operating earnings in the 1990 quarter were up by 24.2 percent due to improved performances at the on-going stations and reduced corporate expenses.

Included in the dispositions of broadcast properties were two television stations and two radio stations which were sold in this year's first quarter. These dispositions contributed to revenue reductions in 1990 versus last year. Thus, net revenue in the 1990 third quarter of $11,289,000 was down from $22,531,000 in the prior year and net revenue of $42,657,000 in the first nine monhs of 1990 was less than last year's $71,684,000.

The sales of broadcast stations enabled Outlet to reduce interest expense and amortization of intangibles and provided Outlet with net gains from dispositions, after taxes, in both years. For the nine months ended Sept. 30, 1990, Outlet had net income of $4,060,000, or 62 cents per share compared to prior year net income of $12,726,000, or $1.94 per share.

Last year's results include larger non-recurring gains from radio station sales along with an extraordinary credit for tax benefits from net operating loss carryforwards.

Outlet also announced that it has discontinued the services of its financial advisor, The First Boston Corp., which had been engaged to explore strategic alternatives for the company, including its possible sale and/or merger.

Outlet Communications Inc., a public-company headquartered in Providence, R.I. owns and operates two VHF television stations: WJAR-TV, Providence, R.I. and WCMH-TV, Columbus, Ohio.

#90316b0718 11/12/1990 ~Business Wire

NASHVILLE, TN (NOV. 12) BUSINESS WIRE - Comdata Corp. (NASDAQ/NMS: CMDT) announced Monday that it has entered into a marketing agreement with Motorola Inc. (NYSE: MOT), Communications Sector.

Under terms of the agreement, Comdata becomes a value-added remarketer of Motorola's CoveragePLUS real-time vehicular communications and tracking systems.

"Prior to signing this agreement, we examined every available means of providing in-truck communications," said George L. McTavish, president and chief executive officer of Comdata. "Motorola's CoveragePLUS meets the trucking industry's need for a cost-effective information link with their

drivers and serves as a solid foundation for Comdata's new in-truck communication system."

"By combining our capabilities with Motorola's sophisticated CoveragePLUS network and mobile radio units, we can give our customers two-way, in-truck voice communications, voice mail, and text messaging," McTavish says.

"This consolidation of resources allows Comdata to offer trucking companies an innovative service at a reasonable price and lets the small- and medium-seized operators receive the benefits of CoveragePLUS without making an additional investment in computer equipment.

"All it takes is a phone call to the Comdata Communications Center to access this broad array of communications services," McTavish says. "Comdata serves as the central hub through which dispatchers and drivers channel their messages 24 hours a day, seven days a week."

Now trucking companies can easily and economically contact their drivers to alter their routes, change their pick-up and delivery instructions, notify them in the event of an emergency, and can quickly handle virtually any situation which requires rapid communications between dispatcher and driver. A dispatcher simply makes one phone call to initiate a voice communication or to leave a message for immediate or delayed retrieval.

Using the Comdata system, the trucking company can locate its trucks while they are en route, review a detailed transaction history of all communications activity passed through the system, or even access records of purchase or money transfer activities initiated with Comdata's Comchek card.

Comdata Corp. is a leading supplier of products and services to the transportation industry, including fuel management, fuel tax reporting, money transfer, in-truck communications, phone services, electronic load matching, public fax machine services, permit and legalization services, log auditing, audio and video safety training materials, and drug education and testing programs.

NATICK, MA (NOV. 12) BUSINESS WIRE - ''On October 26, 1990, Prime made a $25 million payment to its senior bank lenders originally scheduled for payment on December 31, 1990,'' announced James F. McDonald, vice chairman and chief executive officer of Prime Computer Inc.

''We are pleased to have had operating results to date that have enabled us to make this early payment, which will save us approximately $450,000 in cash interest expense in the fourth quarter of this year,'' McDonald further stated.

''Since January 30, 1990, Prime has reduced its operating company debt by $145 million through pre-payments and other debt reduction actions.

''This pay-down of its bank debt is part of Prime's ongoing program commenced over the past several quarters to maximize the company's financial flexibility in building its business,'' said Jack Shields, president and chief operating officer.

''We are proud of our performance to date, and will continue our efforts on building Prime's position as a leading provider of innovative business information solutions for the CAD/CAM and computer systems markets'' Shields added.

Prime Computer Inc. is a leading worldwide supplier of CAD/CAM (computer-aided design/computer-aided manufacturing) solutions, having leadership positions in the automotive, industrial equipment and aerospace markets. In addition, the company is a supplier of general-purpose minicomputers incorporating state-of-the-art technology and competitive price/performance. The company has a global software and hardware field service maintenance organization providing service to Prime's installed base.

NORWOOD, MA (NOV. 12) BUSINESS WIRE - Phoenix Technologies Monday announced that the company has licensed its PhoenixPage PCL 5-compatible interpreter to Abaton Inc., a subsidiary of Everex Systems Inc., for implementation in Abaton's LaserScript P5 printer.

The LaserScript P5 is the first non-HP printer based on the PCL 5 language.

The LaserScript P5 will debut at Comdex in Las Vegas, Nov. 12-16. Shipments are expected in January 1991.

The Abaton announcement follows Pacific Data Product's introduction of the Pacific FivePage cartridge, a PCL 5-compatible upgrade cartridge for LaserJet Series II, IIP, and IID printers. The Pacific FivePage cartridge also uses the PhoenixPage PCL 5 software.

Last month Phoenix announced that it had reached an agreement with Agfa Compugraphic to distribute Agfa's Intellifont PCL 5 font scaling technology. Phoenix also supplies Bitstream Inc.'s Speedo PCL 5 scalable font solution.

PhoenixPage is an expandable software printing architecture that provides

compatibility with PostScript (B&W and color), PCL 4 and 5, and other major imaging models. PhoenixPage also includes the unique FontSocket font management system which supports Adobe Type 1, Agfa Compugraphic Intellifont, Bitstream Speedo and Fontware and other industry-standard font rendering technologies.

Phoenix has licensed its PCL 5 interpreter to several other unannounced manufacturers as well.

Phoenix Technologies designs, develops, and markets systems software products for personal computers and printers. Its products enables OEMs to offer their customers computers and printers that are compatible with industry standards. More than 300 major personal computer and printer manufacturers rely on Phoenix for its system-level software and hardware compatibility expertise.

Abaton manufactures and markets desktop publishing and desktop communications products for the Macintosh and PC markets. Everex Systems Inc., headquartered in Fremont, Calif., is a leading supplier of personal computers and peripherals.

LOS ANGELES (NOV. 12) BUSINESS WIRE - Harlyn Products Inc. (AMEX:HRN) Monday announced results for the first quarter ended Sept. 30.

Sales rose to $6,321,000 from $5,830,000 during the three months ended Sept. 30, 1989. For the latest first quarter, income from operations increased significantly to $787,000 from $487,000 and net income was $256,000, or 7 cents per share, as compared to $235,000, or 6 cents per share, for the prior first quarter.

Commenting on these results Harold Weisbrod, chairman, stated, ''We are gratified by the continued growth in sales and earnings we experienced during the first quarter of fiscal year 1991. We are particularly pleased with the 62 percent increase in income from operations. Net income, however, did not grow at the same rate because of increased borrowings to finance receivables and inventory and income taxes paid during the latest quarter were up substantially from those paid in the comparable quarter a year ago due primarily to the expiration of the tax holiday in Thailand.

''While the economy remains uncertain, we remain optimistic about growth in

both sales and earnings during the current quarter and beyond,'' Weisbrod concluded.

HORSHAM, PA (NOV. 12) BUSINESS WIRE - Robec Inc., a national microcomputer products distributor (NASDAQ: ROBC), today reported the following results:

	Sept. 30, 1990	Sept. 30, 1989
	(in 000's)	
THREE MONTHS ENDED:		
Net sales	$46,618	$42,953
Net income	730	1,003

Earnings per share (a)	$.16	$.31

NINE MONTHS ENDED:

Net sales	$141,782	$122,531
Net income	3,014	3,353
Earnings per share (a)	$.66	$1.03

(a) Earnings per share decreased in part as a result of the additional shares issued in connection with the company's initial public offering in October 1989. On a pro forma basis, earnings per share would have been $.22 and $.73 for the three-month and nine-month periods ended Sept. 30, 1989, had the shares issued in connection with the public offering been outstanding since the beginning of 1989. T The 16 percent increase in sales for the nine-month period resulted primarily from an overall increase in sales volume and the addition of five new branches in the first quarter of 1990. Four of these offices were opened as a part of the acquisition of Electronic Marketing Specialists on Feb. 2. The four offices are in Los Angeles, San Franciso, Seattle and Salt Lake City.

Robec Distributors is a national, value-added distributor of microcomputer systems, peripherals, spare parts and accessories, providing product leadership and technological services to value-added resellers, dealers and computer retailers.

Robec is headquartered in Horsham, Pa. The company maintains sales and warehouse locations across the United States including: Asheville, N.C.; Atlanta; Boston; Chicago; Columbus, Ohio; Dallas; Denver; Houston; Kansas City Kan.; Los Angeles; New York; Orlando, Fla.; Philadelphia; Phoenix; Pittsburgh; Salt Lake City; San Francisco; Seattle; Washington, D.C.; and Youngstown, Ohio.

NEW YORK (NOV. 12) BUSINESS WIRE - Phoenix Re Corp. (NASDAQ/NMS:PXRE) Monday announced the appointment of Jeffrey D. Cropsey as senior vice president, treasurer and chief financial officer.

''We are indeed pleased to name Jeffrey Cropsey to this position,'' said Gerald L. Radke, president and chief executive officer. ''Mr. Cropsey has distinguished himself within the insurance industry as a capable and experienced financial executive, one that has developed keen and highly specialized skills in virtually all matters of accounting and finance.

Cropsey was most recently affiliated with The Equitable Life Assurance Society in New York as Vice President -- Expense Control and Accounting Practices for

the Equitable Insurance Companies.

In this capacity, he was responsible for managing the expense control process for $800 million in annual expenditures, including planning, budgeting and analyzing actual expenses.

Prior to that, he was an audit partner with Peat Marwick Main & Co. in New York, where he planned and directed financial audits of public and privately held insurance companies and mutual funds.

From 1970 until 1984, Cropsey was affiliated with Touche Ross & Co. During that time he held various positions with the firm, including partner in its audit practice.

He also served as the firm's National Director for the insurance industry and was the Director of Accounting Standards for the firm.

During his tenure with Touche Ross, he worked as a practice fellow for the Financial Accounting Standards Board, where he was responsible for managing accounting research projects.

Cropsey graduated with honors from Princeton University with a Bachelor's degree in Electrical Engineering. He received a Masters of Business Administration, with an emphasis in Operations and Systems Analysis, from Stanford University.

A certified public accountant, he is a member of the American Institute of Certified Public Accountants, the New York State Society of Certified Public Accountants and the Society of Insurance Accountants, and is a former member of the AICPA's Insurance Companies Committee.

Phoenix Re provides reinsurance products and services to a national and international marketplace, with principal emphasis on commercial and personal property risks. The company's common shares trade on the NASDAQ National Market System under the symbol PXRE.

DETROIT (NOV. 12) BUSINESS WIRE - ASK Computer Systems Monday announced MANMAN/AUTOMOTIVE, a complete electronic data interchange (EDI) and release accounting system for automotive suppliers.

MANMAN/AUTOMOTIVE is the newest addition to MANMAN, ASK's complete manufacturing information system that supports accounting, manufacturing,

order management and other planning functions.

MANMAN is the first closed loop corporate-wide information system from a major supplier that offers integrated automotive functionality from the receipt of an electronic release to the transmission of an advance shipment notice. Many other systems offer merely an interface to a third-party's EDI and release accounting system.

ASK anticipates that its relationship with EDS Corp., which includes a 20 percent equity investment in ASK and a joint marketing agreement will contribute significantly to the success of this product.

EDS, an independently operated subsidiary of General Motors, develops, maintains and supports information systems used by GM to interface with its suppliers and customers.

EDS will offer MANMAN/AUTOMOTIVE, along with other ASK management information system applications, to manufacturers that have engaged EDS for outsourcing or systems integration services.

MANMAN/AUTOMOTIVE will be part of the EDS Center of Expertise dedicated to marketing MANMAN. EDS will also augment ASK's automotive engineering and support services.

The domestic automotive supplier market consists of approximately 5,800 domestic manufacturers. To address the specific needs of this large market, ASK formed a dedicated automotive engineering and support group and an Automotive Business Unit, both located in Detroit. In keeping with its tradition of involving customers in the product design process, ASK establshed an Automotive User Advisory Council comprised of 42 of the leading automotive suppliers.

MANMAN/AUTOMOTIVE is integrated with MANMAN/OMAR (order management) and MANMAN/MFG (manufacturing functions) to provide users with the visibility and control of current customer demand to effectively manage planning, production and decision-making. It is easy to install because it requires no special programming or table definitions and it is easy to use because it is window- and menu-driven.

ASK Comptuer Systems is a leading provider of management information systems, relational databases and application development tools. It recently completed its tender offer for Ingres Corp. of Alameda. ASK also completed a $60 million equity investment by EDS Corp., and Hewlett-Packard Co., representing 30 percent of ASK's outstanding shares.

SANTA CLARA, CALIF (NOV. 12) BUSINESS WIRE - GenRad Inc. Monday announced that it has become a participant in Digital Equipment Corporation's PowerFrame Synergy Program and that it will support encapsulation of its System HILO 4 Logic Simulation Tool suite within PowerFrame design management framework software.

PowerFrame will provide System HILO users with a design management structure that facilitates the incorporation of System HILO's high performance and high accuracy simulation capabilities into the designer's tool suite.

The recently announced System HILO 4 provides major advances in both productivity and performance, while still providing the highest accuracy simulation. System HILO 4 has been aimed at supporting Language Driven Design and Concurrent Engineering simulation for designs incorporating complex, sub-micron ASICs. It operates on industry standard platforms such as Digital's VAXstation and DECstation workstations.

GenRad participates in Digital's Cooperative Marketing Program (CMP) under which the two companies work closely to market computer application specific hardware and software for the electronic design automation marketplace.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

#90316b0797 11/12/1990 ~Business Wire

ATLANTA (NOV. 12) BUSINESS WIRE - Zenox Inc. (NASDAQ:ZENO) announced Monday that Deloitte & Touche, the company's auditor for 1988 and 1989, has notified the company that its independent audit of Oct. 13, 1989, should no longer be relied upon or associated with the company's financial statements.

Zenox had previously terminated its relationship with Deloitte & Touche for reasons unrelated to the present action on Aug. 30, 1990, as reflected in the company's 8-K filing dated Sept. 14, 1990.

The Oct. 13, 1989 audit report and financial statements formed an integral part of Zenox's annual report, filed on Form 10-K, for the year ended June 30, 1989. In that report Touche Ross & Co., predecessor of Deloitte & Touche,

valued Zenox's shares of stock in Firestone Development Co. Inc. at $1,125,000 based upon their own inquiry and investigation.

During the company's annual audit for the year ended June 30, 1990, Zenox's current independent auditor, Marlin & Edmondson, P.C., was unable to ascertain a value for the Firestone shares, and the company instructed its auditor to write the valuation down to zero.

Thereafter, Zenox and Marlin & Edmondson advised Deloitte & Touche that the Firestone shares they had valued in the previous year were being written down to zero. Deloitte & Touche then notified Zenox that the 1988 and 1989 audited reports issued by Touche Ross & Co. on Oct. 13, 1989 should no longer be relied upon or associated with the company's financial statements for those periods.

Zenox's current independent auditor has agreed to review and, if deemed necessary, restate the audit done by Touche Ross & Co. for the years 1988 and 1989. The company expects that this may result in writing down most, if not all of the value previously determined for the Firestone stock by Touch Ross & Co. Zenox will file amended 10-K and 10-Q reports as may become necessary to reflect such changes.

Zenox has also notified Deloitte & Touche that the company may initiate litigation against it for damages that may have been incurred by Zenox as a result of Touche Ross & Co.'s audit report issued on Oct. 13, 1989.

BEVERLY HILLS, CALIF (NOV. 12) BUSINESS WIRE - Burt Sugarman, chairman and chief executive officer of GIANT GROUP LTD. (NYSE:GPO) announced Monday the results of the third quarter and the nine months ended Sept. 30, 1990.

Net income for the three months ended Sept. 30, 1990 was $158,000, or 4 cents per share compared to $2,742,000, or 64 cents a share in the third quarter of 1989.

Net income for the third quarter of 1989 includes $989,000 from the settlment of a litigation award resulting in a reversal of a prior litigation expense and $1,002,000 from discontinued operations.

Net income for the nine months ended Sept. 30, 1990 was $15,408,000, or $3.54 per share compared to $7,803,000 for the nine months ended Sept. 30, 1989, or $1.87 per share.

Net sales and operating income for the three months ended Sept. 30, 1990 were

$21,087,000 and $1,023,000, respectively, compared to $20,624,000 and $1,297,000 for the three months ended Sept. 30, 1989.

Net sales and operating income for the nine months ended Sept. 30, 1990 were $59,737,000 and $3,082,000, respectively, compared to $57,769,000 and $1,767,000 for the nine months ended Sept. 30, 1989. The results for the nine months reflect the sale of Golden State Newsprint Co. Inc. on May 8, 1990.

The income from continuing operations before taxes for the nine months ended in 1989 includes a gain of $7,676,000 from the sale of GIANT's investment in Barris Industries Inc.

GIANT GROUP LTD. owns 46.6 percent of Rally's Inc. (NASDAQ:RLLY). Rally's is the fastest growing hamburger chain in America and operates or franchises 255 drive-through quick-service hamburger restaurants in 23 states.

GIANT also owns Keystone Cement Co. and Giant Cement Co., who manufacture and sell cement products in southeastern, northeastern, and middle atlantic regions of the United States. GIANT is a pioneer in the resource recovery burning of waste materials.

#90316b0811 11/12/1990 ~Business Wire

NEW YORK (NOV. 12) BUSINESS WIRE - James B. Farley, chairman and chief executive officer, Monday announced the appointment of Michael I. Roth to president and chief operating officer.

In addition, several other top management appointments at Mutual Of New York (MONY) were announced.

As President and Chief Operating Officer of MONY, Michael Roth assumes management responsibilities for the company's three core businesses -- Insurance, Pensions and Investment Operations -- as well as for MONY subsidiaries; MONY Reinsurance, MONY Securities Corp., The Enterprise Fund Group and Evaluations Associates Inc. Roth will report directly to Farley.

Michael Roth joined Mutual Of New York as chief financial officer in 1989. He was previously with Primerica, where he was executive vice president and chief financial officer. At Primerica, Roth also held positions as senior vice president of Corporate Finance and Taxes, and executive vice president of Corporate Finance, Tax and Administration.

Roth completed his undergraduate work at City College of New York where he received his B.B.A. in Accounting. He received his J.D. from Boston University Law School, and his LL.M. degree from New York University Law

School. Roth is also a Certified Public Accountant. He and his wife, Carol, reside in Stamford, Conn., with their three children.

Samuel J. Foti, CLU, has been named executive vice president and head of insurance operations. Foti was most recently senior vice president and chief marketing officer for Individual Financial Services (IFS), the company's insurance, annuity and disability division.

He joined MONY in 1988 as the National Director of Agency Operations. Previously, Foti was with the Metropolitan Life Insurance Co. Foti reports to Roth. Foti has a B.S. in Finance and Investment, and a M.A. in Public Government and Finance from Wharton School of the University of Pennsylvania. Prior to his work career, Foti attended Oxford University in England where he read Law. He and his wife, M.J., reside in Greenwich, Conn.

Appointed MONY's Chief Investment Officer, Kenneth M. Levine, FSA, will be responsible for the company's investment operations, and will report directly to Roth. Levine joined MONY in 1972 as a technical assistant in the actuarial department. Rising through the ranks, he was appointed vice president of Group Pensions in 1981.

In 1988, he became senior vice president and head of Pensions Operations, and was promoted to executive vice president and head of Pensions Operations, and was promoted to executive vice president earlier this year. Levine earned his B.A. from Queens College. He is also a Fellow of the Society of Actuaries. He and his wife, Andrea, reside in River Vale, N.J., with their four children.

Senior vice president Tom A. Schlossberg has been designated to lead MONY's pension operations in Purchase, N.Y. He will be responsible for all customer service, marketing, systems and sales functions of this division. Schlossberg joined MONY in 1971 as a programmer trainee, was promoted to director of systems in 1979, assistant vice president in 1981, and vice president-Pension Adminstration in 1985.

Earlier this year, Schlossberg was named senior vice president. Schlossberg reports to Roth. Schlossberg earned his B.S. in mathematics from Boston University. He and his wife, Janis, reside in Stamford, Conn.

In business since 1843, Mutual Of New York (MONY) sold the nation's first mutual life insurance policy. Today, MONY has nearly $22 billion in assets under management, and is an industry leader in providing outstanding and innovative insurace, pension and investment products and services to more than one million policyholders and customers.

#90316b0813 11/12/1990 ~Business Wire

LOS ANGELES, CA (NOV. 12) BUSINESS WIRE - American Vanguard Corp. (NASDAQ:AMGD) Monday announced unaudited results for the third quarter and nine month periods ended September 30, 1990. Financial results for the prior year periods have been restated to reflect a discontinued operation.

Revenues from continuing operations for the third quarter of 1990 increased 17.5 percent to $6,239,500 from $5,309,800 one year earlier. There was a net loss from continuing operations in the current period of $51,300 or $.02 per share. In the third quarter of 1989, the Company had net income from continuing operations of $271,300 or $.12 per share.

For the nine months of 1990, revenues from continuing operations were $15,642,500 as compared to $15,492,400 in the same period the prior year. The net loss from continuing operations for the nine month period ended September 30, 1990 was $106,300 or $.05 per share. This compares to net income from continuing operations in the first nine months of 1989 of $1,185,100 or $.52 per share.

Start-up costs and expenses directly attributable to the PCNB plant operation during the quarter ended September 30, 1990 were approximately $825,000. The Company ceased capitalization of the expansion costs during the third quarter. All costs and expenses relating to the operating of this new facility are now charged directly to operations. There were no sales of PCNB during the third quarter.

Although the Company experienced a net loss for the current year period, the gross profit margin for the nine months ended September 30, 1990 remained unchanged as compared to the same period in 1989, despite the absorption of certain start-up and other costs relating to the PCNB plant expansion.

American Vanguard Corp., through its wholly-owned subsidiary AMVAC CHEMICAL, is a manufacturer and formulator of chemicals for crop, human and animal protection.

#90316b0817 11/12/1990 ~Business Wire

WINDLESHAM, ENGLAND (NOV. 12) BUSINESS WIRE - The announcement of the preliminary results of The BOC Group, the gases and health care company, follows:

Salient points are:

-- Pre-tax profit up 6 percent

-- Earnings per share up 6 percent

-- 1991 dividend rate of 20.4p (40.0c) announced, an increase of 7 percent on 1990. Two equal payments of 10.2p (20.0c) are planned in February and August.

The BOC Group
Preliminary Announcement of Results
(unaudited)
for the year to September 30, 1990

Pre-tax profits of The BOC Group, the gases and health care company, were 354.3 million pounds sterling ($694.4mm) for the year to September 30, 1990, up by 6 percent from 333.4 million pounds sterling ($653.5mm) in 1989.

Earnings per share also rose by 6 percent to 51.28p (100.51c) and turnover (including share of related companies) rose by 7 percent to 2,802.0 million pounds sterling ($5491.9 mm). Richard Giordano, Chairman and Chief Executive of The BOC Group, commented: ''In the UK and the US, growth in both GDP and industrial activity, important bell-wethers of the prosperity of our business, slowed from high levels in September 1989 to their current levels of near stagnation. In the US, the major market for our health care products, there have been continued severe cost containment pressures on all health care expenditures. In this context The BOC Group has performed satisfactorily.''

The BOC Group, based in Windlesham, England and Murray Hill, N.J., is an international corporation with operations in more than 50 countries around the world. Its principal businesses are industrial gases, health care products and services, and high vacuum technology. BOC's business and trade names include Airco, Ohmeda, Anaquest, Glasrock Home Health Care, Transhield, Edwards High Vacuum, CIG, and Viggo-Spectramed.

GREENBELT, MD. (NOV. 12) BUSINESS WIRE - COMNET Corp. (NASDAQ/NMS Symbol:CNET) Monday announced financial results for the second quarter and six months of fiscal year 1991.

For the second quarter ended Sept. 30, 1990, revenue increased 13 percent to $6,178,000, compared with $5,446,000 reported for the comparable period a year earlier. Net earnings increased to $272,000, or 10 cents per share compared with $150,000, or 6 cents per share, the prior year.

For the six months ended Sept. 30, 1990, revenue was up 9 percent to $11,861,000, compared with $10,912,000 for the same period a year earlier. Net earnings increased 44 percent to $734,000, or 26 cents per share, compared with $511,000, or 19 cents per share, reported for the six months ended Sept. 30, 1989.

Commenting on these results, Robert Bowen, president and chief executive officer of COMNET Corp. said, ''We are most pleased with the year-to-year improvement in our second fiscal quarter, which is traditionally the company's weakest quarter of the year.

COMNET Corp. has three operating units in the computer software and services field:

o GROUP 1 SOFTWARE INC. (NASDAQ/NMS Symbol:GSOF) is the leading provider of mainframe, midrange and microcomputer (PC) software to the direct marketing industry, to other volume mailers and to a broad range of organizations for general marketing application. GROUP 1 offer a broad range of list management, postal discount, mail personalization and demographic database software products. The company has offices throughout the United States and in Canada, and is represented in the United Kingdom, Australia and New Zealand.

o COM-MED Systems serves the nursing home industry and other areas of the

long-term health care market with computerized management and operations support systems.

o AIM Division provides computer services for direct marketing clients, plus customized grpahics, forms design, laser and LED printing, PARM predictive modeling and on-Demand Printing.

AUSTIN, TX (NOV. 12) BUSINESS WIRE - Citizens Inc. (NASDAQ:CINNA), a life insurance holding company based in Austin, reported that net income for the quarter ended Sept. 30 was $315,976 or 3 cents per share compared with $366,757, or 3 cents per share for the 1989 third quarter.

Revenues for the third quarter of 1990 increased 58.1 percent over the same period of 1990 (to $5,458,916 from $3,452,539) as a result of a 54.3 percent increase in premium income. Realized losses on investments of $39,399 were incurred in the third quarter of 1990 vs. realized gains of $82,805 for the same period in 1989.

For the nine months ended Sept. 30, 1990, net income was $1,032,459, or 7 cents per share compared to a net loss of $716,161 or 5 cents per share for the same period in 1989. The 1989 loss was impacted by a $608,564 loss related to the foreclosure of a note receivable.

Revenue for the nine month period in 1990 was $14,231,118 compared to $10,662,614 for the same period in 1989, an increase of 33.4 percent. Premium income was $11,660,248 and $8,528,247, respectively, for the same periods.

An extraordinary income item of $422,409, or 3 cents per share was realized in 1990 through the utilization of net operating loss carryforwards.

Cash flows provided by operations for the nine months period in 1990 were $2,006,423, compared to a use of $283,675 for the prior year.

Stockholders' equity at Sept 30, 1990 was $7,510,703, representing a 15.4 percent increase since Dec. 31, 1989. Total assets grew to $58,728,018 from $54,431,278 at Dec. 31, 1989

SARASOTA, FL (NOV. 12) BUSINESS WIRE - Elcotel, Inc. (NASDAQ/NMS: ECTL), manufacturer of public communications products, Monday announced results of operations for the second quarter and six months ended September 30, 1990.

Net operating revenues for the second quarter of fiscal 1991 were $2,004,000, compared to $1,840,000 one year ago, and first half operating revenues were $4,731,000, down from $5,290,000 for the first six months of fiscal 1990.

A net loss was incurred for the fiscal quarter ended September 30, 1990, of $197,000, or $.04 per share, as compared to a net loss of $416,000, or $.08 per share, for the second quarter of fiscal 1990.

A net loss was incurred for the current first half of $409,000, or $.08 per share, as compared to a net loss of $310,000, or $.06 per share, for the first half of fiscal 1990.

The company also announced that C. Shelton James would become the fourth independent member of its six-man Board of Directors on November 28, 1990. Mr. James is Executive Vice President of Fundamental Management Corporation which holds approximately five percent of the Company's outstanding shares.

Mr. James was Executive Vice President of Gould, Inc., and President of its Computer Systems Division, from 1980-1989. Previously he was Vice President of Finance of Systems Engineering Laboratories from 1969 until 1980.

George C. Pierce, Chief Executive Officer, commented: "The company continues to experience relatively weak demand for its pay phone products. Call processors for the hospitality industry, as well as recently released coinless phones and public facsimile machines, however, are beginning to make meaningful contributions to revenues and earnings.

"The addition of Shelton James to our Board brings related high technology experience which should prove invaluable in assisting the company in its future growth."

UNION, N.J. (NOV. 12) BUSINESS WIRE - Transnet Corp. (NASDAQ:TRNT), a leading dealer of personal computers, peripheral and related equipment, service and supplies, Monday announced results for the first fiscal quarter ended Sept. 30

1990.

First quarter revenues of $6,793,858 soared 215 percent over the $2,158,175 for the similar quarter last year, a record for any quarter. Much of this revenue growth is due to an expanded product line, greater purchasing discounts and expanded sales and marketing efforts associated with the acquisition of Round Valley Computer Center Inc. in March of 1990.

The corporation reported a loss before provision for income taxes of $109,430 down significantly from the loss of $192,720 in the first quarter of fiscal 1989. The net loss of $109,430, or 2 cents per share compares to a net loss of $115,720, or 2 cents per share for the same quarter a year ago.

Steven J. Wilk, president of Transnet Corp., stated, ''We are pleased to report that our first fiscal quarter is the second consecutive quarter of record revenues.

''In addition, we feel confident that we will realize futher cost savings as we complete the consolidation of the two companies.

''While we experienced strong demand for our products during July and August, September's demand was affected by advance announcements of new products which caused some customers to defer their orders, awaiting new product availability.

''Those orders are now being received at gratifying levels and we optimistically look forward to the remainder of fiscal 1991.''

CAMBRIDGE, MA (NOV. 12) BUSINESS WIRE - A leader in the design, installation and operations of private data communications networks for over two decades, BBN Communications Monday announced it is moving to strengthen this position by providing open network platforms and management systems upon which oranizations can base their mission critical network applications for the 1990s.

The company announced a series of strategic and product measures designed to retain a leadership position in the packet switching marketplace and capture significant marketshare in the emerging market for broadband network technology. It specifically stated it will continue to offer products for X.25 and SNA networks and LAN internetworks, it will expand its network management capabilities, and begin to provide products during 1992 for broadband networks.

According to Jeffrey H. Palmer, BBN Communications vice president marketing and planning, ''BBN Communications has always provided users with complete system solutions that tie together the major investments they have made in premises equipment while controlling their carrier services expenses. With today's announcements, BBN is commiting to extend its heritage in classic packet switching. The company will continue to offer users high availability networking for all data traffic.''

Palmer said the company intends to accomplish this over the next two years via specific product initiatives that will:

o Provide support for T1 and Frame Relay on its new high end T/300 Packet Switching Node;

o Introduce a new generation network management system by integrating internally developed tools and applications on Digital's EMA network management architecture;

o Release a new concentrator designed to offer lower cost, higher performance access to X.25 and SNA users;

o Offer additional functionality on its family of internet packet routers;

o Develop a next generation cell relay-based broadband switch.

BNN Communications believes that during the 1990s, organizations will continue to increase their reliance on communications to support their business operations. What's more, the company believes the emphasis increasingly will be placed upon data communications, given the challenges of moving to applications requiring higher speeds and the adoption of new standards. The

products announced today reflect this belief.

A division of Bolt Beranek and Newman Inc., BBN Communications designs and builds private wide-area communications networks for commercial, government and international organizations. The company also provides network consulting, management, and other professional services. For the fiscal year ending June 30, 1990, Bolt Beranek and Newman had sales of $262 million.

COPIAGUE, NY (NOV. 12) BUSINESS WIRE - TII Industries Inc. (ASE:TI) announced Monday that sales for the first quarter of fiscal 1991 (ended Sept. 28, 1990) increased to $8,151,000, a 58 percent increase from sales of $5,154,000 reported during the first quarter of fiscal 1990.

The sales increase represents a recovery of sales to levels more consistent with those levels experienced prior to the business interruptions in 1989 caused by Hurricane Hugo at the company's Puerto Rico facility, as well as strikes at several Regional Bell Operating Companies, principal customers of the company.

Cost of sales as a percent of sales improved to 78.3 percent in the three months ended Sept. 28, 1990 vs. 103 percent in the three months ended Sept. 29 1989.

Operating loss and net loss was reduced to $259,000 and $592,000 during this period vs. losses of $2,135,000 and $2,486,000 respectively in the comparable period last year.

TII Industries Inc., with executive offices and R&D facilities in Copiague, and manufacturing facilities in Puerto Rico, Dominican Republic and Haiti, is a high technology company specializing in the design, manufacture and sale of telephone network interface and protection products, surge protection and specialized electronic devices, principally for use in the telecommunications and computer industries.

#90316b0868 11/12/1990 ~Business Wire
PISCATAWAY, N.J. (NOV. 12) BUSINESS WIRE - Rheometrics Inc. (NASDAQ:RHEM), a manufacturer of sophisticated materials testing instruments and systems,

Monday reported revenues of $2.6 million and a net loss for the first quarter of fiscal year 1991 ending Sept. 30.

First quarter revenues were lower than the $4.9 million reported in the same period last year. The company incurred a loss of $2.1 million (69 cents per share), vs. a loss of $499,000 (16 cents per share) for the comparative quarter in FY 1990.

Dr. Joseph M. Starita, chairman and chief executive officer, said, ''We anticipated lower sales activity in this quarter because the previous quarter's sales were exceptionally high, which significantly reduced our backlog for the beginning of this fiscal year. We are experiencing a recovery in second quarter sales revenue.''

Starita also noted that ''the lower gross profit margin and higher net loss resulted from operating inefficiencies caused by the reduced volume.''

The company continues to expand its product offerings and has recently announced the introduction of the Fluids Analyzer (RFX), a new laboratory instrument that measures the extensional and high shear viscosities of fluids. Starita said that ''the company anticipates additional revenue gains from the new RFX instrument during this fiscal year.''

Rheometrics Inc. manufactures sophisticated rheological instruments for the plastics, coatings, food, biomedical and adhesives industries.

COPIAGUE, N.Y. (NOV. 12) BUSINESS WIRE - TII Industries Inc., (ASE: TI) announced Monday that it has received from Ameritech Services, its third consecutive quarterly award for Outstanding Vendor Performance.

These awards were granted to TII under Ameritech Services' Supplier Management Program which measures its vendors' performance in the areas of quality, on time delivery, responsiveness to customer requests and technical and administrative support.

Ameritech Services, a large customer of TII, is the planning company for the five Ameritech Bell Companies: Illinois Bell, Indiana Bell, Michigan Bell, Ohio Bell and Wisconsin Bell.

Ameritech Services provides centralized purchasing and material management for the Ameritech Bell Companies, in addition to marketing, technical and regulatory support.

TII supplies a variety of products under contract to Ameritech Services including overvoltage station protectors, network interface devices and station electronics.

TII Industries Inc., with executive offices and R&D facilities in Copiague and plants in Puerto Rico, Dominican Republic and Haiti, is a high technology company specializing in the design, manufacture and sale of telephone network interface and protection products, surge protection and specialized electronic devices, principally for use in the telecommunications and computer industries.

MILWAUKEE (NOV. 12) BUSINESS WIRE - Applied Power Inc. (NASDAQ/NMS:APWRA) declared a quarterly dividend of 3 cents per share on Class A and Class B common shares payable on Nov. 30, to shareholders of record on Nov. 20.

The company also announced that the board of directors had authorized the purchase of up to 250,000 shares of Applied Power Inc. Class A Common Stock during each company fiscal year. This authorization provides the company with flexibility over time for making stock available for various stock incentive plans either through issuance of additional Class A Common Stock or through purchases of then outstanding stock.

Applied power is traded on the NASDAQ National Market System under the APWRA symbol. Applied Power is a global company engaged in the businesses of providing tools, equipment, components, systems and consumable products to a wide variety of end users in the manufacturing, construction, transportation, aerospace, defense and natural resources industries. Approximately half of the company's revenues and assets are outside of the United States.

#90316b0886 11/12/1990 ~Business Wire

MARLBOROUGH, MA (NOV. 12) BUSINESS WIRE - Sequoia Systems Inc. (NASDAQ: SEQS) said Monday that it presently expects its revenues for the second fiscal quarter of fiscal 1991 ending Dec. 31, to be below analysts' estimates of $15 million, but ahead of the comparable fiscal 1990 quarter, when revenues were $9.6 million.

Due to the revenue shortfall, profits for the quarter are expected to be below analysts' estimates of 14 cents to 16 cents per share and more in line with the 11 cents per share reported for the comparable quarter of fiscal 1990 when fewer shares were outstanding.

The company said revenues will be off because of lower-than expected revenue from Sequoia's principal distribution partner in the Pick marketplace, the Ultimate Corp.

Gabriel P. Fusco, Sequoia's chairman and chief executive officer, said that ''demand from Sequoia's other OEM's, distributors and our direct business remains strong. Sequoia has recently established plans and added resources focussed on achieving a higher level of direct sales, both to the UNIX and Pick markets, which benefits our gross margins and profits, but the trend toward more direct sales will not create enough immediate volume to offset the revenue shortfall in the present quarter.''

Sequoia Systems Inc. (NASDAQ:SEQS) designs, manufactures and markets fault-tolerant computer systems to serve on-line transaction processing (OLTP) needs. Sequoia's systems have an open architecture adhering to industry standards and a UNIX-based operating system.

The company also offers the Pick Open Architecture operating system and provides on-line services and maintenance support to its worldwide customer base. Major customers include manufacturers, distributors, banks and financial institutions, insurance companies, telecommunications operations, and federal agencies. Sequoia has shipped over 130 systems to 100 customers in the United States and nine other countries.

MILWAUKEE (NOV. 12) BUSINESS WIRE - Milwaukee Insurance Group Inc. (OTC:MILW) Monday reported a third quarter net loss of $1,018,000 or 33 cents per share compared to net income of $755,000, or 25 cents per share for the like period last year.

The nine-month 1990 net loss was $1,341,000, or 44 cents per share vs. nine-month 1989 net income of $2,999,000, or 98 cents per share.

Included in net income are pre-tax realized losses of $7,000 for the third quarter of 1990 compared to gains of $49,000, or 2 cents per share for the

third quarter of 1989 and $131,000, or 4 cents per share for the first nine-months of 1990 compared to $57,000, or 2 cents per share for the like period of 1989. Property-Casualty Insurance

Milwaukee Insurance Group Inc.'s property-casualty insurance segment produced a net loss of $1,149,000, or 37 cents per share for the third quarter of 1990 compared to net income of $467,000, or 15 cents per share in the corresponding period of 1989.

''Premium rates on our personal auto policies were increased early in the year and will begin to impact earnings in the fourth quarter,'' said Robert W. Doucette, president and chairman of Milwaukee Insurance Group Inc. ''The sizable increase in medical costs and automobile repairs continues to be the Achilles heal of the personal automobile business.

The life insurance segment of Milwaukee Insurance Group Inc. contributed net income of $131,000, or 4 cents per share during the third quarter of 1990 compared to $288,000, or 10 cents per share in the corresponding period of 1989.

Milwaukee Insurance Group Inc. provides property and casualty insurance through two subsidiaries, Milwaukee Guardian Insurance Inc. and Milwaukee Safeguard Insurance Co.; and life insurance through its subsidiary, Milwaukee Life Insurance Co. It is traded on the NASDAQ National Market System under the symbol MILW.

#90316b0895 11/12/1990 ~Business Wire

LAS VEGAS (NOV. 12) BUSINESS WIRE - United Gaming Inc. (NASDAQ:UGAM) Monday announced that revenues for the quarter ended Sept. 30, rose 17 percent to $22,454,000, compared with $19,250,000 during the first quarter of 1989. However, the company reported a net loss of $8,836,000, or a loss of 95 cents per share, compared with net income of $1,528,000, or 18 cents per share, during the same period last year.

The weighted average number of shares outstanding for the quarter was 9,295,000, while the weighted average number of shares outstanding for 1989 was 8,512,000. At September 30, United Gaming's book value was $3.72 per share.

The loss consists of pre-tax, non-recurring charges of $12,816,000. These charges will substantially complete the successful financial reorganization of the company which began in early September when a new senior management team was appointed.

The company reported that Heritage Hotel Limited Partnership I terminated United Gaming's lease for the casino, restaurant and bar portions of the Chaparral Hotel & Casino project.

The lease was terminated by Heritage because United Gaming had not received the gaming approvals necessary to operate the casino by Aug. 16, a condition necessary to retain the lease. Of the $12.8 million pre-tax write-off, $6,858,000 is attributable to the Chaparral lease termination.

The remaining $5,958,000 in non-recurring pre-tax charges includes charges related to a valuation adjustment of certain gaming equipment held in inventory; the costs of discontinuing certain route expansion commitments; an increase in bad debt reserves; employee severance pay; and, a change in accounting for certain items that were previously capitalized which will now be expensed.

Chairman and Chief Executive Officer, Alfred H. Wilms, stated, ''The company intends to pursue recovery of the value of the investment.'' Commenting on the financial results, Wilms stated, ''The immediate effect of the reorganization is a temporary and non-recurring negative impact to our earnings. It has not changed our overall operating and market strengths.

United Gaming maintains its market leadership position as Nevada's largest gaming machine route operator. In addition to its gaming machine route operations, the company also manufactures and sells gaming devices and is the operator of a casino and three gaming arcades in Nevada.

MELBOURNE, Australia, (NOV. 12) BUSINESS WIRE - Nov. 12, 1990, The Broken Hill Proprietary Company Limited (NYSE:BHP), announced today that it has accepted the offer of one Newmont Australia share for two BHP Gold shares in respect of all of BHP's 54.9 percent holding in BHP Gold.

Assuming a 100 percent acceptance of the offer by BHP Gold shareholders, BHP will hold a 23 percent interest in the newly merged company.

BHP Directors in deciding to accept the offer, have noted the new company will be the largest pure gold company in Australia and among the top fifteen gold

companies in the world. Its anticipated production of gold in 1991 is about 750,000 ounces. The merged company has the capacity and the stated intention to pay regular dividends. The BHP Directors believe the combined expertise and experience of the existing managements of Newmont Australia and BHP Gold will further strengthen the new company.

BHP has undertaken a broad program of due diligence covering all major technical, legal and financial matters and is satisfied that the merger will provide the opportunity to strengthen its current investment in the Australian gold industry. BHP is making its decision known so that BHP Gold shareholders will be aware of its attitude prior to the closing date of Newmont's offer on November 26, 1990.

The Broken Hill Proprietary Company Limited is an international resources company with three principal lines of business: oil and natural gas, minerals, and steel. Headquartered in Melbourne, it operates on six continents. U.S. operations are headquartered in San Francisco, Calif.

#90316b0906 11/12/1990 ~Business Wire

AUSTIN, TX (NOV. 12) BUSINESS WIRE - Healthcare International Inc. (ASE PSE:HII), Monday announced that that it has received a demand for payment from HealthVest for the indebtedness which accrued between March 1, 1990 and Oct. 31, 1990, under the standstill agreement between the two companies.

Healthcare said HealthVest has also demanded payment for past due rentals due November 1 under certain leases between it, Healthcare, and subsidiaries of Healthcare and under certain guarantees by Healthcare, after application of the $2.9 million payment made by Healthcare during November.

HealthVest, in its demand, noted that all leases between it, Healthcare and subsidiaries of Healthcare contain cross-default provisions.

As was announced last week, the standstill agreement between the two companies as extended, expired on Oct. 31. The companies had reached an impasse in negotiations regarding an interim restructuring of the obligations of Healthcare and its subsidiaries to HealthVest.

Jean P. Smith, Healthcare's president, said that the principal unresolved issues between the parties involve the terms of a deferral note to be executed by Healthcare to evidence unpaid rent and interest payments owed to Healthvest.

She said that specific unresolved issues include the maturity date of the note

the collateral for the note, and the extent to which the note will include rental amounts that have not yet accrued under the leases. Smith indicated that discussions with HealthVest are continuing.

Healthcare International provides a wide range of health care products and services to both local and national markets through 21 facilities in 4 states. The company's class A common stock is listed for trading on the American and Pacific Stock Exchanges under the symbol HII.

WASHINGTON (NOV. 12) COMTEX - The 8-K report filed at the SEC shows on Sept. 30, 1990, the board of directors of Conquest Ventures Inc. approved an agreement concerning its wholly-owned subsidiary, Hotshots High Fashion Photography Inc.

The agreement provides that Conquest would trasnfer all of the common stock of Hotshots to Michael Hammersmith and David J. Louy in exchange for 308 million shares of Conquest's common stock held by these persons.

The agreement also provides that Messrs. Hammersmith and Louy as well as H. Gil Kveen, Jr. will resign as officers and directors of Conquest on the acquisition of another business by Conquest.

On Oct. 26, 1990, the agreement was approved by Conquest's shareholders.

Having now completed the divestiture of Hotshots, Conquest intends to search for business opportunities in an effort to complete a business combination

with another business.

However, Conquest reports it presently has no cash and approximately $6,000 in liabilities.

The company's executive office is located at 72840 Highway 111, Suite 199, Palm Desert, CA 92260 and its telephone number is (619) 341-5602.

By MARCIE RASMUSSEN

HONOLULU (NOV. 12) UPI - A long way from the little grass shack of fabled Hawaii, the world's most expensive beach house is made of ocean-proof marble trimmed in copper and bronze and built to last forever.

The three-bedroom, 30,000-square-foot edifice is perched over a scenic rocky surfers' cove, beneath the brow of Diamond Head - not on the familiar Waikiki side, but on the opposite flank, home to movie stars and reclusive millionaires.

It lists for $60 million, and it's ready for immediate occupancy.

The neighborhood is Black Point, one of the most exclusive in Honolulu, a city where even modest districts are pricey and the median price of a home runs upwards of $350,000.

Besides location, the estate has amenities, amenities, amenities. For starters there's the million-dollar front entry, with bronze doors that weigh a ton -

literally.

And, of course, there's the Christmas-present wrapping room, a 1,200-square-foot closet that Imelda Marcos could envy, in the 10,000-square- foot master suite.

There are reproductions of 4th century B.C. mosaics on hallway ceilings, a priceless Baccarat chandelier, a Lalique table in the breakfast nook and fanciful murals of birds and flowers sprinkled throughout.

It is the dream house of one of America's most noted contemporary developers, Christopher Hemmeter, who gave Hawaii the modern fantasy resort - Hyatt Regency Hotels in Waikoloa, Waikiki and Maui, Westin Hotels in Kauai and Maui - then found the reception increasingly mixed.

After 30 years in Hawaii, Hemmeter recently moved to Southern California without ever spending a single night in his palace by the sea.

So the home, which Hemmeter calls ''Kaiko'o'' for its locale (the Hawaiian word means ''strong seas''), is for sale.

It was first shown during the summer to realtors who drive Rolls Royces and deal with the high-rolling Japanese market. They predicted the residence would go in a flash to the ''right'' buyer who will see it once, make a snap decision, and then try to get to Hawaii once in a while to enjoy it.

At more than $1,500 per square foot, it ''is probably the most expensive home ever built in America, and possibly the world,'' Hemmeter said.

''What we wanted was to outdo Hearst Castle (at San Simeon in California), which we studied for almost a year before we designed this house - just to make sure we were the next generation beyond it.''

With such sky's-the-limit goals, Hemmeter as master designer, a team of architects, project manager Ken Goldblatt and legions of craftsmen and artisans from all over the globe spared no expense.

For those who have ever cursed the shoddy workmanship and lack of pride in most new construction, this is indeed what Hemmeter calls ''a work of art.''

Deferred maintenance isn't likely to be a problem. Hemmeter says he ''built the house to give it an infinite life, even though it's on the ocean. Nothing in the house can corrode.''

A bewildering array of rare marbles and granites, fine woods and metals, etched gold-leafed glass and mirrors was fashioned with Old World care into elaborate moldings, polished floors and glittering walls.

Hemmeter and his wife Patsy designed the rooms by ''scripts'' - the master suite's ''his'' bathroom, for example, is made of fine burled wood intended to evoke the masculine richness of a Dunhill cigar box.

Systems for heating, cooling and purifying air take up a whole room, along with enough electronic gadgetry to require an operations manual for hapless owners who might forget how to turn on the switchless lights and where to find the 28 invisible telephones.

To provide a cozy atmosphere in eternally balmy Hawaii, there are fireplaces with firewood imported from Aspen ''so it wouldn't spark and it has that nice smell,'' said Hemmeter.

The house has a lighthearted spirit, despite enough works of art, collected for the Hemmeters by interior designer Steve Chase of Rancho Mirage, Calif., to qualify it as a museum.

It is set up to accommodate dozens upon dozens of guests for formal and informal gatherings, with various salons and lounges, an elaborate theater with plush couches for movies and TV and a computerized sound system.

The property fronts 350 feet of the sparkling Pacific, with views that overwhelm the man-made interiors.

There is a grotto-styled pool, complete with waterfalls and a cave lit by electronically controlled torches. Tropical palms framing the seascape are equipped with night lights that cast a moonlit glow, whether the moon is shining or not.

Nothing has been left to chance - except perhaps the missing buyer, still at large somewhere in the world.

LONDON (NOV. 12) - Queen Elizabeth II is to visit Germany for the first time since reunification at the end of this month, Buckingham Palace announced here Monday.

The queen, who last visited the former West Germany in May 1987, will meet with head-of-state President Richard von Weizsaecker on November 23 after visiting the Royal Air Force air base at Laarbach.

She has previously met twice with Mr. Weizsaecker -- during the 1987 state visit and in London the previous year.

Mr. Weizsaecker became president of the reunified Germany on October 1.

NEW YORK (NOV. 12) - A granite statue recently dedicated to a slain Polish Roman Catholic priest was found decapitated and the words "For Lenin, For Stalin" painted on its base, police in the New York borough of Brooklyn reported.

The statue's head was found in a nearby trash can after the act of vandalism was discovered Sunday, Poland's independence day.

The statue was dedicated October 28 to Jerzy Popieluszko, a pro-Solidarity labor movement priest killed six years ago in Poland by four secret police officers.

Munich (NOV. 12) - The drop of the U.S. dollar to below 1.50 marks may cause the Deutsche Airbus company to have to make a value adjustment of its assets, which could put strains on its capitalisation, industry officials indicated here Monday.

But officials at Deutsche Aerospace (Dasa), the Daimler-Benz division which holds a major share of Deutsche Airbus, dismissed as ''pure speculation'' recent hints about major losses facing the company as a result of the dollar's decline.

Under the terms of the Daimler-Benz takeover of the aerospace firm Messerschmitt-Boelkow-Blohm (Mbb), the Bonn government pledged to cover currency-related risks in the Airbus programme down to a rate of 1.60 marks. Daimler was to be responsible for rates below that.

Deutsche Airbus is owned to 80 per cent by Mbb and the rest by the German state-owned Bank for Reconstruction.

Last year Deutsche Airbus was only able to report a surplus after getting massive federal government help in the form of Bonn assuming old burdens. Without such help the company would have lost just over one billion marks.

A value adjustment to Deutsche Aerospace assets would chiefly reflect the money represented by the some 1,000 Airbus planes now on order. Officials noted that any new support for the company by Bonn could eventually be returned if the dollar recovered in value.

RIO DE JANEIRO (NOV. 12) - Eight people were killed when a Brazilian air force plane crashed Monday at Galeao international airport here. Only one person on board survived.

The Canadian-made Buffalo C-115 training and transport plane crashed in the military part of the airport shortly after take-off and was engulfed by fire, local media reports said. The cause of the crash was not immediately known.

KUALA LUMPUR (NOV. 12) - Trade between Malaysia and South Korea is expected to increase to 2.4 billion U.S. dollars this year and to 3.0 billion next year the South Korean Ambassador to Malaysia, Hong Soon Young said Monday.

The rise was attributable to an expected increase in South Korean investments in Malaysia, Mr. Hong told newsmen after addressing an investment forum for the visiting 16-member Korean Industrial Plant and Investment Cooperation mission.

Trade between the two countries was 2.05 billion dollars last year, he said.

Mr. Hong said Samsung, one of South Korea's leading corporations, had proposed setting up a 100-million-dollar plant to produce television picture tubes in southern Negri Sembilan state and is building a 20-million-dollar plant to produce microwave ovens in Port Klang, near here.

He said plans have also been submitted to construct a 100-million-dollar iron and steel mill in southern Johore state in a joint venture between Pohan Steel Mill Co. and an unidentified local partner.

"There is also a proposal to set up oil refinery plant in southern Malacca state, which is being done through equity participation between Malaysia, South Korea and Shell Companies," Mr. Hong said, adding that negotiations for the South Koreans to take a 30 per cent stake were going on.

He said the number of South Korean companies investing in Malaysia was increasing.

The mission arrived here Saturday for a four-day visit and is due to leave for home Tuesday.

PORT MORESBY (NOV. 12) - The Papua New Guinea government will approve the 1.3-billion-U.S.-dollar Kutubu oil project within weeks, Prime Minister Rabbie Namaliu said Monday.

Mr. Namaliu told a lunch here: "The government's next task is, within weeks, the approval of the Kutubu oil project."

The government had initially set a November 1 deadline for the project's approval, but bureaucratic delays and provincial government and landowner politics have seen the deadline pass.

Mr. Namaliu assured foreign investors his government was still committed to resource development despite the current political crisis.

Last week Port Moresby rammed the budget through parliament in less than three hours and adjourned the house for more than eight months after a no confidence motion was launched.

"We remain committed to resource development," he said.

Kutubu involves the IagafuHedinia and Agogo fields in the rugged Southern Highlands Province, with a small segment extending into neighbouring Gulf Province.

It is scheduled to pump its first export oil by mid-1992 with a pipeline carrying up to 120,000 barrels per day of crude from the highlands to a marine terminal in the Gulf of Papua.

Recoverable reserves are estimated at 170 million barrels, and the project will have a 10-to-12-year life.

Among other approvals, Kutubu joint venture operators Chevron Niugini are waiting for a petroleum development licence and a pipeline licence.

Kutubu joint venture partners comprise: Chevron Niugini (25 percent), BP Petroleum Development (25 percent), Ampolex (PNG Petroleum) (14.98 percent),

BHP Petroleum (PNG) (12.5 percent), Oil Search (10.02 percent) and Merlin Pacific Oil and Merlin Petroleum (each 6.25 percent).

FREETOWN (NOV 12) - A team of japanese technical experts are to work with the newly established Sierra Leone Rubber Company (SLRC) in a major industrial project in Sierra Leone's southern and eastern provinces.

According to the consul of Japan in Sierra Leone, Kishore Shankerdas, who is the managing director of the company, 50,000 acres of rubber plantation will be developed in addition to 2,900 acres from an existing five rubber estates.

Mr Shankerdas said that the company will employ about 1,000 workers in the initial stage, which will later be increased to 10,000.

It is the first time production of rubber is to be started on such a large scale, and it comes at a time when the rubber estates in neighbouring Liberia have all but collapsed as a result of the civil war in that country.

WELLINGTON (NOV 12) - New Zealand's Reserve Bank governor, Don Brash, warned on Monday that the inflation fight was not over, despite a big drop in food price inflation.

He was commenting after the Statistics Department reported Monday that the annual increase in food prices to October was 3.3 percent, the smallest increase since January 1973.

In October, food prices dropped 0.7 percent, compared with a 0.5 percent rise in October last year.

Mr. Brash said the food inflation figure was "rather better" than he had expected but noted that it accounted for only a fifth of overall inflation.

"Whether or not it adds up to an overall decline will depend on the behaviour of other parties," he said.

Mr. Brash cautioned against reading too much into the October food price fall, as the food price index was notoriously volatile.

The Reserve Bank, the country's central bank, is still targeting an inflation rate of two percent by the end of 1992, although the new government's election manifesto stated policy is to extend that deadline an extra year.

#90316d0350 11/12/1990 ~French/German News Agency
WASHINGTON (NOV. 12) - A sleeping U.S. Marine was shot and killed by a bullet fired from another Marine's M16 rifle at a base camp in eastern Saudi Arabia, the Pentagon said Monday.

The victim was identified as James Cunningham, 22, of Glendale, Arizona, a member of the 3rd Marine Regiment based in Hawaii.

Military investigators found no evidence of foul play and tentatively determined that Friday's shooting was accidental, Marine Corps spokesman Warrant Officer Randy Gaddo said.

He said a soldier's rifle discharged as he was leaving a tent, hitting the victim. The soldier and another Marine who was in the tent at the time of the shooting have been questioned, he said.

If the initial findings are confirmed, the incident would raised to 44 the number of accidental deaths since the U.S. deployment to the Gulf began August 7.

#90316d0510 11/12/1990 ~French/German News Agency
BRUSSELS (NOV. 12) - The European Economic Community (EEC) took the offensive against critics of its controversial proposals for farm subsidy cuts here Monday, saying that its offer was about as good as theirs.

Ray MacSharry, European Commissioner for Agriculture, said that the EEC's proposed cuts in subsidies for farmers were "equivalent" to those of major trade partners, and made a "major contribution" to world trade negotiations.

Addressing a press conference, he called on other countries to match the EEC's offer, and said he remained optimistic that international trade talks in December aimed at lowering trade barriers would end successfully.

The EEC has been strongly criticised by the United States and other major agricultural exporting countries for subsidy cut proposals that were too little and too late.

But Mr. MacSharry, the Irishman who made the original EEC proposals of an overall 30 per cent cut in subsidies between 1986 and 1996, said it was wrong to compare this with the apparently much more far-reaching U.S. proposal.

His proposal, modified to soften the blow of subsidy cuts on farmers, was formally presented last week just four weeks ahead of a General Agreement on Tariffs and Trade (GATT) conference here in December.

FREETOWN (NOV. 12) - Liberia's interim president professor Amos Sawyer is on a four-nation consultation visit on his way to the Liberian capital, Monrovia, this week for the inauguration of his government, a peacekeeping force's political ambassador in Freetown said Monday.

According to Joshua Iroha from the regional economic grouping that sent peacekeeping troops into Liberia, Mr. Sawyer's visit started over the weekend in Accra, Ghana before going to Nigeria, the Gambia and Guinea.

Mr. Iroha said Mr. Sawyer will travel direct from Conakry to Monrovia but did not say how long the visit to the four countries would last.

African diplomats said Monday the inauguration of the interim government is to take place Thursday at the executive mansion.

Mr. Sawyers's deputy, Bishop Ronald Diggs and six members of the interim government left Freetown Saturday by a Nigerian navy plane for Monrovia.

Mr. Iroha said that all administrative officers appointed by the interim government as well as 200 Liberian civil servants who were residing in Freetown for the past six months as displaced persons have returned to Monrovia "to start normal life in the city".

He added, "arrangements are in progress for 1,000 Liberians, including businessmen, to return to Monrovia by the Nigerian naval ship, "Ambe."

The interim government was elected by vembers of Liberian political parties and interests groups including the warring parties during a conference in Banjul from August 27 to September 2.

ISLAMABAD (NOV. 12) - Transport workers Monday called off their week-long strike triggered by a new Islamic law on cases involving fatal motor accidents Pakistan television quoted government officials as saying.

The workers agreed to call off the nationwide protest following a lengthy meeting between union leaders and government officials in the Punjab provincial capital of Lahore, the state-run television said.

It did not give details of the agreement.

The drivers were protesting the law requiring drivers involved in fatal motor accidents to pay the families of the deceased the equivalent of 8,500 U.S. dollars.

The government suggested introducing group insurance or a third-party insurance mechanism to reduce the financial pressure on drivers, official sources here said.

Earlier the federal cabinet at its first meeting here under Prime Minister Nawaz Sharif ruled out any "compromise" on Islamic injunctions.

It said the strike was based on drivers' misunderstanding of the clauses of the Islamic law, and that the government was trying to clear them up through negotiations.

The strike had paralysed life in major cities and towns as drivers demanding the repeal of the law pulled their buses, vans, trucks and lorries off highways and inter-city roads.

The situation was aggravated Monday when oil tankers also joined the strike after the government said causing a fatality in a road accident was a non-bailable offence.

The transport crisis was the first under the new government headed by Punjabi industrialist Mr. Sharif.

The strike had drastically cut the flow of supplies. Motorists in many cities and towns faced hardship as gas stations were without petrol.

Pakistan Railways commissioned additional trains into service to cope with the rush of passengers, and reports said the domestic airline was flooded with people seeking flight bookings.

#90316d0820 11/12/1990 ~French/German News Agency
BUDAPEST (NOV. 12) - The Hungarian government on Monday denied reports in Egyptian newspapers claiming that Iraq had offered to trade ''cheap oil for weapons and food'', the official Hungarian news agency Mti said.

According to the reports, Iraq made the same offer to a number of other Eastern European countries.

Janos Menyhart, a department head in the Foreign Trade Ministry, said Iraq had recently put out feelers for Hungarian food shipments but had not expressed an interest in weapons.

He disclosed that Iraq recently offered Hungary oil in advance payment for all of its financial obligations until 1995. Menyhart said Hungary refused, citing the United Nations embargo imposed against Baghdad after its invasion of Kuwait.

According to Menyhart, Hungary has already lost 40 million dollars as a result of the embargo.

#90316d0850 11/12/1990 ~French/German News Agency
BEIRUT (NOV. 12) - The Christian Lebanese Forces militia threatened Monday to jeopardise a government plan to reunify Beirut under army control saying it would keep its military structure here until it received guarantees that pro-Syrian factions would not move into its positions.

Pro-Syrian Lebanese party officials said meanwhile that LF leader Samir Geagea Monday had talks with General Ghazi Kanaan, the head of the intelligence services of the Syrian army deployed in Lebanon.

LF sources refused to confirm or deny this report.

If confirmed the meeting would be the first of its kind between a Syrian officer and the staunchly anti-Syrian Mr. Geagea, whose militia has vowed to

rid Lebanon of some 35,000 Syrian troops.

An LF spokesman said the powerful militia would keep control of the Ashrafiyeh hill in Christian east Beirut and its headquarters there unless the government guaranteed that no pro-Syrian armed faction would enter the region.

He also denied press reports that the LF had removed important quantities of weapons from Ashrafiyeh, where a major part of the militia's arsenal is stockpiled in the Qarantina headquarters at the foot of the hill.

The spokesman confirmed that the militia begun overnight Saturday to remove some of its weaponry and to take down fortifications in Ashrafiyeh and that redeployed some of its 10,000 men, its armoured vehicles and artillery in the Kesrouan district north of Beirut.

But further operations would depend on government assurances that no pro-Syrian faction would enter the region when the regular troops deploy there he said.

The LF and government were locked in negotiations over such assurances and he voiced hope that the guarantees would be forthcoming in the next few days thus allowing the militia to complete its withdrawal.

Partisans of former LF officer Elie Hobeika and militants of the Syrian Nationalist Socialist Party entered the Metn region northeast of Beirut after a Syrian-led operation forced the surrender of Christian military chief General Michel Aoun last month.

The LF has accused both groups of abuse against the population and of kidnapping senior militia members.

Hezbollah political chief Abu Yasser announced Monday that the Iranian-backed group had evacuated all its weapons from Beirut in compliance with the government plan to reunite the capital under the control of the army by November 20.

Hezbollah was among the first militias to begin dismantling its structure in Beirut when the plan was launched November 10.

On Saturday the pro-Syrian Amal militia completed the evacuation from Beirut of 3,000 fighters along with armoured vehicles and artillery pieces.

The Progressive Socialist Party of Druze leader Walid Jumblatt has also announced a withdrawal of its fighters from mainly Moslem west Beirut and mountain villages to the southeast.

If completed on schedule the government plan would leave the army in control of Greater Beirut -- a triangle of about 450 square kilometers (180 square

miles) covering the capital, its suburbs and adjoining areas.

Bitter factional fighting since 1975 has left the capital devastated and divided.

#90316d0940 11/12/1990 ~French/German News Agency

BANGKOK (NOV. 12) - The Thai government announced Monday it will tighten security measures, two days after Burmese pro-democracy students hijacked a Thai Airways International (THAI) flight.

Interior Minister Banharn Silpa-archa said he had ordered Immigration Division officials and others to screen more carefully Burmese students and suspected foreign political activists who might use Thailand to advance their causes.

He said the measures were aimed at preventing them from creating "unrest" in Thailand.

Two Burmese hijackers identified as Ye Marn, 24, and Ye Htin Kyaw, 22, hijacked a Rangoon-bound THAI Airbus-320 from Bangkok on Saturday and forced it to land in the Indian city of Calcutta.

After negotiations with Indian authorities, the two men freed all the 221 passengers and crew early Sunday and surrendered to Indian authorities, ending an eight-hour drama at Calcutta's Dum Dum Airport.

Before being taken into custody the hijackers told a press conference they had wanted to draw the world's attention to their struggle for democracy in Burma.

Generals seized power in Rangoon in a bloody coup in September 1988 to crush nationwide demands for the establishment of Western-style democracy in the Southeast Asian country.

Thousands of students fled Rangoon and other cities in Burma for fear of repression following the coup. Some crossed Burma's border with Thailand, an area where ethnic minority insurgency groups have been battling Rangoon's central government since the country's independence from Britain in 1948.

Meanwhile, Thai Deputy Prime Minister Arthit Kamlang-ek said Monday that Burmese students in Thailand could not break Thai law whenever they wish to make demands of the Burmese government.

Speaking as chairman of an international terrorist suppression committee, Mr. Arthit said the Interior Ministry planned to set up "restrictive areas" for Burmese students to allow Thai authorities to control them more easily.

Mr. Arthit said the Thai cabinet had earlier agreed "not to repatriate Burmese

students by force but they must stay in restrictive areas."

Thailand has had to deal with Burmese student hijackers before.

Last year two dissident Burmese students hijacked a plane on a domestic flight in Burma, forcing it to land at the Thai navy base at U-tapao, southeast of here, to press demands for democracy.

A Bangkok court sentenced the two to six years in prison each.

Their release was among a list of demands issued by Saturday's hijackers before their surrender.

ACCRA (NOV. 12) - Ghana's first stock exchange began business here Monday ahead of the official launching scheduled for later this month, the Ghana News Agency (Gna) reported.

Gna said three stockbroking firms registered with the exchange so far - the National Trust Holding Company (Nthc), the National Stockbrokers Limited and the Ecobank Stockbrokers Limited - traded in 10,700 securities from 11 listed public companies.

The highest number of shares traded on the floor came from Pioneer Tobacco Company (Ptc), a member of the multi-national B.A.T. group, which had 2,200 of its shares distributed among the three brokerage firms at 750 cedis (about two dollars) a share.

Ghana has been freeing its economy from controls and has been operating a free market economy over the past few years.

ATTERIDGEVILLE, SOUTH AFRICA (NOV. 12) - Police teargassed African National Congress social welfare chief Winnie Mandela in this black township outside Pretoria Monday as she visited relatives of two people shot dead by police.

No sooner had Mrs. Mandela drawn up outside the house of 19-year-old Lucky Phathlane, killed in clashes with police in the township on Saturday, than police opened fire with a volley of teargas canisters.

She scrambled inside the house, but a crowd of some 100 chanting supporters and journalists were caught by a stinging cloud and sent scrambling for cover in backyards.

After commiserating with the family she went on to visit the parents of 10-year-old Prince Makhoba, shot dead in his own backyard on Saturday as youths protesting at electricity powercuts clashed with police.

She had earlier visited the township's Kalafong hospital, where five people remained on the wards of the 38 the hospital treated over the weekend, according to medical superintendent Dr. Julius Kunzmann.

One of the victims, a 40-year-old man, was in intensive care with 35 per cent burns, but was out of danger, Dr. Kunzmann said.

HARARE (NOV. 12) - Linking the electrical grids of South Africa and Zimbabwe "makes sense", President Robert Mugabe told Ian McRae, chief executive of Pretoria's Electricity Supply Commission, on Monday.

President Mugabe met the head of the giant South African para-statal at a conference here of the World Energy Council, when Dr. McRae made an impassioned plea for inter-regional cooperation to defeat traditional patterns of poverty.

"The first major constraints in this region are political, and one of the joys I am finding now is that political constraints are dropping like leaves from an autumn tree," Dr. McRae told the opening session of the three-day

conference.

Reflecting recently relaxed tension between Pretoria and its black neighbours, there were 100 South African delegates including the chairman of South Africa's ultra-secret Atomic Energy Corpooration, Wynand De Villiers and his chief executive Waldo Stumpf. Dr. De Villiers declined to be interviewed and said they were only observers in Zimbabwe -- which has previously denounced Western nuclear cooperation with Pretoria.

President Mugabe spent nearly 30 minutes touring an ESCOM exhibit with Dr. McRae after formally opening the conference, and expressed interest in pooling generating capacity and sharing ideas on getting electricity to rural areas where women currently have no alternative to firewood.

Dr. McRae later disclosed that talks had already been held between South Africa and Zimbabwe on sharing power from Mozambique's giant Cahora-Bassa dam on the Zambezi River. Pretoria is helping to rehabilitate the hydro-electric project after decades of sabotage by the rebel Mozambique National Resistance. Zimbabwe is currently 2,000 megawatts short of electrical consumption needs while ESCOM has over 4,000 megawatts surplus capacity.

President Mugabe has until now been at the forefront of the campaign to intensify sanctions against South Africa and forbidden government-to-government contact.

-30- 2202

#90316d1200 11/12/1990 ~French/German News Agency

LONDON (NOV. 12) - Occidental Petroleum Corp. was guilty of unsafe practices and inadequate worker safety training in the July 1988 explosion on the British oil platform Piper-Alpha, according to a public inquiry's final report Monday.

The explosion in the North Sea claimed 167 lives.

The inquiry in the Scottish city of Aberdeen also found that the Department of Energy's inspections were too lax. The last inspection, a month before the accident, failed to turn up any of the shortcomings.

In the future, a special safety commission will be responsible for the oil platforms in the North Sea.

The inquiry found the cause of the accident, the world's worst offshore oil disaster, to be a leak in a gas compressor. The emergency rescue system failed during the ensuing fire.

#90316d1230 11/12/1990 ~French/German News Agency
MASERU (NOV. 12) - Lesotho's new king, Prince Mohato Seeisa, was sworn in here Monday in a ceremony which brought thousands of citizens of this mountain country to the streets here.

The swearing-in ceremony comes only six days after his father, King Moshoeshoe II, was stripped of office by Lesotho's military ruler Major General Justin Lekhanya on November 6.

In a press release here Monday, the Lesotho government said the new monarch -- who has yet to be named but is expected to be called King Letsie III -- is a popular choice and is "looked upon as a man of the people".

The ceremony was held in the centre of Maseru at the base of a statue of King Moshoeshoe I, and several hours before the start of proceedings Lesotho's citizens flocked into the streets to celebrate the ceremony.

The former King Moshoeshoe II incurred the wrath of Gen. Lekhanya by refusing to ratify the sacking on February 19 of three colonels from the ruling military council, including the king's cousins Sekhobie and Thaabe Letsie.

Gen. Lekhanya stripped the former king of his legislative and administrative powers on February 28. The king has been officially "on sabbatical" in London since March 10 by "mutual agreement" with the military council which took power in a coup in January 1986.

The government press release said Gen. Lekhanya has given the assurance that the deposed king has been granted amnesty.

"The former king is presently in London, and although he will lose his monthly allowance of 50,000 rands (19,760 dollars), (he) is still a wealthy man in his own right.

"None of his property will be confiscated," the government release added.

#90316d1260 11/12/1990 ~French/German News Agency
BAGHDAD (NOV. 12) - Japanese, Italian, Swedish and Soviet nationals detained in Iraq were among the foreign guests who attended Monday the opening of a "peace camp" at a favourite honeymoon spot near here.

But the guests of honor were undoubtedly the former U.S. attorney general Ramsey Clark and the former Danish prime minister Anker Jorgensen who both urged a peaceful outcome to the Gulf crisis and appealed for negotiations.

The camp was organized by the Iraqi Association of Friendship with the People of the World, on an idea by Italian peace activists. It was set up on Jazirat

al-A'raess, Weddings Island in Arabic, on the eastern outskirts of Baghdad.

The two-kilometers-long (one and a half miles) island is a few hundred meters (yard) wide. With its palm trees, it is a favourite honeymoon spot for working-class Iraqi newlyweds.

An Iraqi official said that a similar camp would also be set up at the borders of Saudi Arabia and Iraqi-occupied Kuwait, with U.S. troops deployed on one side and Iraqi forces on the other.

The opening ceremonies were an occasion for orators to denounce the U.S. position on the Gulf crisis, the international sanctions against the Iraqi government and to voice support for the "peace efforts" of President Saddam Hussein.

"They told us there could be some good news announced here, so we came," Julio an Italian who declined to give his last name, said to explain his presence.

"As far as I'm concerned, I don't mind staying here 10 days if that meant I could then go home," he said.

Italy was the most representative community at the "peace camp".

Japanese men in dark suits were also predominant in the audience estimated at about 300 people.

But there were apparently no U.S. or British citizens taking part in the "peace camp" and it was not immediately possible to know if their absence was deliberate or whether they were not invited to attend.

Some 2,400 Britons and Americans are among the 3,500 Westerners and Japanese detained by the Iraqi authorities since August 2.

Fifteen people, most of them Italians, have been roomed in the bungalows on either side of the main road that slices through the island.

Portraits of President Hussein in civilian clothes greet the visitor to Jazirat al-A'raess, where strong winds pulled down an array of placards bearing anti-U.S. and other slogans.

"We demand the departure of foreign forces from the region," one placard said.

"United States: Enemies of Humanity," said another, while a third read: "Together with Iraq in the face of aggression."

Albeto Labate of the Italian Volunteers for Peace in the Middle East group expects many more people to join the camp over the next few days but he failed to say if Iraqis would be authorised by their government to attend.

#90316d1660 11/12/1990 ~French/German News Agency

WASHINGTON (NOV. 12) - After taking a back seat to local issues in last week's mid-term elections, the Gulf crisis has become the focus of heated political debate here as lawmakers question White House motives in beefing up U.S. military might in the Middle East.

Influential Democratic senators like Samm Nunn, chairman of the Armed Forces Committee, and Claiborne Pell, head of the Foreign Relations Committee, voiced strong concerns Sunday about letting the United States go to war to free Kuwait of its Iraqi oppressor.

The debate was set off by President George Bush's decision last Thursday to increase U.S. military strength in the Gulf to about 380,0000 troops, for the first time giving the multinational force an offensive capability.

Before that announcement, congressmen had tacitly agreed to shun the Gulf crisis during their election campaigns, as it was widely believed voters would frown on such a serious issue being used for political gain.

But with the mid-term elections over, lawmakers are free to voice their opinions.

Speaking on CBS Television, Mr. Nunn came out against any change in U.S. policy in the Gulf without prior debate in Congress, as implied in Mr. Bush's decision to shift from defending Saudi Arabia from aggression to raising the possibility of forcing Iraq out of Kuwait militarily.

"Why not let the embargo work?" asked Mr. Nunn, who suggested that the military option be kept on ice for several months.

"The president has a real obligation ... to explain why liberating Kuwait is so important we're willing to spend thousands of American lives if necessary," Mr. Nunn said, voicing his own doubts.

Mr. Pell concurred with his colleague and further stressed that before any offensive, the White House should get a specific U.N. resolution authorizing the use of force.

He also warned that any confrontation in the Gulf could easily evolve into a war between the United States and the Arab nations.

Senate Majority Leader George Mitchell chipped in repeatedly with the reminder that, contrary to Secretary of State Jame Baker's stated opinion, "Congress and only Congress can engage the United States" in a war.

Other lawmakers like Representative Ronald Dellums, leader of the black caucus were clearly against "all offensive action."

In the midst of this debate, the Bush administration has failed to come up with convincing arguments in favor of a military offensive in the Middle East, while keeping alive the possibility of a peaceful resolution to the crisis.

But administration officials requesting anonymity have said time was running short: it was increasingly difficult to keep such a disparate multinational anti-Iraqi alliance together, while curbing Arab anger over the presence of U.S. military forces so close to their holy sites.

Some lawmakers concurred with this view, like House Armed Services Committee chairman Les Aspin, who insisted that Congress be consulted prior to any action in the Gulf.

Public opinion was more uncertain than at the start of the crisis in early August, with 50 percent in favor of launching a military offensive and 33 per cent against it.

The U.S. Armed Forces are ready to do what they must, but General Norman Shwarzkopf, commander of the 230,000-strong U.S. forces in the Gulf, has often said war would bring many casualties.

#90316d1820 11/12/1990 ~French/German News Agency

JOHANNESBURG (NOV. 12) - Barlow Rand, South Africa's leading company with interests in steel, coal, textiles, chemicals, food and pharmaceuticals, recorded a 15 percent decline in earnings to 463.7 cents (180.8 U.S. cents) a share for the year ended September 30, 1990, results released here Monday showed.

Despite the drop, a 119 cent (46.5 U.S. cent) final dividend was declared, maintaining the total for the year at 170 cents (66.5 U.S. cents) a share, which is covered 2.7 times.

In its preliminary report, Barlow Rand commented that unfavourable trading conditions of the first half deteriorated for most divisions in the second half and turnover consequently showed only modest growth of 10 percent at 29.119 billion rands (11.356 billion dollars).

It noted that the combination of lower demand, intensified competition and high interest rates had an adverse effect on profitability, with operating profit after interest at 1.889 billion rands (736 million dollars) -- down by 16 percent.

The overall effect was to impact on the group's operating margin with

pre-interest operative profit at 2.475 billion rands (965 million dollars), eight percent down against a 10 percent rise in turnover.

Interest paid rose by 30 percent to 586 million rands (228 million dollars) and increased the decline in operating profit to 16 percent.

Barlow Rand's shares are currently priced at about 3150 cents (1229 U.S. cents) at which level the 1990 earnings and dividend yield are 14.7 percent and 5.4 percent respectively.

ATHENS (NOV. 12) - Former Prime Minister Andreas Papandreou has been called to appear November 22 before a judge investigating a scandal caused by banker Georges Koskotas, court sources said here Monday.

Mr. Papandreou, now leader of the opposition socialist party, is charged with ''moral complicity,'' ''passive corruption'' and ''accepting illegal funds.''

He is to be judged by a special court set up one year ago by parliament.

Four of his former ministers implicated in the scandal ae also to appear before the court.

Mr. Koskotas is in jail in the United States. He is charged with having extorted 230 millions dollars from the Bank of Crete when he was its director.

JOHANNESBURG (NOV. 12) - South Africa's hardline socialist Pan Africanist Congress said Monday it had asked Iran to help secure the release of PAC prisoners being held in South African jails.

In a statement issued here, PAC spokesman Phillip Dlamini said a delegation from the organisation, led by acting PAC President Clarance Makwethu, had arrived in Iran at the weekend for talks with the Iranian government.

The release of all political prisoners is the subject of ongoing talks between the South African government and Nelson Mandela's African National Congress (ANC) -- the PAC's main anti-apartheid rival.

Last week, Justice Minister Kobie Coetsee published categories of political prisoners eligible to apply for indemnity in accordance with an agreement thrashed out between the government and the ANC at historic talks in Cape Town in May and Pretoria in August.

#90316d1970 11/12/1990 ~French/German News Agency
SANAA (NOV. 12) - A leading Yemeni newspaper on Monday welcomed the call for an emergency Arab summit on the Gulf crisis while Egypt's semi-official press felt otherwise.

Morocco's King Hassan II called over the weekend for a summit on the crisis caused by Iraq's continuing occupation of Kuwait.

"It is logical and even indispensable for Arab leaders, headed by King Hassan II and (Algerian) President Chedli Bendjedid, to prepare such a summit to find a peaceful solution," said the September 26 newspaper, which is published by the Yemeni armed forces.

It made the commentary one day after King Hassan II called for an emergency Arab summit to provide a "new and final chance" for a peaceful end to the crisis.

The newspaper stressed that a summit prepared by the Moroccan and Algerian leaders "would be accepted by all the Arab, namely Iraq, Kuwait and Saudi Arabia."

As an alternative to a summit, the daily suggested the setting up of "a council of wise men" that would represent all the Arab countries except of Iraq, Iraqi-occupied Kuwait and Saudi Arabia.

#90316d1990 11/12/1990 ~French/German News Agency
CAPE TOWN (NOV. 12) - Notorious Robben Island prison off the coast here should become a monument in the "new South Africa", not a public resort as businessmen wish, African National Congress (ANC) regional spokesman Trevor Manuel said here Monday.

He said the ANC would resist any attempt to turn the prison into "a flippant place of decadent pleasure", SAPA news agency reported.

Robben Island, which currently houses political prisoners and common-law criminals, was home to ANC Deputy President Nelson Mandela for the bulk of his 27 years in South African prisons.

Mr. Manuel said many ANC members had been incarcerated on the island and any move to open it up as a tourist resort would be highly insensitive.

Future generations had to be reminded "of events which took place on the island", he said.

Tourism Minister Kent Durr has backed plans by a consortium of businessmen to develop the island, though no final decison has been taken.

#90316d2030 11/12/1990 ~French/German News Agency

BAGHDAD (NOV. 12) - Iraq is willing to make "sacrifices" for the sake of peace in the Gulf, President Saddam Hussein said here Monday after talks with Chinese Foreign Minister Qian Qichen, the official news agency INA reported.

"In the region, Iraq is the only country willing to make sacrifices to achieve peace (in the Gulf), on condition that the chance for a sincere dialogue be guaranteed," President Hussein said in statements carried by INA.

He said Iraq would be willing to "discuss with an open mind all the formulas suceptible of achieving peace," adding: "The goal of the whole world is to achieve peace rather than to trigger war."

But he stressed that the interest of Iraq and the Arab countries did not lie in "Baghdad's acceptance of those threatening to use force."

He referred to the deployment of U.S and British troops in the Gulf since Iraq's August 2 invasion of Kuwait saying Iraq "rejects all threats or submission," preferring instead "a dialogue based on mutual respect."

President Hussein charged again that Washington's military presence in Saudi Arabia was aimed at "extending its hegemony and controlling oil wells" in the Gulf region.

"Is it in the world's interest to see the United States alone control the oil of the Middle East?" asked President Hussein.

He also reiterated calls for a "global settlement to the problems of the region."

President Saddam met with the visting Chinese official before his departure from Iraq to Saudi Arabia on his second unscheduled visit to the kingdom in less than a week.

Mr. Qian was immediately met in Jeddah, western Saudi Arabia, by his Saudi counterpart Prince Saud al-Faisal and was expected to brief him on the results of his visit to Baghdad, a Chinese diplomat said.

Chinese diplomatic sources have described Mr. Qian's visit to Iraq as a success and said the talks with President Hussein were "particularly important."

Mr. Qian's visit to Baghdad was part of a tour that took him to Egypt, Jordan

as well as Saudi Arabia.

#90316d2080 11/12/1990 ~French/German News Agency
WASHINGTON (NOV. 12) - The White House said Monday President George Bush would consult closely with Congress on the conflict with Iraq but said "unforeseen kinds of provocations" might force him to order military action on his own.

The comments by White House spokesman Marlin Fitzwater came in response to growing questions among Democrats over the president's policy in the Gulf and their insistence that only Congress can declare war.

"He will follow the constitutional requirements, and he would want to consult with the Congress every step of the way," said Mr. Fitzwater. "But there are always those unforeseen kinds of provocations that might result in having to move first."

After taking a back seat to local issues in last week's mid-term elections, the Gulf crisis has become the focus of heated political debate here as lawmakers question White House motives in beefing up U.S. military might in the Middle East.

Influential Democratic senators like Samm Nunn, chairman of the Armed Forces Committee, and Claiborne Pell, head of the Foreign Relations Committee, voiced strong concerns Sunday about letting the United States go to war to free Kuwait of its Iraqi oppressor.

The debate was set off by President George Bush's decision last Thursday to increase U.S. military strength in the Gulf to about 380,0000 troops, for the first time giving the multinational force an offensive capability.

Before that announcement, congressmen had tacitly agreed to shun the Gulf crisis during their election campaigns, as it was widely believed voters would frown on such a serious issue being used for political gain.

But with the mid-term elections over, lawmakers are free to voice their opinions.

The White House seemed surprised by the Democrats' sudden vehemence. "Not a shot's been fired," said Mr. Fitzwater. "What are these guys talking about?"

Speaking on CBS Television, Mr. Nunn came out against any change in U.S. policy in the Gulf without prior debate in Congress, as implied in Mr. Bush's decision to shift from defending Saudi Arabia from aggression to raising the possibility of forcing Iraq out of Kuwait militarily.

"Why not let the embargo work?" asked Mr. Nunn, who suggested that the military option be kept on ice for several months.

HANOI, Nov 12 (AFP) - Vietnam's only oil enterprise in commercial operation, Vietsopetro, is projected to produce 25 million tons of crude oil from 1991 to 1995, the official Vietnam News Agency (VNA) said Monday.

Vietsopetro, a joint venture between the Soviet Union and Vietnam, was established in 1981, and will have produced five million tons of oil from 1986 to late 1990, VNA said.

It said about 2.5 million tons of that total was produced in 1990 from the only well in the Bach Ho, or White Tiger, oil-field, 120 kilometres (about 75 miles) off Vung Tau, formerly Cap Saint-Jacques.

About 40 wells, worked from eight platforms, are operational, producing between 8,000 and 10,000 tons of crude oil daily, VNA said.

Bach Ho's neighbouring fields, Rong and Dai Hung, which were discovered in 1986 and 1987, will go into production in the next five years, VNA said.

The news agency said Vietsopetro's annual oil production would rise to between six million and eight million tons in 1995, against the 3.5 million tons already projected for 1991.

The Dai Hung oil-field, 250 kilometres (155 miles) off Vung Tau and 110 metres (363 feet) deep, is superior to the Bach Ho field, it said.

Vietsopetro was initially authorised to explore and work in a surface area of 59,000 square kilometres (23,600 square miles), which was divided into seven lots, but was forced by Hanoi to limit its activities to only three lots, the newspaper Saigon Giai phong said recently.

VNA said the joint venture employs a workforce of 6,000 people, including more than 1,000 Soviet workers.

Most of Vietsopetro's oil output was exported to the Soviet Union, Japan and Singapore, because Vietnam's single oil refinery can only process about 40,000 tons annually, it said.

Oil company Petrofina (Belgium), Shell (DutchBritish), British Petroleum (British), SECABIPLL SwedishCanadian), ONGC (Indian), Enterprise Oil (British) and Petro-Canada (Canadian) are currently exploring for oil in Vietnamese territorial waters, VNA said.

JERUSALEM (NOV. 12) - Two Palestinians were shot and wounded Monday in clashes with the Israeli army in the town of Gaza in the occupied Gaza strip, Palestinian sources said.

Tension is high in both the Gaza strip and on the occupied West Bank between the occupying Israelis and local Arabs.

In the West Bank, Israeli troops blew up a house of a resident of Beit Ura Tahta, near Ramallah, who is charged with murdering a Palestinian suspected of ''collaborating'' with Israel, the sources said.

Another two houses were destroyed by Israeli police in Isawiya, near east Jerusalem, for not having building permits, eyewitnesses said.

Since the Palestinian uprising began in the occupied territories in December 1987, a thousand Palestinian houses have been destroyed by Israeli officials, the sources said.

#90316d2170 11/12/1990 ~French/German News Agency
PANAMA CITY (NOV. 12) - Ten months after they toppled military ruler Manuel Noriega, U.S. troops here are losing their popularity among Panamanians, according to a poll released Monday.

But a majority of Panamanians still support the presence of U.S. troops in their country, said the poll by the Central American affiliate of Gallup International. Approval of U.S. troops is down to 74 per cent from 88 per cent in January, it said.

The poll of 1,210 people was conducted in October.

It showed that some 28 per cent of Panamanians now view the December 20 action by U.S. troops as "an invasion," exactly double the number which held that opinion at the beginning of the year.

While early in the year 76 per cent of Panamanians approved of continued U.S. military presence in the Canal Zone after the waterway is handed over to Panama in 2000, only 68 per cent of those polled in October favored such a presence.

BONN (NOV. 12) - Police raided the Bonn headquarters of the Greens Party

after its Bavarian section urged German troops to desert rather than be sent to fight in a Gulf conflict, police and party officials said.

Between 30 and 40 policemen took part in the raid, seizing 70 handbills and a draft of a handbill, the party said. The police said the operation was for alleged incitement to commit a criminal act.

The appeal published by the Bavarian section of the leftwing ecology and pacifist group said "desertion is a human right, because no one can force a man to kill another man."

"War is no way to solve international conflicts," it said.

The United States has over 200,000 troops in the Gulf and leads an alliance which includes French and British troops. U.S. reinforcements are being sent.

There are no German troops in the Gulf.

The Christian Social Union (CSU), the conservative party that takes part in the centre-right Bonn government, blasted the Greens for their encouragement to desert.

It is proof of the Greens' "moral perversion," the CSU's spokesman on foreign affairs, Ortwin Lowack, said.

SAN SALVADOR (NOV. 12) - Central America's ranking provincial Jesuit priest Jose Maria Tojeira accused the Salvadoran Army Monday of blocking the investigation into the November 1989 slayings of six Jesuit priests.

Fr. Tojeira, from Spain, said the investigation conducted by the Salvadoran Government has not turned up conclusive evidence "because the military does not want justice to get to the bottom of this."

At a news conference on the anniversary of the 1989 slayings, Fr. Tojeira said he was "disconcerted" that the probe was stalled and may come apart imminently.

"The difficult part to clear up in the case is the army," he said, noting that the army had burned evidence, delivered false documents and sent the wrong witnesses to testify, Fr. Tojeira said.

He also accused the U.S. Embassy in San Salvador of covering up evidence throughout the investigation of the assassinations.

Still in dentention as the principal actors in the slayings are Colonel Guillermo Benavides, former director of El Salvador's Military Academy and nine

other members of the military.

#90316d2740 11/12/1990 ~French/German News Agency
JEDDAH, SAUDI ARABIA (NOV. 12) - Chinese Foreign Minister Qian Qichen met late Monday with King Fahd and senior Saudi officials during an unscheduled visit to Saudi Arabia, his second in six days, Saudi officials said.

They said Mr. Qian, who flew here after talks with President Saddam Hussein in Iraq, had delivered a message to the Saudi monarch from Chinese President Yang Shangkun.

Informed sources said the message dealt with the Gulf conflict and ways to settle it peacefully.

A Chinese diplomat had said earlier that Mr. Qian would brief Saudi officials on the results of his talks with Mr. Hussein. The Chinese official also met with Saudi Foreign Minister Prince Saud al-Faisal during Monday's visit.

Chinese diplomatic sources have described the visit to Baghdad as a success and said Mr. Qian's meeting with Mr. Hussein was "particularly important."

Mr. Qian travelled to Baghdad after visits to Egypt, Jordan and Saudi Arabia.

At each stop, he called for a peaceful settlement to the Gulf crisis.

The Saudi press Monday quoted Mr. Qian as saying that Beijing was "adopting a firm position on the need for an Iraqi military withdrawal from Kuwait and the reestablishment of the legitimate Kuwaiti government."

#90316d2780 11/12/1990 ~French/German News Agency
WASHINGTON (NOV. 12) - U.S. spy satellites are not the only way for Washington to monitor the Gulf: three private firms, including one in the Soviet Union, are selling satellite photographs of the area.

Photographs sold by Soyuzharta, a Soviet firm, "are among the finest unclassified imagery I have ever seen," said Peter Zimmerman, a professor of applied sciences at George Washington University.

SPOT image, a French firm, and the U.S. company Landsat also sell satellite photographs of the Gulf.

Rick Obern, a Pentagon spokesman, said Monday that the U.S. government would be concerned by the sales only if they showed operational details of the U.S. deployment in Saudi Arabia.

Images sold by Soyuzharta show details down to five meters (yards), but may come from Soviet spy satellites, experts said.

Velon Minshew, who represents the Soviet firm in the United States, said they had photographs of Saudi Arabia, Kuwait and Iraq, taken in August and September.

The three firms are forbidden to sell the images to Iraq, under sanctions approved by the United Nations.

Mr. Minshew said that Soyozkarta would not sell the photographs except to legitimate organizations who agree not to resell them.

Clark Nelson, a spokesman for SPOT image, said his company sold only to those who had completed "proper security procedures."

"We are not selling to the Iraqis or anybody associated with the Iraqis," he said.

Landsat spokesman Dick Mrocynski said his firm's photographs were to be used for mapping and geological purposes and had no military value.

#90316d2790 11/12/1990 ~French/German News Agency

TEGUCIGALPA (NOV. 12) - Flooding that began last week in Honduras has claimed nine lives, left more than 20,000 people homeless and caused serious damage to cropland and roads, officials said.

The National Emergency Committee said the flooding had spread from the northern coast to eastern parts of this poor Central American country, and that if the rains continued, a state of emergency would be declared nationwide.

Some 30,000 people were evacuated from the northern departments of Cortes and Yoro, and 13,000 of them saw their homes destroyed or damaged, the committee said.

Another 8,000 people were left homeless in the northeastern department of Gracias a Dios, near the Nicaraguan border, when the Patuca River overflowed its banks.

Unofficial reports put total damage from the flooding at 70 million dollars.

#90316d2840 11/12/1990 ~French/German News Agency

BERLIN (NOV. 13) - Demonstrators toppled a tramway, dug trenches and fought

pitched battles with police Monday night to protest the eviction of squatters from three buildings in east Berlin, police said.

Several hundred demonstrators, many of them masked, faced three police water-cannons.

Police said a dozen demonstrators were arrested and several policemen were injured, but they did not give casualty figures for the demonstrators.

Since the Berlin Wall fell last year, scores of empty buildings in the east of the city have been occupied by squatters, prompting the new joint municipal authorities last July to ban all new occupations.

#90316d2870 11/12/1990 ~French/German News Agency

LONDON (NOV. 13) - British Steel earned pre-tax profits of 309 million pounds (609 million dollars) in the six months to the end of September, a fall of 27 percent from the 423 million pounds it reported in the same period of 1989, the group said here on Monday.

A statement by Chairman Sir Robert Scholey said that the poor results were likely continue in the short term.

"Profits will be reduced for the rest of the year and the difficult economic situation will also impact on 1991-92," Sir Robert said.

The chairman also said that the company, the world's second biggest steel firm had reopened talks on a possible takeover of the Spanish group Aristrain, after an initial failure to reach agreement.

The first-half results were in line with analysts' predictions, and British Steel's shares rose slightly, by one penny to 121.5 pence in early afternoon trading here.

The company, which was privatised in 1988, said it had boosted its exports,

partly compensating for a drop in sales at home. However this had been achieved at the price of cutting profit margins to face up to sharpened world competition, it added.

British Steel recently announced the closing of its mills on Clydeside in Scotland, with the loss of 1,200 jobs.

Sales were down 1.6 percent for the six-month period, to 2.51 billion pounds (4.9 billion dollars).

Earnings per share were down 28 percent at 11.9 pence, against 16.6 over the

same period in 1989.

Nevertheless the group said it would make an increased dividend installment payment of three pence per share as against 2.75 pence.

#90316d2920 11/12/1990 ~French/German News Agency

LA PAZ (NOV. 12) - Bolivian coca growers Monday accused the army of planning to wage the war on drugs under the guise of routine military maneuvers in the Chapare coca-growing region of the country.

The charges came after the armed forces commander, General Jorge Moreira, said four army battalions would be sent into the Chapare for routine exercises but steer clear of any drug-fighting activity. He did not specify the date of the announced maneuvers.

Located in central Bolivia, the Chapare region is one of South America's main sources of coca leaves, the raw material of cocaine. The area produces 80 per cent of the 140,000 tonnes of coca grown annually nationwide.

The Federation of Coca Farmers of Chapare said the army plans were part of a militarization of anti-drug efforts agreed to last May in Washington by Bolivian President Jaime Paz Zamora and U.S. President George Bush.

The U.S. Government is pressing Bolivia to "militarize the Chapare region," so coca producers have decided to form self-defense groups "in light of the imminent attack," said federation leader Julio Arce.

Currently, anti-drug operations in the Chapare are the responsibility of a special narcotics force which answers to the Bolivian police.

#90316d2950 11/12/1990 ~French/German News Agency

GUATEMALA CITY (NOV. 13) - Two conservative candidates qualified for a January 6 runoff for president of Guatemala after no candidate won a majority in Sunday's national ballotting.

With 75 percent of the returns in Monday, newspaper publisher Jorge Carpio Nicolle (Unc), 58, had 25.3 percent of the vote and Christian fundamentalist Jorge Serrano Elias, 45, of the Mas party was close behind with 25 percent.

Christian Democrat Alfonso Cabrera Hidalgo, the hand-picked candidate of outgoing President Vinicio Cerezo, trailed with 16.3 percent.

Serrano is viewed by analysts as the favourite in the runoff. He headed the national council for a time under military dictator Efrain Rios Montt who was

ousted in 1983.

More than 400 international observers drafted into the Central American country to oversee the polls reported that voting went off with litle incident. The election campaign had been marred by the murder of 14 politicians since mid-June.

All three candidates campaigned on a ''law and order'' platform and vowed to boost the police force. Serrano has also pledged to bolster Guatamala's flagging economy by cuts in public spending.

#90316d3340 11/12/1990 ~French/German News Agency
TOKYO (NOV. 13) - Matsushita Electric Industrial Co., Ltd. Tuesday said it had set up a service network for installation and repair of home electric appliances in East European countries in a bid to promote regional sales.

Matsushita officials said they recently signed agreements with companies and state corporations in Bulgaria, Czechoslovakia, Hungary, Poland, Romania and Yugoslavia to provide service for Matsushita products.

They said Matsushita's Hamburg-based German subsidiary would offer the service through local centers for home appliance parts in six cities of former East Germany, including Leipzig and Dresden.

Albania is the only East European country not to have an extension of the Matsushita service network, the officials said.

Matsushita's sales to East Europe of audio-visual products, including video-cassette recorders, radio-cassette decks and compact disk players totalled 6.5 billion yen (50 million dollars) in the 12 months to March.

With the completion of its service network, Matsushita plans to sharply increase its sales to the region to 16.5 billion yen (129 million dollars) between April 1990 and March 1991, company officials said.

SINGAPORE (NOV. 1) - A price war has broken out over Pacific air fares amid a "softening" in the travel market, press reports said Monday.

The Business Times said the softening resulted from prospective travellers postponing their travel plans pending developments in the Middle East.

The business daily said three major airlines operating between Singapore and the Pacific west coast have slashed their wholesale price to travel agents by

between 150 Singapore dollars (90 U.S.) and 500 dollars (300 U.S.) in the past few weeks.

While Singapore Airlines (SIA) cut its trans-Pacific fare by 500 dollars to 1,700 dollars (1,000 U.S.), United Airlines (UA) and Japan Airlines (JAL) slashed 150 dollars (90 U.S.) each to 1,650 dollars (970 U.S.) and 1,700 dollars respectively, it noted.

UA and JAL sources declined to comment, while SIA could not be reached.

Other carriers such as Korean Air, Thai International, Cathay Pacific, Malaysian Airlines System and Northwest Airlines were likely to follow suit soon.

#90316d7580 11/12/1990 ~French/German News Agency

JOHANNESBURG (NOV. 12) - Daimler Benz's South African subsidiary, Mercedes Benz of South Africa (MBSA), is meeting its production targets for the first time in three years, the Business Day newspaper reported here Monday.

MBSA's plant in the Indian Ocean port city of East London had been plagued with labour problems and resumed production a month ago following an eight-week shut-down caused by a strike by members of the black National Union of Metalworkers of South Africa (NUMSA).

Business Day said a central feature of the agreement between the union and MBSA which ended the strike was that productivity problems be addressed with management, suggesting the company's continued future in South Africa depended on it.

MBSA Human Resources Manager Ian Russel said at the weekend that "expectations raised in the dispute settlement process have been met" and that the previous high absenteeism rate was now down to industry norms.

In addition, quality in commercial vehicle production had reached the German record of 1.26 faults per vehicle.

"There is a real effort from everyone, a very good improvement on the shop floor", Mr. Russel said.

#90316d7650 11/12/1990 ~French/German News Agency

SEOUL (NOV. 12) - Faced with dwindling profits and incentives, more foreign firms and investors are turning away from South Korea, Finance Ministry officials said here Monday.

They said that during the first nine months to September, foreign investment amounted to a mere 633 million dollars, down from 864 million dollars during the same period last year.

In 1988, the comparable figure was 1.09 billion dollars.

More foreign firms have also been pulling out. In 1988, a total of 19 foreign firms withdrew and the number increased to 28 in 1989 and to 30 as of September this year.

The officials said South Korea had been losing its attractiveness for foreign investment because of stronger unionism and higher wages that resulted in reduced profits and dwindling incentives offered by the government.

The government has been reducing incentives, including tariff and tax cuts, for foreign investment it had provided in the past to attract foreign funds to finance economic development.

It has removed, for example, tariff cuts it had offered for facilities needed for building hotels during the 1988 Seoul Olympics. Hotels took the lion's share of foreign investment in 1988.

Foreign investment has been notably reduced in labor-intensive industries. Investment in textile and garments was reduced from 15 separate deals in 1988 to 13 in 1989 and to only three as of September 1990, the officials said.

Annual returns on investment for foreign investors averaged three percent, but U.S. firms took more than four percent, they said.

-30- 1757

#90316d7660 11/12/1990 ~French/German News Agency

MANILA (NOV. 12) - Communist rebels slammed the door on proposed new peace talks with the Philippine government after it indicated that U.S. troops may stay in the country beyond 1991, a newpaper said here Monday.

The communist National Democratic Front (NDF) charged that President Corazon Aquino's government "has sold national sovereignty once again" and that "there is no hope for peace under a regime of national betrayal," Newsday reported.

It quoted an NDF statement sent to the daily on Sunday as saying that "there is no other way for all patriots but to intensify the people's struggle both in the streets and in the hills throughout the land."

The NDF had expressed willingness to discuss the possibility of fresh peace talks with Mrs. Aquino's government after she suspended military operations in areas ravaged by a killer earthquake last July.

The New People's Army (NPA), the rebels' nationwide guerrilla force, had earlier unilaterally suspended its offensives in the quake-hit areas.

The Philippine government said Friday that it was determined to gain "full sovereign control" over U.S. air and naval bases when their lease expires on September 16, 1991, but that it may ask Washington to run them for a longer period because local troops need more time to take over the facilites.

A U.S. government spokesman in turn disclosed here on Monday that they wanted a 10- to 12-year period to phase out their control of military facilities in the Philippines.

The next round of bases talks is set for December. If the two allies fail to forge a treaty on the bases by January, they have agreed to immediately take steps to end the U.S. military presence by September.

-30- 1911

#90316d7730 11/12/1990 ~French/German News Agency

SEOUL (NOV. 12) - South Korea, named one of the four Asian "dragons" because of its spectacular economic expansion, fared less well this year and will likely face even harder times in 1991, analysts say.

On the surface, the country again appeared to prosper this year with its annual economic growth rate forecast at 8.6 per cent, up from 6.7 per cent last year.

Growth has been boosted by domestic construction and consumption and disguises some troubling fundamental problems.

The official think-tank, the Korea Development Institute (KDI), forecasts a 1.5 billion dollar trade deficit due to sluggish exports, and a 1.8 billion dollar balance of payments deficit for the year.

This year's balance of payments deficit represents a sharp drop from last year's surplus of 5.1 billion dollars and illustrates rapid economic deterioration, according to analysts.

When the country achieved double-digit growth rates for three consecutive years from 1986 to 1988, producing an annual average current account surplus of 9.5 billion dollars, many forecasted that South Korea would rank with Japan as a world economic power in the 1990s.

But KDI forecasts that South Korea will post a 2.5 billion dollar trade deficit and a 2.8 billion dollar current account deficit in 1991 as the economic growth rate slows to 6.9 percent.

KDI adds that the figures are due largely to a sharp rise in crude oil prices

prompted by the Gulf crisis, coupled with an economic slowdown in advanced countries, particularly the United States, which is South Korea's most important export market.

Exports rose by a meager 1.8 percent this year to an estimated 62.5 billion dollars, over last year.

Exports, mainly responsible for the nation's rapid economic growth in the past decade, have become sluggish as South Korean products become less competitive in the international market due to wage rises and lack of technological innovation.

Last year alone, a worker's average daily wage in the manufacturing sector rose by 25 percent to 36.2 dollars amid widespread labor unrest, a figure compared with 19.8 dollars in the rival dragon, Taiwan.

Samsung Economic Institute Director Lim Dong-Sung said South Korean industries that are still vulnerable to international competition would face more difficulty as the world market gradually opens up.

He fears wages may rise at a rate far surpassing that of labor productivity next year because of nine percent inflation this year and 10 percent forecast for next year.

The government is hoping to keep inflation below double digits.

He predicts the nation's exports will be sluggish because a tight-money government policy aimed at checking inflation will discourage industrialists from investing in new technology and plant facilities.

He says the key to overcoming the current economic difficulties for enterprises is to raise productivity, improve product quality, and develop new technology to recover the lost competitiveness of Korean export products.

Government economists have nonetheless offered an optimistic seventh five-year-plan for 1992-96.

It envisages annual real economic growth of seven percent and an increase in the nation's per capita gross national product (GNP) from 6,767 dollars in 1992 to 10,190 dollars in 1996.

South Korea's per capita income, now at around 5,000 dollars, will reach the 10,000-dollar level as the country approaches the rank of advanced countries, a senior Economic Planning Board official said.

The new development plan also calls for raising the nation's exports gradually from 76.5 billion dollars in 1992 to 112 billion dollars -- thus eliminating the current account deficit in 1992 and leading to a 5.5-billion-dollar

surplus by 1996.

South Korea is to become a net creditor nation by 1995, according to the plan. At present, the nation's foreign debts stand at around 28 billion dollars.

Critics have described the plan as too ambitious in the current economic climate.

KABUL (NOV. 12) - The Afghan government is planning to devalue its artificially overpriced currency in a bid to attract greater foreign interest in Kabul's tottering economy, Finance Minister Mohammad Hakim said.

Mr. Hakim said the official exchange rate of the afghani, unchanged since the pro-communist revolution of 1978, did not reflect market realities and discouraged potential foreign investors.

The afghani is officially pegged at 55 to the U.S. dollar, but its "bazaar" -- or black market -- value has fluctuated wildly between 440 and 700 over the past year.

"We are planning to increase the official rate so that the difference between the two rates will become smaller," Mr. Hakim said in an interview. "It will be done very soon -- very, very soon.

The Afghan black market -- the dilapidated three-storey "bazaar" where hundreds of money-changers sit in shabby cubicles -- is silently encouraged by the authorities because of its importance to the economy.

Mr. Hakim said several foreign organisations and companies were reluctant to come to Afghanistan because of the afghani's unrealistic exchange rate.

Diplomatic missions and several aid agencies here exchange their foreign currency at the official rate, but their local staff are allowed to be paid in hard currency, which they exchange at the bazaar.

"We know that increasing the official exchange rate will put some more burdens on the budget, but we have to be prepared to absorb it," Mr. Hakim said.

He did not say by what proportion the afghani would be devalued, but informed financial sources said it would be substantial and "very close to the bazaar rate."

Mr. Hakim said the disparity between the open market and the official rate was also due to sharply falling revenue, increasing expenditure and the effects of the ongoing civil war in Afghanistan, one of the world's poorest countries.

The trade deficit in the year ending May 21 was estimated at 543.89 million dollars compared to less than 100 million dollars 10 years ago.

The corresponding figure for 1988-89 was not available.

Last year's deficit was financed almost entirely by the money merchants at Char Chattar bazaar, underlining their key role in the national economy.

The government does not sell dollars to the private sector at the official rate, but recently pumped 15 million dollars to finance essential food imports at a rate slightly lower than the bazaar price.

With foreign exchange earnings virtually dried up after the closure of a natural gas pipeline to the Soviet Union just before Soviet troops withdrew from Afghanistan in February 1989, the state is hard pressed for dollars.

Efforts are now under way to reopen the pipeline, which accounted for nearly 90 per cent of Afghanistan's total foreign exchange earnings, but no firm date has yet been fixed for resuming gas sales.

The drop in foreign earnings compounded problems of dwindling domestic revenues, which fell by 20 percent, while spending rose by 32 percent last year, Mr. Hakim said.

He said the Afghan economy grew at a poor 1.2 percent a year over the past decade, compared with an annual average growth of 2.3 percent for the world's 41 least developed countries.

More than one million people died and some 2,000 schools, 5,000 vehicles and 2,000 kilometres (1,250 miles) of road were destroyed during the 12-year Afghan war.

Kabul has been surviving on generous Soviet handouts, including food, fuel and military supplies.

Agriculture, the mainstay of the economy, suffered severely as output fell by 28 percent and the population grew at an annual 2.6 percent during the past dcade, the minister said.

But Mr. Hakim said the only real solution to the country's economic problems was the prospect of an early political settlement, which would encourage the return of some five million Afghan refugees and, hopefully, attract foreign rehabilitation aid.

BAGHDAD (NOV. 12) - Chinese Foreign Minister Qian Qichen met here Monday with Palestine Liberation Organization Chairman Yasser Arafat to discuss Arab and international efforts to avert war in the Gulf, Palestinian sources reported.

Mr. Arafat arrived here late Sunday.

The Chinese foreign minister met twice earlier in the day with Iraqi Foreign Minister Tareq Aziz on the chances for a peaceful solution to the Gulf crisis and may pay a second visit to Saudi Arabia on Monday, according to Chinese diplomatic sources here.

Mr. Qian was last week in Cairo, Riyadh and Amman, where he issued repeated calls for a non-violent resolution in the Gulf.

But U.S. officials said he had also not ruled out Chinese support for a possible United Nations Security Council resolution authorizing the use of force to dislodge Iraqi troops from Kuwait.

Iraq seized and occupied the emirate on August 2 and has since defied international appeals for a military withdrawal.

LONDON (NOV. 12) - Coffee prices are unlikely to recover from their current levels, close to 15 year lows, in the short term, according to trade house E.D. and F. Man in their latest review of the world coffee market released Monday.

Physical stocks in countries producing mild coffee are at a much lower level than last year, Man said, which combined with reports of delayed or reduced crops in Central America, Mexico Colombia and Kenya may provide the opportunity for rallies.

But an expected hand-to-mouth buying pattern from roasters and high arabica stocks in Europe should preclude any major movements upwards in arabica type prices in the short term, the report said.

#90316d8160 11/12/1990 ~French/German News Agency

MANILA (NOV. 12) - The Philippine government Monday assured panicked vehicle owners who rushed on gas stations that the country's oil supply was adequate and warned oil retailers against hoarding their products.

The rush came after the government's energy regulatory board ordered gas stations to open only fom 7:00 a.m. to 7:00 p.m. on weekdays and 8:00 a.m. to 5:00 p.m. on weekends and holidays.

The three oil companies that operate in the Philippines -- the state-owned Petron and local subsidiaries of Caltex and Shell -- have given assurances that the supplies are "adequate," a presidential palace statement said.

"Oil companies agreed to modify their distribution system to assure constant supply to their outlets" to prevent consumer panic, it said.

The palace said oil companies had petitioned the government to exempt tankers distributing petroleum products from a ban on trucks in Manila streets during rush hours.

It warned of criminal and administrative proceedings against oil retailers found to be hoarding petroleum products, it warned.

The government's order to gasoline stations to shorten working hours was the second step in a graduated rationing program sparked by the Gulf crisis, mounting public deficit and dwindling international reserves.

The government earlier reduced deliveries to dealers by 10 percent, forcing some stations to limit their sales to one can at a time or to close down some of their pumps.

Officials said last week that gasoline rationing by coupon could be introduced if the situation worsens.

Despite threats of a general strike by labor groups, the government has also been contemplating new price increases following an 8.7 percent depreciation last month in the value of the peso.

Local oil prices increased by 29 percent in September, and President Corazon Aquino has banned sports that consume large amounts of gas, such as car and boat racing.

#90316d8350 11/12/1990 ~French/German News Agency

SOMERSET WEST, SOUTH AFRICA (NOV. 12) - Double-digit inflation is locked into the South African economy and in the minds of South Africans, leading economist Ockie Stuart said in this Cape province wine town Monday.

Addressing a conference organized by Stellenbosch University's Bureau for Economic Research, which he heads, Mr. Stuart predicted annual inflation would average out at 13.2 percent over the next five years.

The current year would be the worst, with an annualised inflation rate of 14.3 percent, and 1992 could be the best if the world economy recovered as expected with an inflation rate of 11.5 percent, he forecast.

Trade unions would be in a strong position during the negotiations the government wants to start with credible black leaders next year to thrash out a new constitution enfranchising the black majority, Mr. Stuart said, warning that unions were not noted for the realism of their wage demands.

Interest rates would remain high until 1992 and would then drop from the present 21 percent prime rate to 17.7 percent from 1992-95, he predicted.

On the balance of payments, Mr. Stuart said capital outflows would decrease as the country broke the back of its commitments to repay an estimated 18 billion dollar foreign debt.

The government keeps the current account solidly in the black, at the expense of growth, to meet debt repayments in the absence of credit facilities withdrawn in 1986 in protest at apartheid.

But the weakness of the gold price, diminishing gold production and higher oil prices would offset the reduction in outflows, Mr. Stuart said.

The current account surplus should average out to 4.5 billion rands (1.8 billion dollars) over the next five years, compared to this year's target of six billion rands (2.4 billion dollars).

Net capital outflows would average out at 3.2 billion rands (1.28 billion dollars) over the same period, he said.

The decline in savings was particularly worrying, he said. The savings ratio had declined from around 10 percent of income in the early 1980s to its current "dismally low" level of one percent.

"It simply means that we are consuming 99 percent of our income, leaving one percent to be used for fixed investment purposes," he said.

The economy would show negative growth this year and marginal growth next year he predicted.

"Political tensions, together with adverse trade union activity, are likely to be with us during the nineties," he said.

"Even though a political settlement may be reached before the end of 1993 the road ahead will be bumpy as far as capital inflows are concerned."

#90316d8370 11/12/1990 ~French/German News Agency

HAMBURG (NOV. 12) - Coal prices on world markets have not benefited any from the increase in heating oil prices, and instead have actually declined amid an

increase in coal supplies to the market, the German Coal Importers Associationn said here Monday.

The association said that while heavy heating oil on the Rotterdam spot market has gone to beyond 100 dollars per tonne, coal for power plants now sells for less than 50 dollars per ton.

In Germany, the price at the border for hard coal imports dipped to 93 marks (61 dollars) per ton during the third quarter of 1990, down from 100 marks per hard coal-unit ton in the previous quarter.

Domestically-produced coal in Germany remains far higher, at 270 marks per coal-unit ton.

The association noted that there had been a major rise in coal exports by Australia, the United States, Colombia and South Africa.

It estimated that the hard coal imports by the European Community this year would rise 12 percent to 115 million tons, out of total world coal imports amounting to 340 millionn tons, up 7 percent.

NICOSIA (NOV. 12) - OPEC maintained its expanded levels of crude oil production in October to compensate for the embargo on Iraq, but output fell sharply in Iran, the Middle East Economic Survey (MEES) reported Monday.

The weekly newsletter said crude production for the Organisation of Petroleum Exporting Countries last month averaged 22.66 million barrels per day (bd), compared to 22.685 million bd in September.

But Iran's share dropped by nearly 500,000 bd from a record high of 3.47 million bd in September because of falling buyer interest in Iranian crude and technical problems on the production side, it said.

The shortfall was made up by increases from Saudi Arabia and Libya, the Nicosia-based weekly said. Production for each country rose by around 170,000 bd, up to 1.6 million bd for Libya and 7.67 million bd for Saudi Arabia.

MEES said OPEC production could reach 23 million bd in November and even higher in December, compared to to the production ceiling of 22.5 million bd agreed by the organisation before the Gulf crisis erupted in August.

The international embargo against Baghdad since its invasion of Kuwait cut exports of around four million bd from Iraq and Kuwait, with Saudi Arabia at the forefront of countries boosting its production to compensate.

According to the MEES estimates, Iraq produced 450,000 bd and Kuwait around 100,000 bd in October, the same as in September, compared to 3.3 million bd for Iraq and 1.7 million bd for Kuwait before the crisis.

LAGOS (NOV. 12) - Nigeria plans to ignore the European market for natural gas exports and instead concentrate on penetrating the United States market, Nigerian Minister of Petroleum Resources Jibril Aminu has said here.

In an interview in the independent Champion newspaper, he predicted much stiffer competition in the European market, notably from Algeria.

The Nigerian government said last year that it considered Algeria, a major gas producer, a big threat to its own natural gas exports which are expected to begin in January 1995, a source recalled.

Nigeria is pinning its hopes on an increased natural gas demand in the United States, Prof. Aminu said.

On local oil policy, he said the Nigerian government would encourage private participation in setting up export-oriented refineries to increase the nation's oil utilisation, boost foreign exchange earnings and generate employment.

The move is part of government efforts to encourage private participation in oil exploration in the country, he added.

The nation, which currently has four refineries - with a total capacity of 445,000 barrels per day - cannot build new refineries now due to financial constraints, he said.

Prof. Aminu reiterated Nigeria's determination to remain a member of the 13-member Organisation of Petroleum Exporting Countries (OPEC).

Nothing could damage the country's national interests more devastatingly than breaking away from the cartel, he said.

LONDON (NOV. 12) - Scotland Yard has scored its first "significant" victory againt the IRA in months with the arrest of six terrorist suspects here, but a wave of killings in Northern Ireland is making this autumn one of its bloodiest to date.

Early Monday police were still questioning six people arrested Sunday during a raid in Kilburn, northwestern London. The area is a stronghold for Irish emigrants.

The six were being held under Britain's anti-terrorism laws, at a high-security prison in central London.

Following an anti-terrorist operation that lasted for several months, police also seized an impressive 25 kilograms (55 pounds) of explosives, including Semtex, favoured by the outlawed Irish Republican Army. They also found weapons and documents in two cars parked outside an apartment complex in nearby Willesden.

Police flooded the working class district Sunday and more than 2,000 residents were evacuated.

Police said the weapons were probably intended for a terror campaign that would have been launched during the Christmas holidays.

The raid came just days after police found two alleged IRA "bases" in a nearby quarter of the city - apartments where they found false documents and traces of explosives.

For more than two years, Scotland Yard's anti-terrorist branch has been tracking one, or possibly two, IRA cells believed responsible for 23 attacks in England that have left 15 people dead and scores wounded since August 1988.

During the period, the IRA has diversified its targets as much as possible to create a climate of terror, hitting at the heart of the British establishment.

Its victims included senior military officers, Conservative politicians, and even, symbolically, the London Stock Exchange.

An attack in the summer killed an adviser to Prime Minister Margaret Thatcher, member of parliament Ian Gow.

#90316d8650 11/12/1990 ~French/German News Agency
TOKYO (NOV. 12) - Sabotage attacks by leftist radicals shook Tokyo Monday as Emperor Akihito formally ascended to the Japanese throne in a solemn and

colourful ritual.

The attacks, mainly directed against the city's railway system, were carried out despite the massive presence of 37,000 police, but they failed to disrupt the ceremonial behind the walls of the Imperial Palace in the heart of the capital.

Some 30 incidents had been reported by the time the enthronement took place. Police confirmed there had been a large number but would make no official comment.

More than 2,000 opponents of the imperial system also staged demonstrations in three separate locations in Tokyo. There were some scuffles with police, who blocked off surrounding streets to contain the main demonstration and made at least three arrests.

Junichi Shirosaki, leader of the radical Chukaku-ha (Middle Core Faction), told reporters at one rally that his group carried out many of the attacks.

The sabotage was the climax of a series of protest actions leading up to the enthronement, which critics saw as the perpetuation of a feudal militarist tradition.

But the impressive half-hour ceremony, the first for 62 years, passed off as planned before some 2,500 guests, including leaders of more than 150 countries, drawing on more than 10 centuries of ritual.

The 56-year-old emperor, wearing a traditional costume dating back 1,000 years pledged to observe the constitution and discharge his duties "as symbol of the state and of the unity of the people".

Prime Minister Toshiki Kaifu then led three "Banzai" cheers after a congratulatory speech on behalf of the Japanese people which promised ''to devote our utmost efforts to building a Japan open to the world."

Escorted by members of the imperial household, and in complete silence, the emperor mounted an ornate canopied and curtained throne near the back of the large State Hall.

Empress Michiko was on a similar throne beside and behind the emperor's, with other members of the imperial family standing in front.

#90316d8810 11/12/1990 ~French/German News Agency

TEHERAN (NOV. 12) - Teheran's military prosecutor announced Monday the execution of a man said to have spied for the United States.

Prosecutor Hojatoleslam Mohammad Niazi said the man, Seyyed Mohammad Ali Shahbukhari, had been a member of ''an espionage network affiliated to the U.S. Central Intelligence Agency (Cia)''.

The man had been a ''citizen of a neighbouring country''. He was sentenced to death by a military tribunal and executed after approval of the verdict by the supreme court.

Security forces had arrested other members of the group, Niazi said. They had been passing information to the U.S. ''on certain organisations affiliated to the armed forces'' during and after the 1980-88 Iraq-Iran war, the Iranian news agency cited him as telling journalists.

The prosecutor also said ''several groups involved in bribery, embezzlement and corrupt activities have been smashed''.

A number of officials working in Teheran's municipality and passport office had been arrested in this connection. Municipality officials had confessed to stealing 3.5 billion rials (50 million dollars) in cash and 850 gold coins, each worth about 1,900 dollars, the prosecutor said.

#90316d8840 11/12/1990 ~French/German News Agency

PARIS (NOV. 12) - A secret western network to counter an invasion by Warsaw Pact countries existed in France from the 1950s and was only recently disbanded by French President Francois Mitterrand, reliable sources said Monday.

French Defence Minister Jean-Pierre Chevenement revealed in a radio interview Monday that the secret organisation, which was set up in other western European countries from the onset of the Cold War, had a French branch.

"It is true that a structure did exist, set up at the beginning of the 1950s to enable communications among a government that might have fled abroad in the event of the country being occupied," Mr. Chevenement said.

He added that the group here only had "a dormant and liaison role".

The French arm of the network known in French as Glaive (sword) was disbanded "on orders of the French president", Mr. Chevenement said, but he did not indicate when.

The reliable sources said that Mr. Mitterrand, who came to power in 1981, "relatively recently" dissolved the structure.

According to the sources, the organisation became obsolete as a Soviet invasion of France was no longer thought possible.

Constantin Melnik, who supervised French secret services from 1959 to 1962, had said on Friday that the network had not existed under French president Charles de Gaulle, who ruled from 1958 to 1969.

The existence of the shadowy group, codenamed Gladio (Latin for sword) in Italy, was disclosed last month by Italian Prime Minister Giulio Andreotti.

Mr. Andreotti said Gladio had been created in 1956 in Italy and other European countries with the agreement of the North Atlantic Treaty Organisation (NATO) and with financial support from the U.S. Central Intelligence Agency, to prepare for a Soviet invasion.

-30- 1990

#90316d8880 11/12/1990 ~French/German News Agency

HONG KONG (NOV. 12) - In a landmark high court judgement here Monday 111 Vietnamese boat people were released after the government was found to have detained them unlawfully.

But within hours of the judgement, the group was re-arrested and threatened with deportation under a different section of immigration laws.

The boat people came to Hong Kong in May 1989 on their way to Japan which, at the time, had a more liberal policy for Vietnamese asylum seekers.

They claim, however, that they were tricked into landing in Hong Kong where their boat was confiscated and destroyed after government officials declared it to be unseaworthy.

Barrister Gerald McCoy, who represented the group, described the government's action as ''macabre''. McCoy said he would be making another application for habeas corpus and was contemplating a case against the government for contempt of court.

A number of other legal challenges to the government's boat people policy are in the pipeline. The Hong Kong government treats all arriving boat people as illegal immigrants pending a screening process to determine whether they qualify for refugee status.

#90316d8940 11/12/1990 ~French/German News Agency

JERUSALEM (NOV. 12) - Israeli Police Minister Ronni Milo has ordered a shake-up and demoted a senior official in his force after it was criticized in a report on last month's killing of 18 Palestinians in east Jerusalem.

The sanctions -- seen by analysts as mild -- aim to curtail protests from the

Israeli right-wing but also to respond to U.S. criticism over the police handling of the October 8 unrest, political leaders said Monday.

An official report on the killing of 18 Palestinians at the Dome of the Rock criticized three senior police officials for not taking adequate measures to prevent the disturbances involving stone-throwing Palestinians.

Mr. Milo announced late Sunday that General Police Superindentent Yaakov Terner remained in his post, but Arie Bibi, in command of Jerusalem, was effectively demoted by being moved to a secondary post in Tel Aviv.

He is to be replaced by Haim Albaldes.

Another officer who was criticized by the commission, Rahamim Comfort, in charge of Israel's southern police sector where Jerusalem is located, will be retired in January and replaced by Rafi Peled.

Mr. Milo also announced that Jerusalem police were to get 350 more men and a new special command post from which to monitor events in the old city, the holy places and in Jewish neighbourhoods adjacent to Arab quarters.

Some 250 police reinforcements joined their 2,000 colleagues in Jerusalem late Sunday.

Jerusalem is changing from being the political nerve centre for the 35-month-old uprising in the occupied territories to a focal point for Palestinian militants, sources close to the Israeli Defence Ministry said.

Three Israelis were stabbed to death here last month in revenge for the October 8 killings.

An Israeli coordinator in the occupied West Bank and Gaza Strip, Shmuel Goren, said late Sunday that 10,800 Palestinians from the territories were being barred from entering Israel for security reasons.

On the Gaza Strip, the army has dismantled a cell of the banned Moslem fundamentalist group Al Jihad, a military spokesman said.

#90316d8950 11/12/1990 ~French/German News Agency

MANILA (NOV. 12) - The Philippines' trade deficit climbed to 2.85 billion dollars in September, a 51 percent increase over 12 months, officials said Monday.

The National Statistics Office (NSO) said exports, led by electronics, rose by 4.1 percent to 6.05 billion dollars from January to September, but were outstripped by imports, topped by oil and capital goods, which rose by 15.6

percent to 8.90 billion dollars.

Meanwhile, the Central Bank confirmed that capital flight from the country reached 190 million dollars by August, a 342 percent increase over the same period last year.

From January to August this year, net foreign investments stood at 272 million dollars, 46.4 percent down on the same period last year, according to Central Bank figures released here this week.

The bank gave no breakdown of the capital flight, which emerged as the Philippine government was grappling with a budget and foreign exchange crisis complicated by the effects of the Gulf conflict.

Manila newspapers reported Monday that 174 million dollars was remitted abroad by foreign investors, principally from investments in the stock market after the sharp depreciation of the peso this year.

The newspapers said 13 million dollars was remitted abroad by foreign banks in Manila and three million dollars in capital was invested abroad, the dailies said.

#90316d8990 11/12/1990 ~French/German News Agency

BRUSSELS (NOV. 12) - The European Economic Community (EEC) urged here Monday that the United Nations tighten the land embargo of Iraq, and that a bloc of about 40 countries be asked to press for the release of hostages.

German Foreign Minister Hans-Dietrich Genscher told journalists that EEC foreign ministers had agreed to a German request that the United Nations should act to make the land embargo of Iraq more effective.

He said the EEC wanted to examine ways to stop leakages in the embargo, particularly involving Iraq's neighbours.

And French Foreign Minister Roland Dumas said the council of EEC foreign ministers had also agreed to ask about 40 countries, including some in the non-aligned bloc, to pressure Iraq into releasing hostages.

The foreign ministers gave a mixed reaction to the visit of former West German Chancellor Willy Brandt to Iraq to secure the release of hostages. Mr. Genscher said they expressed no criticism of Mr. Brandt's trip.

But a source close to the talks said Denmark, Belgium and the Netherlands had criticised individual initiatives to free hostages in Iraq and Kuwait.

The source said the three countries maintained that, if these individual

missions continued, the only hostages left in Iraq would be British and American, and this would be bad for international solidarity against Iraq.

At a summit of heads of state and government in Rome last month, the EEC agreed not to send any official missions to Iraq, and to discourage all other efforts to free the hostages except those carried out by the United Nations.

#90316d9040 11/12/1990 ~French/German News Agency

BERLIN (NOV. 12) - Despite the unification of Germany, "millions" of former East Germans are likely to move to the western part of the country in the near future, the Bundestag speaker Rita Suessmuth said in an interview published Monday.

"Experts are telling us that in the near future, millions will move definitively to the west, or at the least, go there to work," the speaker of parliament told Berliner Zeitung.

The continuing exodus is bad news for the German government, which was desperately hoping that the speedy unification of Germany, concluded on October 3, would reassure East Germans worried about their future.

Housing and social funds in former West Germany are already straining to accommodate 600,000 East German refugees who crossed over from the summer of 1989 to July 1 1990, the date when monetary union was achieved.

The haemorrhage - 3.7 percent of the population of the German Democratic Republic - contributed to the downfall of Communist leader Erich Honecker in October 1989 and the opening of the Berlin Wall, a month later.

But the right to travel also enabled millions of East Germans to witness, first hand, the gulf in living standards with the West. The exodus continued, even after the March 18 elections that gave East Germany its first democratic

government.

Population movements have not been officially recorded since July 1, when East Germany's Ostmark was replaced by the Deutschemark. But the state-run television channel, ZDF, estimated Sunday that roughly 100,000 easterners had moved to the west in the July-September period.

A chief cause is unemployment, or the threat of it, as the five eastern states make the painful adjustment to a market economy.

Mrs. Suessmuth said that to raise East German salaries to West German levels, in order to stem the flow, could only be a temporary solution.

"We are witnessing a relatively rapid increase in (eastern) salaries, but labour productivity is not following suit," she said.

BANGKOK (NOV. 12) - Five mourners were killed and 17 injured at a funeral in southern Thailand by two gunmen wielding automatic rifles, police said Monday.

The gunmen hid under cover of darkness in a rubber plantation in the southern province of Krabi, some 850 kilometers (500 miles) south of here, where the funeral was held late Saturday, Colonel Wichai Sukmongkol, the provincial police commander said.

While Buddhist monks were chanting prayers for the dead, a 60-year-old villager, the gunmen opened fire, emptying more than 30 rounds from their M-16 automatic rifles into the crowd of 200 mourners, he said.

The gunmen were trying to kill a prominent construction contractor, Samrong Jaiboon, who was a candidate for the post of village headman in an upcoming local election, Col. Wichai said.

#90316d9080 11/12/1990 ~French/German News Agency

RANGOON (NOV. 12) - Burma's military leader, General Saw Maung, said he would not give in to threats or intimidation demanding a transfer of power, it was reported here Monday.

Speaking to State Law and Order Restoration Council (SLORC) members and government employees in Pyay, 270 kilometers (170 miles) north of here on Sunday, the general stressed that any such transfer would be carried out according to the due process of law.

He made special reference to the demands made by the hijackers of the Thai

plane on Saturday which included the release of political prisoners, withdrawal of martial law and the immediate transfer of power to a civilian government.

"I am going according to a clearly defined process and nobody needs give us orders or directives in this regard," Gen. Saw Maung said.

And he warned government employees not to be swayed by outside influences, which he said would only get them into trouble.

The SLORC, which seized power in a bloody coup in September 1988, says it is following a power transfer process based on a new and comprehensive constitution.

Political parties here, including the leading National League for Democracy (NLD), which won a landslide victory in the May general election, have been told to go along with the process or face being deregistered.

At its central committee meeting on Friday, the NLD decided to accept the SLORC transfer power process.

AMMAN (NOV. 12) - Iraqi Deputy Prime Minister Saadoun Hammadi met here Monday with King Hussein to discuss the latest developments in the Gulf, Jordanian officials said.

King Hussein and the Iraqi envoy consulted on Arab and international efforts to find a peaceful settlement to the Gulf crisis and other conflicts in the Middle East.

Mr. Hammadi, who arrived here earlier Monday, also met Jordan's Prime Minister Moudar Badran.

King Hassan II of Morocco called Sunday for an Arab summit to avert war in the Gulf and said the gathering should be held on the basis of "decisions made by the international community".

While not specifically rejecting the call, Iraq insisted that such a summit "must not take place under pressure and threats from foreign forces that are violating sacred Moslem and Islamic values" in Saudi Arabia.

Jordan said earlier Monday it had not yet received an official invitation for a summit.

DHAKA (NOV. 12) - Saudi Arabia is to employ 25,000 Bangladeshi nationals who fled Kuwait and Iraq because of the Gulf crisis, a visiting professor from Singapore said Monday.

"This is only the beginning of the economic benefits countries like Bangladesh can expect out of the crisis," said Ishtiaq Hossain, a professor of political science at the National University of Singapore.

Saudi Arabian officials were not immediately available to confirm his comments which were made at a seminar on the implications of the Gulf crisis for South Asia.

Mr. Hossain said Bangladesh and countries with similar economies would have an "economic boom" of employment and trade opportunities when the crisis ended.

Some 100,000 Bangladeshis returned home after fleeing Kuwait and Iraq following Iraq's August 2 invasion of the tiny oil-rich emirate.

SYDNEY (NOV. 12) - A man described as the ''architect'' of an attempt to blow up an Indian prime minister in 1978 was sentenced to 14 years in jail Monday by the central criminal court of this Australian city.

Judge Michael Grove said Tim Anderson would have been jailed for life but for the fact that he was only 25 years old at the time and was under the influence of an Indian-inspired religious sect, Amanda Marga.

Members of the sect tried to blow up Moraji Desai, the then prime minister of India, during a meeting of Commonwealth heads of government conference in a Sydney hotel.

The device, concealed in a garbage container, killed two refuse collectors and a policeman, but missed the politicians.

Prosecutors said the sect tried to kill Desai to gain the release of its founder, Baba, from an Indian prison. The man convicted of planting the bomb, Evan Dunstan Pederick, was sentenced a year ago to 20 years in jail.

COPENHAGEN (NOV. 12) - The Danish financial and insurance group Baltica signed agreements with shareholders to avoid a hostile takeover by its biggest shareholder, the company said Monday.

The agreements signed with the French conglomerate Suez, which holds 22.8 per

cent of the shares, and Koebstadaernes Almindelige Brandsforsikring, a Danish fire-insurance company which holds 12 percent of the shares, were designed to calm fears and slow trading by major shareholder Hafnia.

Hafnia has aggressively acquired 33.5 percent of Baltica's shares recently giving it a blocking minority.

KAB's director, Alf Torp-Pedersen, confirmed that an agreement had been signed with Baltica but refused to give any details apart from saying they were "flexible and had a time limit."

According to the Danish financial weekly Mandag Morge, the battle between Baltica and Hafnia was intensified by the failure of a merger of the two groups.

Peter Christoffersen, president of Baltica, drew up merger plans a year and a half ago, but the plans failed because Baltica insisted Mr. Christoffersen be appointed president of the new group.

BAGHDAD (NOV. 12) - Former U.S attorney general Ramsey Clark voiced his opposition to the deployment of foreign troops in the Gulf here on Monday, the official Iraqi News Agency reported.

"I am opposed to foreign intervention in the Gulf and I refuse all military presence in the area," Mr. Clark was quoted as saying.

He also expressed support for a peace initiative announced by President Saddam Hussein on August 12 -- 10 days after Iraqi troops invaded Kuwait -- which links a solution to the Gulf crisis to an overall Middle East settlement.

"This initiative carries two essential ideas: a call for a dialogue between the concerned parties and the principle that says peace is indivisible," said Mr. Clark, whose country has massed around 230,000 troops in the Gulf.

Mr. Clark, who on Sunday met Justice Minister Akram Abdel Kader Ali, has been in Baghdad since Saturday at the invitation of the Iraqi Government in a bid to secure the release of foreigners held against their will in Iraq and Kuwait.

MOSCOW (NOV. 12) - Visiting top NATO generals John Galvin and Vigleik Eide on Monday held talks with Soviet Defense Minister Dmitri Yazov and Chief of Staff Mikhail Moiseyev, Tass news agency reported.

Gen. Galvin, supreme commander of the North Atlantic Treaty Organisation (NATO) allied forces in Europe, and Gen. Eide, chairman of the Western alliance's military committee, are the first such senior NATO officials to visit the Soviet Union.

Their trip follows that of Marshal Yazov to NATO headquarters in Belgium.

The Western military leaders, who arrived Sunday, have also visited the Taman motorized rifle division on the outskirts of the capital.

The two generals are also due to meet Soviet President Mikhail Gorbachev and Foreign Minister Eduard Shevardnadze during their visit.

KARLSRUHE (NOV. 12) - A senior official of Germany's development aid ministry has been arrested on suspicion of having spied for East Germany from 1964 until the beginning of this year, federal prosecution officials said here Monday.

The 53-year-old man, who was not named in the announcement, held a position as director at the Bonn ministry of economic cooperation.

The statement said he had been paid by the former ministry of state security of East Germany to provide documents and information. The man was arrested on Thursday, but this was not made public at the time.

Since the two Germanys united last month, a series of highly placed East German spies have been uncovered in the Bonn public service.

LAGOS (NOV. 12) - President Ibrahim Babangida on Monday ordered the immediate release of 11 former senior officials of Nigeria's National Electric Power Authority (NEPA) jailed for life almost two years ago for strike action, officials said here.

The government had in December 1988 pressed "economic sabotage" charges against the 11 for plunging the nation into darkness for three days, in support of workers' demands for wage increases.

Following appeals from the Nigerian Labour Congress (NLC), the central labour movement, and international organisations such as the Organisation of African Trade Union Unity (OATUU), the government last year reduced the life jail terms to 10 years.

General Babangida announced the pardon when he met a delegation of the NLC, led by its national president, Pascal Bafyau, who was reported as expressing "our desire to convince you that the lesson intended to be learned by our colleagues has been learned".

The heads of the nation's security agencies were also present at the meeting. Gen. Babangida said the authorities would work to have the 11 freed officials integrated into the civil service.

#90316d9620 11/12/1990 ~French/German News Agency

COLOMBO (NOV. 12) - Rebels of the Liberation Tigers of Tamil Eelam (Ltte) opened fire at a boat carrying Moslem refugees, killing one person and injuring two others in Sri Lanka's north-western Mannar district on Sunday evening, a Moslem political source said Monday.

Tamil rebels had also taken three persons captive from the boat, which had reached the Silavathurai coastal area, Sri Lanka Moslem Congress (Slmc) political party spokesman Dr. I.M. Illiyas said.

The Moslems were heading back to their homes whence they had fled two weeks back following threats by the Ltte, which is fighting in the north-east of the country for an independent homeland for the minority Tamils.

Dr. Illiyas said the attack was a deliberate attempt to prevent the Moslems from returning to their homes. This was one of the first groups which had tried to return to the Mannar district since the Moslems were 'ordered' to leave the area by the rebels.

Meanwhile, a defence ministry statement said Monday that in the continuing operations in Mannar troops found a 'large quantity' of anti personnel mines, 60 kilograms of explosives, and other items used by the rebels.

TOKYO (NOV. 12) - U.N. Secretary-General Javier Perez de Cuellar said here

Monday he was disappointed by the tough stance taken by Iraqi President Saddam Hussein, a French source said.

Mr. Perez de Cuellar made the statement in a 30-minute meeting with French Prime Minister Michel Rocard in which they discussed the possibility of resorting to Article 42 of the U.N. charter, which allows the use of force to back United Nations Security Council resolutions, a source in Mr. Rocard's delegation said.

The source quoted Mr. Perez de Cuellar as saying he was also disappointed that Mr. Hussein "showed no sign of wanting to withdraw from Kuwait or to abide by the U.N. resolutions" calling for his withdrawal from the oil-rich emirate he invaded August 2.

Mr. Perez de Cuellar said he would have sent a U.N. envoy to Baghdad to work to free the hostages but Mr. Hussein would not deal with such an emissary, the source said.

The secretary-general said the U.N. embargo was working, but that a dictatorship might be better able to endure hardship than a democracy, the source said.

Mr. Rocard met Mr. Perez de Cuellar between two ceremonies of the enthronement of Japanese Emperor Akihito.

Meanwhile, Japan, Egypt and the six members of the Gulf Cooperation Council (GCC) repeated their support for a peaceful solution to the Gulf crisis within the framework of the United Nations, a Japanese Foreign Ministry official said.

Foreign Minister Taro Nakayama met with his Egyptian Minister of State for Foreign Affairs Boutros Ghali, before talking with official representatives of the GCC, which groups Saudi Arabia, Kuwait, the United Arab Emirates, Oman, Bahrain and Qatar, the official said.

The representatives called for an Iraqi withdrawal from Kuwait, the restoration of Kuwait's legitimate government and the release of all the hostages, the official said.

DUMFRIES, SCOTLAND (NOV. 12) - The bomb which destroyed a Pan Am Boeing 747 on December 21, 1988 over the Scottish town of Lockerbie, killing 270 people, was in unaccompanied luggage put on board in Frankfurt, Germany, an inquiry into the incident said Monday.

It was the first time the inquiry officially announced that the bomb was put aboard in Frankfurt although the fact had been suspected since the outset.

Commissioner Derek Henderson, a witness, also confirmed that the bomb was hidden in a radio-cassette player.

The unaccompanied suitcase which contained the radio-cassette player was put on the plane which flew the first leg of the Frankfurt to New York flight stopping in London. The bronze-coloured Samsonite bag was then transferred to the Boeing 747 at London's Heathrow airport for the second leg of the flight to New York.

Mr. Henderson also said the luggage of an American-Lebanese passenger, Khaled Jaafar, was searched for drugs after the catastrophe but nothing was found.

Last month a U.S. televison programme suggested this passenger could have carried the bomb in his luggage.

MOSCOW (NOV. 12) - Armenian nationalist leader Paruyr Ayrikyan, who was exiled in July 1988 and deprived of his Soviet nationality, has returned to Armenia where he was elected to parliament in his absence, the independent Interfax news agency reported here Monday.

Mr. Ayrikyan, who spent a number of years in Soviet prison camps in the 1970's and 80's, went to visit his electoral district in Echmiadzin and was expected to address the Armenian parliament and a public meeting in Yerevan Monday evening, Interfax said.

The nationalist leader, who had been living in the United States, has called for a referendum on Armenian independence and has actively campaigned for the extension of Armenian sovereignty over Nagorny Karabakh, a mostly-Armenian enclave inside neighbouring Azerbaijan.

#90316d9870 11/12/1990 ~French/German News Agency

NDJAMENA (NOV. 12) - Thousands of Chadians turned out here on Monday in a show of support for President Hissein Habre after what the military described as fighting of a "rare intensity" in eastern Chad on Saturday.

Top politicians and soldiers attended the rally, called by the sole, ruling National Union for Independence and the Revolution (UNIR), and marchers shouted for "increased vigilance" against Libya and Sudan.

A UNIR resolution of support for Mr. Habre said the two neighbouring states were guilty of "criminal aggression" in Saturday's raid by a reported 2,000 men from Sudan, repelled after 24 hours' heavy fighting.

Chadian authorities blame the attacks on the Libyan-created Islamic Legion, said to have rear-bases in Sudan's western Darfur Province. In August, Ndjamena alleged that Tripoli, with which it has a long-running border dispute was preparing "total war" by pumping men and arms into Darfur.

The military high command on Monday stated that casualty figures would be issued later.

Libya has "categorically denied" any involvement in the fighting and said it was "simply a civil and tribal war".

A statement issued by Tripoli's embassy in Paris on Sunday advised "the Chadians to avoid accusing Libya each time that their rivalries, conflicts and internal problems explode".

Sudan's military regime on Sunday admitted that Chadian dissidents had invaded from Sudanese territory, but added in a foreign ministry statement that they had betrayed "promises" to Khartoum, which would "take all necessary measures to prevent, once and for all, such violations".)

The border with Sudan is a frequent trouble spot. There was heavy fighting in May, after a rebel incursion understood to have been led by former Chadian army chief Idriss Deby, who has attempted to overthrow Mr. Habre.

TOKYO (NOV. 12) - The five permanent members of the U.N. Security Council, along with Indonesia, will meet in Paris on November 23 to discuss the Cambodian conflict, a French source said here Monday.

The news came out of a meeting between French Prime Minister Michel Rocard and United Nations Secretary-General Javier Perez de Cuellar.

The decision to meet in Paris was made at a conference on Cambodia, which was held in Jakarta over the weekend, the source in Mr. Rocard's delegation said.

Mr. Perez de Cuellar told Mr. Rocard that the Jakarta meeting went well and was "a semi-success," the source said.

HARARE (NOV. 12) - Zimbabwean President Robert Mugabe Monday called on developing nations to cooperate in energy matters to counter negative effects of the Gulf crisis.

Mr. Mugabe, speaking as he officially opened a conference organised by the Zimbabwe committee of the World Energy Council, deplored the lack of cooperation among developing nations on energy.

The meeting here was attended by more than 250 delegates, including a large South African team and representatives of the World Bank, the United Nations and the Organization of Petroleum Exporting Countries (OPEC).

The World Energy Council is a London-based private organization with 90 member countries which every three years organizes the world's largest energy conference.

Mr. Mugabe added that the African continent was rich in natural resources but lacked the necessary techonology to be self-sufficient in energy. He added that developing countries should also help each other through technology transfers.

#90316d9990 11/12/1990 ~French/German News Agency

STUTTGART (NOV. 12) - France is to withdraw 20,000 of its soldiers from Germany in the course of next year, the commanding officer of French forces on German soil announced here Monday.

General Noel Chazarain said eight military units would be stood down in the course of 1991. He told Baden-Wuerttemberg state Premier Lothar Spaeth a total of 35 regiments would be withdrawn from Germany up to 1994.

The bulk of the French forces are based in this southwestern state on the French border. The area was part of France's military occupation zone after the German defeat in the Second World War.

A baden-Wuerttemberg state official said the French would abandon altogether three of their bases, at Karlsruhe, Muellheim and Kehl.

-30- 907
#90316e0020 11/12/1990 ~Latin America New Agency
VIENNA (NOV 12) EFE - The Albanian parliament Monday opened an unprecedented debate on the political loosening-up of Europe's last hard-line Stalinist redoubt, Albania's official ATA news agency reported.

Discussion is expected to last for most of the week and center on details of a new electoral law allowing multiple candidates to run as independents or as representatives of other groups in contesting parliamentary seats to be decided by secret ballot.

As announced last week by Premier Ramiz Alia, the reforms stop short of allowing rival political parties to challenge the rule of the Communists, who have maintained an iron grip on power since the end of World War II.

No date has been set for the polls, but observers said they were likely to be held early next year in a bid to come to grips with Albania's worsening economic crisis.

Alia last week also announced the lifting of the strict ban on all forms of religious worship in force since 1967, that saw hundreds of churches and mosques boarded up or torn down and the jailing of religious prosletyzers.

In Tokyo, meanwhile, where he was attending coronation ceremonies for the Emperor Akihito, Albanian Foreign Minister Reis Malile said his country was not yet ready to introduce a multi- party democractic system.

He added, however, that it was hoped the planned reforms would allow for the development of pluralist political currents within the single-party state.

Rattled by protests, Albania's ruling Communists have recently taken steps aimed at ending their country's self-imposed international isolation, and have expressed an interest in joining the 34-nation Conference on Security and Cooperation in Europe.

#90316e0037 11/12/1990 ~Latin America New Agency
Managua (NOV 12) EFE - Nicaragua's leading churchman, Cardinal Miguel Obando y Bravo, Monday urged the government of President Violeta Chamorro and ex-Contra rebel leaders to work together to solve their problems or risk "the outbreak of another civil war."

Archbishop of Managua, Obando y Bravo told a press conference that he would act as mediator between the ex-Contras and the government, but added that Chamorro had not so far asked for his services because "she feels capable of

solving the problems."

A recent wave of violence and unrest has been sparked by protests by ex-Contras who accuse Chamorro of reneging on a promise to redistribute land nationalized by the former leftist Sandinista government.

The former rebels have also demanded food grants and the disarming of pro-Sandinista civilians.

Last week, five people were killed and 35 injured during clashes between the former Contras and police in the Atlantic coastal town of Nueva Guinea, some 260 km southeast of the capital.

The former rebels have blocked a section of a key highway running from Managua to the Atlantic coast and have staged a sit-in since November 3 in a temporary cathedral in the outskirts of the capital.

Obando y Bravo Monday denied that the Catholic Church has urged the ex-Contras to take over the cathedral and other churches throughout the country.

The Catholic bishops "only preach against the use of violence," he said.

Eighteen mayors in the Nueva Guinea area who are sympathetic to the Contras say the rebels are also demanding the resignation of several top government officials including Armed Forces chief Humberto Ortega, who was defense minister in the Sandinista government.

But Obando y Bravo said the former rebels were not pushing for the resignations and added that there existed important differences between the former rebels' true demands and the mayors' claims.

Chamorro failed during weekend talks to convince the mayors to persuade the ex-Contras to lift the barricades on the coastal highway.

The president offered to travel to the town of Muelles de los Bueyes, 216 km south of the capital, to discuss with the demands with the former rebels, but the mayors rejected the idea and threatened to withdraw their support for Chamorro.

The government has left open the offer to meet with the ex-Contras November 21 in Muelles de los Bueyes.

The U.S.-backed Contras fought a nine-year war against the Sandinistas which ended when the former government handed over to Chamorro's coalition in April after losing elections earlier in the year.

SHANGHAI (NOV. 12) XINHUA - A YOUNG FARMER IN HONGQIAO TOWNSHIP, IN THE SUBURBS OF SHANGHAI, HAS SUCCEEDED IN GROWING 50 FOREIGN VEGETABLES DURING THE PAST THREE YEARS.

JAPANESE MUSKMELON IS A RARE AND PRECIOUS TREAT IN RESTAURANTS OF SHANGHAI. ONCE A JAPANESE BUSINESSMAN SENT EXPERTS TO TRY TO GROW MUSKMELON IN THE CITY, BUT FAILED. HE CONCLUDED THAT SHANGHAI HAS AN UNFAVORABLE CLIMATE AND THE WRONG SOIL CONDITIONS FOR MUSKMELON. CHEN XULIANG, HOWEVER, WAS DETERMINED TO GROW THE MELON. AFTER SEVERAL FAILED ATTEMPTS, HE FINALLY SUCCEEDED.

CHEN HAD BEEN SENT TO STUDY AT AN AGRICULTURE UNIVERSITY IN JAPAN IN 1980. THERE, HE WORKED HARD AND MASTERED A SERIES OF VEGETABLE PLANTING TECHNIQUES. WHEN HE RETURNED HOME, HE USED THE MONEY WHICH HE HAD SAVED IN JAPAN TO BUY AND BRING BACK FINE VEGETABLE STRAINS FROM FOREIGN COUNTRIES.

IN AUGUST 1987, CHEN AND HIS EIGHT COLLEAGUES TURNED 2.5 HECTARES OF WASTELAND IN JINGTING VILLAGE INTO A MODERN VEGETABLE PLANTATION. ON THIS PATCH OF LAND, HE PLANTED THE FOREIGN VEGETABLES WHICH HE HAD BROUGHT HOME, INCLUDING CELERY FROM HOLLAND, CHERRY TOMATOES FROM THE UNITED STATES, AND MUSKMELON AND ROMAINE LETTUCE FROM JAPAN.

CHEN HAS NOW LEARNED HOW TO SELECT AND RESERVE FINE SEEDS FOR PLANTING, WHICH WILL HELP THE SPREAD OF FOREIGN VEGETABLE CULTIVATION IN CHINA.

SINGAPORE (NOV. 12) XINHUA - SINGAPORE WILL BAN NON-PHARMACEUTICAL AEROSOL PRODUCTS CONTAINING HARMFUL CHLORO-FLUOROCARBONS (CFCS) FROM NEXT FEBRUARY.

ENVIRONMENT MINISTER AHMAD MATTAR ANNOUNCED RECENTLY THAT THE BAN WOULD INCLUDE THE IMPORT AND MAKING OF POLYSTYRENE SHEETS OR PRODUCTS USING CFCS.

IT MEANS THAT HOUSE-HOLD AEROSOL PRODUCTS, RANGING FROM HAIR-SPRAY TO FURNITURE POLISH AND INSECTICIDES, WILL NOT BE ALLOWED TO BE SOLD IN THE LOCAL MARKET IF THEY CONTAIN CFCS.

PRODUCTS SUCH AS DISPOSABLE CROCKERY AND WRAPPINGS USING POLYSTYRENE MATERIAL CONTAINING CFCS WILL NOT BE ALLOWED.

HOWEVER, PARMACEUTICAL AEROSOL PRODUCTS CONTAINING CFCS WOULD BE EXEMPTED FROM THE BAN FOR MEDICAL REASONS, SAID THE MINISTRY.

CFCS HARM THE ENVIRONMENT BECAUSE THEY DEPLETE THE OZONE LAYER WHICH SHIELDS THE EARTH'S SURFACE FROM HIGH LEVELS OF HARMFUL ULTRA-VIOLET RADIATION.

CFCS ALSO LEAD TO GLOBAL WARMING AND HAVE ADVERSE EFFECTS ON THE ECOLOGICAL SYSTEM.

DHAKA (NOV. 12) XINHUA - BANGLADESH, ONE OF THE LEAST DEVELOPED COUNTRIES IN THE WORLD HIT HARD BY THE CURRENT GULF CRISIS, IS EXPECTED TO RECEIVE MORE AID FROM ABROAD.

THE WORLD BANK HAS URGED DONORS TO FINALIZE AID AND CONSIDER APPROPRIATE ADDITIONAL SUPPORT TO BANGLADESH IN THE LIGHT OF THE GULF CRISIS TO HELP DHAKA REINFORCE ITS POLICY REFORMS.

A TWO-DAY MEETING, WHICH WAS ATTENDED BY MORE THAN ONE HUNDRED DELEGATES FROM 26 DONORS AND AGENCIES, REVIEWED THE ACTION PROGRAM FOR POLICY REFORM IN BANGLADESH FOR FISCAL 1991 STARTING JULY 1.

ACCORDING TO THE MEETING SOURCES QUOTED BY LOCAL MEDIA TODAY, THE MEETING'S CHAIRMAN S. ASAWUMA, DIRECTOR OF THE COUNTRY DEPARTMENT OF THE WORLD BANK, WELCOMED THE CONSIDERABLE PROGRESS MADE BY BANGLADESH IN MANY AREAS OF THE ACTION PROGRAM, PARTICULARLY IN FINANCIAL STABILITY AND MACRO-ECONOMIC STABILITY.

THE CHAIRMAN NOTED THAT MANY SPEAKERS IN THE MEETING WERE OF THE OPINION THAT BANGLADESH HAS MOVED CLOSER TO SELF-SUFFIENCY IN FOOD, BUT THEY SUGGESTED TO EXAMINE ALTERNATIVE POLICIES TO SUPPORT CROP DIVERSIFICATION AND THE LONGER TERM REQUIREMENT OF THE AGRICULTURAL SECTOR.

HE SAID THE BANGLADESH GOVERNMENT'S POLICY REFORMS IN AGRICULTURE, INDUSTRY AND FINANCIAL SECTORS HAD PROVIDED A MORE FAVORABLE CLIMATE FOR LONG-TERM (ECONOMIC) GROWTH.

THE MEETING ALSO TOOK NOTE OF THE GOVERNMENT'S SUBSTANTIALLY INCREASED ALLOCATION FOR EDUCATION, HEALTH, FAMILY PLANNING AND THE SOCIAL SECTORS, AND ATTENTION WAS DRAWN TO THE RECENT INITIATIVE TAKEN BY DHAKA TO INTEGRATE WOMEN MORE EFFECTIVELY IN THE DEVELOPMENT PROCESS, HE SAID.

DHAKA (NOV. 12) XINHUA - A VISITING EXPERT HAS SAID HERE THAT MOTHER'S MILK PROTECTS INFANTS AGAINST DIARRHOEA, CHOLERA, COMMON ILLNESS AND RESPIRATORY TRACT INFECTIONS.

BRIEFING NEWSMEN HERE ON SUNDAY, M. POTTSS, PRESIDENT OF AMERICAN BASED "FAMILY HEALTH INTERNATIONAL" NOW VISITING BANGLADESH, SAID BREAST-FEEDING WAS NATURE'S CONTRACEPTIVE AND CONSTITUTED ONE OF THE MOST SIGNIFICANT INTERVENTIONS AVAILABLE TO MOTHERS IN ACHIEVING BETTER BIRTH SPACING.

HE SAID BREAST-FEEDING WAS MORE ECONOMIC THAN MILK SUBSTITUTES. ALTHOUGH A BREAST-FEEDING WOMAN NEEDS MORE FOOD AND LIQUID THAN NORMAL, THE SUBSTITUTES WERE BEING IMPORTED IN BANGLADESH AT THE COST OF FOREIGN EXCHANGE, HE ADDED.

M.Q.K. TALUKDER, A PAEDIATRITIAN, SAID AT THE BRIEFING THAT ACCORDING TO A LATEST STUDY, 80 PERCENT OF MOTHERS IN BANGLADESH HAD TURNED TO ARTIFICIAL FEEDING OF THEIR BABIES, BECAUSE THE RURAL MOTHERS HAD THE CONCEPTION THAT ANY POWDERED MILK IS A BREAST MILK SUBSTITUTE.

HE SAID CHILDREN UP TO FIVE MONTHS SHOULD BE EXCLUSIVELY BREAST FED AND THIS SHOULD CONTINUE UP TO TWO YEARS WITH WEANING FOOD. THE MOTHER SHOULD TAKE MORE NUTRITIOUS FOOD FROM PREGNANCY TO AS LONG AS THE BABY IS BREASTFED, HE NOTED.

WELLINGTON (NOV. 12) XINHUA - THE NEW ZEALAND GOVERNMENT IS TOUGHENING UP REGULATIONS TO MAKE SURE IMMIGRATING BUSINESS PEOPLE TO THE COUNTRY INVEST MONEY, LOCAL PRESS REPORTED TODAY, QUOTING BILL BIRCH, MINISTER OF LABOR, IMMIGRATION, STATE SERVICE AND PACIFIC ISLAND AFFAIRS.

BUSINESS IMMIGRANTS WOULD BE REQUIRED TO BRING WITH THEM ABOUT 500,000 N.Z. DOLLARS (300,000 U.S. DOLLARS) TO NEW ZEALAND BEFORE VISAS ARE ISSUED, THOUGH THE EXACT FIGURE WAS YET TO BE DECIDED, HE ADDED.

THE MINISTER'S REMARKS CAME ON SUNDAY WHEN COMMENTING REPORTS FROM AUSTRALIA THAT LARGE NUMBERS OF TAIWANESE PEOPLE WITH NO INTENTION OF SETTING UP BUSINESSES WERE BEING ALLOWED INTO AUSTRALIA ON A BUSINESS MIGRANT SCHEME.

HOWEVER, ONLY A TINY PROPORTION OF MIGRANTS ON THE SCHEME WERE MAKING ANY INVESTMENTS OTHER THAN IN REAL ESTATES, HE NOTED.

AT PRESENT, BUSINESS IMMIGRANTS DO NOT HAVE TO TRANSFER MONEY TO NEW ZEALAND BEFORE VISAS ARE GRANTED.

CANBERRA (NOV. 12) XINHUA - AUSTRALIA AND BRUNEI HAVE AGREED TO ESTABLISH DIRECT AIR SERVICES BETWEEN PERTH, WESTERN AUSTRALIA, AND BRUNEI AND TO INCREASE AIRLINE CAPACITY BETWEEN DARWIN, THE NORTHERN TERRITORY OF AUSTRALIA, AND BRUNEI.

ANNOUNCING THE AGREEMENT TODAY, AUSTRALIAN TRANSPORT AND COMMUNICATIONS MINISTER KIM BEAZLEY SAID ROYAL BRUNEI AIRLINES HAD BEEN GIVEN PERMISSION TO OPERATE A WEEKLY BOEING 757 SERVICE BETWEEN PERTH AND BRUNEI.

BEAZLEY SAID HERE IN A STATEMENT THAT "THIS AGREEMENT HAS THE POTENTIAL TO FURTHER DEVELOP INBOUND TOURISM TO WESTERN AUSTRALIA AND INCREASE EXPORT OPPORTUNITIES FOR WESTERN AUSTRALIA'S PRIMARY PRODUCERS AND MANUFACTURERS."

THE MINISTER SAID THE AIRLINE WOULD BE PERMITTED ALSO TO INCREASE ITS CAPACITY TO DARWIN FROM TWO BOEING 737 TO TWO BOEING 757 FLIGHTS A WEEK.

UNDER THE NEW ARRANGEMENTS, QANTAS, AUSTRALIA'S INTERNATIONAL AIRLINE, WILL BE ALLOWED TO OPERATE TWO BOEING 747 SERVICES TO BRUNEI EACH WEEK, EITHER DIRECT OR VIA INTERMEDIATE POINTS, AND BEYOND.

AGREEMENT HAS ALSO BEEN REACHED ON THE TEXT OF AN AIR SERVICES AGREEMENT TO REPLACE TEMPORARY ARRANGEMENTS AGREED IN 1984.

BEAZLEY NOTED THAT THE NEW ARRANGEMENTS REPRESENTED AN IMPORTANT PHASE IN AUSTRALIA'S AVIATION AND BILATERAL RELATIONS WITH BRUNEI.

WELLINGTON (NOV. 12) XINHUA - THE NEW ZEALAND FOOD PRICE INFLATION HAS DROPPED TO A 17-YEAR LOW OF 3.3 PERCENT IN THE YEAR ENDING OCTOBER, ACCORDING TO OFFICIAL STATISTICS.

THE LATEST DROP CAME AFTER FOOD PRICES RECORDED THE BIGGEST MONTHLY FALL OUTSIDE A PRICE FREEZE IN ALMOST 18 YEARS. PRICES FELL 0.7 PERCENT IN OCTOBER, THE BIGGEST DROP SINCE A 1 PERCENT FALL IN NOVEMBER 1972.

WARM WEATHER HAS CONTRIBUTED MUCH TO THE GROWING OF TOMATOES AND GREEN LEAF VEGETABLES. THE STATISTICS DEPARTMENT SAID TODAY LOW PRICES FOR FRESH FRUIT AND VEGETABLES, CAULIFLOWERS AND TOMATOES IN PARTICULAR, AND FOR SHEEP MEAT WERE THE MAIN CONTRIBUTORS TO THE FALL IN OCTOBER.

PRICES ALSO FELL FOR SUGAR, SOFT DRINKS AND POTATO CRISPS, BUT ROSE FOR CABBAGES AND CARROTS.

THE FOOD PRICE INDEX SHOWED A 4.6 PERCENT INCREASE IN THE YEAR TO SEPTEMBER. IN OCTOBER 1989 IT STOOD AT 11.7 PERCENT.

#90316h0066 11/12/1990 ~Chinese News Agency

ISLAMABAD (NOV. 12) XINHUA - THE PAKISTAN GOVERNMENT HAS SIGNED THREE AGREEMENTS RECENTLY WITH FOREIGN COUNTRIES IN A BID TO REVIVE BARTER TRADE,

OFFICIAL SOURCES SAID HERE MONDAY.

OUT OF THE THREE, AN 100 MILLION U.S. DOLLARS AGREEMENT WAS SIGNED EACH BY TRADING CORPORATION OF PAKISTAN (TCP) WITH FINLAND AND SWEDEN. ANOTHER AGREEMENT OF 100 MILLION U.S. DOLLARS WAS SIGNED BY THE MINISTRY OF COMMERCE WITH BULGARIA.

THE GOVERNMENT IS ALSO NEGOTIATING TO SIGN A NEW AGREEMENT OF 100 MILLION U.S. WITH HUNGARY AND IT IS IN THE FINAL STAGE, THE SOURCES SAID.

PAKISTAN STOPPED BARTER TRADE AFTER JUNE THIS YEAR DUE TO PRESSURE FROM THE INTERNATIONAL MONETARY FUND.

UNDER THE RECENTLY SIGNED BARTER TRADE AGREEMENTS, PAKISTAN WILL IMPORT EDIBLE OIL (PALM AND SOYBEAN), GRAIN, FERTILIZER, PETROLEUM PRODUCTS, OIL EXPLORATION EQUIPMENTS, ROAD BUILDING EQUIPMENTS, MINING EQUIPMENTS, VEHICLES AND SPARES, AND TELECOMMUNICATION EQUIPMENTS.

THE LIST OF EXPORTABLE ITEMS INCLUDES RAW COTTON, COTTON WASTE, COTTON YARN, TEXTILE GARMENTS AND MADE-UPS, FINISHED LEATHER GOODS, PETROLEUM PRODUCTS, STEEL MILL PRODUCTS, CARPETS, CHROME ORE, SEA FOOD, RICE, FRUITS AND VEGETABLES.

#90316h0067 11/12/1990 ~Chinese News Agency

WELLINGTON (NOV. 12) XINHUA -- A GROUP OF NEW ZEALANDERS INTERNED BY THE JAPANESE DURING THE SECOND WORLD WAR IS CLAIMING 14.8 MILLION U.S. DOLLARS FROM THE JAPANESE GOVERNMENT.

SOME 740 NEW ZEALANDERS ARE EACH CLAIMING 20,000 U.S. DOLLARS FROM THE JAPANESE AS PART OF AN INTERNATIONAL CAMPAIGN BY 240,000 PEOPLE FROM SIX COUNTRIES TO GET ACKNOWLEDGMENT FROM JAPAN OF ITS WAR CRIMES. THE MONEY WAS FOR EACH FORMER PRISONER STILL ALIVE OR FOR THEIR DIRECT NEXT-OF-KIN.

ALMOST ALL OF THE NEW ZEALANDERS INVOLVED WERE CAPTURED IN THE DUTCH EAST INDIES (NOW INDONESIA) DURING THE WAR. ABOUT 75 PERCENT OF THEM WERE CIVILIANS AND MOSTLY OF DUTCH DESCENT, ACCORDING TO HENK ZEEMAN, CHAIRMAN OF THE EX-JAPAN WAR VICTIMS NEW ZEALAND ACTION COMMITTEE.

ZEEMAN SAID THE CLAIM ON BEHALF OF CANADIAN, BRITISH, AMERICAN, AUSTRALIAN, DUTCH AND NEW ZEALAND PRISONERS OF WAR WAS FORWARDED FROM THE HUMAN RIGHTS CENTER IN GENEVA TO JAPAN IN AUGUST.

A LOCAL MEDIA REPORT SAID TODAY THAT THE NEW ZEALAND GROUP APPROACHED THE JAPANESE EMBASSY IN WELLINGTON ON THE MATTER.

ALTHOUGH THE 20,000 U.S. DOLLARS WOULD BE USED TO THOSE SUFFERING MEDICAL

PROBLEMS AS A RESULT OF THEIR INTERNMENT, IT WAS AN ARBITRARY FIGURE AND WHAT THE FORMER PRISONERS REALLY WANTED WAS AN ADMISSION OF GUILT FROM THE JAPANESE THE REPORT SAID.

"IT'S A FEASIBLE AMOUNT FOR THEM TO GIVE US. WE WANT AN ACKNOWLEDGMENT THAT WILL HURT THEM A BIT. AN APOLOGY IS NOT ENOUGH," ZEEMAN SAID, ADDING THAT "THE 20,000 DOLLARS IS NOT ENOUGH FOR WHAT WENT THROUGH, BUT WOULD PUT AN END TO THIS AFFAIR."

HE SAID GENERALLY THERE WAS FAR LESS ANIMOSITY TOWARDS GERMANS FROM THOSE WHO HAD SUFFERED DURING THE WAR BECAUSE WEST GERMANY HAD GIVEN 94 BILLION U.S. DOLLARS IN REPARATIONS.

THE INTERNATIONAL GROUP SENT A TELEGRAM AT THE WEEKEND TO JAPANESE EMPEROR AKIHITO CONGRATULATING HIM ON HIS ENTHRONEMENT AS EMPEROR. "IT IS OUR UNDERSTANDING THAT YOU ACKNOWLEDGE THE WAR CRIMES FOR WHICH JAPAN WAS FOUND GUILTY BY THE INTERNATIONAL MILITARY TRIBUNAL OF THE FAR EAST IN WORLD WAR II " THE TELEGRAM SAID.

"WE WOULD BE GRATEFUL IF YOU WOULD MAKE THE NECESSARY ARRANGEMENTS TO HAVE THESE CLAIMS CONSIDERED BY YOUR GOVERNMENT AT THE EARLIEST OPPORTUNITY," THE TELEGRAM ADDED.

NINGBO (NOV. 12) XINHUA - THE LARGEST TRADE DOCK OPEN TO TAIWAN BUSINESS IS BEING BUILT IN SHIPU HARBOR, LOCATED IN XIANGSHAN COUNTY OF NINGBO CITY IN SOUTHEAST CHINA'S ZHEJIANG PROVINCE.

SHIPU HARBOR IS A WELL KNOWN SHIP HAVEN. FISHING VESSELS FROM TAIWAN HAVE OFTEN COME TO THE HARBOR DURING THE TYPHOON SEASON TO TAKE SHELTER FROM THE WIND. THE VESSELS USUALLY REPLENISH THEIR OIL SUPPLY AND REPAIR THEIR SHIPS WHILE DOCKED IN THE HARBOR. ILL STRICKEN FISHERMEN HAVE ALSO RECEIVED MEDICAL TREATMENT IN THE HAVEN.

THE NEW 3,000 TON DOCK WILL BE 81 METERS LONG AND 14.5 METERS WIDE, MAKING IT 10 TIMES THE SIZE OF THE DOCK BEING USED NOW. WHEN COMPLETED, IT WILL BE CAPABLE OF BERTHING 5,000 TON VESSELS. IN ADDITION, A 2,000 SQUARE METER RECEPTION BUILDING AND A 1,600 SQUARE METER STOREHOUSE WILL ALSO BE BUILT.

THE CONSTRUCTION OF THE DOCK IS BEING ORGANIZED BY THE NINGBO COMMUNICATIONS COMMITTEE, A SUBORDINATE TO THE MINISTRY OF COMMUNICATIONS. THE MAIN PROJECT, THE UNDER WATER PILE DRIVING, IS EXPECTED TO BE COMPLETED BY THE END OF THIS YEAR.

BEIJING (NOV. 12) XINHUA - CHINESE PREMIER LI PENG SAID HERE TODAY THAT THE NEXT DECADE WILL WITNESS FAST GROWTH IN CHINA'S TELECOMMUNICATIONS SECTOR.

IN HIS ADDRESS TO THE FIFTH SESSION OF THE GENERAL ASSEMBLY AND THE 14TH

SESSION OF THE MANAGEMENT COMMITTEE OF THE ASIA-PACIFIC TELECOMMUNITY (APT), LI SAID THAT CHINA IS MAPPING OUT PLANS FOR THE NEXT DECADE AS WELL AS THE NEXT FIVE-YEAR PLAN FOR ECONOMIC DEVELOPMENT, AND THAT TELECOMMUNICATIONS WILL PLAY A VERY IMPORTANT ROLE.

"WE WILL PAY ATTENTION NOT ONLY TO QUANTITY BUT ALSO QUALITY," LI SAID, ADDING THAT CHINA WILL DEVELOP DIGITAL EXCHANGE TECHNOLOGY, OPTICAL FIBER, AND SATELLITE TELECOMMUNICATIONS.

ALSO AT TODAY'S OPENING CEREMONY, CHINA'S MINISTER OF POSTS AND TELECOMMUNICATIONS YANG TAIFANG SAID THAT BY THE YEAR 2000 CHINA WILL INCREASE ITS TELECOMMUNICATIONS CAPACITY SEVEN-FOLD OVER THAT OF 1980.

THIS MORNING'S CEREMONY WAS ALSO ATTENDED BY DR. PEKKA TARJANNE, SECRETARY-GENERAL OF THE INTERNATIONAL TELECOMMUNICATION UNION, OFFICIALS OF THE APT, AS WELL AS 133 GENERAL ASSEMBLY DELEGATES FROM 21 COUNTRIES AND REGIONS.

DISCUSSION DURING THE FIFTH SESSION WILL INCLUDE THE APT GOALS AND STRATEGY FOR THE NEXT DECADE, AND SPECIFIC PLANS FOR THE NEXT THREE YEARS. THE MEETING IS SCHEDULED TO END ON NOVEMBER 23.

THE GENERAL ASSEMBLY SESSION IS HELD IN EVERY THREE YEARS AND THE MANAGEMENT COMMITTEE HOLDS ANNUAL SESSIONS.

MEXICO CITY (NOVEMBER 12) XINHUA - PRESIDENTS OF COLOMBIA AND VENEZUELA SIGNED A DECLARATION SUNDAY REAFFIRMING THEIR WILLINGNESS TO SPEED UP BILATERAL INTEGRATION, A COLOMBIAN RADIO BROADCAST REPORTED.

THE DOCUMENT WAS SIGNED DURING A PRIVATE MEETING BETWEEN VENEZUELAN PRESIDENT CARLOS ANDRES PEREZ AND HIS COLOMBIAN COUNTERPART CESAR GAVIRIA IN THE VENEZUELAN BORDER CITY OF SAN CRISTOBAL.

THE AGREEMENT REAFFIRMED THEIR WILLINGNESS TO SPEED UP THE PROCESS OF BILATERAL INTEGRATION.

GAVIRIA AND ANDRES PEREZ ACKNOWLEDGED THE WORK OF SEVERAL BILATERAL COMMISSIONS FOR THE STRENGTHENING OF INTEGRATION BETWEEN THE TWO COUNTRIES, THE BROADCAST SAID.

THE PRESIDENTS REITERATED THEIR WILLINGNESS TO WORK FOR SOLUTIONS TO UNRESOLVED DIFFERENCES BETWEEN THE TWO NATIONS THROUGH DIALOGUE.

THEY SAID THAT THEIR BORDER COOPERATION PLAN WAS A MAJOR STEP FORWARD WITHIN THE LARGER LATIN AMERICAN FRAMEWORK OF REGIONAL INTEGRATION.

THEY CALLED FOR CONTINUED WORK OF THE BILATERAL COMMISSIONS AND AGREED TO HOLD BIANNUAL PRESIDENTIAL MEETINGS TO EVALUATE THE COMMISSIONS' PROGRESS.

#90316h0145 11/12/1990 ~Chinese News Agency

TEHRAN (NOV. 12) XINHUA - IRAN NOW PLANS TO COOPERATE WITH QATAR IN EXPLOITING AN OFF-SHORE GAS FIELD IN THE GULF AT AN ESTIMATED COST OF 3 BILLION U.S. DOLLARS, IRAN'S DEPUTY OIL MINISTER M. NA'IMI SAID HERE TODAY.

PLANS HAVE BEEN DRAFTED FOR JOINT EXPLOITATION OF THE PAS GAS FIELD, WHICH IS EXPECTED TO START PRODUCTION BY THE END OF 1994, THE OFFICIAL ADDED.

THE GAS FIELD, ONE OF THE LARGEST IN THE WORLD, LIES HALFWAY BETWEEN THE IRANIAN COAST AND QATAR.

WITH PROVEN RESERVES OF 14,000 BILLION CUBIC METERS, IRAN IS THE WORLD'S SECOND RICHEST COUNTRY IN GAS RESOURCES, NEXT ONLY TO THE SOVIET UNION.

FACING SHORTAGES OF HARD CURRENCY, IRAN HAS DECIDED TO SEEK FOREIGN COOPERATION IN DEVELOPING ITS GAS INDUSTRY.

NA'IMI DISCLOSED THAT IRAN IS CURRENTLY EXPORTING 2 TO 3 BILLION CUBIC METERS OF NATURAL GAS ANNUALLY SINCE THE SOUTHERN KANGAN GAS REFINERY STARTED OPERATION IN MARCH.

THE SOVIET UNION IS THE BIGGEST BUYER OF IRANIAN GAS. THE TWO COUNTRIES RESUMED THEIR GAS DEAL IN APRIL AFTER AN 11-YEAR BREAK.

THE ISLAMIC REPUBLIC IS ALSO STRIVING TO EXPORT GAS TO YUGOSLAVIA, BULGARIA, FRANCE AND ITALY.

WITH THE EXISTING PIPELINES PUMPING 3 BILLION CUBIC METERS OF IRANIAN NATURAL GAS TO THE SOVIET UNION ANNUALLY, IRAN PLANS TO LAY ANOTHER PIPELINE THROUGH TURKEY BY SEEKING FOREIGN INVEST- MENTS.

TOKYO (NOV. 12) KYODO - NAMIBIAN FOREIGN MINISTER THEO BEN GURIRAB ON MONDAY REQUESTED MORE JAPANESE INVESTMENT IN HIS COUNTRY, FOREIGN MINISTRY OFFICIALS SAID.

GURIRAB TOLD JAPANESE FOREIGN MINISTER TARO NAKAYAMA THAT HIS COUNTRY HAS PROMOTED EFFORTS TO BUILD ITS ECONOMY SINCE ITS INDEPENDENCE FROM SOUTH AFRICA ON MARCH 21.

GURIRAB REQUESTED FURTHER ECONOMIC AND FINANCIAL HELP FROM JAPAN, AND ASKED TOKYO TO INCREASE TRADE WITH AND INVESTMENT IN NAMIBIA. HE ALSO ASKED JAPAN TO PURCHASE URANIUM ORE FROM HIS COUNTRY, THE OFFICIALS SAID.

NAKAYAMA RESPONDED THAT JAPAN HOPES TO SUPPORT NAMIBIA'S STATE-BUILDING EFFORTS, AND ASKED GURIRAB TO SPECIFY THE ECONOMIC ASSISTANCE NAMIBIA EXPECTS FROM JAPAN.

NAKAYAMA ALSO URGED GURIRAB TO CONSULT WITH JAPANESE BUSINESS CIRCLES ON TRADE AND INVESTMENT MATTERS.

-30- 1006

#90316k0035 11/12/1990 ~Japanese News Agency

TOKYO (NOV. 12) KYODO - FOREIGN MINISTER TARO NAKAYAMA TOLD BHUTAN'S FOREIGN MINISTER DAWA TSERING ON MONDAY THAT JAPAN WILL CONTINUE HELPING THE NATION WITH ITS ECONOMIC DEVELOPMENT PLAN.

NAKAYAMA, MEETING TSERING AT THE MINISTRY'S IIKURA GUESTHOUSE, ALSO SAID HE WANTS TO PROMOTE YOUTH EXCHANGES BETWEEN JAPAN AND BHUTAN AS WELL AS OTHER SOUTH ASIAN NATIONS.

NOTING THAT JAPAN AND BHUTAN HAVE STRENGTHENED BILATERAL TIES RECENTLY, NAKAYAMA SAID JAPAN WILL CONTINUE EXTENDING ECONOMIC ASSISTANCE TO BHUTAN, PARTICULARLY IN THE FIELD OF AGRICULTURE.

NAKAYAMA ASKED TSERING ABOUT THE PROSPECT FOR A PLANNED SUMMIT MEETING OF THE SOUTH ASIAN ASSOCIATION FOR REGIONAL COOPERATION (SAARC) TO BE HELD NEXT WEEK, FOREIGN MINISTRY OFFICIALS SAID.

SAARC, FORMED BY INDIA, PAKISTAN, BANGLADESH, SRI LANKA, NEPAL, THE MALDIVES, AND BHUTAN, AIMS TO WORK TOGETHER FOR THE DEVELOPMENT OF THE SOUTH ASIAN REGION.

TSERING EXPRESSED PESSIMISM ABOUT THE MEETING AND SUGGESTED HE COULD NOT EXPECT MUCH FROM THE ASIAN GROUP UNLESS POLITICAL SITUATION IN THE AREA TURNED MORE FAVORABLE, THE OFFICIALS SAID.

TSERING PRAISED JAPAN'S ECONOMIC AND TECHNOLOGICAL AID TO THE COUNTRY, THEY SAID.

TSERING TOLD NAKAYAMA THAT JAPAN CAN PLAY A GREATER ROLE FOR WORLD PEACE AND PROSPERITY.

TOKYO (NOV. 12) KYODO - A JAPANESE DANCER SET OFF FIRECRACKERS MONDAY AT A

ROADSIDE IN TOKYO SHORTLY BEFORE EMPEROR AKIHITO PASSED BY IN A MOTORCADE AND WAS IMMEDIATELY ARRESTED BY POLICE.

GENSHU HANAYANAGI, 49, A PERFORMER OF TRADITIONAL JAPANESE DANCE, WAS DETAINED ON CHARGES OF VIOLATING THE ROAD TRAFFIC LAW, POLICE SAID.

THEY SAID HANAYANAGI SET OFF THE FIRECRACKERS BY THE ROADSIDE IN THE AOYAMA DISTRICT AS THE EMPEROR'S MOTORCADE WAS APPROACHING.

AT THE SOUND OF THE FIRECRACKERS, POLICE MOTORCYCLISTS PROTECTING THE MOTORCADE SWERVED TOWARD THE CONVERTIBLE CAR CARRYING EMPEROR AKIHITO AND EMPRESS MICHIKO, BUT THE PROCESSION ITSELF WAS NOT AFFECTED.

EARLIER IN THE SAME AREA, POLICE ALSO TOOK AWAY THREE MEN WHO TRIED TO PUT UP A BANNER INSCRIBED WITH A SLOGAN PROTESTING AGAINST THE ENTHRONEMENT CEREMONY.

-30- 1012

#90316k0038 11/12/1990 ~Japanese News Agency

TOKYO (NOV. 12) KYODO - PHILIPPINE PRESIDENT CORAZON AQUINO ON MONDAY ASKED JAPAN TO EXTEND FINANCIAL AID TO HER NATION, SAYING THE PHILIPPINE ECONOMY HAS BEEN HARD HIT BY THE PERSIAN GULF CRISIS, GOVERNMENT OFFICIALS SAID.

AQUINO MADE THE PLEA AT A 20-MINUTE MEETING WITH FINANCE MINISTER RYUTARO HASHIMOTO AT A TOKYO HOTEL. THE MEETING TOOK PLACE ON THE OCCASION OF HER ATTENDANCE OF THE ENTHRONEMENT CEREMONY OF EMPEROR AKIHITO.

FINANCE MINISTRY OFFICIALS SAID AQUINO BRIEFED HASHIMOTO ON THE ECONOMIC PLIGHT OF HER NATION, ESPECIALLY IN LIGHT OF THE RETURN OF MIGRANT WORKERS FROM THE MIDDLE EAST AND THE SHARP UPSWING IN CRUDE OIL PRICES.

SHE SOUGHT JAPAN'S AID ASIDE FROM A LOAN PACKAGE NOW BEING DISCUSSED WITH THE INTERNATIONAL MONETARY FUND (IMF), THE OFFICIALS SAID.

HOWEVER, HASHIMOTO STOPPED SHORT OF ACCEPTING THE REQUEST IMMEDIATELY, MERELY SAYING HE WANTS THE PHILIPPINES TO PROMOTE NEGOTIATIONS WITH THE IMF FIRST, THEY SAID.

IN MAY LAST YEAR THE PHILIPPINES WAS PERMITTED TO OBTAIN 800 MILLION DOLLARS IN AID FROM THE IMF.

BUT THE EXTENSION OF AID HAS BEEN SUSPENDED BECAUSE OF THE ISLAND REPUBLIC'S POSSIBLE FAILURE TO ACHIEVE FISCAL RECONSTRUCTION GOALS IN THE WAKE OF LAST JULY'S STRONG EARTHQUAKE AND THE ENSUING GULF CRISIS.

NEGOTIATIONS ARE NOW UNDER WAY BETWEEN THE PHILIPPINES AND THE IMF REGARDING NEW FISCAL REHABILITATION TARGETS.

#90316k0043 11/12/1990 ~Japanese News Agency
TOKYO (NOV. 12) KYODO - JAPAN AND THE SIX GULF COOPERATION COUNCIL (GCC) COUNTRIES AGREED MONDAY TO EXPAND THEIR RELATIONS OVER A WIDER RANGE OF AREAS, FOREIGN MINISTRY OFFICIALS SAID.

JAPANESE FOREIGN MINISTER TARO NAKAYAMA REACHED THE ACCORD DURING A GROUP MEETING WITH REPRESENTATIVES OF THE UNITED ARAB EMIRATES, BAHRAIN, KUWAIT, OMAN, QATAR, AND SAUDI ARABIA.

AMONG THEM WERE PRINCE NAWAF BIN ABDULAZIZ AL-SAUD OF SAUDI ARABIA AND KUWAITI MINISTER OF STATE FOR FOREIGN AFFAIRS SHAIKH NASSER MUHAMMAD AL-AHMAD AL-SABAH.

THE RIYADH-BASED GCC, SET UP IN 1981, AIMS AT PROMOTING COOPERATION AND COORDINATION AMONG ITS MEMBERS.

AL-SAUD, SPEAKING ON BEHALF OF ALL THE SIX GCC COUNTRIES, PRAISED JAPAN FOR TAKING A FIRM POSITION AGAINST IRAQ OVER ITS INVASION OF KUWAIT ON AUGUST 2.

AL-SAUD TOLD NAKAYAMA THAT THE GCC HAS DEMANDED IRAQ MAKE AN UNCONDITIONAL PULLOUT FROM THE OIL-RICH KINGDOM AND THAT THE PERSIAN GULF CRISIS SHOULD BE RESOLVED PEACEFULLY.

HE RENEWED GCC CALLS FOR RESTORING THE LEGITIMATE KUWAITI GOVERNMENT, OFFICIALS SAID.

JAPAN AND THE GCC ALSO AGREED THAT THE IRAQI GOVERNMENT SHOULD FREE FOREIGNERS WHO ARE DETAINED AT STRATEGIC LOCATIONS IN IRAQ AS "HUMAN SHIELDS."

#90316m0004 11/12/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (NOV. 12) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"I think we're in the midst of a liquidity crisis ... brought about by the banks being unwilling to lend money to the private sector," says WILLIAM GROSS. "The Federal Reserve can put money into the system ... but if banks aren't willing to lend it to corporations because they are afraid of bad loans and risky loans and writeoffs, then the private economy will suffer. ... We saw some of that in the 1930s, but it's not as bad this time because of safety nets in the economy, but it's a situation that is very serious." He looks for the economy to "stagger" for the next 12 months. ("Wall Street Week", 11/9)

"In general, I don't think you will see the banks react favorably" to a quarter-point cut in the Federal funds rate, says ALAN LERNER at BANKERS TRUST. "In normal times, it might be enough to get the prime down. But right now the banks want to build back profit margins." Another banker, who did not want to be identified, says, "If you wanted to get a quick and dramatic reduction in the prime, you would have to cut the funds rate by 50 basis points." (NYT, 11/12)

"They've got to step on the gas pedal a little bit," STEPHEN GALLAGHER at KIDDER, PEABODY says of Fed credit policy. JEREMY GLUCK at MITSUBISHI BANK puts the odds of the Fed easing the federal funds rate this week at only 50-50 although he does expect a cut by the end of the month. He says a delay until after Friday's CPI report is probable because "the Fed is still concerned about its inflation-fighting image." ("Investor's Daily", 11/12)

"I would be very surprised if the Fed didn't ease [this week]," says DONALD FINE at CHASE MANHATTAN BANK. "We are in the early stages of a recession, one whose mildness or severity is still in question. And the lack of economic activity will help to fight inflation." (NYT, 11/12)

"It's clear that Federal Reserve policy is in favor of lower interest rates to offset the negative economic implications of higher taxes," says S.E. CANADAY JR. at JOHN NUVEEN & CO. ("Investor's Daily", 11/12)

With indicators such as the CRB index showing a decline in inflation, the Fed has no reason not to ease rates at this week's FOMC meeting, says ALBERT GROSS economist at REFCO. "The Fed has been late in responding, by any historical measure," says Gross. "With the domestic economy this weak, the Fed has to focus on the major effort of stimulating." (CNBC "World Business", 11/12)

The U.S. economy is dependent on foreign capital and the Fed has to keep rates high enough to keep foreign capital here, says WALTER WILLIAMS of AMERICAN BUSINESS ECONOMETRICS. "If foreign capital leaves our system, which it is beginning to do, you'll see an intensified liquidity crisis which pushes rates higher." Williams, who believes the core rate of inflation is still too high, says the Fed might lower the funds rate by a quarter point, "but that's not enough to stimulate the economy ... two percent, three percent, even four percent is what's needed [and] there's just not the ability to lower rates by that magnitude." (FNN "A.M. Business Report", 11/12)

"What has the Treasury market so solidly on the long side is the belief that the Fed will soon move to ease credit further," says JONATHAN GREENSPAN at AEGIS CAPITAL MANAGEMENT. "This is one reason why few are concerned that a large portion of this week's record refunding issues are still on dealer shelves." (NYT, 11/10)

"What you're witnessing now is a classic flight to quality," says SKIP SHAW, head of government bond trading at BEAR STEARNS & CO. "People want high

quality assets." CHARLES LIEBERMAN of MANUFACTURERS HANOVER SECURITIES says the success of last week's Treasury auction "was a function of the willingness of domestic investors to buy domestic securities and fortunately replace foreign investors." ("The Washington Post", 11/10)

"Bucking the growing optimism among many bond market professionals, some of the top investment newsletters are warning readers to shun long-term bonds," reports "The Wall Street Journal." (WSJ, 11/12)

THE ECONOMY:

"To a large extent, this is a yuppie recession," says EDWARD YARDENI of PRUDENTIAL-BACHE. "If the Fed really is coming around now to recognizing that the economy is falling into a recession, we'll have a big drop in interest rates that I think will revive consumer spending by the first quarter. The recession is almost over." ((NYT, 11/11)

"It now seems very likely that America's longest peacetime expansion is about to come to an end," says ROBERT EGGERT of EGGERT ECONOMIC ENTERPRISES. Also editor of "Blue Chip Economic Indicators," he says 80% of the 55 economists polled in his latest monthly survey feel a downturn will start before the end of 1990 and an additional 5% see a downturn starting in 1991. ("Investor's Daily", 11/12)

"Like many forecasters, we expect the fourth quarter of 1990 and the first quarter of 1991 to evidence slower growth," says MICHAEL BOSKIN, chairman of PRESIDENT BUSH's COUNCIL OF ECONOMIC ADVISERS. "Whether we slip into negative territory remains to be seen, though it is most likely to happen in the fourth quarter of 1990. ... I will say that our current forecast - which will be revised in the next month or so - does call for a slowdown in the economy in late 1990 and early 1991. It is consistent with narrowly skirting recession and gradual recovery, or one or two negative quarters and a more rapid rise." ("Barron's", 11/12)

Economist HENRY KAUFMAN, who runs his own consulting company, says the economy has started a recession that will run from six to 15 months, probably about 12 months. He sees unemployment reaching at least 7% and hanging there and a "feeble recovery." (CNBC "Market Wrap-Up", 11/9)

"It appears unlikely the oil shock will be translated" into sharp price increases throughout the economy as happened in the 1970s, says DAVID JONES at AUBREY G. LANSTON & CO. "The big difference is that the economy is weaker now." ("Investor's Daily", 11/12)

"Abstracting from energy prices, what you saw here [in the wholesale price report] was a continuation of the trend towards moderating goods prices that we were seeing before the Iraq crisis erupted," says PIERRE ELLIS at THE BOSTON CO. "There was also no sign the oil price shock is being reflected in

the price of other goods." DAVID BLITZER, chief economist at STANDARD & POORS'S, says "what the Fed has to realize is because we have a weak economy, the rise in oil is not a big risk of spreading inflation throughout the economy." (CNBC "Market Wrap-Up", 11/9)

"The climate is not going to be favorable for an increase in inflation," says economist ROBERT DEDERICK at NORTHERN TRUST CO. in Chicago. "We're in a bad inflation patch now, but we'll get through it." ("The Washington Post", 11/10)

"I think we're going through the tail-end of a convulsion necessary to bring us into a stronger economic position and I think that's why we are in the kind of situation that appears to be a problem," says MONTE GORDON at DREYFUS. "I don't think it really is a problem. I think is part of the economy structuring itself for what [would] be a problem. ... We're fighting for survivorship and we're cutting down and ridding ourselves of those people that were unnecessary those inefficiencies that we built into the system. That's what's coming out." He looks for an upturn around the middle of 1991. ("Wall Street Week", 11/9)

"The flat core rate [in the Friday PPI report] ought to cool off some of the inflation psychology that's flying around out there," says RON SCHREIBMAN, vice president of the NATIONAL ASSOCIATION OF WHOLESALER-DISTRIBUTORS. (NYT, 11/10)

IN WASHINGTON:

The FEDERAL COMMUNICATIONS COMMISSION is proposing fines of $250,000 each for PACIFIC BELL, SOUTHWESTERN BELL, NEW YORK TELEPHONE and NEW ENGLAND TELEPHONE. They are accused of accounting rule violations. (WSJ, 11/12)

PEAPACK, NJ (NOV. 12) PR NEWSWIRE - Beneficial Insurance Group, Inc., a wholly owned, credit-related subsidiary of Beneficial Corporation (NYSE: BNL) has launched a pilot program that offers life and disability insurance services in the Columbus, Ohio area.

Operating under the name B.I.G. Insurance Agency, Inc., the new Beneficial business will offer a full line of products including whole life, interest-sensitive and universal life, term life, and individual disability insurance.

"After extensive research, we concluded that the Beneficial customer has a broad range of needs that are not adequately addressed by conventional insurance approaches," said Finn M.W. Caspersen, chairman and chief executive officer of Beneficial Corporation of Wilmington, Del.

"Our close-knit relationship with customers, our awareness of customer needs from years of lending experience, and our focus on customer service place us in a better position to help our customer," Caspersen said.

"We will select only the highest quality insurance products at the most reasonable rates for our customers," said Daniel R. O'Brien, president and chief executive officer of the Beneficial Insurance Group. B.I.G. Insurance Agency will offer customers an evaluation of their insurance needs to help them establish comprehensive family financial plans.

The B.I.G. Insurance Agency will operate independently from Beneficial's consumer finance system branch office network.

Robert M. Merryman of Worthington, Ohio, has been named agency director of the office. Merryman, a 20-year veteran of the finance and insurance business, will manage the office and lead a staff of 19, including 10 insurance sales representatives.

The B.I.G. Insurance Agency office is located at 6400 Office Square (6422 East Main Street).

The Beneficial Insurance Group is a subsidiary of Beneficial Corporation, which is based in Wilmington. Beneficial Corporation provides consumer financial services through its various operating subsidiaries located throughout the United States and in Canada, the United Kingdom and Germany.

SAN BRUNO, CALIF. (NOV. 12) PR NEWSWIRE - The following was released today by North Lily Mining Co. (NASDAQ: NLMC):

Recent exploration on the Star Lake property, which is adjacent to the Jolu mine in northern Saskatchewan, has resulted in the discovery of a new structure called the "Ducksnest." While too early to determine the significance of this discovery, exploration to date has been encouraging and assays from selected grab samples are as follows:

Sample No.	Assay Result Ounces of gold per ton
59030	0.268
59031	0.005
59032	2.706
59033	1.240
59034	1.531

Additional exploration is underway to determine the extent of this discovery. The Star Lake property is held under option and International Mahogany and Corona Corp. have a right to earn a 100 percent interest in this property. Corona is the operator of International Mahogany's Jolu mine, and earned a 30 percent interest in the property by placing it into production. Because of the proximity of Star Lake to Jolu, any ore mined on the property may economically be processed in the Jolu mill.

North Lily controls 59 percent of International Mahogany Corp.

SCOTTSDALE, ARIZ. (NOV. 12) PR NEWSWIRE - Kroy Inc., an international labeling, lettering and sign company, has developed the world's first digital lettering system capable of printing in either the Thai language or in English.

Kroy Printing Products, a division of Kroy Inc. and Gestetner (Thailand) Co. Ltd. will introduce the new product, Jester(TM), at a special exhibition at the Hilton International Hotel in Bangkok, Thailand, Nov. 13-14. Gestetner will be the exclusive distributor of the product in Thailand.

The two companies will work closely to determine other market-specific products for Thailand that will also be developed by Kroy and distributed by Gestetner.

"The Jester provides the advantage of high-quality print on an adhesive strip ready to apply as call outs to technical drawings, aerial site photos and maps

" said Robert Vandevoort, head of Kroy Inc.'s international division.

It's also an ideal method to quickly add sequential numbers to finished technical drawings, to produce repetitive text, label a computer disk, video tape, three-ring binder (using vertical printing) or any application where reproducible, legible identification is required.

The portable, keyboarded Jester is based on the technology of Kroy's popular DuraType 240 lettering system. About the size of a desktop calculator or telephone -- and as easy to use -- the modern design of the Jester forms its own sleek carrying case. It's styled to be visually appealing on the desktop.

Jester has two resident fonts -- 24-point Kroy Siam with a complete Thai character base and 24-point Helvetica Medium. The Thai resident font will support unlimited combinations of consonants, vowels and tone marks. Access to Thai or English is determined by depressing the font selection key.

The characters entered into the system can be viewed on the liquid crystal display (LCD) in either Thai or English, depending on the font selected. All messages, prompts and alerts on the LCD are in English. The Jester uses the standard typewriter-style keyboard with an overlay of Thai characters.

Kroy will be releasing additional Thai language typestyle fonts for the Jester in the coming months.

DETROIT (NOV. 12) PR NEWSWIRE - Chrysler Corporation (NYSE: C) will expand its relationship with Mitsubishi Motors following the collapse of talks with Italy's Fiat Auto S.p.A., the industry trade paper Automotive News reports in its Nov. 12 edition.

Chrysler and Mitsubishi are likely to increase joint product development and production in the United States and possibly in the Far East following Chrysler's failed bid to strengthen its presence in Europe via Fiat, Automotive News said.

The talks between Chrysler and Fiat collapsed Nov. 2. Both sides blamed poor global economic conditions for thwarting a deal.

The newspaper quotes Chrysler Motors President Robert Lutz saying that the "JJ" junior Jeep that was supposed to be a joint venture has not been canceled but that the vehicle is up for review.

Automotive News is published each Monday in Detroit by Crain Communications

Inc., a privately held company. Crain Communications publishes 26 consumer, business and trade publications including Advertising Age, Detroit Monthly, Crain's Detroit Business and AutoWeek.

ROCHESTER, N.Y. (NOV. 12) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) and Amersham International of England today announced the formation of a jointly owned company in clinical immunodiagnostics to be called Amerlite Diagnostics Limited.

Amersham, headquartered 25 miles northwest of London, holds a leading position in the fields of health care diagnostics and life-sciences research.

The new enterprise will incorporate all of Amersham's current clinical reagents business including radioimmunoassays, enhanced luminescence assays, and new developments in automated systems and biosensors. Amersham businesses in life sciences, pharmaceuticals and industrial products are not included in this venture.

Jose Coronas, vice president and general manager of Kodak's Clinical Products Division, said, "Kodak is committed to the long-range growth of our in-vitro diagnostics business. This agreement with Amersham will allow us to quickly establish our presence in the fast-growing $3 billion immunodiagnostics segment of that market. That segment is growing at the estimated rate of 10-12 percent annually with margins higher than other segments. As the clinical chemistry and immunodiagnostics segments grow closer together, Kodak will be well-positioned to compete in both segments."

By terms of the agreement, Amersham and Kodak will both invest in Amerlite Diagnostics Limited. Kodak has committed to contribute $58.5 million at current exchange rates.

Amersham will contribute all assets of its Clinical Reagents Divison (CRD) business other than property. This includes fixed assets, inventory, patents, technology, brand names and product lines, leases and other aspects of the business.

A provision is made in the agreement for an option under which Kodak may assume total ownership of Amerlite Diagnostics any time after two years from the signing date.

#90316p5641 11/12/1990 ~PR Newswire

FORT WAYNE, IND. (NOV. 12) PR NEWSWIRE - Lincoln Foodservice Products, Inc. (NASDAQ: LINN) today announced operating results for the third quarter and nine months ended Sept. 30, 1990. Third quarter net income was $226,000 or $.07 per share, on net sales of $10,973,000, compared to net income of $319,000 or $.10 per share, on comparable 1989 net sales of $12,355,000.

For the first nine months of 1990, Lincoln's net income was $215,000, equivalent to $.07 per share, on net sales of $32,941,000. In 1989, Lincoln's net income for the first nine months was $799,000, equivalent to $.24 per share, on net sales of $35,535,000.

Earnings for the quarter reflect one-time costs associated with the special committee study of alternatives to enhance Lincoln's stock value. Those costs amounted to $125,000 before tax, or $.02 per share after taxes. Excluding those costs, 1990 third quarter earnings would have been $.09.

Earnings for the year reflect the costs associated with the special committee study and a write-off taken during the second quarter of Lincoln's investment in Bay-Lea Industries Limited, which amounted to $.10 per share after taxes during the first nine months. Excluding the two non-recurring charges, Lincoln's earning through Sept. 30, 1990 would have been $.19 per share.

In commenting on operations, Thomas C. Griffith, chairman and chief executive officer, said, "We are encouraged that Lincoln's sales of supplies have approximated 1989 levels given the weakening economy and softening of food service markets. Sales of supplies were down less than 1 percent on a quarter-to-quarter comparison basis; revenue from supplies for the first nine-months of 1990, excluding a $1,000,000 one- time pizza pan order last year, increased 2 percent from 1989 levels."

Griffith continued, "We experienced continued sales declines in our most prominent equipment line: Impinger(R) ovens. Sales of our two- foot Impinger were down from 1989 primarily as a result of a dissolved joint venture between Pizza Hut and Marriott, one of our major customers during last year. The decline in sales of our three-foot Impinger is due to continued competition from larger capacity air-impingement ovens."

New ovens offer new growth "The downward trend in Impinger sales should reverse as our two new Impinger products begin to find their place in the market. Our high- capacity, low-profile oven, introduced in September, has been well- received by customers. With the introduction of the countertop Impinger, Lincoln will have products to offer any food service establishment requiring fast, efficient, high-quality cooking technology -- regardless of capacity requirements or space constraints. These product launches offer increased market opportunities for our high- margin equipment lines; we are

optimistic concerning their contribution to our business in 1991."

"To concentrate our efforts on these new product introductions, early in the fourth quarter we decided to sell our Galley(R) and Steam'r Oven(R) product lines. The primary reason for the decision was to support our new products while at the same time allowing increased sales emphasis on our existing Wear-Ever(R) and Impinger lines. At this early date, we are unable to determine whether a gain or loss will result or whether it will be material to our 1990 results." noted Griffith.

Improved margins, lower cost, and a strong balance sheet "Through sound planning Lincoln's financial position is strong. We have been fortunate that our raw material costs declined early this year and are currently holding steady, which has allowed us to compete more effectively. We have taken full advantage of that trend by exercising stringent controls over discretionary items effecting the cost of products sold. The result is an improvement in our gross profit margin during the year, achieved despite increased sales promotion expense and discounts allowed on certain lines."

"We have continued to reduce selling, general, and administrative expenses during 1990. While we have cut costs in most discretionary categories, we have increased our expenditures in research and development as well as in advertising and promotion.

We view costs in these areas as investments in our business, and we will not inhibit the resources needed to develop and promote our products," added Griffith.

"Our cash position continues to be strong, and our debt-to-equity ratio at Sept. 30, 1990 is 0.28:1 compared to 0.31:1 at Dec. 31, 1989. This ratio continues to improve as we make principal payments on existing debt and incur no new debt."

"While we expect some fourth quarter earnings improvement, we strongly believe that our new product introductions, combined with a strong balance sheet, will enable us to compete more effectively while improving earnings in 1991 in light of its economic uncertainty," concluded Griffith.

Lincoln Foodservice Products, Inc. designs, manufactures, and markets commercial and institutional foodservice cooking equipment and utensils. The company, which produces Impinger(R) conveyor ovens, Steam'r Oven(R) combi-cookers, Wear-Ever(R) and Centurion(R) foodservice utensils, Redco(R) food slicers, cutters, and wedgers, Galley(R) food serving equipment, and Fresh-O-Matic(R) food warmers, markets its products internationally through its own sales force and a network of 1500 distributors worldwide.

GAITHERSBURG, MD (NOV. 12) PR NEWSWIRE - Genex Corporation (NASDAQ-NMS: GNEX) announced last Friday that commencing Nov. 15 it will begin a series of staff reductions that will reduce the number of its employees from 65 to approximately 28 over the next several months in order to reduce its operating expenses.

The remaining employees represent a core group of scientists and management personnel that the company views as essential to support projects that it believes have the greatest market potential, including Surgical Bioadhesives, SCA Antigen-Binding Proteins, and its existing corporate collaborations.

Reed Prior, Genex's new president and CEO said: "Due to today's financial climate, biotechnology companies such as ours have encountered much difficulty in obtaining financing. This reduction helps to stretch our existing cash reserves, and we believe that the resulting lower operating expenses will make Genex more attractive to potential investors."

The company also announced that it has entered into letters of intent to sell the two major components of its bioseparations unit to two separate buyers. The sales remain subject to the negotiation of definitive agreements, satisfactory completion of due diligence by the prospective buyers and other conditions.

Genex Corporation utilizes its proprietary expertise in protein engineering to design and produce specialized pharmaceuticals and surgical bioadhesives.

ROCKVILLE, MD. (NOV. 12) PR NEWSWIRE - GE Information Services, a leading global provider of network-based value-added application services, and Data Exchange International (DXI), a leading software company specializing in tariff automation, have formed an agreement that will enable GE Information Services to provide tariff automation services to the ocean carrier and liner shipping conference industry.

GE Information Services will offer the DXI tariff software, called RateMaster, as part of GE's worldwide CARGO-LINK Services, a recently launched family of computer and network-based services for the trade community. CARGO-LINK provides information management capabilities such as Electronic Data Interchange, electronic mail and database access tailored to the needs of the parties involved in moving and managing cargo door-to-door.

In light of the U.S. Federal Maritime Commission's move toward mandatory electronic tariff filing during 1991, this offering from GE Information

Services represents a strategic solution for carriers and shipping conferences seeking a sophisticated solution to their U.S. Trade and automation of their Tariff Management worldwide.

RateMaster provides international ocean tariff rating and management capabilities. It creates tariff entries in data element form and enables automatic electronic distribution to clients, authorities and agents almost anywhere in the world.

The RateMaster capabilities within the CARGO-LINK Services include tariff creation, filing, retrieval, distribution, maintenance and updates. It makes use of technologies such as commodity indexes, keyword searching of commodities and tariff rules, global location validation and tariff records.

DXI's expertise to develop RateMaster was gained from within the maritime industry, initially on tariff filing, retrieval and distribution within the Federal Maritime Commission regulated routes.

RateMaster is developed on UNIX and is available on GE Information Services' worldwide network or on a client's own UNIX computer.

Tariff data is used to create freight quotations, to perform statistical analysis and to calculate bottom line bill of lading rates.

DXI, headquartered in Pittsburgh, is a leading provider of tariff automation software.

GE Information Services, a division of GE Company (NYSE: GE), USA, is a global provider of network-based information services and support, headquartered in Rockville.

LOWELL, MASS. (NOV. 12) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) and ITT Hartford Insurance Group today announced a strategic alliance for continuing development and marketing of an automated property and casualty claim processing application.

The work management application, jointly developed by Wang and The Hartford, enables 100 percent of vital information and 100 percent of claim handling procedures to be managed with a computer system during the entire claim settlement process. The application integrates data, text, image, and voice processing into a dynamic, customer-oriented transaction environment. The results are significant reductions in operating costs, increases in customer service capabilities, and improvements in work process quality.

"Claim automation has allowed us to re-engineer the activities and methods that make up a claim professional's workday by minimizing 'getting ready to work' activities and maximizing the 'main work' of claim handling," said Jack Crawford, vice president of Information Management at The Hartford. "We are at the forefront of how a claim office will operate during the 1990s."

"Rather than simply automating manual processes or creating electronic file cabinets, this application taps the power of integrated imaging and changes how information is viewed and processed in a claim office," said Jeanne McCann vice president, Financial Services Applications Engineering at Wang. "This alliance demonstrates customer confidence in Wang both as a supplier of innovative solutions and as a business partner."

The solution will be marketed by Wang to insurance companies worldwide. The Hartford will pilot the fully integrated version of the application in a 42-person production site at its Pittsburgh claim office starting in December.

The Wang/ITT Hartford application runs on Wang Integrated Image Systems (WIIS) which are based on Wang VS mid-range computers and use Wang's PACE database management system.

With the integrated claim automation application, incoming paperwork, such as customer correspondence, standard insurance forms, doctors' reports, and repair estimates, is scanned upon arrival into the system and placed into electronic files. The application supplies automatic indexing capabilities to attach incoming images to the claim information database, creates "activity logs" that record relevant activities in the claim life cycle, and provides electronic work routing and management.

SUNNYVALE, CALIF. (NOV. 12) PR NEWSWIRE - Weitek Corp. (NASDAQ: WWTK) today announced that Microsoft's PostScript-compatible TrueImage(TM) page description language version 1.0 will be supported on Weitek's family of page printer processors. The price/performance advantages of both the Weitek processors and Microsoft's TrueImage PDL deliver a page printing solution that provides OEMs with a competitive and full-featured alternative to current printer solutions.

Weitek's XL-8220, which is optimized for page printer applications, integrates a number of printer-specific functions onto a 32-bit RISC chip, saving board space, lowering system cost and significantly reducing time to market compared to other printer processors. These characteristics make the XL-8220 the best

price/performance solution currently available for PostScript based printer controllers and their alternatives. The TrueImage PDL offers PostScript compatibility, TrueType(TM) fonts, enhanced communications with the operating system and an open architecture. TrueImage on Weitek processors will be available in January 1991.

Weitek is the leading supplier of high-performance numeric processing solutions. The company's VLSI circuits and development tools power a broad range of computer systems from minisupercomputers and engineering workstations to desktop computers and page printers.

#90316p5658 11/12/1990 ~PR Newswire

SUNNYVALE, CALIF. (NOV. 12) PR NEWSWIRE - Weitek Corp. (NASDAQ: WWTK) today announced that the first RISC-based Adobe PostScript(R) printers for the office incorporate Weitek's XL-8200 printer processors. Epson America Inc. and Dataproducts Corp. both have introduced new Adobe PostScript printers selling for under $3,500 and using Weitek's XL-8200 processors for printer controllers. Epson's EPL-7500 printer and Dataproducts' LZR 660 printer use Weitek's XL-8200 RISC processors to provide 2-4 times the performance over comparable priced Motorola-based printers.

The six-page-per-minute Epson EPL-7500 matches the features of today's most popular PostScript printers while operating at twice the performance and selling at a retail price below $3,500. The Dataproducts LZR 660 printer, which also runs at six pages-per-minute and sells for $2,995, is the first laser printer to incorporate PostScript Level 2 software from Adobe. The combination of the Weitek XL-8200 and Adobe's PostScript Level 2 allows the LZR to image complex documents significantly faster and at a lower cost than previous laser printers.

These page printers achieve their high performance level through the use of Weitek's XL-8200 page printer processors, which process PostScript up to six times faster than the 68000-10 MHz, the most widely-used printer controller processor for the office environment. The printer optimized XL-8200 processors get their high speed from their RISC (reduced instruction set computer) architecture and a variety of built-in numerics and graphics processing features. Printers using PostScript require heavy number-crunching to construct detailed bit maps of fonts and graphics.

The PostScript language from Adobe is the standard page description language in the industry, with over 40 licensed OEMs shipping more than 75 PostScript products.

Weitek is the leading supplier of high-performance numeric processing

solutions. The company's VLSI circuits and development tools power a broad range of computer systems from minisupercomputers and engineering workstations to desktop computers and page printers.

DOWNERS GROVE, ILL. (NOV. 12) PR NEWSWIRE - HealthCare COMPARE Corp. (NASDAQ: HCCC) announced today that its board of directors has authorized a 2-for-1 common stock split in the form of a 100 percent distribution. The 2-for-1 split is payable on Dec. 17, 1990, to stockholders of record on Nov. 23, 1990. Stockholders will receive on additional share of common stock for each share held of record.

James C. Smith, the company's president and chief executive officer, indicated that the stock split will allow a wider distribution and ownership of COMPARE's stock by improving the marketability of the shares particularly for the retail investor. Smith noted that after the distribution there will be 11,550,550 shares outstanding.

HealthCare COMPARE Corp. is one of the nation's leading independent managed care/cost management companies. The company provides data analysis, extensive utilization management and provider negotiation services (PPO development and management). Its services are provided to indemnity health care payers as well as alternative delivery systems. The company manages costs and utilization without compromising the quality of care available to health care plan participants.

NAPERVILLE, ILL. (NOV. 12) PR NEWSWIRE - First Midwest Bancorp Inc. (NASDAQ-NMS: FMBI) today announced that it has acquired the approximate $82 million Home Savings, a Federal Savings and Loan Association, Joliet, Ill., from the Resolution Trust Corp.

The acquisition took the form of a "clean" thrift purchase and assumption transaction that saw approximately $82 million in core deposits assumed by First Midwest Bank, the company's $900 million bank headquartered in Joliet. The bank simultaneously purchased certain assets of Home, with purchased loans and other assets being subject to liberal putback rights, and acquired options to purchase still other assets of Home. Consideration of $3.5 million was paid by the bank. The former thrift will be operated as a branch of the bank.

"This acquisition represents a cost effective enhancement of our already strong presence in southwestern metro Chicago's Joliet/Will County market where we are the largest bank," said Robert P. O'Meara, First Midwest Bancorp president and CEO. "Our Joliet bank has experienced significant expansion over the last two years and continues to enjoy excellent financial performance returning in excess of 22 percent on average equity and 1.3 percent on average assets in the first nine months of 1990."

With total assets of approximately $2.4 billion, First Midwest Bancorp is one of Illinois' largest bank holding companies, operating 35 banking and five trust offices in northern Illinois.

NEWPORT NEWS, VA (NOV. 12) PR NEWSWIRE - The Flight International Group, Inc. announced today that it has executed a non-binding letter of intent with The Carlyle Group, L.P., a private merchant bank based in Washington, relating to

the possible sale of equity securities to be issued by Flight International to such entity or one of its affiliates. The letter of intent provides that the parties intend to enter into negotiations toward the preparation and execution of mutually satisfactory definitive agreements to be executed by Dec. 15, 1990.

The letter provides that, subject to certain conditions, the purchaser would make a capital contribution to Flight International in the form of preferred and common equity. Consummation of the transaction, which is expressly subject to a number of significant conditions, would result in the purchaser owning a majority interest in Flight International. Flight International has stated that it intends to file a Current Report on Form 8-K with the Securities and Exchange Commission with respect to the execution of the letter of intent.

Nelson Happy, the chairman and chief executive officer of Flight International stated, "We are very enthusiastic about the prospects of completing this transaction. It clearly represents a major step in our efforts to restructure Flight International."

Flight International also announced that on Nov. 9, 1990 the U.S. District Court Judge presiding over the consolidated class action lawsuit against Flight International and certain other defendants signed and entered a final order approving the settlement of such lawsuit.

The Flight International Group is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

MINNEAPOLIS (NOV. 12) PR NEWSWIRE - Arkla, Inc. (NYSE: ALG) and Diversified Energies, Inc. (DEI) (NYSE: DEI), said today that they are pleased with the decision of the Minnesota Public Utilities Commission (PUC) to reconsider last Friday's 2-1 vote disapproving the proposed merger of Minnegasco -- the natural gas distribution company of DEI -- into Arkla. Friday evening, the PUC said it plans to schedule a hearing of the full commission as soon as possible to reconsider the decision.

Company officials said that DEI and Arkla are committed to obtaining a favorable PUC decision and that the special shareholders' meetings of Arkla and DEI remain scheduled for Nov. 28, 1990.

Arkla and DEI are traded on the New York Stock Exchange under the symbols ALG and DEI, respectively.

NEW YORK (NOV. 12) PR NEWSWIRE - Witco Corporation (NYSE: WIT) today announced the completion of its acquisition of the surfactants and emulsifier businesses of DeSoto, Inc. (NYSE: DSO). Included in the purchase are two plants; one in Harahan, La., the other in Forth Worth, Texas. The purchase price, including inventories, amounted to approximately $65 million.

Surfactants at these locations are generally sold as process aids to facilitate formulations manufactured by the personal care, agricultural, oil field chemical, and numerous other general industries.

"We are especially pleased to bring this to a successful completion as it will allow us to better serve our surfactants customers," said Witco chairman and chief executive officer William R. Toller.

The Harahan and Fort Worth facilities will be managed by Witco's Organics Division which operates six other surfactants plants two of which are located in Santa Fe Springs, Calif.; two more in the Chicago area; and one each in Perth Amboy, N.J. and Houston. Other Witco surfactants operations include Oakville, Ontario and Elbeuf, France.

Witco manufactures specialty chemical and petroleum products and engineered materials with annual sales of approximately $1.6 billion.

ROCKY MOUNT, N.C. (NOV. 12) PR NEWSWIRE - Rocky Mount Undergarment Co., Inc. (NASDAQ: RMUC) today reported increased sales of $4,668,000 for the third quarter of 1990 compared to $4,187,000 for the third quarter of 1989. Net sales for the first nine months of 1990 were $13,763,000 compared to $13,963,000 in the first nine months of 1989 (after excluding $8,412,000 of sales of the Company's menswear division which was sold in June 1989).

Operations in the third quarter of 1990 resulted in a lower net loss of $85,000 ($.03 per share) compared to a loss from operations in the third quarter of 1989 of $223,000 ($.07) per share). Operations in the first nine months of 1990 resulted in a net loss of $332,000 ($.11 per share) compared to a loss from operations before gain on disposition of the menswear division and income taxes in the first nine months of 1989 of $274,000. Net earnings of $1,560,000 ($.47 per share) for the first nine months of 1989 include $1,834,000 gain on disposition of the menswear division.

The Company is in a strong financial position with little debt. Available short-term borrowings are sufficient to meet all current cash requirements. Inventories were leaner at the end of the third quarter, being at their lowest levels this year and lower than their year-end 1989 levels.

Rocky Mount manufactures and markets basic and fashion underwear and sleepwear for women and children.

#90316p5684 11/12/1990 ~PR Newswire

CHERRY HILL, NJ (NOV. 12) PR NEWSWIRE - Mediscience Technology Corporation (NASDAQ: MDSC) plans to begin clinical tests in 1991 of a cancer detection instrument that uses ultraviolet light to detect malignant tumors and distinguish them from benign and normal tissues, it was announced today by Peter Katevatis, president.

The Mediscience announcement follows the disclosure last week, at the 1990 annual meeting in Boston of the Optical Society of America, that scientists developing the instrument have obtained "excellent results" applying the ultraviolet method -- a new technique -- in important gynecological areas, including breast, ovary and cervix tissues. The technique involves directing ultraviolet light at suspected tissue and measuring the resulting fluorescence

(or colors) emitted without using external or extrinsic dyes.

The scientists are working under Robert R. Alfano, director of the City College of New York's Institute of Ultrafast Spectroscopy and Lasers (IUSL) and chairman of the scientific advisory board of Mediscience. He said the IUSL results "confirm that malignant tumors can be distinguished from benign tissues when the ratio of intensities of the tissue's native fluorescence is observed at different, specific wavelengths."

In his statement, Katevatis said: "The progress achieved by the Institute of Ultrafast Spectroscopy and Lasers has reached the stage where Mediscience can begin contacting medical institutions to inform them that a prototype is expected to be available for field testing next year. If testing is successful, it would represent a first step for clinical use and be a major breakthrough in the search for a light-based diagnostic instrument for optical biopsy, and serve to complement current diagnostic methods."

At the Optical Society of America's annual meeting, a presentation by two members of Alfano's research team, B.B. Das and Sha Glassman, included the following explanation of the ultraviolet light method: "The basic technique involves directing a beam of ultraviolet light, with a wavelength of 300 nanometers (nm), at samples of suspected breast, ovary and cervix tissue and measuring the fluorescence spectrum emitted. When the ratio of intensities of the tissue's fluorescence is observed at 340 nm. and 440 nm., there is a consistent and significant difference between malignant and tissues that are benign or normal.

"The ratio readings for malignant tissue are consistently higher.... as a result, we have been able to record excellent results with our ultraviolet excitation and fluorescence light method of detecting cancer," the researchers reported.

The announcement of these results follows the issuance to Alfano, on June 5 of this year, of a patent for a method of using laser-induced fluoresence to distinguish between cancerous and normal tissue. This patent and three related patent applications under Alfano's direction have been assigned to Mediscience. Apart from his position as director of the Institute for Ultrafast Spectroscopy and Lasers, Alfano is distinguished professor of Science and Engineering at City College of New York. He is a fellow of both the Optical Society of America and the American Physical Society.

Mediscience Technology Corporation, with headquarters in Cherry Hill, is a pioneer in mediphotonics, the emerging medical technology designed to utilize the power of light to detect human disease. Mediscience is also involved in the marketing of Forsterite laser crystals in North America, under a five-year agreement with Mitsui Mining and Smelting Co. Ltd. of Tokyo, as well as the development of an apnea monitor, a respiratory monitoring device.

#90316p5686 11/12/1990 ~PR Newswire

ST. PAUL, MINN. (NOV. 12) PR NEWSWIRE - Northwest Airlines, Inc. today reported third-quarter net earnings of $91 million. Restrained by higher fuel costs, the earnings were down from $134 million for the third quarter of 1989.

Operating revenues grew to $2 billion from $1.8 billion, and operating expenses reached $1.9 billion compared to $1.6 billion for the quarter ending Sept. 30 last year. Quarterly operating income was $116 million versus $181 million in 1989.

Northwest's cash flow from operations in the third quarter was $195 million compared to $174 million from the year earlier quarter.

Northwest's fuel expense jumped $79 million to $338 million for the quarter -- a 30 percent increase reflecting two months of higher fuel costs following Iraq's invasion of Kuwait on Aug. 2.

"We anticipate that continued high fuel expenses for the remainder of the year will result in a fourth quarter net loss," said John Dasburg, president and chief executive officer.

Northwest has adopted a number of measures to deal with its soaring fuel bill, including fare increases, a headcount freeze, flight schedule reduction and deferral of non-essential expenses.

For the third quarter, Northwest's traffic was up 9.4 percent and capacity grew 6.2 percent, resulting in a 72 percent load factor, up 2.1 points over third quarter of 1989. Yield (revenue for flying one passenger one mile) increased 1.4 percent to 12.08 cents from 11.91 cents.

For the first nine months of 1990, Northwest posted net earnings of $111 million, down from $240 million for the first nine months of 1989. Operating revenues were $5.4 billion, up from $4.9 billion, and operating expenses grew to $5.3 billion from $4.6 billion. Operating income for the three quarters was $90 million, compared to $297 million in 1989.

Northwest is America's fourth largest airline, serving Asia, Europe, Canada, Mexico, the Caribbean and 40 U.S. states.

#90316p5687 11/12/1990 ~PR Newswire

JACKSON, MICH. (NOV. 12) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today reported net earnings for its third quarter and nine months ended Sept. 30, 1990.

Commenting on the company's results, company President U.E. (Pat) Patrick stated, "Our company remains a profitable and growing energy producer. We have several high-potential prospects to be drilled yet this year. This includes the continuation of our Winnipegosis exploratory program in Northwest North Dakota. Our next Winnipegosis reef test will be drilled this month, along with several other significant wells in our various Williston Basin and Michigan plays. We remain confident that our drilling and acquisition programs will contribute to a growing reserve base and improved financial results as our industry progresses in the coming decade."

Mr. Patrick continued, "At Sept. 30, the company had $14.3 million in cash and short-term and long-term marketable securities. Working capital was $7,838,926, our current ratio was 1.8 to 1.0 and stockholders' equity was $55,353,351, or $4.54 per outstanding share. Our debt-to-equity ratio was 0.55 to 1.0."

Third-quarter oil and gas sales remained strong at $2,855,724, vs. $2,677,698 a year ago. However, total revenues for the third quarter declined to $3,176,662 from $3,660,198. Net earnings were $109,866, or 1 cent per share, on approximately 12.5 million weighted average shares outstanding, vs. $225,718, or 2 cents per share, on 12.6 million shares. These results were

primarily due to lower non-operating income vs. a year ago. This includes $500,961 from gains on sales of investments in the 1989 third period. Total expenses were reduced to $3,066,796 from $3,434,480.

Nine-month oil and gas sales increased substantially to $9,465,969 from $7,325,729. Total revenues for the nine months were $10,306,165, vs. $9,694,981 a year ago. Net earnings declined to $372,635, or 3 cents per share, on approximately 12.6 million weighted average shares outstanding, vs. year-ago net earnings of $595,915, or 6 cents per share on 10.8 million shares. Expenses increased to $9,933,530 from $9,099,066, largely reflecting increased costs from higher operating levels.

Three-month oil production was 64,863 barrels, vs. 58,787 a year ago. Gross wellhead oil prices for the third quarter averaged $22.74, vs. $19 in the year-ago three months, reflecting higher prices toward the quarter end, resulting from the Iraqi crisis. Third-quarter natural gas production was 801,623 Mcf (thousand cubic feet), vs. 856,642 Mcf a year ago. Various factors contributed to this reduction, including adjustments to prior period accruals, payout on a significant gas well which automatically reduced the company's working interest, as well as temporary workovers. The average gas price received was $1.65 per Mcf, vs. $1.70 per Mcf a year ago.

#90316p5689 11/12/1990 ~PR Newswire

HAIFA, ISRAEL (NOV. 12) PR NEWSWIRE - Elscint Ltd. (NYSE: ELT) today announced its unaudited consolidated results of operations for the third fiscal quarter and the nine month period ended Sept. 30, 1990.

Consolidated revenues for the third quarter of 1990 totalled $40.2 million, as compared with $36.1 million in the corresponding quarter of 1989. Revenues for the nine month period ended Sept. 30, 1990 totalled $114.6 million, an increase of 7 percent as compared with $107.1 million for the corresponding period one year ago.

Net income for the third quarter of 1990 totalled $3.6 million, or $0.05 per share, as compared with $1.51 million or $0.04 per share for the corresponding quarter of 1989. Net income for the nine months ended Sept. 30, 1990 totalled $8.7 million, or $0.12 per share, as compared with $978 thousand, or $0.02 per $0.02 per share, in the corresponding period of the preceding year.

Gross margin for the third quarter of 1990 was 43.8 percent of revenues, as compared with 41.2 percent for the third quarter of 1989. Gross margin for the nine month period ended Sept. 30, 1990 was 44.0 percent, as compared with 41.1

percent for the corresponding period of 1989.

New order booking rates and backlog growth in both nuclear medicine (NM) and computerized tomography (CT) improved in the third quarter. In NM, demand for Elscint systems continues to grow in all segments, with major interest centering on the upper end of the product spectrum. In CT, an important factor was the recently announced Exel 2000 Sprint, a lower-cost, high-performance system with extensive upgrade potential.

The accompanying table compares the unaudited results of the three and nine month periods under review as compared with the corresponding periods of 1989, and an unaudited balance sheet as of Sept. 30, 1990 as compared with the audited balance sheet as of Dec. 31, 1989.

Elscint designs, manufactures, distributes and services medical diagnostic imaging equipment for selected international markets.

DEARBORN, MICH. (NOV. 12) PR NEWSWIRE - Donald K. Huffman has been appointed manager of Lincoln-Mercury Division's Detroit District Sales Office.

He replaces Philip A. Nome, who has been named Ford Division's sales promotion manager.

Huffman had been Ford Division's dealer advertising manager since July 1989.

He joined Ford in May 1976 as a marketing analyst with Ford of Canada in Oakville, Ontario. After holding various analyst and sales positions there, he was appointed car merchandising manager for that company in May 1982.

Huffman became the luxury car sales manager for Ford of Canada in May 1983, then general field manager of Ford of Canada's Atlantic Region in July 1984.

In July 1985, he was named car and truck contest and incentives manager for Ford of Canada. In April 1986, he became the assistant manager for the Canadian Great Lakes Region.

Huffman's last assignment with Ford of Canada was as marketing and product plans manager from December 1987 through July 1989. At that time, he was transferred to Ford Division's General Marketing Office in Detroit.

Huffman was graduated from Queen's University in May 1975 with a bachelor of

commerce degree, and earned his MBA in May 1976 from McMaster University.

LAS VEGAS, NEV. (NOV. 12) PR NEWSWIRE - Genesis Integrated Systems announced today the GenSTAR(TM)2000 CD-ROM drive for IBM PC, XT and AT and compatibles. The GenSTAR 2000 comes complete with interface card, drive, cables, system software and audio software. Suggested retail price for the GenSTAR 2000 is $499. A high-performance, external unit, the GenSTAR 2000 CD-ROM drive includes the following features:

-- 500 msec average access time -- Full 12-month warranty with 48-hour replacement -- Full MS-DOS CD extensions -- Daisy chain up to eight units -- Standard caddy loading mechanism

Genesis Integrated Systems is committed to increasing the acceptance of optical-storage devices by providing low-cost, high-quality CD-ROM products. In the past there has been a psychological pricing barrier to the acceptance and use of CD-ROM technology. "(W)e can overcome and get non-linear results (growth) as we drop below the $500 price point which I do feel confident we will do over the next year," Bill Gates, chairman and CEO of Microsoft Corporation at the Fifth International CD-ROM Conference and Exposition, Feb. 27, 1990. Next year has arrived with the introduction of the GenSTAR 2000 CD-ROM drive at $499 suggested retail.

The GenSTAR 2000 CD-ROM drive will be demonstrated in the GoldStar booth, Booth Number H7552, in the Las Vegas Hilton at COMDEX during the week of Nov. 12-16, 1990. The first GenSTAR 2000 CD-ROM drives will be shipped to distributors and dealers in January 1991. Genesis Integrated Systems is in the process of completing distribution agreements and joint marketing programs that will commence with the January shipments.

The GenSTAR 2000 comes complete with system software, interface card, cable, caddy, audio software, and a full 12-month warranty. Genesis Integrated Systems will provide second-day replacement for any drive found to be defective during the warranty period.

Genesis Integrated Systems markets high performance CD-ROM drives and systems for desktop, multimedia and information markets. Headquartered in Minneapolis, Genesis Integrated Systems markets its products in the United States and Western Europe through independent- distributors, OEMs, computer stores, and value-added resellers.

MINNEAPOLIS (NOV. 12) PR NEWSWIRE - LaserMaster Technologies, Inc. (LMT) (NASDAQ: LMTS) announced today the signing of a license agreement with Microsoft Corporation (NASDAQ: MSFT) for Microsoft's TrueImage(TM) page description language software. The license agreement enables LaserMaster to use Microsoft's TrueImage software as a PostScript- language interpreter in its new high resolution personal typesetters and printers.

TrueImage interpreter software provides compatibility with both Adobe's (NASDAQ: ADBE) PostScript language and the Type 1 font format, as well as the TrueType format in Apple Computer's upcoming System 7(TM), and future versions of Microsoft Windows(TM) and OS/2(TM) programs. Jean-Louis Gassee, who is expected to join LaserMaster's board in December, described the licensing relationship as important to both parties. Gassee, who was formerly president of the Apple products division of Apple Computer, Inc., stated, "By coupling Microsoft's TrueImage with LaserMaster's proprietary TurboRes(TM) technology, LaserMaster will bring high resolution to PostScript-compatible desktop printing.

LaserMaster will utilize TrueImage software in new products, including a Personal Typesetter combining typeset-quality 1200 by 1200 TurboRes output with an 11 by 17-inch printing format, and a personal printer, a low-cost laser printer that provides users with 400 by 400 TurboRes output and 50 Type 1 format typefaces.

LaserMaster Technologies, Inc., designs, manufactures and markets laser printer and display systems and subsystems for high quality electronic printing and desktop publishing applications. LMT's products include high performance printer controllers, plain-paper desktop typesetters and integrated electronic publishing systems which feature the company's proprietary TurboRes resolution enhancement technology.

TurboRes is a patent-pending technology and a trademark of LaserMaster Corporation. TrueImage, Windows and OS/2 are registered trademarks of Microsoft Corporation. Macintosh is a registered trademark of Apple Computer, Inc. PostScript is a registered trademark of Adobe Systems, Inc. Other product and brand names are trademarks or registered trademarks of their respective companies.

SEATTLE (NOV. 12) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today reported

an expected loss of $4.5 million, or 44 cents per share, for the quarter ended Sept. 30, 1990. The quarterly loss is due in part to increased expenses related to preparations for the launch and marketing of Leukine(TM) GM-CSF, and to continued investment in research and development of other products the company intends to market itself. For the same three-month period in 1989, the company posted a net loss of $7.4 million, or 95 cents per share.

Immunex also reported a loss of $3.1 million, or 36 cents per share, for the nine-month period ended Sept. 30, 1990, compared to a loss of $10 million, or $1.29 per share, for the same period in 1989.

Leukine GM-CSF, Immunex's lead product, is a white blood cell growth stimulant being tested in bone marrow transplantation and cancer treatment.

Total costs and expenses declined by 18 percent for the third quarter 1990 as compared to the previous period. This decline was due in large part to the purchase of product rights which occurred in September, 1989. However, for the third quarter 1990, research and development expenses increased 31 percent to $6.1 million, compared to $4.7 million in 1989. General and administrative expenses for the three-month period increased 134 percent to $3.2 million from $1.4 million for the same quarter in 1989.

"Immunex has made significant progress with the products we acquired a year ago," said Stephen A. Duzan, chairman. "The increase seen in G&A spending reflects the addition of sales staff and other expenses in anticipation of the launch of Leukine GM-CSF.

Total revenues for the nine-month period increased 36 percent to $28.3 million in 1990 from $20.7 million for the same period in 1989, due primarily to one-time fees earned from collaborators during the first quarter 1990.

Immunex is a leading biotechnology company focused on the research, development, manufacture and marketing of immunological therapeutic products.

WICHITA, KAN. (NOV. 12) PR NEWSWIRE - Brite Voice Systems, Inc. (NASDAQ: BVSI), today announced the purchase of a Real Estate Hotline(R) system by Realty One, of Cleveland. Realty One is Ohio's largest independently owned residential real estate company with 49 offices servicing 20 counties in Northern Ohio. The company is ranked as the eighth largest independent broker in the United States in terms of transaction sides. In 1989, Realty One conducted 20,092 transaction sides (per individual listing and selling sides of closed residential transactions) amounting to a sales volume of over $1.8 billion.

"The Real Estate Hotline has proven itself to be a powerful and innovative marketing tool for real estate brokers," stated Brite President and CEO Stan Brannan. "It increases the marketing power of the brokers by providing listings and other key real estate information around the clock to today's busy consumers. The ability to market a home listing 24 hours a day may influence a potential home seller's decision as to which broker receives the listing. Our other customers consider it an incredible listing tool.

"We are proud to welcome Realty One to the growing number of Real Estate Hotline customers. Realty One is a progressive company whose dedication to customer service will be complimented by the purchase of a Real Estate Hotline

system," Brannan continued.

"Realty One plans to take advantage of one of the industry's most innovative marketing tools, the Real Estate Hotline," said Vincent T. Aveni, chairman of the board and chief executive officer of Realty One. "We will promote the system in our market under the name 'The Realty One Hotline.' This program is the best way for us to service our sellers and buyers, to support our sales associates and to enable Realty One to continue to be the leader in the 90s. Our program will be available to home buyers and sellers in January 1991."

Realty One will be the exclusive provider of The Real Estate Hotline for Cleveland and the surrounding area. Over 4,000 property listings will be made available to the public when the system becomes operational in January of 1991. A marketing campaign is planned by Realty One to introduce the system throughout the Northern Ohio market.

The Real Estate Hotline is an audiotex computer system which provides telephone access to such real estate information as listings, mortgage rates, and tips on buying and selling homes. Additional information made available through the system includes relocation advice, descriptions of area school systems, open house schedules and more. The system is capable of handling from four to over a thousand callers simultaneously depending on the size of the installation. Consumers may call the main system number from the comfort of their home, office, or car. Once connected to the system, they have the option of selecting listings based on price, location and features. A unique four-digit category is assigned to each listing. The category numbers are promoted in all other forms of traditional advertising mediums including classified ads and yard signs.

After reviewing the features and benefits of a particular listing, a caller may choose to be directly connected to the listing agent's office or home by simply pressing the star (asterisk) key. They may also leave their name and telephone number or other information through a voice record feature.

Brite Voice Systems has installed Real Estate Hotline systems in cities such as Kansas City, Sacramento and Washington, D.C. The company also manufactures and sells turnkey audiotex and interactive voice response systems to broadcast and print media, cellular telephone, health care markets and to telephone companies, government agencies and 800/900 service bureaus.

CORTLAND, NY (NOV. 12) PR NEWSWIRE - Marietta Corporation (NASDAQ: MRTA) announced today that sales for fiscal 1990 increased by approximately 33 percent compared to fiscal 1989. Management estimates that net income will decrease approximately 5 percent to 10 percent for the same period.

Marietta President John Nadolski commented on the estimates for the fiscal year, saying sales for the company as a whole were in line with original growth projections, however sales in Marietta's guest amenities market fell short of growth goals. The company feels the underperformance in guest amenity sales was a result of several factors including a slowdown in the lodging industry and the transition the company recently made in their sales and marketing approach to the guest amenities market.

The company will release fourth quarter and fiscal 1990 financial statements in early December.

Marietta Corporation specializes in the design, manufacture, packaging, marketing and distribution of guest amenity programs to the travel and lodging industry in the United States and abroad, and provides customized "sample-size" and "unit-of-use" packaging products and services to major consumer products companies in the toiletries, cosmetics and pharmaceutical industries.

WASHINGTON, D.C. (NOV. 12) PR NEWSWIRE - Michael J. Stanton, director of state relations for the Motor Vehicle Manufacturers Association, has been named the Association's director of federal liaison. Stanton's appointment was announced today by MVMA President Thomas H. Hanna.

In his new assignment, Stanton will be responsible for implementing and coordinating MVMA and its members' programs to assure that their views on federal issues are appropriately communicated to members of Congress and their staffs, executive departments and agencies and other associations and organizations.

Stanton, state relations director for the past four years, replaces Tim MacCarthy, who leaves MVMA to be the director of government and industry relations for Nissan North America, Inc.

Stanton joined MVMA in 1979 as federal liaison manager. A native of Washington Stanton holds a master of administration degree from George Washington University and a bachelor of arts degree from Wheeling College, West Virginia.

He spent two years in the Navy, serving as lieutenant junior grade aboard the U.S.S. America during the Vietnam War. Prior to joining MVMA, Stanton was in the Department of the Navy as a liaison official to business and to the Congress.

Stanton, 45, lives in Rockville, Md., with his wife, Mary Anne, and their four children.

MVMA is the trade association for domestic motor vehicle manufacturers. Its seven member companies build 94 percent of U.S.-made motor vehicles. Members are: Chrysler Corporation; Ford Motor Company; General Motors Corporation; Honda of America Mfg., Inc.; Navistar International Transportation Corp.; PACCAR Inc.; and Volvo North America Corporation.

FRANKLIN, MASS. (NOV. 12) PR NEWSWIRE - Stuarts Department Stores, Inc. (NASDAQ-NMS: STUS), announced today that there exist certain Events of Default under its bank credit facility with Shawmut Bank, N.A. The company announced further that, although the company is current on its repayment obligations under the credit facility and the bank has not attempted to accelerate the maturity of its loans to the company, the company has failed to comply with certain financial covenants in respect of the fiscal quarter ended Nov. 3, 1990. The company announced also that it had been advised by the bank that, as a result of the existence of such Events of Default, the bank had declined to make certain advances requested by the company under the bank credit facility and that the bank did not intend to make any further advances until such time as the company's financial condition, as reflected by such Events of Default, is addressed by the company in a manner which the bank deems satisfactory.

The company does not believe that this development will materially impair its ability to continue retail operations at this time. The company is presently engaged in discussions with the bank concerning its credit arrangement and is reviewing its financial condition and related alternatives, including, among others, alternative sources of financing and whether it should seek relief

from its creditors under Chapter 11 of the Bankruptcy Code.

Stuarts Department Stores, Inc., operates 23 self-service discount department stores located in Massachusetts, New Hampshire, Rhode Island, Vermont, Connecticut and Maine, 22 under the name "Stuarts" and one under the name "Harry's." The company's stores sell a wide variety of general merchandise selected to satisfy the clothing, home, recreational and convenience needs of the blue collar and middle income family.

LAFAYETTE, LA (NOV. 12) PR NEWSWIRE - Offshore Logistics Inc. (NASDAQ: OLOG), a supplier of aviation services worldwide, reported gross revenues of $24.7 million for the three months ended Sept. 30, compared to $22.0 million reported for this same period a year ago.

The company also reported net income of $4.9 million ($.28 per share) compared to net income of $4.2 million ($.24 per share) for the same quarter last year. Gross revenues of approximately $2.4 million from marine services in each period were not included in these amounts. Net income from marine services of $.02 per share in each period is shown as income from discontinued operations.

Income from continuing operations increased 18 percent from the same quarter last year. The increases in revenues and profits are the result of 17 helicopters being added to the fleet since September 1989 and increased charter hire rates. Demand for helicopter services remains strong in the U.S. Gulf of Mexico and activity is increasing in many international markets. The company has committed to purchase 26 new helicopters during the next 18 months.

The recently announced sale of the company's marine assets will be reported as a gain of approximately $5 million in the quarter ended Dec. 31. The results of marine activities in prior periods are reported as discontinued operations. The tabulated results for the quarters ended Sept. 30, 1990 and 1989, are as follows (dollars in thousands except earnings per share):

OFFSHORE LOGISTICS INC.

3 mos. ended	9/30/90	9/30/89
Gross revenue	$24,683	$22,028
Income from continuing operations	$ 4,580	$ 3,886
Income from operations of discontinued marine division	$ 290	$ 285
Net income	$ 4,870	$ 4,171
Earnings per common share and common equivalent share from continuing operations	$ .26	$ .22

DALLAS (NOV. 12) PR NEWSWIRE - EDS and Cummins Cash and Information Services, Inc. (CCIS) today announced the signing of a 10-year, $90 million systems management agreement under which EDS will assume full responsibility for the computer and communications operations of CCIS.

CCIS, based in the Dallas area, provides electronic funds transfer, fuel purchase programs and temporary truck permit services to the North American trucking industry. CCIS is wholly owned by Cummins Engine Company, based in Columbus, Ind. Cummins is a major producer of diesel engines, components and power systems for trucks and industrial equipment.

The relationship will have an immediate, positive impact on CCIS' responsiveness in serving its customers throughout North America.

EDS' vast technological expertise and processing capacity will greatly expand CCIS' on-line transaction processing capability and allow more rapid development and deployment of new products and services to the field.

EDS will provide additional hardware and software resources to allow CCIS to continue meeting the needs of its rapidly growing customer base, and CCIS will have access to a wide range of EDS programming capabilities that can quickly customize new products and services. Also, EDS can efficiently engineer the critical connectivity between CCIS and the many diverse mainframe systems used by its customers.

EDS has operations in 27 countries, employs 60,000 worldwide and is the leader in providing information technology services. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

VANCOUVER, WASH. (NOV. 12) PR NEWSWIRE - VanFed BanCorp (VANF) and Washington

Mutual Savings Bank (NASDAQ: WAMU) today announced the signing of a non-binding letter of intent to merge VanFed BanCorp's subsidiary, Vancouver Federal Savings Bank (VanFed Savings) of Vancouver, Wash., into Washington Mutual's subsidiary, Washington Mutual, a Federal Savings Bank.

The cash offer, if permitted by the regulators, would provide VanFed BanCorp stockholders a total consideration, subject to adjustment and after the exercise of options, of approximately $23.3 million or $19 per share. At the close of business on Nov. 9, VanFed BanCorp's stock was trading at $9.25 per share.

In connection with the merger, VanFed BanCorp has granted Washington Mutual an option to purchase 9.9 percent of VanFed BanCorp's shares. Each party is subject to the payment of certain fees if, under certain circumstances, it should elect not to proceed with the transaction.

VanFed Savings operates seven locations in the Vancouver, Wash., area and has assets of approximately $306 million and deposits of approximately $254 million. Washington Mutual and its subsidiary, Washington Mutual, a Federal Savings Bank, operate 75 branches in Washington and 18 home loan centers in Washington, Oregon and Idaho. Washington Mutual has assets of $7 billion and deposits of $4.3 billion.

Kerry Killinger, Washington Mutual president and chief executive officer, said "We are excited by this opportunity to serve more of the greater Vancouver community. VanFed and Washington Mutual share a number of traditions: emphasizing customer service, focusing on the consumer, and serving the community. Washington Mutual already has a substantial commitment to the Vancouver area, as shown by the new branch we just opened. The Vancouver area is growing and Washington Mutual wants to help the community continue prospering. Together, VanFed and Washington Mutual will make a great team."

"Washington Mutual and VanFed, on a combined basis, have about 16 percent of the Vancouver deposit market. VanFed currently is the Clark Co. leader in residential mortgage loans and Washington Mutual is the No. 1 residential mortgage lender in Washington state and a leading lender in the greater Portland area. That combination makes for a great organization. A major component of our corporate strategy is to increase our market presence in key areas. The proposed merger is another step toward our goal of being a leading regional bank," said Killinger.

Loren Means, VanFed president and chief executive officer, added, "We strongly believe this merger is in the best interests of our stockholders, customers and employees. The added resources of this merger will enable economies of scale to be achieved that we are unable to obtain as a stand-alone entity. In addition, the combined organizations will be able to offer a broader array of services to customers throughout our region. We are delighted to join the Washington Mutual team and look forward to an exciting future."

The transaction is subject to approvals from the Office of Thrift Supervision (OTS), VanFed Savings' primary regulator. VanFed Savings converted from mutual to stock form in 1989 and because this conversion occurred within the past three years, regulatory approval is required before any further steps can be taken. In addition to regulatory approval, the approval of VanFed BanCorp shareholders will be required. The entire process could take approximately eight to 10 months.

CONTACT: Loren B. Means, president and chief executive officer of VanFed BanCorp, 206-690-0303, or Scott F. Selby of Washington Mutual, 206-461-3186

CHANTILLY, VA (NOV. 12) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) today reported first quarter net income of $20.2 million, or $1.18 per share, for the quarter ended Sept. 30, 1990. For the prior year's first quarter, the company earned $200,000 before preferred stock dividends. Net sales were $123.2 million in the fiscal 1991 first quarter. This compared with net sales of $157.3 million in the same fiscal 1990 period, which included sales of $47.4 million from Banner Aerospace, Inc., accounted for as an equity investment in fiscal 1991. Adjusted sales for the prior year's quarter, excluding sales from Banner Aerospace, would have been $109.9 million. The 1991 sales, as compared with the adjusted 1990 sales, show an increase of $13.3 million from continuing business segments.

Net income for the current year's quarter was affected by a non-recurring net pre-tax gain of $54.6 million principally from the initial public offering in July 1990, of 52.8 percent of Banner's holdings in Banner Aerospace, and an after-tax loss of $10.1 million reflecting a provision for loss on the disposal of discontinued operations.

Banner Industries' operating income before interest and taxes was $13.5 million (including equity earnings in affiliates) for the quarter ended Sept. 30, 1990, compared with $8.6 million in the year-ago period. Operating income for the quarter ended Sept. 30, 1989, would have been $5.7 million if the partial spin-off of Banner Aerospace had occurred in the prior year.

Commenting on the recent results, Chairman and Chief Executive Officer, Jeffrey J. Steiner, stated, "If we focus on the performance of Banner Industries' core operations, namely aerospace fasteners, industrial tooling and telecommunications, we achieved strong operating results. Consolidated revenues of these businesses increased by 12 percent, while operating income rose 35 percent."

Steiner also noted that the company benefited from the sale of 52.8 percent of

its interest in Banner Aerospace. This transaction generated $125 million in cash and, in addition, Banner Aerospace assumed $75 million of corporate debt. Banner Industries also recently announced an agreement to sell its Envirex waste water treatment operations for approximately $75 million cash.

Banner Industries, Inc. is a leading supplier of aerospace and industrial products and communications services.

MINNEAPOLIS (NOV. 12) PR NEWSWIRE - Datakey, Inc. (NASDAQ: DKEY) announced today that it has received another multi-million dollar contract from the Department of Defense for a significant quantity of KSD-64A keys for the government's secure telephone program. This is the fourth contract Datakey has been awarded under this program since 1986.

"We are pleased to report that this contract calls for significant monthly deliveries of our KSD-64A keys to the government throughout 1991. It also includes an option year which permits the government to purchase another similar quantity of keys, with shipments extending over the next 12 months," said Ronald J. Niccum, senior vice president of government sales and marketing. Niccum added that due to the sensitivity of the secure telephone program, Datakey cannot disclose the exact value or other details of the contract.

"The key deliveries scheduled under this contact represent government requirements only and do not include purchases from any of the phone suppliers. They will also need large quantities of our keys and receptacles during the contract period," said Niccum. "In addition, Datakey's licensee, CTS Corporation, received a contract that will generate royalty income for Datakey throughout 1991.

"While this new government contract is not as large as last year's, it represents a very important order for the company," observed Niccum. "Moreover it reflects a continuing, long-term increase in use of the secure telephones. This usage is expected to expand even further with introduction of a new, commercial version of the phones sometime in 1991. In addition, the new contract will continue to provide Datakey with significant, core revenue, giving us a foundation for the company's ongoing commercial market development activity and for our participation in other important government programs."

Datakey, Inc., designs, produces and markets specialty-class portable data carriers in the form of keys, cards and custom-shaped devices to OEMs in an application-oriented marketplace. These small, semiconductor-memory-based, portable devices serve as a convenient way to provide machine-readable electronic information for use in a variety of microprocessor-based equipment. The company's portable data devices are packaged to withstand the adverse elements found in transportable human environments. Datakey also designs, produces and markets supporting peripheral equipment for these portable data carriers devices. Shares of Datakey's common stock are traded on the NASDAQ/NMS market under the symbol DKEY.

HAIFA, ISRAEL (NOV. 12) PR NEWSWIRE - Elbit Computers Ltd. (NASDAQ: ELBTF), an Israel-based manufacturer of computer systems and products for military and commercial applications and a subsidiary of Elron Electronic Industries Ltd. (NASDAQ: ELRNF), today announced its unaudited consolidated financial results for the third fiscal quarter and the nine-month period ended Sept. 30, 1990.

Consolidated revenues for the quarter ended Sept. 30, 1990 were $91,267,000 as compared with $42,159,000 for the parallel quarter last year. Net income for the quarter was $5,472,000, or $0.35 per share, as compared with $3,042,000, or $0.22 per share, for the corresponding quarter in 1989.

On a year-to-date basis, consolidated revenues for the nine months ended Sept. 30, 1990 totalled $264,161,000, as compared with $117,200,000 for the parallel period last year. Net income for this nine-month period was $15,881,000, as compared with net income of $8,747,000 in the corresponding period of 1989. Primary earnings per share for the nine month period under review amounted to $1.05, and earnings per share on a fully diluted basis were $1.02, as compared with $0.62 in the same period in 1989.

The company's board of directors declared a third quarter dividend of 6 cents per ordinary share, payable on Jan. 7, 1991 to shareholders of record at the close of business on Dec. 8, 1990. Under Israeli law, the company is required to withhold taxes at a rate currently estimated to be 15.2 percent, which a U.S. taxpayer may credit against U.S. taxes due in respect of the dividend.

Out of the $264 million in consolidated revenues for the first nine months of 1990, $114 million were derived from Elscint Ltd. (NYSE: ELT), the company's medical diagnostic imaging subsidiary. Elscint's net income in the period under review amounted to $8.7 million, which contributed approximately $5.4 million to Elbit's net income in this nine-month period.

Revenues deriving from Elbit's traditional business increased substantially during this nine-month period, and reached $150 million, as compared with $117 million in the corresponding period of 1989. This business yielded a net income of $10.5 million in the period under review, up from $8.7 million in the parallel period of 1989.

Over 80 percent of consolidated revenues in the period under review derived from export and international sales. Approximately 50 percent of consolidated revenues represent U.S.-related business.

Revenues derived from non-defense activities amounted to 55 percent of revenues, compared with 23 percent in fiscal 1989. This change reflects the company's strategy to offset the effect of decreasing defense expenditures worldwide.

The company's backlog of orders at Sept. 30, 1990 was approximately $386 million, as compared with $330 million at Sept. 30, 1989. The backlog figure for 1990 includes orders for sales of Elscint systems. Over 80 percent of such backlog represents orders deriving from outside Israel, mainly from the United States.

On Aug. 1, 1990, the company issued 517,193 ordinary shares to Elron. These shares represented half of the consideration paid to Elron for the Elscint ordinary shares acquired from Elron at the beginning of this year.

Elbit Computers Ltd. designs, develops, manufactures, markets and services a wide range of advanced, often combat-proven electronic products and systems for airborne, shipboard and ground military applications. Through its Elscint Ltd. subsidiary, Elbit is engaged in the design, manufacture, distribution and servicing of computer-based medical diagnostic imaging systems. Through other subsidiaries, it provides a variety of commercial products and services, as well as specialized infrared imaging equipment.

HUTCHINSON, MINN. (NOV. 12) PR NEWSWIRE - Hutchinson Technology Incorporated (NASDAQ/NMS: HTCH) today reported net income for the fourth quarter ended Sept. 30, 1990, of $1,314,000, or 33 cents per share, which includes 6 cents per share in tax credits. Net sales for the quarter were $35,029,000. For the comparable quarter of the prior fiscal year, the company reported a net loss of $360,000, or 9 cents per share, on net sales of $23,753,000.

For the year ended Sept. 30, Hutchinson Technology reported record net income of $5,338,000, or $1.34 per share, on net sales of $122,444,000 compared to a net loss of $5,693,000, or $1.44 per share, on net sales of $92,321,000 for fiscal 1989.

Jeffrey W. Green, Hutchinson Technology's chairman and chief executive officer said the return to profitability for the quarter and the year results from improved demand for disk drive components, as well as the company's success in positioning itself as a supplier of components for new disk drive models. "Our share of the market for suspension assemblies used in the newest model disk drives is especially strong and we continue to be the world's leading supplier of suspension assemblies for rigid disk drives," said Green.

Fourth quarter net sales increased approximately 14 percent over fiscal 1990 third quarter levels. The fourth quarter was a 14-week period compared to the 13-week third quarter. Net income declined to 33 cents per share for the

fourth quarter from 42 cents per share in the third.

Green attributed the lower fourth quarter profitability to a change in the product mix. "Suspension assemblies of newer designs accounted for a larger portion of fourth quarter sales. Yields on these new designs are initially lower than those for established products, resulting in lower gross profits," said Green.

Entering fiscal 1991, Green said that order rates are high and that the company is operating at near capacity on certain products.

Hutchinson Technology manufactures components and assemblies for original equipment manufacturers in the computer peripheral, electronics and other technology industries.

#90316p5754 11/12/1990 ~PR Newswire

JACKSON, MICH. (NOV. 12) PR NEWSWIRE - Consumers Power Company today announced a key judicial victory in Ingham County Circuit Court which denies the State of Michigan jurisdiction over current and past operations of the Ludington pumped storage hydroelectric generating facility on Lake Michigan.

Ingham County Circuit Court Judge Carolyn Stell summarily dismissed a $147 million lawsuit filed in 1986 against Consumers Power and The Detroit Edison Company by the Office of the Attorney General and the State Department of Natural Resources in connection with fish losses at the facility. The utilities jointly own, and Consumers Power operates, the Ludington plant.

Judge Stell's ruling found that the State of Michigan's complaint, seeking past and future damages due to fish losses and alleging violation of a Lake Michigan-bottom land use lease, is preempted by the Federal Power Act. Ruling "the plaintiff's claim would require the court to determine the conditions and requirements" of the facility's federal license, Judge Stell wrote that "federal law dictates that the states do not have the power to veto the construction and operation of a federally licensed hydroelectric plant."

Judge Stell further wrote, "The court takes judicial notice of the fact that a temporary net has been installed in accordance with a Federal Energy Regulatory Commission order directing defendants to study alternative plans for the mitigation of fish mortality" at the plant. The utilities recently concluded the second year of a multi-year program in which a protective seasonal barrier net was employed to keep fish outside the area of the Ludington plant's water intakes.

Located on the shores of Lake Michigan, the Ludington plant is a major power resource for Michigan, providing low-cost electricity for homes and businesses throughout the state. Water is drawn from Lake Michigan into its 1.3-square-mile reservoir at night when demand for electricity is low and released during the day when power demand is high. The plant saves customers more than $40 million each year by displacing higher cost generation.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

MADISON, WIS. (NOV. 12) PR NEWSWIRE - Tak Communications, Inc. today announced that it has accepted a tentative proposal from its financial lenders that will restructure its corporate debt and allow it to continue to build its operations throughout the country.

The company said the tentative accord was reached after nearly eight months of talks with a consortium of east coast-based banks.

"This tentative agreement will have remarkably little impact on the daily operations of our company and its stations. We will continue to broadcast for the public's benefit and manage our business while the final details of the plan are developed," said Sharad Tak, chairman and owner of the firm. "When it is approved, it will make Tak Communications an even stronger broadcasting business operation. There will be no layoffs nor staff reductions while we complete this restructuring and chart a revised financial course."

Tak noted that the company's revenue growth for this year is ahead of the 1989 pace and added that cash flow was more than sufficient to meet its current secured debt schedule and continue operations. He added the draft plan also eliminates erroneous reports and unfounded rumors that the company's Wisconsin television stations would be sold.

As part of the agreement, Tak said the banks have withdrawn their request for a federal court to appoint a receiver for the company's nine radio and television stations.

"These banks were feeling the pressure of increased regulatory scrutiny, and despite meeting virtually all of our senior secured debt payments, they were still pressing for more," he added. "The plan's outline means that we can now work to strengthen Tak Communications' position as one of the leading broadcast companies in the nation."

He also noted that the company is confident that "our future is made even more

promising by this proposal, and we anticipate a stronger financial picture to emerge in the months ahead.

"We are pleased that our negotiations have resulted in an outline that allows us to continue broadcasting for the public's benefit. Now, we can aim our attention toward building a stronger and more profitable broadcasting company " he said.

Tak Communications, Inc. has television station operations in Wisconsin, New York and Hawaii. It owns radio stations in Pennsylvania, Florida and Illinois. It employs about 580 people.

CONTACT: Evan N. Zeppos of Zeppos-Remsik, Inc., 414-481-6237, or 414-789-7986 after hours, for Tak Communications, Inc.

SOUTHFIELD, MI (NOV. 12) PR NEWSWIRE - Vernon E. Oeschle has been appointed executive vice president and chief operating officer of Allied-Signal Automotive, one of the world's largest automotive suppliers.

Oeschle, former group vice president of the Dana Corporation (NYSE: DCN), was named to the new position by John W. Day, president and chief executive officer of Allied-Signal Automotive.

Oeschle will have charge of all operations of the firm's strategic business units worldwide, said Day, who had been both chief executive officer and chief operating officer.

"The increasing complexities of managing a globally based company in the demanding, highly competitive environment of the automotive industry in the nineties dictates the need for an operating officer whose sole responsibility is the strategic business units," said Day.

"All policy, planning, financial, human resource and other staff functions will continue to report to me," added the president.

Oeschle, who joined Dana in 1964 following his graduation from Bowling Green State University, had served since 1985 as group vice president. His responsibilities included line management for several divisions with annual sales of over $2 billion, worldwide strategic and tactical responsibility for the highway vehicle original equipment market and strategic responsibility for manufacturing disciplines in all of Dana's 350 facilities.

He also had served as president and chief executive officer of Hayes-Dana Inc. a Canadian subsidiary of Dana; corporate controller; and in other key managerial and financial positions.

He is a board member and vice chairman of the Motor Equipment Manufacturers' Association (MEMA) and chairman of the MEMA - JAMA (Japanese Auto Manufacturers Association) sponsored by the U.S. Department of Commerce.

Allied-Signal Automotive serves seven major businesses worldwide: braking systems for passenger cars and light trucks; braking systems for medium and heavy trucks; friction materials; safety restraints; turbocharging systems; sparkplugs, and filters.

The company is part of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive and engineered materials.

HASTINGS, MINN. (NOV. 12) PR NEWSWIRE - Genius Technologies, Inc. (NASDAQ: MDSI), formerly Micro Display Systems, Inc., is announcing significant enhancements to and expansion of its line of The Genius(R) high-performance video controller cards at Comdex/Fall'90.

In September 1990, Genius Technologies released The Genius Model 1922M, a 19-inch dual page monochrome display and video controller card compatible with the IBM PS/2(a) line of micro channel computers. The Model 1922M is based on the Texas Instruments 34010 general purpose microprocessor and supports all TIGA-based applications, as well as an extensive list of software applications using The Genius' proprietary drivers.

A new half size video controller card for the most widely used product, The Genius 15-inch full page monochrome display system for PCs and compatibles, was introduced in early October 1990. The card incorporates new technology and design which translates into very high product reliability.

Initial shipments of The Genius Model 1920C and 1920G have begun and customer feedback has been very positive. These feature-rich controller cards for large screen color and grayscale displays have a 32-bit microprocessor and run at 60Hz. Standard memory is 2MB VRAM and 2MB DRAM. A natural upgrade path has been designed to allow memory expansion up to 16MB DRAM, the most being offered in the market today.

Windows 3.0 drivers have been available since late September for several of The Genius systems and driver development for the remaining applications is scheduled for completion in November 1990.

Genius Technologies is also introducing a five-year full warranty on all of these new boards. "High-quality products, backed with knowledgeable customer

support has contributed to a history or high ratings and superior performance citations from several leading trade journals," said Richard Falconer, vice president of marketing for Genius Technologies, Inc. "We are firmly committed to continued excellence in the future."

(a) PS/2 is a trademark of International Business Machines, Inc.

LAS VEGAS (NOV. 12) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) and Pocket Soft Inc. today announced they have signed an agreement to use the Pocket Soft .RTLink/Plus overlay linker as part of Ashton-Tate's dBASE Professional Compiler, which is currently under development.

The dBASE Professional Compiler is being demonstrated this week in the Ashton-Tate booth, No. H8218 at the Hilton Pavilion, during COMDEX Fall '90.

".RTLink/Plus is a good example of Ashton-Tate's commitment to provide the best available tools for customers," said Dave Proctor, Ashton-Tate's executive vice president, product development. "The inclusion of .RTLink/Plus in the dBASE Professional Compiler provides the technology necessary to ease the creation of complex applications."

"We are very pleased that .RTLink/Plus is going to be part of Ashton-Tate's dBASE Professional Compiler package," said Thames Goodwin, marketing director of Pocket Soft. ".RTLink/Plus is the industry-leading linking technology for MS-DOS developers. Making it part of this new compiler will ensure that a product that meets Ashton-Tate's high standards is available to dBASE developers."

With .RTLink/Plus in the dBASE Professional Compiler, developers can control the memory requirements of their program, allowing them to run large applications (even larger than 640k) in smaller amounts of memory than would normally be required. .RTLink/Plus provides other unique features such as utilities to help optimize runtime performance and reduce the amount of disk space required to store multi-executable systems.

Headquartered in Torrance, Calif., Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and software utilities. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies. Ashton-Tate has international operations in most countries around the world, with products available in 20 languages in more than 50 countries.

ARLINGTON, VA. (NOV. 12) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) announced today that is has signed a four-year agreement with Phone Base Systems, Inc., a leading inter-active voice response service bureau to provide 800 and 900 services.

The contract is worth an estimated $15 million over four years. Under its terms, MCI will supply Phone Base Systems, Inc., with 800 service for toll-free incoming calls from the entire U.S. and a number of international locations. MCI's 900 service provides nationwide access for callers to customer-provided information services and enables the customer to determine the cost charged to callers.

Bert C. Roberts Jr., MCI president and chief operating officer, explained, "MCI's 800 and 900 services offer flexibility and cost effectiveness to Phone Base Systems and their customers." Roberts added, "Phone Base, which is a sophisticated 800/900 service bureau, can take advantage of a variety of specialized 800 and 900 service features tailored for their business operations."

According to John C. Keaveney, president and chief operating officer of Phone Base Systems, Inc., "MCI was chosen because it provided us with an advanced, yet flexible system for our 800- and 900-number call processing." He added, "Phone Base Systems must process large volumes of simultaneous calls cost-effectively, with consistency and reliability. MCI's 800 and 900 service will ensure our success in this area."

Headquartered in Vienna, Va., Phone Base Systems, Inc., provides advanced 800- and 900-number call processing for consumer, business-to-business marketers and non-profit organizations. Staffed with more than 100 market-tested specialists, Phone Base develops and maintains its own comprehensive telecommunications facility and offers marketers the ability to integrate a variety of sophisticated interactive elements into one phone call.

MCI is the world's second largest long-distance provider, supplying a full range of voice and data telecommunications services to business and residential customers and government agencies. MCI's long-distance service enables customers to call throughout the United States and dial direct to more than 170 nations.

MCI Mid-Atlantic serves customers in Virginia, New Jersey, Pennsylvania,

Delaware, West Virginia, Maryland and the District of Columbia.

#90316p5774 11/12/1990 ~PR Newswire

LAS VEGAS, NEV. (NOV. 12) PR NEWSWIRE - From photographs stored on CDs to high-quality color printing, Eastman Kodak Company (NYSE: EK) is demonstrating an unparalleled mix of products and technologies at COMDEX/Fall '90 for bringing color to the desktop.

"From the first color photographs to the introduction of color in motion pictures, color images have long been proven to communicate more powerfully than black-and-white," said David A. Lehman, director of strategic planning for Kodak's information sector. "Drawing on our long history of leadership in color imaging, Kodak is demonstrating the ability to bring the power of color images to the world of desktop computing."

Highlighting a technology introduced just two months ago, the company is demonstrating its new Kodak Photo CD system, which digitizes 35 mm photographic images and stores them on compact discs. Along with the system itself, Kodak is demonstrating two new software packages -- the Photo CD development toolkit and Photo CD accessory -- which allow the use of Photo CD images in computer applications.

In these applications, users with CD-ROM XA drives can integrate photographic-based color images into desktop publishing, business presentations and other functions. In consumer applications, the Photo CD system will allow people to view their photographs on television, using a combination Photo CD/audio CD player.

Besides the Photo CD system, COMDEX visitors will see the first public demonstration of Kodak technologies that provide the computer industry a uniform way to represent color.

Proposed as standard industry color space, Kodak's PhotoYCC color interchange specification provides an efficient method for representing color digitally. PhotoYCC has received support from a number of leading computer firms, and will be supported in the new PostScript Level 2 page description language from Adobe Systems, Inc.

Kodak is also demonstrating the Kodak color management system, a family of software products and tools designed to provide consistent, quality color from a variety of devices and operating systems.

Another featured product bringing color to the desktop is the Kodak Diconix color 4 printer. Introduced just last month, this desktop ink-jet printer produces color text and graphics on plain paper or transparency material. The printer, available for users of IBM-compatible and Apple Macintosh computers, uses specially formulated inks to produce a full palette of colors.

#90316p5776 11/12/1990 ~PR Newswire

TINTON FALLS, N.J. (NOV. 12) PR NEWSWIRE - Keptel, Inc. (NASDAQ: KPTL) today announced sales and earnings for the quarter and fiscal year ended Sept. 30, 1990. Sales for the year were $51,103,000, while net income totaled $1.2 million, or $.26 per common share. Sales for the fourth quarter totaled $13,521,000 as net income rose to $265,000, or $.06 per common share, up from a loss of $225,000 ($.05 per share) reported in the previous quarter.

Richard K. Laird, president and chief executive officer, said, "As expected, the company returned to profitability during the fourth quarter. Revenues returned to planned levels as our Bell and non-Bell telephone customers ordered equipment to our original expectations. These improvements, coupled with better gross profit margins overall, produced a solid performance for the quarter despite nearly $400,000 (.05 cents per share) of non-recurring expenses associated with staff changes, a new product introduction and the start-up of our new Mexican factory. These behind us, we are optimistic that 1991 will be a very strong year.

"Operationally during the quarter, each of our product groups turned in good showings. Keptel Network Interface and Test product sales rose from $7.9 million to $10 million with especially strong performances from Ameritech and Bell Atlantic as a result of their now better orchestrated deployment of our new 4600 Network Interface Device. Voice and Data Connecting apparatus sales from our Armiger group remained steady at $1.2 million, reflecting continued acceptance of our new modular Epitome Line, while transmission product sales from our Comfab group totaled $1.5 million despite delays in new product development which prevented shipment. (Turbo, the most anticipated of these new transmission products leaves the lab this week for field testing.)

"Inventories during the quarter were reduced by nearly $1.6 million and our short-term debt position of $1,750,000 was retired; our plan now is to begin retiring long-term debt as well.

"Additionally during the quarter, David Stehlin joined the company in the new position of senior vice president, marketing and sales. David has begun strengthening the company's sales and marketing efforts by moving significant staff and dollar resources from R&D to marketing, deploying existing headquarters people to field positions and accelerating the company's entry

into the fiber optic market; get closer to the customer, define and design faster, the keys.

"Looking to the future, two regulatory changes, one now in effect and the other coming Jan. 1, will have positive effects on our company.

"The first, FCC regulation 88-57, better defines the points at which telephone company responsibility ends and customer responsibility begins and as such will serve to increase the market for the company's 'point of demarcation' Network Interface Products. Bell Atlantic and Ameritech have already selected one of our new products designed to this end and will begin deployment in early calendar '91; the other five Bells are evaluating.

"The second new regulation, commonly referred to as 'price cap' provides telephone companies with additional financial incentives to operate more efficiently. These incentives will increase the market size for the company's 'quick install' and 'remote test products,' areas in which Keptel is a clear leader.

"Overall, the reorganizations we executed during the third and fourth quarters coupled with our new factory in Mexico, new products coming and our strong base business, positions the company well for more predictable growth in both revenues and earnings in the years to come."

Keptel, Inc. designs, manufactures and markets a diversified range of telecommunications and CATV test equipment as well as a full range of voice and data connecting products.

#90316p5777 11/12/1990 ~PR Newswire
MCLEAN, VA. (NOV. 12) PR NEWSWIRE - Dr. William E. Sweeney, Jr. was named executive vice president and chief operating officer (COO) of BDM International, Inc. in an announcement today by Earle C. Williams, president and chief executive officer of the diversified professional and technical services firm.

"Dr. Sweeney has made immeasurable contributions to the leadership and operations of BDM," Williams said. "We believe that, as COO, his talents will be even more important in helping us seize the opportunities now available to BDM as an independent company."

Noting that BDM had been a Ford Aerospace subsidiary from 1988 until last month, he said, "The appointment of Dr. Sweeney as COO is the first step in aligning our senior executive talent with the exciting and challenging tasks ahead of us." On Oct. 24, simultaneous with the acquisition of Ford Aerospace by Loral Corporation, BDM was acquired by The Carlyle Group, L.P. in a move that will permit significant ownership by BDM management and staff, along with the operating freedom Carlyle vests in companies it has acquired.

Beyond the traditional duties of a COO, Williams explained, Dr. Sweeney will be responsible for implementing an "Operations Agenda" for BDM in 1991. According to Dr. Sweeney: "This Operations Agenda for 1991 will focus on the reinforcement of our new, independent status and the achievement of significant improvement in our business development, marketing, and business management. Additionally, we will emphasize the continuing commitment to quality services and products for both our traditional clients and our new commercial and governmental clients."

Dr. Sweeney succeeds F.N. Hofer in the COO role. Hofer continues as corporate executive vice president and has been newly charged with responsibility for a series of key corporate-wide projects affecting the way BDM operates.

BDM is headquartered in McLean, (metropolitan Washington) with offices and operations in more than 50 worldwide locations. The company provides professional and technical services to public and private sector clients in national defense and security, communications, energy, logistics, space, information systems, advanced technology, manufacturing technology, and other areas.

#90316p5783 11/12/1990 ~PR Newswire
LANCASTER, PA (NOV. 12) PR NEWSWIRE - Cardinal Technologies, Inc., today announced the release of its latest addition to the Cardinal PC10 Series of

desktop computers, the PC10-386SX. The PC10-386SX is a fast and powerful personal computer with a fully integrated 12" monitor.

This computer was developed to satisfy the need for a "plug-in-and- play" ready, fully integrated personal computer, with a VGA monitor, capable of outperforming more expensive products on the market. Plus, the product retails for only $999.00 complete.

The integrated package design is similar to the Macintosh products from Apple and the IBM PS/1 from IBM. Everything needed to start up is built in. The result is an IBM compatible PC in a Mac-like package. In contrast to the PS/1 however, the designers from Cardinal have made sure that the integrated package has no unsightly or unnecessary wires or cords. And like products from Macintosh, only a single cord is needed to power up the PC10-386SX to start computing - satisfying an emerging consumer need for convenient, appliance-like functionality.

This low cost, very compact PC is rated at a maximum clock speed of up to 20MHz, has a base RAM of 1MB expandable to 8Mb, and features EMS 4.0 support. There are one parallel and two serial ports and a mouse port. There are also two industry standard (ISA) compatible expansion slots, one 16 bit and one 8 bit, to ensure full expandability and flexibility when using peripherals. Software compatibility includes Novell, 3COM, and Windows 3.0 Coupled with the Cardinal FlashCard and a network board, the PC10-386SX would make an ideal, high performance workstation, at a cost similar to a dedicated terminal.

Cardinal has included an operating system, DR DOS 5.0, a graphical user interface, built-in VGA graphics, and a 1.44MB 3.5' disk drive. The onboard 100 percent register level compatible VGA video controller chip is downward compatible with MDA, CGA, HGC and EGA formats and can provide 640x480 resolution for 256 colors or gray scales on the integrated monochrome monitor.

Overall configurations detail modest footprint dimensions of 10.75"x12.00"x15.25," which includes the monitor, and a weight of 15 lbs. For $1,399.00, the PC10-386SX can be delivered with a 40MB fixed drive.

Cardinal Technologies, Inc. designs, manufactures and markets advanced computer components and products. Sold under the Cardinal- brand and through various OEM's, all products are designed and produced domestically at Cardinal's state-of-the-art, 92,000 square foot manufacturing facility located in Lancaster, Pa. Cardinal's line includes communications and graphics products, as well as computer peripherals and subsystems such as high-performance color and monochrome display monitors, keyboards, communication software, desktop PC systems and terminals.

WINTER PARK, FL (NOV. 12) PR NEWSWIRE - Southern Starr Broadcasting Group, Inc. (NASDAQ: SSBG) reported record income from operations of $939,328, a 40.1 percent increase, for the six months ended Sept. 30, 1990 and net income of $483,908, or $.37 per share compared to net income of $1,899 the prior year. Income from operations for the quarter increased 44.5 percent to $329,834, from $228,242 for the quarter ended Sept. 30, 1989. Net income for the quarter was $160,309, or $.12 per share, compared to a net loss of $85,085.

Revenues declined 13.8 percent and 13.1 percent to $2,045,649 and $4,360,279 for the quarter and six months, respectively. Excluding the operations of the Leesburg/Orlando station which was sold in December 1989, revenues would have been $1,832,722 and $3,762,165 for the quarter and six months ended Sept. 30, 1989, resulting in effective increases of 11.6 percent and 15.9 percent for the current fiscal year periods, respectively.

Management attributes most of the improvement in operations to a very favorable change in broadcast operating income at the company's Arkansas station. In addition, the reduction of outstanding debt in fiscal 1990 and the resulting decrease in interest expense during the current fiscal year has significantly improved the company's profitablity.

TAMPA, FL (NOV. 12) PR NEWSWIRE - Assix, Inc. (NASDAQ-NMS: ASIX), which markets AccuBalance(TM), a proprietary wheel balancing program to large volume tire retailers, said that it expects to report an increase of approximately 20 percent in net income for its first quarter ended Sept. 30, 1990, on a sales increase of over 80 percent.

"This anticipated is a result of the successful installation of our systems with hundreds of Sears outlets," according to R. Park Newton, III, president and chief executive officer. "As expected, the number of installations declined in the first quarter, reflecting the completion of our program with Sears."

The company will continue to aggressively pursue new contracts with tire retailers across the country. Newton noted that contract negotiations are proceeding with two national tire chains which together represent a potential 400 new outlets for Assix's AccuBalance(TM) program. "During the coming months we will be expanding our test program with Montgomery Ward, from approximately 17 systems up to 40, principally in upper New York state. If we can sustain their profitability in this economically difficult region, we are confident that our program can be used successfully elsewhere in their chain," said Newton. Indications from Montgomery Ward, N.T.W. and other national chains interested in the company's proprietary systems continue to be positive.

"In the meantime, we have tightened our cost structure considerably in both field operations and manufacturing," Newton said. He noted that the company will continue to enjoy a strong recurring revenue stream from an installed base of approximately 1,900 systems. "Because the investment with our retail partners is taken at the beginning, these revenues carry extremely attractive margins."

Newton also said that the company expects to increase its unit base during the year with several of its existing customers with the introduction of its new AccuBalance(TM) program. AccuBalance(TM) is a quality control process consisting of a five-step tire and wheel service that includes Assix's patented Tire Matching(R) technology.

Name Change and New Directors Announced

At the company's annual meeting in Tampa last week, shareholders approved a name change from Assix International to Assix Incorporated. The new name reflects the company's recent restructuring into three strategic business units -- Assix Automotive, N.A., Inc.; Assix Automotive-Europe GmbH; and Bestec, Inc. -- headed by three newly elected directors.

Ronald Shamlaty has been elected a director, executive vice president and chief operating officer of Assix Incorporated. Shamlaty, 48, also will serve as president of Assix Automotive, N.A., Inc. His background consists of executive sales and marketing positions with Great Northern Nekoosa Corporation, Jim Walter Corporation and Xerox Corporation.

Charles Ross has been elected a director of Assix, and he will serve as the president of Bestec, Inc., Assix's subsidiary for world-wide management systems and training. Ross, 52, who has been president of Cross-Tec Venture Management, Inc., since 1987, previously served in a variety of executive

sales and marketing positions with Honeywell.

George Crook also was elected an Assix director, as well as the president of Assix Automotive-Europe, GmbH. Crook, 63, has served as an independent international consultant to Assix for the past five years. His background consists of international sales, marketing and management positions with United Technologies, Litton Industries and Gulf & Western.

Assix shareholders re-elected J. Theodore Biesanz, chairman of the board, R. Park Newton, III, and James Carlstedt as directors.

MADISON, WI (NOV. 12) PR NEWSWIRE - Madison Gas and Electric Co. (MGE) (NASDAQ-NMS: MDSN) reported earnings for the third quarter ended Sept. 30, 1990, of $0.94 per share compared with $0.84 earned in the same quarter a year ago. Earnings for the nine months ended Sept. 30, 1990, were $2.06 per share compared with $1.94 earned in the comparable nine-month period a year ago. The 12-month earnings for the periods ended Sept. 30 were $3.03 per share this year versus $2.87 last year.

Revenues in the quarter just ended were $49.3 million compared with $47.1 million a year ago. Revenues in the nine months just ended were $160.2 million compared with $158.9 million in the same year-ago period.

"A 5 percent increase in electric retail sales was primarily responsible for the higher third-quarter earnings this year," said G. Howard Phipps, senior vice president-finance. "The higher sales reflected the steady growth of our customer base and actual temperatures which averaged about two degrees higher than normal," Phipps said.

"During this past summer, other operations and maintenance expenses were down 2 percent from the third quarter of last year," Phipps added. "This is an indication that our comprehensive cost-containment efforts continue to be successful."

MGE is a public utility engaged in generation and transmission of electric energy and in its distribution over 250 square miles in Dane County. The company also distributes and transports natural gas through 962 square miles in Dane, Columbia and Iowa counties.

The common stock of MGE is traded over-the-counter (OTC), is reported through the NASD National Market System and is quoted in the NASD Automated Quotation

System.

EDEN PRAIRIE, MINN. (NOV. 12) PR NEWSWIRE - Roe H. Hatlen, chairman, president and CEO of Buffets, Inc. (NASDAQ: BOCB), announced today that the company has completed the purchase of C. Dennis Scott's 50 percent interest in Evergreen Buffets Inc., operator of four Old Country Buffet restaurants in the Pacific Northwest. The acquisition increases the company's ownership interest in Evergreen Buffets Inc. to 90 percent. Joel Brown, 10 percent minority owner of Evergreen Buffets Inc. will continue to be in charge of the operation of Evergreen's restaurants and will direct the development of two restaurants in 1991.

Buffets, Inc. also announced that it has reached an agreement in principle with Les Storhaug to oversee the operation and development of its expansion into Texas. Storhaug, who is a seven-year veteran of Old Country Buffet will have a 10 percent minority interest in the newly formed Texas Buffets, Inc. and will oversee the development of at least two Texas Old Country Buffet restaurants in 1991.

With these announcements, Hatlen stated that the company now operates 84 restaurants in 14 states and will open four additional restaurants by year end. In 1991, the company expects to complete the most aggressive expansion program in its history with the addition of 28 new restaurants.

PHILADELPHIA (NOV. 12) PR NEWSWIRE - Reading Co. (NASDAQ: RDGCA) today announced that it had completed the sale of several properties, including the historic Reading Terminal Market and the Reading Terminal Train Shed, to the Pennsylvania Convention Center Authority and the Redevelopment Authority of the city of Philadelphia for use in the Pennsylvania Convention Center project in Center City Philadelphia, for $18.4 million.

Reading will also receive an additional $3.3 million in the next several months for the sale of additional property owned by the company and located in and around the Convention Center site.

Commenting on the transaction, Charles M. Carter, president and chief executive officer of Reading, said, "We are pleased that this transaction has been concluded and that the Convention Center project can now move forward to the benefit of the city of Philadelphia and the region. Moreover, we are pleased that PCCA has acquired the Reading Terminal Market which will continue to operate in conjunction with the Convention Center project."

Carter also stated, "This transaction represents the final planned divestiture in the reformation of Reading which began in 1988. The company is now in a strong financial condition and is well positioned to capitalize on major acquisition opportunities that should arise."

WESTWOOD, MASS. (NOV. 12) PR NEWSWIRE - LTX Corporation (NASDAQ: LTXX) announced today that it has shipped a 256 pin Deltamaster, valued at approximately $3 million, to NEC. This is the first shipment of this new digital VLSI test system. The Deltamaster operates at a 80/160 MHz test data rate and is fully software compatible with and upgradeable from all Micromaster digital test systems.

NEC has been a customer of both the linear/mixed signal and digital VLSI test systems of LTX. It plans to use the Deltamaster to test 32-bit

microprocessors and RISC processors.

LTX Corporation is a leader in the design, manufacture and marketing of computer-controlled equipment for testing linear, digital and mixed-signal devices. For integrating the total production environment, from engineering through final test, LTX offers multi-platform networking and information products. Headquartered in Westwood, Mass., LTX has worldwide sales and service facilities to support its customer base.

SEATTLE (NOV. 12) PR NEWSWIRE - The Egyptian airline, EgyptAir, has ordered five Boeing 737-500s, Boeing Commercial Airplane Group confirmed today. Value of the order is about $150 million. EgyptAir said it is ordering the 737-500s for fleet expansion and will operate the new aircraft on international and domestic routes.

EgyptAir's new twinjets, to be powered by CFM56-3C1 engines, will have a maximum takeoff weight of 133,500 lbs. (60,680 kgs.) They will be certified for both mixed-class and all-tourist class seating ranging from 108 to 132 passengers, depending on configuration. In the high-gross-weight version selected by EgyptAir, the 737-500 has a range of up to 3,340 statute miles (5,345 km).

"The operational flexibility of the 737-500 means EgyptAir will be able to use this aircraft for both its international services to European destinations as well as for domestic flights," said Seddik Belyamani, vice president for international sales at Boeing Commercial Airplane Group. "We're very pleased EgyptAir chose the 737-500 and we know the airline will be impressed with this airplane's performance."

The 737-500 entered commercial service in February 1990. It is the smallest and newest member of the family of three new-generation 737 twinjets that are among the quietest, most fuel-efficient aircraft in the world. The other members of the family are the mid-size 737-300 and the larger 737-400.

More than 60 customers around the world have now ordered 1,715 of the new-generation 737s. Orders for the entire 737 program, the most popular airplane in commercial aviation history, total 2,859.

LINCOLN PARK, N.J. (NOV. 12) PR NEWSWIRE - Polymerix, Inc. (NASDAQ: PLXX), a development stage company engaged in the manufacture of "TriMax" brand plastic lumber from recycled plastic materials, announced today that it has reached agreement in principle to license the company's technology to a joint venture partnership consisting of Energy Answers Corporation, an Albany, N.Y., developer and operator of recycling and resource recovery facilities, and On Line Management Associates, Inc., a solid waste consulting company based in Hauppauge, N.Y.

Under the agreement, Energy Answers will have the right to construct and operate a TriMax lumber manufacturing facility in the state of Florida, and the opportunity to obtain further licenses for the technology in specific other states.

The agreement calls for Polymerix to receive an initial license fee and a royalty on gross sales of lumber produced under the license.

Gary Schantz, president of Polymerix, said: "This affiliation will provide Polymerix with access to the raw material sourcing, engineering, and project financing capabilities of Energy Answers, a company truly committed to

recycling. That access will significantly improve our company's ability to penetrate the marketplace with our TriMax lumber product and enhance our prospects for growth. We are extremely pleased to be working with Energy Answers, a company providing effective solutions to our nation's recycling and solid waste issues."

Polymerix currently produces TriMax, a structural plastic lumber product intended to replace pressure treated wood in many outdoor applications, at its company-owned manufacturing facility in Ronkonkoma, N.Y. To date, sales of TriMax lumber have been concentrated primarily in the marine construction and landscaping markets.

#90316p5808 11/12/1990 ~PR Newswire

CAMBRIDGE, MA (NOV. 12) PR NEWSWIRE - BBN Advanced Computers Inc. today announced the results of the SPECthruput benchmark on the TC2000(tm) parallel supercomputer. The TC2000 achieved a SPECthruput rating of 510 using 63 processors. "This is by far the highest SPECthruput rating reported to date on any computer," said Dr. W.B. Barker, president of BBN Advanced Computers.

Version 1.0 of the SPEC benchmark suite, released by the Systems Performance Evaluation Cooperative (SPEC), consists of 10 engineering and scientific programs, written in C and Fortran, that measure fixed and floating point performance. To measure throughput on multiprocessor systems, two copies of a single benchmark are run concurrently for each processor in the system. The times to execute the benchmarks are used to generate throughput ratios relative to the performance of a VAX 11/780. The SPECthruput ratio is computed as the geometric mean of the throughput ratios for the 10 benchmark programs.

For comparison, the highest SPECthruput reported to date is 91.6 for a four-processor Stardent 3040. Also, the Motorola Delta 188k-QP system, which uses four 25 MHz 88000 processors, achieved a SPECthruput rating of 41.2.

The TC2000 system's shared memory architecture is uniquely suited to applications that require the power of a large number of closely-coupled processors. The system's scalable performance allows a dramatic increase in total throughput to an architectural limit of 512 processors, 11,264 Dhrystone MIPS, 10,240 peak MFLO PS, 8,192 MBytes of memory, and 2,560 MBytes/second of I/O bandwidth. The TC2000's unique architecture provides efficient support for both the shared memory and message passing programming models. A reason for this versatility is the high random access bandwidth (RAB) provided by the TC2000's Butterfly switch.

Developers can group multiple processors into functional clusters, applying

processing power simultaneously to both program development and application execution. The TC2000's native nX(tm) operating system, the world's largest-scale symmetric multiprocessing implementation of UNIX, is complemented by the pSOS+m(tm) real-time executive and by the industry-leading Xtra software development tool set. The Xtra tools enable programmers to interactively debug parallel software, easily setting and examining variables across multiple processors, as well as doing performance analysis tasks. Unlike other massively parallel computers, the TC2000 system is a complete, multi-user system that conforms to industry standards, inc luding Ada, POSIX, the X Window System and NFS(tm). BBN Advanced Computers Inc. develops and markets the most easily programmed high-performance multiprocessing computer systems for both scientific supercomputing and real-time applications. BBN has installed more than 300 parallel computing systems worldwide at major aerospace, industrial, government and university sites.

Headquartered in Cambridge, Mass., BBN Advanced Computers is a wholly owned subsidiary of Bolt Beranek and Newman Inc., a diversified high technology corporation. BBN develops, manufactures, sells, and supports products including private wide-area communication networks, data analysis software, and parallel processing computers; provides research and development services in the computer and physical sciences; and builds advanced simulation and sensor and surveillance systems. For its fiscal year ended June 30, 1990, BBN had sales of $262 million.

BETHESDA, MD (NOV. 12) PR NEWSWIRE - Federal Realty Investment Trust (NYSE: FRT) reported today that funds from operations for the third quarter of 1990 increased 23 percent to a record $6.0 million ($.36 per share) compared to $4.9 million ($.34 per share) in the third quarter of 1989. Net income for the quarter was $1.26 million (eight cents per share) versus $739,000 (five cents per share) for the same quarter last year.

This increase can be attributed to improved operating results from recently renovated and remerchandised centers, as well as continued growth from the trust's base portfolio.

Funds from operations also increased for the nine months ended Sept. 30, 1990, rising 26 percent to a record $18.5 million ($1.11 per share) compared to $14.7 million ($1.04 per share) for the comparable period of 1989. Net income for the period was $5.34 million (32 cents per share) compared to $9.89 million (70 cents per share) for the same period last year.

In making the announcement, Steven J. Guttman, president and chief executive officer stated: "We are pleased with our third quarter results. By virtue of the quality of our centers and the strength of their prime locations, our overall portfolio continues to perform well, despite the difficult economic environment."

Federal Realty is an equity real estate investment trust which concentrates on acquiring older shopping centers in prime locations. Trust properties are located in ten states in the mid-Atlantic region between the New York metropolitan area and Richmond, Va.

#90316p5819 11/12/1990 ~PR Newswire

CHICAGO (NOV. 12) PR NEWSWIRE - Kemper Financial Services, Inc. (KFS) has introduced the Kemper Short-Term Global Income Fund, a mutual fund designed to take advantage of international investment opportunities in high-quality, short-term debt obligations.

The Kemper Short-Term Global Income Fund is designed for investors who want a high level of current income, low credit risk, a relatively stable share price and a portion of their assets diversified globally.

"This fund is designed to offer investors higher yields than those currently available from domestic money market mutual funds, with less fluctuation in net asset value than a longer-term bond fund," said KFS Senior Executive Vice President and Chief Investment Officer Stephen B. Timbers.

"The higher yield opportunity arises from the higher interest rates currently available overseas - even on short-term, high-quality paper. And the fund's shorter average maturity (when compared to longer-term bond funds) should mean less price fluctuation due to changes in interest rates," he said.

"Kemper Short-Term Global Income Fund intends to utilize a cross-hedging strategy to help protect the fund against adverse currency moves," Timbers continued. "This strategy can help minimize net asset value (share price) fluctuation due to currency exchange rate changes," he said.

The Kemper Short-Term Global Income Fund's cross-hedge strategy involves buying high-yielding money market instruments denominated in various European currencies, and then selling forward a lower-yielding currency to hedge the currency risk.

Based on current market conditions, the fund's managers intend to invest primarily in Europe, because the high correlation of currencies in the European Monetary System currently makes for efficient cross-hedges to reduce currency risk.

Kemper Financial Services is the Kemper Short-Term Global Income Fund's investment manager, and will use the services of its overseas affiliate, Kemper Investment Management Company, LTD., London for its international fixed income investment expertise. KFS also manages the Kemper Global Income Fund, a longer-term global bond mutual fund.

The Kemper Short-Term Global Income Fund minimum investment is $1,000, or $250 for an Individual Retirement Account (IRA). KFS has been an investment manager for more than 40 years, and has approximately $62 billion in assets under management.

#90316p5821 11/12/1990 ~PR Newswire

ATLANTA (NOV. 12) PR NEWSWIRE - IRT Property Co. (NYSE: IRT) today announced the approval of a $25 million five-year, non-callable loan agreement with a major Southeastern financial institution. The loan supplements an existing $5 million line of credit with the same bank.

Donald W. MacLeod, chairman and president of the real estate investment trust, commented, "Securing this loan now is a strong endorsement of the equality of IRT's investment portfolio and the stability of the company."

MacLeod stated: "This loan gives us the funding to enhance our portfolio and maintain a competitive edge in a tight real estate market. Those companies with the available capital to finance expansion and remodeling programs will be better positioned to attract new tenants and retain existing ones. This loan enables us to make improvements which will assist us in maintaining and increasing tenant leasing."

The loan permits IRT to make prepayments and re-borrow at any time during the term of the loan up to the $25 million ceiling. The interest rate for each advance under the loan may be designated by IRT at the prime rate or based upon other indexes.

MacLeod said: "The present market also provides some excellent opportunities to acquire new properties below market value. We expect to make selective property acquisitions and to continue our program of repurchasing our Eurodollar Convertible Debentures."

IRT Property Co. specializes in neighborhood necessity shopping centers in the Southeastern United States. Anchor tenants include Harris Teeter, Wal-Mart, Ingles and other popular national and regional chain stores. DES PLAINES, ILL. (NOV. 12) PR NEWSWIRE - Hughes Aircraft Co. announced plans today to phase out operations at its Hughes Optical Products Inc. subsidiary over the course of the next year.

The subsidiary, located in Des Plaines, employs about 150 people and has been involved in the production of precision optical components with emphasis of defense applications.

Hughes officials said that the plant was being closed because of the high costs associated with its operation, including the fact that the plant is very energy inefficient in an area where utility costs are among the highest in the nation, and that the leased building is twice as large as warranted by its primarily defense optics business. This situation, coupled with a declining U.S. defense market, made it economically unfeasible to continue its operation.

The phase-out is expected to be completed by late 1991. The company plans to assist employees in finding other jobs during the phase-out.

Hughes plans to transfer manufacturing processes and equipment, along with ongoing programs, to other Hughes' organizations.

CONTACT: Jim Knotts of Hughes Aircraft Co., 213-616-1022

LAS VEGAS (NOV. 12) PR NEWSWIRE - ValCom, Inc. (NASDAQ: VLCM) of Omaha, Neb., today announced TechTrade -- the first nationwide computer trade-in program sponsored by a national reseller. Through TechTrade, ValCom gives customers trade-in value for their installed base of computers when they upgrade, providing an economic and hassle-free opportunity to take advantage of new technology.

The program is the result of a marketing agreement between ValCom and Boston Computer Exchange -- the first and most successful computer brokerage business. TechTrade will be offered to customers through ValCom's network of computer centers in 46 states.

"Computer environments such as Windows 3.0 are making many of the computers sold in the 1980s functionally obsolete," said Bill L. Fairfield, ValCom's president and chief executive officer. "But businesses can't afford to just walk away from this investment. TechTrade gives them a return on their used equipment."

JoeAnn Stahel, president of Storeboard/Computer Intelligence, a computer industry market research firm in Dallas, says the program might be the necessary inducement for customers to accelerate replacement of older parts. "Conducted by a nationally recognized reseller and an experienced broker of used computers, TechTrade should stimulate a generally sluggish PC market," she said.

Alex Randall, co-founder and president of Boston Computer Exchange and the

recognized authority on the secondary computer market, has a message for businesses that use computers. "Don't let what you own stand between you and what you really want," said Randall. "There's a market for your current equipment. What's obsolete to one person is another's technological windfall."

Given the rapid pace of technology and the need for upgrades, Randall sees unlimited potential in the secondary market. "With TechTrade, ValCom is the first major reseller to recognize the strategic importance of trade-in in the 1990s."

Randall is the author of the "Used Computer Handbook" (Microsoft Press), considered the best guide for people thinking of buying, selling or upgrading a used computer.

ValCom is a leading provider of support services and PCs from IBM, Compaq, NEC and Epson, along with related products from Hewlett- Packard, Oracle, Novell, Banyan, and others.

#90316p5827 11/12/1990 ~PR Newswire

CAMBRIDGE, MA (NOV. 12) PR NEWSWIRE - BBN Advanced Computers Inc. today announced the release of several additional software features for the TC2000(tm) massively parallel supercomputer, including new releases of the UNIX(R)-based nX(tm) operating system, the Xtra(tm) software development tool kit, the TC2000 C and Fortran compilers, and the pSOS+m(tm) real-time executive.

The TC2000 system is the only massively parallel supercomputer which provides a fully native UNIX development environment. In all other massively parallel systems, the computer is an attached processor or "back-end" to a workstation or a personal computer, resulting in substantial bottlenecks in the software development cycle.

"These new capabilities further extend our lead in software development productivity for massively parallel systems," said Dr. W. B. Barker, president of BBN Advanced Computers. "It doesn't matter how fast the system is if you can't program it."

Interleaving

The nX operating system and the C and Fortran compilers now support interleaving of shared memory across the Butterfly(R) switch in a TC2000 system. This facility uses the interleaver hardware on the TC/FPV processor boards to distribute a shared array or other data structure across multiple

memory modules in the system, providing a software- transparent means to increase the effective bandwidth to global memory.

Switch interleaving makes use of the TC2000's high random access bandwidth (RAB), which is a system's ability to randomly fetch words from global memory. High RAB is particularly important for data classification and retrieval, sparse-matrix algorithms, adaptive grid problems, combinational optimization, and real-time simulation. The TC2000's RAB, the highest of any massively parallel system, enables the TC2000 to avoid the bottlenecks found on other systems when solving large-memory problems.

About the TC2000 Computer
The TC2000 system's shared memory architecture is uniquely suited to applications that require the power of a large number of closely-coupled processors. The system's scalable performance allows a dramatic increase in total throughput to an architectural limit of 512 processors, 11,264 Dhrystone MIPS, 10,240 peak MFLO PS, 8,192 MBytes of memory, and 2,560 MBytes/second of I/O bandwidth. The TC2000's unique architecture provides efficient support for both the shared memory and message passing programming models. A reason for this versatility is the high random access bandwidth (RAB) provided by the TC2000's Butterfly switch.

BBN Advanced Computers Inc. develops and markets the most easily programmed high-performance multiprocessing computer systems for both scientific supercomputing and real-time applications. BBN has installed more than 300 parallel computing systems worldwide at major aerospace, industrial, government and university sites.

Headquartered in Cambridge, Mass., BBN Advanced Computers is a wholly-owned subsidiary of Bolt Beranek and Newman Inc. (NYSE: BBN), a diversified high technology corporation.

ATLANTA (NOV. 12) PR NEWSWIRE - College Retirement Equities Fund (CREF), part of the nationwide non-profit TIAA-CREF pension system for higher education, held its first annual meeting for policyholders in Atlanta today.

Speaking at the Alliance Theatre in the Robert W. Woodruff Arts Center, TIAA-CREF Chairman and CEO Clifton R. Wharton Jr., highlighted the growth of the pension system and its services for 1.4 million participants at more than 4,400 institutions across the United States.

Terming CREF's first annual meeting an "historic" occasion, Wharton said that the CREF Stock Account, which was founded in 1952 and pioneered the variable

annuity, is now "the largest single managed equity fund in the U.S., and the largest U.S.-based investor in international equities."

The annual meeting was held in accordance with CREF's transition into a new governance structure implemented under provisions of the Investment Company Act of 1940 and the regulations of the Securities and Exchange Commission.

Wharton also announced that CREF, along with its companion organization, Teachers Insurance and Annuity Association, were now accepted as alternatives to state pension plans for public college and university employees in 42 states. TIAA, an insurance company with $49 billion in assets, offers a traditional annuity to education community employees to complement CREF's variable annuity. Wharton noted that TIAA recently was awarded Standard & Poor's highest "AAA" rating for its claims-paying ability and overall financial strength.

The CREF Money Market Account introduced in April 1988, and the two new CREF investment funds introduced on March 1, 1990 -- the Bond Market Account and the Social Choice Account -- are now available at educational institutions employing more than 90 percent of TIAA-CREF participants.

The order of business at the annual meeting included the participants' ratification of the selection by CREF of Deloitte & Touche as its independent public accountant.

GAITHERSBURG, MD. (NOV. 12) PR NEWSWIRE - Life Technologies, Inc. (NASDAQ: LTEK), today announced it has entered into a letter of intent to sell certain assets of its Molecular Diagnostics business, including its human papilloma

virus (HPV) product line, to Digene Diagnostics, Inc., of Silver Spring, Md. Life Technologies will retain its proprietary nucleic acid amplification and decontamination technologies.

This transaction, which is expected to be completed by year-end, is subject to a number of conditions including the execution of a mutually satisfactory purchase and sale agreement.

Life Technologies expects to realize an amount in excess of book value. Therefore, no loss is anticipated.

Digene Diagnostics, Inc., develops and markets DNA diagnostic tests for the detection of human viral disease. Digene also develops, manufactures and markets reagents for use in biomedical research laboratories.

Life Technologies, Inc., develops, manufactures and supplies more than 2,000 products used principally in life science research and commercial manufacture of genetically engineered products. The company believes it is a leading supplier of sera and other cell growth media, as well as enzymes and other biological products necessary for recombinant DNA procedures.

DEERFIELD, ILL (NOV. 12) PR NEWSWIRE - Baxter Healthcare Corp. and Brigham and Women's Hospital announced today that they have signed a four-year stockless/just-in-time supply and sales agreement. Under the agreement, Baxter will manage most of the inventory required to service the hospital's needs and provide daily deliveries of medical supplies in ready-to-use packaging. The agreement is expected to save Brigham approximately $4 million in inventory and related costs and could result in approximately $60 million in sales for Baxter over the course of the contract.

"We have had an excellent relationship with Baxter over the years," said Nicholas J. Johnson, Brigham's vice president, administrative services. "This agreement represents the type of partnership relationship we wish to forge with our vendors. Brigham is at the cutting edge of clinical care and medical technology. Baxter's program will provide us a 'state-of-the-art' materials management system."

Baxter's stockless/just-in-time distribution program, called ValueLink, can reduce or eliminate the need for hospitals to warehouse products by using Baxter's distribution services to delivery supplies as they are needed in quantities that are ready to use.

Stockless delivery represents a departure from the way hospitals typically receive and handle supplies. Most hospitals receive medical products in bulk quantities delivered by numerous vendors. The large cases must then be broken down into small units and sent to the various hospital departments.

Hospitals can also convert old storage areas into revenue-producing space, such as new operating rooms or diagnostic laboratories. Brigham expects to vacate its off-site warehouse once the stockless program is fully implemented.

With 720 inpatient beds and more than 200,000 outpatient visits, Brigham and Women's is one of the pre-eminent medical centers in the United States. Located in Boston, it is a major referral center and the teaching affiliate of Harvard Medical School.

Baxter Healthcare Corp. is the principal domestic operating subsidiary of Deerfield-based Baxter International Inc. (NYSE: BAX). Baxter is the leading worldwide manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in 100 countries.

CARSON, CA (NOV. 12) PR NEWSWIRE - Nissan-built vehicles were named winners of five categories in Road & Track Magazine's "Ten Best Cars in the World, 1991" issue. The awards were announced in the December issue of the monthly automotive publication.

The five award-winning Nissan vehicles were the Nissan Sentra XE, the Nissan Maxima SE, the Nissan 300ZX, the Nissan 300ZX Turbo and the Infiniti Q45 performance/luxury sedan. In addition, the Nissan 300ZX Turbo and the Infiniti Q45 were named to the "Ten Best" list among all 1991 models.

The magazine's 10 judges first selected 3 to 5 vehicles in each of 10 market segments, then drove them in back-to-back evaluations before voting and choosing the winners in each category, as well as selecting the "Ten Best Cars in the World, 1991."

The all-new Nissan Sentra XE was selected as the Best Coupe/Sedan, less than $10,000. Road & Track describes the Nissan Sentra XE as economical, efficient reliable, durable, roomy, practical and fun.

Noting that the Nissan Maxima has helped position Nissan at the forefront of Japanese design, Road & Track named the Nissan Maxima SE as the Best Coupe/Sedan, $17,000 to $28,000.

Citing engine performance, outstanding handling and "impressive" Full Active Suspension option, Road & Track said the Infiniti Q45 overcame years of breeding, tradition, racing history and a healthy dose of snob appeal to become one of the "Ten Best Cars in the World, 1991" and "Best Coupe/Sedan $28,000 to $45,000.

WILLISTON, N.D. (NOV. 12) PR NEWSWIRE - GeoResources, Inc. (NASDAQ: GEOI) announced 1990 third quarter net income of $155,000 or 4 cents per share and net income for the nine months ended Sept. 30, 1990 of $182,000 or 4.6 cents per share. The company said this higher profitability was entirely due to substantially higher oil prices in August and September 1990. In order to further capitalize on these higher prices, the company recently completed workovers on 11 wells that increased production by a net 64 barrels of oil per day. That workover program will continue into the fourth quarter of 1990.

In addition to increased earnings, higher oil prices have strengthened GeoResources' Balance Sheet with increased cash and working capital and provided substantial increases in cash flow. Cash flow from operations increased to $745,000 for the nine months ended Sept. 30, 1990 from $332,000 for the same period in 1989. With higher cash flow, the company expects to significantly increase its activity in oil and gas operations in the coming months.

GeoResources, Inc.'s common stock is traded in the national over-the-counter

market under the symbol GEOI.

PHILADELPHIA (NOV. 12) PR NEWSWIRE - The following statement from Laventhol & Horwath is intended for publication.

It is issued in response to a continuing barrage of negative media stories appearing in major national newspapers in recent days.

Continued media speculation about the future of Laventhol & Horwath distorts and denigrates the underlying strengths of this company.

Certain members of the national media, in their unending quest for negative news, have clearly been maneuvered and manipulated by embittered ex-partners. Ironically, several of these anonymous "tipsters" are basically responsible for many of the litigation problems that have beset L&H.

Nonetheless, the people who brought us the Grabill case, one of the darkest days in the history of L&H, are gone from the company. We've cleaned house, we've changed policies and procedures; we are re- dedicated to client service and satisfaction, and we are trying to move forward in a positive fashion.

Of course L&H has problems. Every single accounting firm in the nation has severe problems -- many caused by the "sue the accountants, they have deep pockets" mentality so prevalent today. The soft economy has also hurt the profession, L&H, and hundreds of other companies world-wide.

Laventhol & Horwath is dedicated to a continuation of a long and distinguished history of quality and service.

We are committed to this goal, despite what embittered ex-partners and employees, hiding behind the cloak of anonymity, may tell the media. Ultimately, we believe the complete story will be told.

SAN FRANCISCO (NOV. 12) PR NEWSWIRE - Sales of the newly redesigned Mercury Tracer in Northern California during October continued a surge that began in late August.

According to Lincoln-Mercury Division's San Francisco District Sales Manager

B.C. Sauer, Tracer sales in the district, which includes Northern California, Washington, and Oregon, were the best for any month since the car was introduced in March 1987. A total of 698 Tracers were sold in October which topped the previous high of 573 delivered in July 1987 by 22 percent, and October of last year by 173 percent.

Sales of the Lincoln Town Car continue to outpace trends in face of a generally slow market. Sauer reported that since January, sales of the Town Car in San Francisco District were up a hefty 103 percent compared to the same period last year, and were the second best in the nation. Dealers delivered a total of 7,414 Town Cars during the January-to-October period. Sauer pointed out that the fuel- efficiency of the Town Car (17 city, 23 highway) is about double that of its 1970s predecessors.

WASHINGTON (NOV. 12) PR NEWSWIRE - President Bush today awarded the National Medal of Technology to AT&T Bell Laboratories executive John S. Mayo. Mayo was among nine other individuals similarly honored.

The National Medal of Technology gives presidential recognition to companies or individuals who "have made exceptional contributions to the well-being of the nation through the development or application of technology." AT&T Bell Laboratories received the corporate award in 1985, and was the first institution so honored.

Mayo, who is senior vice president of Network Systems and Network Services, was recognized for "providing the technological foundation for information age communications, and for overseeing the conversion of the national switched telephone network from analog to a digital-based technology for virtually all long-distance calling both nationwide and between continents."

Throughout his career, Mayo has played an important role in development of digital technologies that have brought the world to the threshold of the Information Age. His work and leadership contributed to the first transistorized digital computers; the first telephone system using high-speed digital transmission; the advent of digital microwave radio; the first communications satellite; the first digital central office super switching machine; and fiber optic lightwave technology, including the first transatlantic and transpacific lightwave cable systems. He holds 12 patents on telecommunications-related innovations.

May is a fellow of the Institute of Electrical and Electronic Engineers (IEEE) and a member of the National Academy of Engineering. Among his awards and honors are the IEEE Alexander Graham Bell Medal for his role in the

development of the T-1 carrier system; the IEEE Simon Ramo Medal for his contributions to the development and implementation of the world's largest integrated digital communications network; and the C&C Prize for his work on the T-1 carrier system.

He is a trustee of Polytechnic University, and a member of the boards of directors of Johnson & Johnson and Western Digital Corporation. Mayo also is a member of the College of Engineering Advisory Board of the University of California, Berkeley.

In addition, Mayo has served on many government, industry and university advisory panels and boards, including the Office of Technology Assessment Advisory Panel on International Cooperation and Competition in Space.

HAYWARD, CALIF. (NOV. 12) PR NEWSWIRE - Sparta Surgical Corp. (OTC Bulletin Board: SPSG), based in Hayward, has completed a sale leaseback of its manufacturing equipment with the LINC Group Inc. The closing which took effect on Nov. 9, 1990, was valued at $1.9 million, it was announced today by Thomas F. Reiner, president and chief executive officer of Sparta.

"For Sparta, LINC is an important new capital source and a partner in the healthcare industry who brings considerable financial resources and expertise. This financing will enable us to continue to increase our market share in the specialty niche areas we serve through acquisitions, new products and growth of existing sales," Reiner said.

The Chicago-based LINC Group is the nation's largest independent firm dedicated to health care equipment finance, with a leased equipment portfolio in excess of $800 million. Its LINC Venture Lease Partners affiliate specializes in financing to emerging growth companies in health care and high technology.

"We are pleased to make available this lease financing to assist in the continuing growth of Sparta Surgical's business. Sparta's product line shows very strong potential, and particularly in the area of microsurgery and specialty surgical products," said Martin E. Zimmerman, president and chief executive officer of the LINC Group Inc.

Sparta develops, manufactures, markets and distributes worldwide over 3,000 products for the healthcare industry, including microsurgical instruments, critical care disposables, wound care dressings, oral surgery anesthesia and drug-related supplies. Sparta's products are used in hospitals, clinics,

outpatient surgery centers, nursing homes, physicians' offices and U.S. Government healthcare facilities.

LAS VEGAS, NEV. (NOV. 12) PR NEWSWIRE - Key Tronic Corp. (NASDAQ: KTCC), a leading manufacturer of keyboards and other computer products, has introduced the MacPro Plus(TM), a Key Tronic Professional Series(R) keyboard compatible with all Macintosh(R) computer models, the company announced today.

The product announcement was made at COMDEX/Fall in Las Vegas, a major computer industry trade show.

The MacPro Plus, which lists for $179, is compatible with the Macintosh(R) Plus family that uses the RJ-11 interface and the Macintosh(R) SE and Macintosh(R) II families that use the Apple Desktop Bus(TM) interface. In addition, the MacPro Plus is compatible with Apple's recently announced Macintosh(R) Classic(R) IIsi and LC models.

Keyboard features include a large, L-shaped "Return" key; a large "Delete" key; 15 user definable function keys; and "Ctrl," "Option" and "Command" keys on both sides of the spacebar. "Caps Lock" and "Ctrl" keys are interchangeable to suit user preference. Dual legends appear on keys that perform commonly used functions when using a Mac(R) in PC emulation. Also included with the MacPro Plus keyboard is an ADB connecting cable. Users requiring the RJ-11 cable for the Macintosh Plus family can receive one free, direct from Key Tronic.

The keyboard uses Key Tronic's capacitance switch technology, which has a reliability rating of 100 million keystrokes. Optional rubber dome kits that allow users to modify the key feel are available.

A free offer for Tempo II(TM) keyboard macro software is included with the keyboard. Tempo II, from Affinity Microsystems, normally lists for $149.95. The software allows users to assign keystrokes, commands, mouse movement sequences and button clicks to the function keys.

"The MacPro Plus offers users a number of enhancements not found on Key Tronic's first Macintosh keyboard, the MacPro, introduced in August 1989," explained Norm Morse, Key Tronic product manager. "The new offering was developed in response to customers' requests for keyboard features that make their system more productive and easier to use," he added.

As part of the Key Tronic Professional Series line, the MacPro Plus is sold through a network of independent computer equipment resellers worldwide. The

keyboard is backed by a three-year limited warranty and unlimited toll-free product support.

Key Tronic is a publicly held corporation, traded over the counter under the NASDAQ symbol KTCC.

HOUSTON (NOV. 12) PR NEWSWIRE - Kelley Oil Corp. (NASDAQ: KOIL) announced today that total revenues for the quarter ended Sept. 30, 1990 were $14,952,000, up 77 percent compared to $8,446,000 for the third quarter of 1989. Cash flow from operations, considered by Kelley Oil as its primary operating benchmark, aggregated $1,966,000 for the current quarter vs. $471,000 for the corresponding 1989 quarter, an increase of 317 percent.

The increase in revenues and operating cash flow reflects substantial advances in oil and natural gas production levels attributable primarily to Kelley Oil's ongoing development drilling activities and interests in producing properties acquired during 1989 and the first half of 1990. Net income for the current quarter was $554,000 compared to net income of $166,000 for the corresponding quarter in 1989, an increase of 234 percent.

Based upon average primary common and common equivalent shares of 14,713,000 outstanding during the current quarter, cash flow from operations per share increased 225 percent to 13 cents per share, and earnings per share were 2 cents after deducting 8 cents per share for depletion, depreciation and amortization (noncash charges), 2 cents per share for deferred income taxes and 1 cents per share for preferred stock dividends. The corresponding per share figures for the third quarter of 1989, based on average primary common and common equivalent shares outstanding of 11,294,000, were cash flow from operations of 4 cents and earnings per share of $0.00 after deducting 3 cents per share for depletion, depreciation and amortization and 1 cents per share for preferred stock dividends.

For the nine months ended Sept. 30, 1990, total revenues were $42,009,000, up 66 percent compared to $25,334,000 for the first three quarters of 1989. Cash flow from operations for the first three quarters of 1990 was $4,753,000 vs. $1,119,000 for the corresponding period in 1989, an increase of 325 percent. Net income for the current period was $1,497,000, an increase of 620 percent compared to net income of $208,000 for the first nine months of 1989.

Kelley Oil is an independent oil and gas producer with oil and gas properties located primarily in Louisiana. Kelley Oil serves as the managing general partner of Kelley Oil & Gas Partners Ltd. (AMEX: KLY), in which it owns interest aggregating 6.66 percent. It also serves as managing general partner

of Kelley Partners 1988 Development Drilling Program, Kelley Partners 1989 Development Drilling Program and Kelley Partners 1990 Development Drilling Program, and owns interests of 48.11 percent, 44.32 percent and 68.33 percent, respectively, in these publicly held programs. Concorde Gas Inc., a wholly owned subsidiary, markets gas for the company, its affiliates and third parties.

ALBUQUERQUE, NM (NOV. 12) PR NEWSWIRE - Lasertechnics, Inc. (NASDAQ: LASX) today announced the introduction of its Starburst(TM) Dual Mode Color Printer at the Comdex Show in Las Vegas, Nev. Based on thermal transfer technology, the unit produces accurate, consistent, high-quality, full-color prints on paper or transparency that are perfect for high resolution imaging applications.

The present plans are for the printer to be commercially available in the first quarter of 1991 for less than $15,000 per unit.

The Starburst is the only color printer on the market capable of producing continuous tone images using the Dye Diffusion Thermal Transfer (D2T2) mode, or dithered images utilizing the Thermal Wax Transfer (TWT) mode. This offers the advantage of superior image quality for specific color hardcopy requirements. Dye diffusion prints are photographic quality and designed to fulfill distinct tone and clarity needs for image processing applications, whereas wax transfer images are more suitable for most computer graphics requirements.

In the D2T2 mode, the new color printer features 150 or 300 pixels or dots per inch (DPI). Each pixel can produce 256 levels of the three primary colors, or a total of 16.7 million colors. The technology utilizes heat to diffuse yellow, magenta and cyan dyes from the ink donor film to a sheet of special

output media. For each level of heat, the printer's thermal head creates a distinct gradation of each of the three printing colors. The unique, new media, developed as a result of a collaborative effort between Lasertechnics and ICI Imagedata, ensures outstanding color fidelity, and produces images onto either paper or transparency receptors.

By simply changing the media, the Starburst delivers 300 DPI in the Thermal Wax Transfer mode. The printer also generates black and white prints or film in both modes, and is PostScript compatible.

The Starburst Dual Mode Color Printer has multiple applications across the image processing and computer graphics markets. The high resolution prints will be produced by computer-assisted design (CAD/CAM) programs now used by engineers, architects and graphics artists. The wide range of other applications include business graphics, desktop publishing, apparel design, remote sensing, mapping, environmental sciences, meteorology and medical imaging.

Lasertechnics is working with ICI Imagedata to design and develop media for the Starburst Dual Mode color printer, and with a European computer hardware manufacturer to design and commercially produce this product.

ICI Imagedata is a part of ICI Films, a business unit of ICI Americas, Inc., a wholly owned subsidiary of ICI PLC.

In addition to its digital imaging systems, Lasertechnics, Inc. designs and manufactures laser marking and engraving systems marketed to the electronics, medical, and consumer products packaging industries. The company also offers the Fizeau wavemeter and other specialty instruments.

PROVIDENCE, R.I. (NOV. 12) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has announced the addition of new non-stop, round-trip service between Providence, R.I. and its Orlando, Fla., hub, beginning in February.

On Feb. 2, Delta will add daily MD-88 service departing Providence at 7:50 a.m., arriving in Orlando at 10:40 a.m. The return flight will depart at 7 p.m., arriving in Providence at 9:39 p.m.

"Delta is very pleased to add the high-technology MD-88 aircraft on a route it believes will be popular with both business and leisure travelers," said Jody Sibole, Delta's district marketing manager. "This aircraft is not only comfortable for the passengers but operates as a good neighbor in the

communities it serves because of its low noise, stage III technology."

Sibole added: "For arriving and departing passengers, Delta's spectacular new 24-gate Orlando Flight Center brings the latest in convenience and comfort, while continuing passengers will find easy connections to and from many Florida destinations and points beyond. The Orlando Flight Center serves as a model for the 21st century."

Delta is a major world airline, with 64,000 professionals operating over 2,400 flights daily. Its fleet of 438 aircraft serves 177 cities around the world. It has for the last 16 consecutive years led the industry in passenger satisfaction among the nine largest domestic airlines according to the records of the Department of Transportation.

SPOKANE, WA (NOV. 12) PR NEWSWIRE - Key Tronic Corp. (NASDAQ: KTCC), leading manufacturer of keyboards and other computer peripherals, announced it has acquired the exclusive manufacturing and marketing rights to a software enhancement program for keyboards from Jefferson Computer Products Inc. of Des Moines, Wash.

Called KeyStar(TM), the new product consists of a licensed set of algorithms designed to reside in keyboard memory. The algorithms enhance keyboard functionality in several ways.

Through actuation of designated keys on the keyboard, KeyStar permits letter keys in the typewriter area to function as cursor keys, function keys or as a numeric keypad. This eliminates the need for data entry operators to remove their hands from the typewriter area to access special or non character keys, without interfering with normal typing.

"In a variety of studies conducted at beta sites, keyboard operators using KeyStar have experienced productivity increases as high as 37 percent," explained Peter F. Wezeman, director of marketing for Jefferson Computer Products Inc. "Besides time saving benefits, operators who spend many hours per day at the keyboard also benefit from KeyStar's ease of use. It also contributes significantly to reducing effects of repetitive strain injuries caused by awkward hand and finger movements," added Wezeman.

KeyStar also offers a Mouse Menu function which allows the keyboard spacebar to be used as a pointing device for opening pull-down menus. In addition, KeyStar users may remap their keyboard to the DVORAK layout by depressing two single keys.

"KeyStar will allow our OEM keyboard customers to obtain the full functionality of a standard 101-key keyboard in a smaller keyboard with as little as 60 keys," stated Wally Starr, OEM standards product manager for Key Tronic. "KeyStar will be a particularly popular feature in smaller footprint keyboards required by OEMs for use with portable computers. And, by encoding KeyStar into keyboard memory, we are able to offer this feature at a very competitive price," he concluded.

KeyStar will be marketed to OEMs for use in custom keyboard configurations through Key Tronic's worldwide network of independent manufacturers representatives. The keyboards will initially be manufactured at Key Tronic's manufacturing facilities near its headquarters in Spokane and Cheney, Wash.

Key Tronic is a publicly held corporation, traded over the counter under the NASDAQ symbol KTCC.

CHICAGO (NOV. 12) PR NEWSWIRE - D. Ward Fuller will succeed Kenneth A. Krick, effective Jan. 1, 1991, as president and chief executive officer of General American Transportation Corp.

The announcement was made by James J. Glasser, chairman, president and chief executive officer of GATX Corp. (NYSE: GMT). General American Transportation, a subsidiary of GATX Corp., is the largest owner and lessor of railroad tank cars in the United States.

Glasser stated, "Ken Krick has elected to retire from GATX following nearly 30 years of exceptional service. Most recently, he has guided General American to three consecutive years of record earnings. His positive contributions to General American and GATX as a whole will be felt for a long time."

"Ward Fuller will bring substantial experience to General American Transportation Corp. Since 1982, Mr. Fuller has been president and chief executive officer of American Steamship Company, a GATX subsidiary headquartered in Buffalo, N.Y. He brings exceptional creativity, vision, and business expertise to GATX's largest subsidiary."

Fuller, 45, joined GATX in 1975 as an assistant treasurer at GATX Capital. In 1977, he was transferred to American Steamship Co. as special assistant to the chairman; he was elected vice president finance in 1978, vice president-marketing in 1979, and executive vice president in 1980.

Ned A. Smith will succeed Fuller as president and chief executive officer of American Steamship Co. Smith, 43, has been senior vice president of American

Steamship since 1985, and has been a vice president of that company in a number of operational and financial capacities since 1982.

He began his career with American Steamship in 1975 as controller. Prior to joining American Steamship, Smith spent five years with Price Waterhouse & Co.

General American Transportation Corp., Chicago, leases the largest fleet of railroad tank cars in the United States, as well as other specialized freight cars which transport chemicals, food, petroleum, fertilizers and coal for major industries and users of bulk commodities. General American Transportation Corp. also operates repair facilities and provides fleet management for its own fleet as well as for others.

American Steamship Company is headquartered in Buffalo, N.Y. American Steamship owns and operates the largest domestic fleet of self-unloading vessels on the Great Lakes serving the steel, utility, chemical, cement, and construction industries.

FORT SMITH, AR (NOV. 12) PR NEWSWIRE - Baldor Electric Co. (NYSE: BEZ), Fort Smith, Ark.-based manufacturer and marketer of industrial electric motors, today announced receipt of the President's "E Star" Award for increasing U.S. trade abroad. Susan Schwab, assistant secretary of Commerce, presented the "E Star" Award to Roland S. Boreham Jr. at a ceremony held in Fort Smith, Ark. on Nov. 8.

"E Star" Awards are given for continued superior performance in increasing or promoting exports. Only previous recipients of the "E" Award are eligible. (Baldor was awarded the "E" Award for export in 1976.)

Baldor is only the second company in the state of Arkansas to receive this award. During the 1980s, Baldor improved its already strong export position. Export and foreign sales now represent over 12 percent of Baldor's total sales. Baldor's products are distributed in over 40 foreign countries, primarily in Canada, Europe, Australia, Asia, and Latin America.

Boreham, chairman and CEO, announced that the board of directors, at its quarterly meeting on Nov. 8, promoted John A. McFarland to the position of vice president - International Sales. McFarland, 39, with Baldor 20 years, has been manager of the International Group for the past eight years.

Baldor's international sales have risen from $4.5 million when McFarland started as manager, to a current annual rate of over $35 million. Baldor products and services are now available in 45 countries.

Also, the board of directors at their meeting on Nov. 8, declared a $.12 per share cash dividend on the company's common stock. The cash dividend is payable on Jan. 2, 1991 to stockholders of record on Dec. 10, 1990.

CONTACT: R.S. Boreham Jr., chairman and CEO, or R.L. Qualls, president, (501) 646-4711, of Baldor Electric.

NEW YORK (NOV. 12) PR NEWSWIRE - Cray Research, Inc. (NYSE: CYR) the world's leading supercomputer company, today announced the recipients of the firm's second annual Gigaflop Performance Awards at a ceremony held here in conjunction with the Supercomputing '90 conference.

Thirty awards were presented to U.S., international, and multinational teams of research scientists and engineers who solved "real-world" computational problems at sustained speeds of more than 1.5 gigaflops - that is more than a billion (Giga-) FLoating-point Operations Per Second - or 1.5 billion calculations per second. The fastest problem solved was one to design and analyze a gas turbine engine. This problem ran at a sustained speed of 2.307 gigaflops.

"It's a testament to this year's recipients, and to the rapid evolution of supercomputer technology, that 30 teams achieved the threshold speed of 1.5 gigaflops, despite the fact that this represented a 50-percent increase over last year's threshold of 1.0 gigaflops," said Carlos Marino, Cray Research's director of Industry, Science & Technology. There were 20 award-winning teams in 1989.

"These award recipients are pioneers," said John A. Rollwagen, chairman and chief executive officer of Cray Research, Inc. "Their computational research expands the frontiers of their specialized fields, making their organizations more competitive, while advancing the boundaries of truly high-speed computing."

"After two years of involvement with this program we have seen the breadth of work being done and the number of applications being run at these sustained speeds grow dramatically," said Marino. "We are convinced that Cray Research systems are the only systems that can do meaningful work at sustained speeds of one gigaflops or more."

The 1990 recipients represent specialized fields ranging from nuclear physics and astronomy, to environmental sciences, computational chemistry, aerodynamics, and automotive design. "This year's recipients are very international, coming from Canada, Germany, Japan, Switzerland, the United Kingdom, and the United States," Marino said. "Several teams are

multinational."

A combined Japanese-and-American team boosted performance through network supercomputing, by connecting two CRAY Y-MP systems in a network configuration. This year's recipients made greater-than-ever use of Cray Research capabilities such as autotasking and vectorizing, and of graphics capabilities to visualize solutions.

Cray Research, Inc. designs, manufactures, markets and supports large-scale, high-speed computer systems for scientific and engineering applications.

#90316p5896 11/12/1990 ~PR Newswire

NEW YORK (NOV. 12) PR NEWSWIRE - Gemstar Development Corp. today announced the launch of VCR Plus+(tm), the revolutionary device that makes taping television shows on a VCR a one-step process. VCR Plus+ will be available in major markets across the country this month.

The New York Times, The Los Angeles Times, regional editions of TV Guide, The San Francisco Chronicle and Examiner, The Detroit Free Press, The Detroit News The Dallas Times-Herald, and The Chicago Sun Times and dozens of other publications will begin printing code numbers (PlusCodes(tm)) next to each television listing in their program guides in the coming weeks. When combined with the inexpensive VCR Plus+ device, consumers will be able to tape any broadcast or cable television program in just one simple step.

"We've worked hard to develop a system that will truly be easy for consumers to use," said Louise J. Wannier, vice president of marketing and business development for Gemstar. "This launch marks a very satisfying moment, when we can say, 'it's here.' Finally there's a real solution to consumer VCR taping problems."

Gemstar's patent-pending VCR Plus+ system will offer the 70 million U.S. VCR owners, as well as all future VCR purchasers, the ability to program their VCRs with ease, eliminating the complicated and lengthy procedures that deter most people from taping television shows.

Every television show -- local, network, or cable -- will have a short code number printed beside its listing. The viewer simply punches the code number of the show that is to be recorded into the VCR Plus+ device and the selected program will be automatically recorded.

VCR Plus+ offers three-show recording options: once, weekly or daily, and can store up to 14 programs, which is double or triple the capacity of most VCRs. In addition, VCR Plus+ calculates how much tape is needed in the next 24 hours.

However, because the current methods of VCR programming are so complicated and tedious, few people take full advantage of this capability. The simplicity of the VCR Plus+ system increases the value and utility of the VCR. The system is made possible by a proprietary coding scheme invented by Gemstar founders Henry Yuen and Daniel Kwoh, each of whom holds a Ph.D. from the California Institute of Technology.

VCR Plus+ will be sold at quality retailers such as Sears Brand Central, Circuit City, Montgomery Ward, Silo and The Good Guys at a suggested retail price of $59.95. Gemstar will establish national distribution by mid-1991.

Gemstar Development Corp., a privately held company formed to develop and market technological products which simplify life for the consumer, is headquartered at 135 N. Los Robles Ave., 870, Pasadena, Calif., 91101.

EAST HARTFORD, CT (NOV. 12) PR NEWSWIRE - Pratt & Whitney's new 300,000-square-foot Overhaul and Repair facility in Cheshire, Conn., has received the Federal Aviation Agency's certificate to begin engine overhaul operations.

Richard Hopkins, Pratt & Whitney's manager for the Overhaul and Repair Center in Cheshire, accepted the certificate and praised both the employees and the FAA. "This is truly a credit to the hard work of all our employees and the cooperation of the FAA," Hopkins said. The certificate means the Cheshire facility is now FAA licensed to carry out the disassembly, inspection, marshalling and assembly of the JT9D, PW2000 and PW4000 engines. "With this new facility and expansion, we can now further enhance our customer support," Horst Pohlmann, vice president-Overhaul & Repair Operations, said. "Turn times for engine overhaul will be reduced and we now have the capacity to meet the increased needs of the airlines." During the past two years, Pratt & Whitney's overhaul facility in Southington, Conn., has been overhauling about 175 engines each year. At full capacity, this new facility will be able to overhaul 400 engines annually by the end of 1991.

"We are very excited about this facility," Pohlmann added. "The investment by the company in a new facility underscores our commitment to continually improve customer service and to grow the overhaul and repair business."

Pratt & Whitney is a division of United Technologies Corporation (NYSE: UTX), headquartered in Hartford, Conn.

TOKYO (NOV. 12) PR NEWSWIRE - In a further expansion of its activities in Japan, Bechtel has won the right to develop a 27-story office tower on Tokyo Bay. The joint proposal of Bechtel Enterprises and Nissho Iwai Corp., a leading Japanese trading company, was selected by the Tokyo Metropolitan Government after a spirited international competition.

"This important landmark will be visible to all people entering the city of Tokyo, to remind them of the long cooperation between the Japanese and American people," said John L. Moore, Jr., Bechtel's senior regional executive for the Far East. Moore, a member of Bechtel's board of directors, is based in Tokyo.

The $650 million, 820,000-square-foot Pacific Rim Center project is scheduled for completion in August 1995. It will be located in the Odaiba section of the new Tokyo Teleport Town, on the harbor front about three miles south of the Ginza-Marunouchi area, current commercial heart of the Japanese capital. Overseas Bechtel Inc. (OBI), which has maintained an office in Marunouchi for 20 years, will move its operations to the Pacific Rim Center, after managing the building's design and construction. Nissho Iwai also plans to occupy office space in the new building.

Perhaps the most interesting aspect of the venture is the opportunity for non-Japanese companies to purchase something roughly akin to a "condominium" interest in the building. Commercial rents in Tokyo are among the world's highest.

Nissho Iwai, headquartered in Tokyo, is among the world's largest trading companies. Its $86 billion in 1989 sales ranks it as one of the world's ten top corporations. San Francisco-based Bechtel Group Inc, a privately held international engineering-construction-management organization, reported $5.1 billion in revenues for 1989, ranking it as one of the world's largest firms in its industry. Bechtel and Nissho Iwai have collaborated on numerous projects over the past 20 years in the Middle East, Indonesia an New Zealand.

Other Bechtel projects currently under way in Japan include joint-venture work on a new terminal for Tokyo's Haneda airport, project management for two hotel conference center and golf complexes, and a nuclear technology and services agreement with Hitachi.

ENGLEWOOD, COLO. (NOV. 12) PR NEWSWIRE - Michael J. Timbers, president and CEO of IHS Group Inc., has today announced the acquisition of Micro Analysis Products Inc., (MAP), a three-year-old company based in Boulder, Colo.

The company provides PC-based banking audit and compliance programs as well as a new CD-ROM (compact disc, read-only memory) product, The Banking Library. The Banking Library consolidates on a single CD-ROM disc the laws, regulations manuals, handbooks, policies, and procedures related to the banking industry.

"This acquisition fits our strategy to lessen dependence on defense-related markets by supplying products to other faster-growing markets," Timbers noted. "In particular, the acquisition of MAP Products tracks the IHS New Markets Division's strategic mandate to provide new products that contain regulatory materials or that are directed to regulated industries."

Tim Schiewe, founder of MAP, will act as a consultant to IHS for banking-related products. "The banking industry is currently undergoing a tremendous transformation and must now address the issue of compliance much more aggressively," Schiewe stated. "Our association with IHS will give us increased product development and distribution capabilities, and will allow us to develop additional products for the banking industry."

MAP will remain in Boulder and will report to IHS's New Markets Division, headed by IHS vice president Michael McCrory.

With the inclusion of MAP, IHS Group now comprises nine information companies which provide a broad spectrum of information and information management services to such diverse markets as banking and financial services, engineering, hospitals, library management, and government. In addition to

Micro Analysis Products, the IHS Group companies include Information Handling Services, CLSI, Predicasts, Global Engineering Documents, D.A.T.A. Business Publishing, Lake Publishing, Continental Healthcare Systems, and, in the United Kingdom, Technical Indexes Ltd.

WATERBURY, VT. (NOV. 12) PR NEWSWIRE - Fred "Chico" Lager, president and chief executive officer of Ben & Jerry's Homemade, Inc. (NASDAQ: BJICA), the Vermont-based superpremium ice cream manufacturer, announced 1990 third quarter results today.

Net sales for the quarter ended Sept. 29, 1990, were $21,705,512, an increase of 24 percent over the figure of $17,525,279 for the corresponding quarter in 1989. Net income for the quarter was $955,630, an increase of 10 percent over net income of $867,171 in the 1989 third quarter. Earnings per share were 37 cents, or 35 cents per share fully diluted, as compared to 33 cents (32 cents fully diluted) in the third quarter of 1989.

Through the first three quarters of 1990, Ben & Jerry's sales stand at $59,091,531, compared to $44,684,757 in the comparable period of 1989. Net earnings through the period total $2,286,798, up from $1,878,487 in the first three 1989 quarters. Net income per common share is 88 cents (85 cents fully diluted), compared to 72 cents (71 cents fully diluted) in the comparable 1989 reporting period.

"Our third quarter results show continued strong sales growth," stated Lager, "and an ongoing investment of marketing resources in strengthening our market position for our entire product line."

Ben & Jerry's produces superpremium ice cream, ice cream novelties, and Ben & Jerry's LIGHT using Vermont dairy products and high quality natural ingredients. Ben & Jerry's ice cream is distributed in 42 states, and the company has 88 franchised scoop shops and five company-owned stores.

PITTSBURGH (NOV. 12) PR NEWSWIRE - Bayer USA Inc., the U.S. management holding company of Bayer AG, Germany, announced the appointment of two new senior communications officers at two of its U.S. operating companies: Miles Inc. and Mobay Corp.

At Miles, Elkhart, Ind., Barry S. Cohen, formerly director, public communications, Warner-Lambert Co., was named staff vice president-corporate communications, which is a new position at the company. Miles is a healthcare company with business in pharmaceuticals, diagnostics and OTC products. Its sales in 1989 were $2.1 billion.

At Mobay Corp., a Pittsburgh-based diversified chemical company, Gordon E. Butte, formerly manager of public communications at Dow Chemical, has been named director designate-corporate communications, effective Nov. 1. Butte will succeed Gerd H. Wilcke, director since 1974, who will retire in May 1991. Mobay's 1989 sales were $2.1 billion.

Cohen, 43, is a native of Chicago and holds a B.S. degree in journalism from Northern Illinois University. He began his professional career in 1970 at Western Electric in its public relations department. From 1976-1988, he was at Abbott Laboratories, where he held various assignments of increasing responsibility in public relations, rising to the position of director, corporate communications. He was at Warner-Lambert from 1988 until taking his present post at Miles on Sept. 17, 1990.

Butte, 39, is a native of Hamilton, Ontario. He holds an honors diploma in journalism administration from the Southern Alberta Institute of Technology, as well as a Certificate in Business Administration from the University of Alberta. He began his public relations career with agencies in western Canada, and then joined Dow as western Canada division communications manager in 1979. He progressed through a variety of managerial assignments of increaisng responsibility with Dow Canada, before coming to the United States in 1985 to head Dow's financial communications activities. He then headed the marketing communications and public relations for Dow's plastics division. He was named to his most recent post as second-in-command of public relations for Dow Chemical U.S.A. in February 1990.

Bayer USA Inc. has business in chemicals, healthcare and imaging technologies. Total sales for Bayer USA in 1989 were $5.4 billion.

CALABASAS, CA (NOV. 12) PR NEWSWIRE - Tekelec (NASDAQ: TKLC) today announced the appointment of Thomas B. Cannon to the position of senior vice president, Research and Development, and the promotion of three senior managers.

Prior to joining Tekelec, Cannon was vice president of Engineering for InteCom Inc., a subsidiary of Matra Communications, a French corporation. InteCom Inc. is a technological leader in the development of integrated voice/data Business Exchange (IBX) Systems. In addition, Cannon has also held engineering

and management positions with STC Communications, where he was also a co-founder, and with Bell Laboratories. Cannon holds a master degree in electrical engineering from the University of Illinois.

Peter N. Vicars, president and chief executive officer, said "Tom brings some 20 years of related communications engineering experience from startup through executive management of a research and development organization." Cannon will be responsible for Tekelec's Research & Development operations worldwide. "I thank Fred Tinch for his efforts on his interim assignment. Fred will now return to his full time responsibilities as vice president, Network Products."

Tekelec also announced the appointments of:
-- Philip J. Alford, chief financial officer, to the additional position of senior vice president
-- Robert A. Hess, director of corporate marketing, to the additional position of vice president of the corporation.
-- Gilles C. Godin to the position of corporate controller, and the office of treasurer.

Recognized as a leading supplier of telecommunications diagnostic tools, Tekelec believes it offers the broadest product line encompassing data protocols (ISDN, X.25, OSI), transmission services and equipment (TI, Fractional TI, DDS, T3), signaling (SS7), cellular (GSM), FDDI and emerging intelligent network applications.

For more information, contact Tekelec at 26580 W. Agoura Road, Calabasas, Calif., 91302, Phone 1-800-TEKELEC, FAX 818-880-6993.

PITTSBURGH (NOV. 12) PR NEWSWIRE - Dr. Volker Charbonnier, executive vice president and chief administrative officer of Bayer USA Inc., is one of seven executives from the Bayer AG group who will take part in a temporary assignment with the Treuhandanstalt, an agency of the German government in charge of restructuring and privatizing state-owned businesses in the five new German states which previously comprised East Germany, it was announced today.

The project is an initiative of German Chancellor Helmut Kohl. German companies were asked by the chancellor to nominate senior managers to help the Treuhandanstalt in the task to turn around the East German economy. In total, about 60 executives from German companies will begin work in mid-November on this project, which is expected to last initially about six to nine months.

Charbonnier will be involved in restructuring activities which may include

potentially increasing the international investments in eastern Europe. According to Dr. Konrad M. Weis, president and chief executive officer of Bayer USA, Charbonnier's experience in the United States since 1986 will give him an important perspective and will be a "bridge" back to the U.S. industry which might eventually have an interest in such investments.

Bayer USA Inc., Pittsburgh, is the U.S. management holding company of Bayer AG Germany.

STURBRIDGE, MA (NOV. 12) PR NEWSWIRE - SpecTran Corporation (NASDAQ: SPTR) today announced receipt of an order for approximately $3.9 million for product intended for use in a variety of multimode optical communication applications. Delivery is expected to begin in June 1991 and is expected to extend through May 1992 raising backlog to approximately $2.7 million for 1991 and $1.5 million for 1992. Sales resulting from this order do not rely on SpecTran's patent licenses and therefore are not subject to the quantity limitations contained therein.

Commenting on the order, SpecTran's President and Chief Executive Officer, Raymond E. Jaeger, said, "The order is the largest we have received in the past five years and reflects current strong market demand. This type of business is particularly important to the company because it raises the prospect to grow annual revenues in both 1991 and 1992 beyond the level set by restrictions in one of out patent licenses."

SpecTran Corporation develops, manufactures and markets glass optical fibers.

MINNEAPOLIS (NOV. 12) PR NEWSWIRE - LaserMaster Technologies, Inc. (LMT) (NASDAQ: LMTS) recently announced the addition of a Windows 3.0 printer to its PC product line. The LaserMaster 400 Personal Printer allows users to print directly from Windows 3.0, features 400 by 400 TurboRes(TM) output, comes with 50 classic typefaces and is PostScript(R) compatible. The unit is scheduled to ship early in 1991 and will be sold for $1,995.

The printer includes 50 LaserMaster Type 1 format typefaces, which can be used for both TrueImage(TM) and direct Windows 3.0 printing. Graphic and font-intensive documents print at four pages per minute.

"The LaserMaster 400 Personal Printer is an excellent choice for Windows users " commented Mel Masters, CEO. "We are providing a high- powered, cost-effective solution for them."

LaserMaster Technologies, Inc. designs, manufactures and markets laser printer and display systems and subsystems for high quality electronic printing and desktop publishing applications. LMT's products include high performance printer controllers, plain-paper desktop typesetters and integrated electronic publishing systems which feature the company's proprietary TurboRes resolution enhancement technology.

TurboRes is a trademark of LaserMaster. Windows, TrueImage and DOS are registered trademarks of Microsoft Corporation. PostScript is a registered trademark of Adobe Systems, Inc. All other product and brand names are trademarks or registered trademarks of their respective companies.

HOUSTON (NOV. 12) PR NEWSWIRE - The Executive Committee of the Enron Corp. (NYSE: ENE) Board of Directors today declared a fourth-quarter dividend of 62 cents per share on the corporation's common stock, payable Dec. 20, 1990 to stockholders of record as of Dec. 3, 1990. The dividend rate remains unchanged from its previous level, with an indicated annual rate of $2.48.

The Board also declared a dividend on the $10.50 cumulative second preferred convertible stock payable Jan. 2, 1991, to stockholders of record as of Dec. 14, 1990. The quarterly dividend rate is $2.625 per share.

Enron Corp., America's leading natural gas company with approximately $11 billion in annual revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

ST. LOUIS (NOV. 12) PR NEWSWIRE - In an effort to encourage students' interest in math and science, McDonnell Douglas (NYSE: MD) announced today

that it will sponsor NASA's mobile teacher resource center program, an educational outreach effort developed by NASA's Marshall Space Flight Center in Huntsville, Ala.

A $125,000 grant from McDonnell Douglas Foundation, the philanthropic arm of the corporation, enables the corporation to schedule visits of a mobile teacher resource center to McDonnell Douglas facilities for three years beginning in 1991. On those occasions teachers from local school districts will be invited to take advantage of the educational resources available. The mobile teacher resource center program is part of a larger NASA program, Project LASER, Learning About Science, Engineering and Research.

"McDonnell Douglas believes that all children, from all backgrounds should receive a quality education," said Walter E. Diggs Jr., vice president of community affairs. "Today's grade school students are the scientists and engineers of tomorrow. That is why we must begin at a young age to rekindle an interest in math, science, engineering, and the quality with which they are taught. Project LASER can help make this possible by educating teachers about the latest science technologies."

During November and early December, a mobile teacher resource center will visit several McDonnell Douglas facilities where representatives of local school districts have been invited to attend teacher workshops. The mobile unit will be in St. Louis Nov. 14 and Nov. 15; Huntington Beach, Calif. Nov. 26 and Nov. 27; and Mesa, Ariz. Dec. 3, 4, and 5.

McDonnell Douglas will provide blank VHS video tapes, slide film, audio cassettes and computer diskettes for teachers to duplicate lesson plans.

Each mobile teacher resource center consists of a 65-foot long climate controlled tractor-trailer. The 48-foot long trailer contains six teacher workstations with seating for two teachers at each station. Each station is equipped with a computer providing access to "NASA Spacelink," an electronic information system that contains a vast range of information and educational materials for math and science teachers.

The intent of the mobile teacher resource centers is to reach teachers all over the nation, particularly those teachers who would not otherwise have access to NASA's resources. Unlike NASA's well- known Spacemobiles that take models and exhibits directly to schools for special lectures, Project LASER provides teachers with access to educational materials they can use long after the van has rolled away.

NASA education professionals will be with each mobile teacher resource center to ensure that teachers take maximum advantage of all the resources available and the wide variety of other NASA educational programs.

NEW YORK (NOV. 12) PR NEWSWIRE - Oak Hill Sportswear Corporation (NASDAQ: OHSC) announced today that it returned to profitability in the third quarter. The company earned $992,000 or $.48 per share in the three months ended Sept. 30, 1990 compared to net income of $1,536,000 or $.73 per share in the third quarter of 1989, as sales declined 9 percent. The company incurred a net loss of $1,106,000 or $.54 per share in the nine months ended Sept. 30, 1990 compared net income of $1,798,000 or $.85 per share in the comparable period last year.

Arthur L. Asch, chairman of the board of Oak Hill Sportswear Corporation, stated that "profits in the third quarter, while below anticipated levels, were achieved in a difficult economic climate. Due to weakening consumer confidence, retailers have been buying hesitantly as they are reluctant to build up excess inventories. The resulting promotional atmosphere continued to put pressure on our company's gross profit margins. We are planning our future business conservatively in what we view as a weak and uncertain retail apparel marketplace."

Oak Hill Sportswear Corporation is a manufacturer of women's apparel.

(NOV. 12) PR NEWSWIRE - Kelley Oil & Gas Partners, Ltd.(AMEX: KLY) announced today that total revenues for the quarter ended Sept. 30, 1990 were $7,039,000 up 27 percent compared to $5,550,000 for the third quarter of 1989. Cash flow from operations, considered by Kelley Partners as its primary operating benchmark, aggregated $4,151,000 for the current quarter vs. $3,096,000 for the corresponding 1989 quarter, an increase of 34 percent. The increase in revenues and operating cash flow reflects substantial advances in Kelley Partners' oil and natural gas production levels attributable primarily to ongoing development drilling activities and property acquisitions during 1989 and the first half of 1990. Net income for the current quarter was $120,000 compared to net income of $1,282,000 for the corresponding quarter in 1989, primarily due to an increase in noncash charges for depletion, depreciation and amortization as well as a 5 percent decline in the average price received for natural gas production.

Based upon average units of 9,828,659 outstanding during the current quarter, cash flow from operations per unit increased 28 percent to 41 cent per unit, with a quarterly distribution of 45 cents per unit payable on Nov. 20, 1990, and earnings per unit were 1 cent after deducting 40 cents per unit for depletion, depreciation and amortization (noncash charges). The corresponding per unit figures for the third quarter of 1989, based on average units of 9,165,362, were cash flow from operations of 32 cents (all of which was distributed to unitholders) and earnings per unit of 13 cents after deducting 19 cents per unit for depletion, depreciation and amortization.

For the nine months ended Sept. 30, 1990, total revenues were $20,738,000, up 45 percent compared to $14,254,000 for the first three quarters in 1989. Cash flow from operations for the first three quarters of 1990 was $12,775,000 vs. $7,216,000 for the corresponding period in 1989, an increase of 77 percent. Net income for the current period was $2,173,000, a decrease of 21 percent compared to net income of $2,741,000 for the first nine months in 1989, primarily due to an increase in noncash charges for depreciation, depletion and amortization and a 6 percent decline in the average price received for natural gas production.

For the nine months ended Sept. 30, 1990, based upon average units of 9,828,659, cash flow from operations per unit increased 35 percent to $1.26 and earnings per unit were 21 cents after deducting $1.05 per unit for depletion, depreciation and amortization (noncash charges). The corresponding per unit figures for the first nine months in 1989, based on average units of 7,419,006, were cash flow from operations of 93 cents and earnings per unit of 35 cents after deducting 58 cents per unit for depletion, depreciation and amortization.

ATLANTA (NOV. 12) PR NEWSWIRE - Beginning today, Opti-World is participating in "Letters From Home," a General Electric and Pitney Bowes program to allow families and friends of those serving with the U.S. Armed Forces in the Persian Gulf region to send overnight electronic mail via the GEnie service.

"Many people don't have access to a personal computer and modem to send electronic mail," said Don Chapman, chairman of Opti-World. "Opti-World is proud to help these people take advantae of the 'Letters From Home' program. All six of our metro Atlanta Opti-World locations will collect handwritten letters and send them by computer to the local General Electric phone number, where they will be transmitted to Saudi Arabia."

The letters will be sent electronically via GE Information Services' worldwide teleprocessing network to GE's local telecommunications facility in Saudi Arabia. After printing and sealing envelopes, the letters will be delivered to the designated serviceperson.

Opti-World is an Atlanta-based chain of 44 full-service optical superstores with complete one-hour eyecare service.

GLEN COVE, N.Y. (NOV. 12) PR NEWSWIRE - Pall Biomedical Products Corporation announced today that it has entered into an agreement with the Cutter Biological Business Unit of Miles Inc., the health care company of Bayer USA Inc., on developing and marketing leukocyte (white blood cell) filtration systems that will benefit the blood banking community and the hospitals and patients they serve.

Cutter Biological, world leader in blood products and blood management systems will supply blood storage bags and tubing for incorporation with Pall filters into a "dry system" (i.e., no anti- coagulant) kits for processing stored blood, which Pall Biomedical will develop and market. Pall Biomedical, a world leader in blood filtration technology, will supply advanced filter devices for blood collection systems Cutter will develop and market.

As many as 30 to 70 percent of these patients develop antibody reactions to

the extra white cells they receive in the course of frequent transfusions, Treppa said. This can keep patients in the hospital a lot longer. Leukocyte depletion (removing white cells from red cells and platelets) can help reduce the likelihood of these reactions.

Pall Biomedical Products Corporation, of Glen Cove, is a leading supplier of filters for patient protection against infection and intrusion of contaminants during open-heart surgery procedures and the administration of blood, breathing gases, and intravenous fluids.

The parent company, Pall Corporation (AMEX: PLL), with annual sales approaching $600 million, is headquartered in Glen Cove. The company is the international leader in the design, manufacture and marketing of filters and other fluid clarification devices which serve the Health Care, Aeropower and Fluid Processing markets. The company employs 6,300 people at offices throughout the world, with manufacturing facilities in the United States, Puerto Rico, England and Japan.

Part of the Biological Business Unit of the Pharmaceutical Division of Miles Inc., Cutter Biological is recognized today as a technical leader in plasma-derived and emerging recombinant biological products as well as in medical plastics products that are vital at every step in the process of collecting, processing and transfusing blood. Miles is the health care company of Bayer USA Inc., the U.S. management holding company of Bayer AS, Leverkusen, Germany. In addition to ethical pharmaceutical and biological products, Miles' products include diagnostic test systems and reagents, consumer health care products and household cleaning products. The company, which is headquartered in Elkhart, Ind., employed over 16,000 people in 1989 and had sales of $2.1 billion. In addition to Miles, other Bayer USA companies include Mobay (chemicals) and Agfa (imaging technologies). Total Bayer USA sales in 1989 were $5.4 billion.

CLEVELAND (NOV. 12) PR NEWSWIRE - Erie Lackawanna Inc. (Erie) announced today that it has reached a settlement with the United States on Erie's claims for refund of federal income taxes paid, including interest, plus its claim for interest from the dates of payment. Under the settlement, Erie will receive about $38,900,000 plus interest from the dates of payment of such amount. Subject to verification by the United States of the amount of interest to be received, and assuming Erie receives payment of the settlement amount on Dec. 1, 1990, Erie calculates that the settlement, net of the federal income tax payable on the interest portion, will amount to about $53.50 per share of Erie's outstanding stock.

Erie further announced today that, in view of such settlement and subject to the approval of the United States District Court in Cleveland, which supervised the bankruptcy proceeding of Erie Lackawanna Railway Company (debtor), it intends to make a Third Partial Liquidating Distribution to the holders of its capital stock. The amount of the distribution will approximate the net amount of the settlement.

The record date for the distribution will be fixed after the court's approval of the distribution is received.

#90316p5939 11/12/1990 ~PR Newswire

COLUMBIA, MD (NOV. 12) PR NEWSWIRE - Essex Corporation (NASDAQ-NMS: ESEX) reported consolidated revenues for the third quarter ended Sept. 30, 1990, of $6,310,000, which were $1,790,000, or 22 percent lower than the $8,100,000 reported in the third quarter of 1989.

Essex consolidated revenues for the first nine months of 1990 totalled $19,462,000, which was $2,191,000, or 10 percent lower than the $21,653,000 reported during 1989. The revenues of the company's wholly owned subsidiary, System Engineering and Development Corporation (SEDC) which was acquired June 1, 1989, were $3,309,000 (nine months to date) and $2,309,000 (four months to date) in 1990 and 1989, respectively. Without the SEDC revenues, the company's revenues would have been $16,153,000, or 16 percent lower in 1990 versus 1989. Sales volume was down since Essex efforts (amounting to $2 million of revenues for the first nine months in 1989) as subcontractor to Boeing Corporation on its Navy aircraft maintenance trainer work was substantially completed by year end 1989.

Essex is reporting a net loss of $37,000, or 2 cents per share, for the third quarter period of 1990, as contrasted to net income of $2,000, or zero cents per share, in the same period of 1989. For the first nine months of 1990, Essex is reporting a net loss of $497,000, or 30 cents per share, versus net income of $111,000, or 8 cents per share, in the same period of 1989. The company's decline in earnings was principally due to the substantial completion of the aircraft maintenance trainer program by year end 1989 and a third quarter pretax loss of $100,000 on a now complete fixed-price software development contract being performed at SEDC.

The SEDC results showed a net loss for the first nine months of 1990 of approximately $574,000, or 35 cents per share, with a net loss of $73,000, or 4 cents per share, occurring in the third quarter of 1990. The SEDC results which are included in the 1989 figures showed a net loss for June-September

1989 of $296,000, or 21 cents per share. Other elements of the SEDC first nine months loss in 1990 were core staff and facility expenses exceeding recoverable costs from current business volume by $335,000; acquisition-related amortization expenses of $196,000; and increased reserves of $80,000 to fully reflect the settlement with the U.S. government regarding allegations of mischarging on certain projects in years prior to the acquisition of SEDC by Essex.

Dr. Harry Letaw, chairman and chief executive officer, stated: "We are particularly gratified that we have been able to reduce debt by $2 million during the nine months. In addition, Essex has put behind it matters that impaired growth. Third quarter results improved compared to the first two quarters of 1990 due to continued attention to cost containment and operating efficiencies set in motion in previous periods. In early 1991, we will begin to experience $400,000 in projected annual facility cost savings resulting from recent consolidation of office space and relocation of our corporate headquarters. Although there was a modest short-term increase in monthly volume at our subsidiary, SEDC, revenues continue to lag those of a year ago. With enactment of the federal budget, we anticipate gradual restoration of market stability and slow improvement in the sustainable rate of growth of revenues."

Established in 1969, Essex Corporation does business in systems effectiveness and information technology, designing, developing, manufacturing, selling and supporting products and systems for public, private and commercial customers. Primary fields of interest include systems engineering, interactive training programs, reliability and maintenance support, safety, error reduction and man-machine interface design, fitness-for-duty test systems and electronic and photonic information work stations. The firm employs a staff of over 200 at 10 locations across the country.

#90316p5940 11/12/1990 ~PR Newswire
HOUSTON (NOV. 12) PR NEWSWIRE - Regal International Inc. (NYSE: RGL) announced today that the petition in involuntary bankruptcy filed against Regal has been dismissed by Order of the United States Bankruptcy Court for the District of Delaware. Ruben Aragon, Regal chairman, said that the dismissal of the bankruptcy petition was accomplished by the successful reorganization and restructure of approximately $3.7 million in Regal indebtedness. Combined with the company's improved earnings performance, this dismissal is a significant step in Regal's revitalization efforts.

The $3.7 million was restructured through the issuance of approximately $2.5 million in new notes with installments due over a one-year period, 4.3 million shares of Regal stock at 30 cents per share, and 1.25 million warrants to purchase common stock in lieu of interest which was forgiven.

The restructure and debt settlement also eliminates the extensive litigation between the company and certain former officers and directors which will substantially reduce legal fees in future periods and allow management to concentrate on continuing to improve operating performance. Results of third quarter operations, to be released next week, are expected to reflect the company's third consecutive profitable quarter.

#90316p5943 11/12/1990 ~PR Newswire
HAUPPAUGE, NY (NOV. 12) PR NEWSWIRE - Graham-Field Health Products, Inc. (AMEX: GFI) today reported record revenues and net operating earnings for the third quarter ended Sept. 30, 1990. Revenues for the third quarter were $11,719,000 versus $8,825,000, a 33 percent increase over the same period last year. Net earnings for the third quarter were $405,000 or $.05 per share versus third quarter 1989 net earnings of $225,000 or $.03 per share.

For the nine months ending Sept. 30, 1990, revenues were a record $32,133,000 versus $24,917,000 for the comparable prior year period, a 29 percent increase. Net earnings before extraordinary credit were $1,151,000 or $.15 per share for the 1990 period versus $312,000 or $.04 per share in the comparable prior year period; net earnings, after extraordinary credits in both 1990 and 1989 representing a gain on the purchase of senior subordinated notes of $286,000 and $1,069,000, respectively, were $1,437,000 or $.19 per share in 1990 versus $1,382,000 or $.18 per share in 1989.

Commenting on the significant improvement in revenues and earnings for the third quarter and nine months ending Sept. 30, 1990, Irwin Selinger, chairman

and chief executive officer, said, "The 33 percent growth in revenues in the third quarter was principally due to greater sales of products in the consumer and home healthcare marketplace. This growth was made possible by the acquisition in March 1990, of the Healthteam product line of M.E. Team, Inc. and expansion of the patient aids product lines for which the company is a principal distributor. The additional market share gained during the quarter was in a highly competitive environment resulting in lower product profit margins. Operating expenses were closely monitored thus despite the pressure on gross profit margins, net income for the quarter increased to $405,000 or $.05 per share versus $225,000 or $.03 per share in the same period last year."

Commenting further, Selinger indicated that "fourth quarter revenues are projected to continue to grow at a stronger rate but additional pressure has been placed on profit margins as the weakening of the U.S. dollar against the Japanese yen and major European currencies are increasing the cost of importing products. Graham-Field purchases approximately 40 percent of its product offerings in overseas markets."

Graham-Field manufactures, markets and distributes approximately 14,000 healthcare products for hospitals, physicians and home use to approximately 12,000 home healthcare, physician and hospital supply distributors, and drugstore retailers and wholesalers.

ATTLEBORO, MA (NOV. 12) PR NEWSWIRE - Marshall Tulin, president of Swank, Inc. (NASDAQ: SNKI) today reported sales and earnings for the third quarter and nine months ended Sept. 30, 1990.

Tulin indicated the decline in earnings for this period is attributed to the sluggish retail environment. He further indicated that cost-saving measures as well as asset management are being evaluated on a continuous basis.

Swank manufactures and markets men's and women's jewelry, belts, personal leather goods, neckwear, fragrances and gift items. The company distributes its products to retail outlets throughout the United States and in 50 foreign countries. These products which are known throughout the world, are distributed under the names "Swank", "Colours by Alexander Julian", "Royal Copenhagen", "Pierre Cardin", "L'Aiglon", "Anne Klein", "Richard Scott", "Etienne Aigner", "90 Park", and "Anne Klein for Men", among others. Swank, Inc. also manufactures jewelry and leather items for distribution under private label.

DAYTON, OHIO (NOV. 12) PR NEWSWIRE - The Iams Company, a manufacturer of high-nutrition pet foods, has received the first annual Good Dog! Magazine "Golden Bone Award" for donations made to needy dogs and cats, the company recently announced.

The Dayton, Ohio-based company has made numerous donations during 1990 to regional animal organizations, as well as donating money and Iams products to help feed the pets of victims left homeless by such disasters as floods, fires and hurricanes.

"There is no structured program for giving donations at our company," said Iams Marketing Communications Manager Glenn Williams. "Our mission is to enhance the well-being of dogs and cats, and these donations are a natural result of that mission."

"Golden Bone Award" winners are chosen by a panel of editors of Good Dog! Magazine. As a finalist for the 1990 award Iams competed with four other companies in the pet food or pet products industries.

Good Dog! Magazine, a national magazine published in Charleston, S.C., covers issues for today's dog owner and tests and reviews pet foods and pet products for dogs.

"The help Iams has given pets in need throughout the country has set a good example for all of us," said Good Dog! Magazine Publisher Ross Becker. "It shows that whatever one's line of business, there's always a way you can help other beings."

Iams high-nutrition dog and cat foods are sold exclusively in specialty outlets such as pet stores, pet supply stores, veterinary clinics, feed stores

and kennels in all 50 states and Canada, and many countries abroad.

The Iams Company has manufacturing plants in Lewisburg, Ohio and Aurora, Neb. A third Iams plant is currently under construction in Henderson, N.C.

#90316p5951 11/12/1990 ~PR Newswire

DENVER (NOV. 12) PR NEWSWIRE - Big O Tires Inc. (NASDAQ: BIGO) reported net income of $825,800 or 5 cents per share for the quarter ended Sept. 30, 1990, compared to net income of $418,500 or 3 cents per share for the like period in 1989. Sales of $31,202,700 increased by $617,200 over sales of the third quarter, 1989.

Steven P. Cloward, president and chief executive officer of Big O Tires, said, "We are extremely pleased that Big O is able to report record earnings for the third quarter. Despite the temporary setbacks in the tire industry of late, Big O and its franchised dealers are continuing to grow. Many of the controls and expected results are beginning to manifest themselves."

Gross profit for the third quarter increased by $336,300 as compared to the like period, 1989. The company's gross profit margin was 20.9 percent for the third quarter, reflecting a .7 percent increase over third quarter, 1989. Gross profits increased by $127,200 as a result of the increase in net sales and $209,100 due to the increased gross profit margin.

Gross profits were impacted by adjustment expenses associated with the company's free tire replacement warranty program, but to a lesser extent than in the like period of 1989.

Selling and administrative expenses decreased $468,400 during the third quarter, 1990, as compared to the like period for 1989. The company attributes this decrease to the sale or divestiture of seven retail stores in late 1989.

Interest expense increased by $88,100 during the third quarter, 1990, as compared to the like period of 1989, primarily due to higher inventory and receivable balances during the first nine months of 1990 compared to the like period of 1989, and from additional long-term debt acquired in relation to the financing of the Denver Regional Sales and Service Center (RSSC) and post-construction financing of the Boise, Idaho RSSC.

Big O Tires, headquartered in Englewood, Colo., provides quality tires and automotive service through more than 350 company and independently owned stores in 15 states, making it the largest tire and automotive service

franchise company in the United States. Its common stock is traded on the NASDAQ National Market System under the symbol "BIGO."

NEW YORK (NOV. 12) PR NEWSWIRE - Culbro Corporation (NYSE: CUC) today reported net income for the third quarter ended Sept. 29, 1990, of $201,000, or 5 cents per share, on sales of $248,710,000. In the 1989 third quarter the corporation reported a net loss of $3,490,000, or 81 cents per share, on sales of $232,462,000.

Net income in the nine-month period ended Sept. 29, 1990, was $4,140,000, or 96 cents per share, on sales of $741,476,000. Net income in the comparable 1989 period was $567,000, or 13 cents per share, on sales of $712,458,000.

Culbro stated that the principal differences between the quarters' results were restructuring charges of $4 million recorded in the third quarter of last year and $1 million of profit from the sale of excess warehouse facilities in the current quarter. Additionally, the 1990 results reflect increased profit in the corporation's wholesale distribution business which benefited from lower LIFO inventory costs, and improved results in the CMS Gilbreth Packaging Systems unit, which was marginally profitable as compared to an operating loss in the 1989 third quarter. These favorable factors were offset in part by an operating loss in the corporation's nursery products business because of the slowdown in real estate development activities and the weakening economy in the Northeast.

Year-to-date net income increased over the comparable 1989 period due to the effect of the restructuring charge in 1989, the profit from the facilities sale and improved results in the industrial products segment, partially offset by lower profit in the nursery products business. All business segments were profitable, before interest and taxes, in the year-to-date period.

Culbro Corporation is a diversified organization with interests in cigars, wholesale distribution of tobacco and sundry consumer products, industrial products including labelling systems and plastic components, real estate and landscape nursery stock.

#90316p5955 11/12/1990 ~PR Newswire

DUNDEE, MICH. (NOV. 12) PR NEWSWIRE - Holnam Inc. (NYSE: HLN) today reported consolidated revenues of $324.0 million and a net profit of $7.6 million for the third quarter ended Sept. 30, 1990; compared with revenues of $326.9 million and a net profit of $16.4 million in the third quarter of 1989.

For the first nine months of 1990, Holnam recorded a net loss of $16.8 million on revenues of $780.6 million, versus a net profit of $10.3 million on revenues of $774.7 million in the first nine months of 1989.

The 1989 results do not reflect the acquisition of Northwestern States Portland Cement Company on Jan. 19, 1990, the March 8, 1990, acquisition of the minority interests of Ideal Basic Industries Inc., nor the acquisition of United Cement Company on Aug. 28, 1990. The effect of these transactions is reflected in 1990 beginning at their respective dates of acquisition.

The decrease in revenues of $2.9 million for the third quarter of 1990, in comparison with 1989, was primarily the result of a 21 percent decrease in cement shipments and reduced concrete volume at St. Lawrence Cement Inc., of Canada, which is 60 percent owned by Holnam. Marc von Wyss, president and chief executive officer, reported that despite a 15 percent increase in cement shipments from the Holnam East and West Divisions, which includes shipments related to Northwestern States Portland Cement Company and United Cement Company, revenues from these operations did not increase sufficiently to offset the St. Lawrence decline.

The increase in revenues of $5.9 million for the first nine months of 1990, in comparison with 1989 was primarily due to a 4 percent increase in total cement shipments, along with a 3 percent increase in cement prices for the East and West Divisions.

Holnam's third quarter of 1990 gross margin declined from the corresponding quarter of 1989 due principally to declining contribution of St. Lawrence

sales which carry a higher-than-average gross margin. The year-to-date gross margin percentage of 20 percent for 1990, compared with 23 percent for 1989 was similarly affected. The percentage gross margin of Holnam East and West for the nine months ending in 1990 and in 1989 remained flat while the margin percentage of St. Lawrence declined five percentage points in 1990, as compared with 1989.

Selling and administration expenses in the third quarter and first nine months of 1990 were higher than in the corresponding periods of 1989, primarily due to operating expenses related to integrating Holnam's East and West Divisions, expenses associated with the Northwestern States operations and increased outlays at St. Lawrence. Higher interest charges resulted from increased debt levels.

The company is negotiating with a group of banks final terms of a $240 million revolving line of credit and term-loan agreement. Closing of the transaction is expected in the next several weeks.

Holnam Inc. is a leading producer of cement in the United States and Canada.

GOTEBERG, SWEDEN (NOV. 12) PR NEWSWIRE - The following statement was released today by AB Volvo:

Volvo's U.S. subsidiary, Volvo North America Corporation, has last week conceded that a TV advertisement was incorrect. A film sequence comparing Volvo cars with others had been manipulated.

"Our behavior is distasteful and unacceptable," said Volvo Chairman Pehr G. Gyllenhammar.

"It represents an offense against our company and what we represent and an insult against all Volvo owners. Our dedicated work to improve traffic and car safety is known the world over and simple facts of what we have achieved is the only sound base for our information."

An investigation has now been ordered in the U.S. organization. The investigation is intended to clarify how this misconduct has come about and identify those responsible for it.

"I will hereby make an example and demonstrate to all our loyal customers, suppliers and employees that I will never tolerate any kind of misconduct or breech of company policies that will damage Volvo's name and excellent reputation," said Gyllenhammar.

MIAMI BEACH, FL (NOV. 12) PR NEWSWIRE - Truck and bus fleet operators in the United States and Canada can obtain more customized performance reports and faster access to trip information from a new generation of on-board electronic computers -- the Tripmaster(R) Data Port system -- introduced today by Rockwell International Corporation's Automotive Operations.

Available immediately, the Data Port system -- previewed by North American truck industry editors here at the American Trucking Association's 1990 Management Conference & Exhibition -- assesses driver and vehicle performance and helps lower fuel costs. For user convenience, this premium model combines new, advanced capabilities within Rockwell's proven configuration of a computerized trip recorder and driver/vehicle performance software, as used by more than 2,000 private and for-hire motor carrier locations across North America.

"This next-generation, on-board computer will permit fleet operations to grow into the 1990s. Its new design contains outlets for use with real-time data devices -- fax machines, bar-code readers, electronic engine controls (SAE J1708 bus) and mobile communications systems," said Kurt Burmeister, director of sales and marketing for Automotive Electronics.

"Due to the overwhelming variety of choices in these communications technologies, we intend to work with all customers to integrate their market segment needs with the new system," Burmeister noted.

As the premium model in the Rockwell on-board computer family, the Tripmaster Data Port system also contains the company's latest method of extracting data: the Tripmaster Traveler, a new connectorless, credit card-sized data extraction card, offering easy information access.

Vehicle operators can use this card as a personalized computer diskette to store and transfer information directly, instead of physically linking a data extractor between the trip recorder and personal computer. The card accommodates single drivers or team driver combinations, including slip-seat operations.

The system's design also offers a new reprogramming feature providing motor carriers the ability to incorporate future product enhancements, without removing hardware, through a unique downloading process.

"Because this system customizes information for a variety of vocations, motor

carrier operations are not faced with the chore of having to pick from a number of special Tripmaster models," said Burmeister.

"For instance, ideal candidates, like wholesale food distribution fleets, bulk haulers and certain slip-seat operations, have information needs ranging from keeping highly detailed records of goods delivered, invoice numbers and new orders to tracking multiple driver performances," he said. "The Tripmaster Data Port system can perform all of these functions and more."

Rockwell International (NYSE: ROK) is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

RICHMOND, VA. (NOV. 12) PR NEWSWIRE - Ryland Mortgage Securities Corporation (RMSC) priced $80,000,000 of mortgage participation securities (Series 1990-5A and 1990-5B) on Thursday, Nov. 8, 1990. The issue will be underwritten by Bear, Stearns & Co., Inc., and will be collateralized by fixed-rate mortgage loans provided by RAC Mortgage Funding Corporation.

Series 1990-5A and 1990-5B will be collateralized by two distinct pools of mortgage loans. Pool A, securing Series 1990-5A, will consist of mortgage loans with original terms to maturity of 15 years or less. Pool B, consisting or mortgage loans with original and remaining terms to maturity of greater than 15 years but not more than 30 years, will secure Series 1990-5B. Series 1990-5A and 1990-5B contain the following classes:

Class	Pass-through Rate (Percent)	Approx. Amount
A-1	9.50	$18,500,000
A-2	(A)	--
B-1	10.00	61,500,000
B-2	(A)	--

(A) Class A-2 and Class B-2 will be entitled to receive all "excess interest" above 9.50 percent and 10.00 percent, respectively, on the loans in the pools.

It is anticipated that Series 1990-5A and 1990-5B will be rated AAA by Standard & Poor's Rating Group and Aaa by Moody's Investors Service. The transaction is scheduled to close on Thursday, Dec. 20, 1990.

Ryland Mortgage Securities Corporation is a limited-purpose finance subsidiary of Ryland Acceptance Corporation (RAC). RAC is an indirect, wholly owned

subsidiary of The Ryland Group, Inc., one of the nation's largest homebuilders.

SYOSSET, N.Y. (NOV. 12) PR NEWSWIRE - Viatech, Inc. (AMEX: VTK) Chairman and Chief Executive Officer Donald J. Bainton today announced record results for the third quarter and first nine months ended Sept. 30, 1990.

Revenues for the third quarter of 1990 increased nearly five-fold to $95,397,000, compared with $19,546,000 in the third quarter of 1989. Net income for the quarter ended Sept. 30, 1990, increased sharply over the previous year's quarter, reaching $1,875,000, or $1.07 per share, vs. $426,000 or $.34 per share.

For the first nine months of 1990, revenues were $215,871,000, over three times greater than revenues of $64,123,000 reported in the first nine months of 1989. Net income for the 1990 nine-month period was a record $3,736,000, or $2.16 per share, compared with $1,044,000, or $.83 per share, in 1989.

Each period of 1989 included an extraordinary item resulting from a tax benefit amounting to $53,000 in net income and $.04 in earnings per share.

"We are extremely pleased with the company's excellent performance and the record results reported today. Our strong revenues and earnings are a direct result of the successful integration of Ferembal, the second largest food can manufacturer in France and fifth largest in Europe, which we acquired in the fourth quarter of 1989. In addition, our other operating subsidiaries -- LKB Dixie Union and Onena -- contributed nicely to our record earnings. Viatech also benefited from increased interest income in the United States and foreign currency translation rate differences," said Bainton.

Bainton noted that earnings per share for the third quarter of 1990 increased 215 percent even with the dilution resulting from the sale of 460,000 shares of common stock in January 1990. According to Bainton, weighted average shares outstanding in the third quarter and first nine months of 1,776,000 and 1,732,000, respectively, is approximately 40 percent higher than the same prior-year periods.

Bainton continued, "Our strategy and vision remains the same -- to aggressively pursue acquisitions in the plastic and metal packaging industries around the world which will have a positive impact on our bottom line. Thus far, both Dixie Union and Onena remain on course with our expectations, while Ferembal's 1990 results are running ahead of our projections. We expect our 1990 financial performance to be significantly ahead of last year."

Viatech, Inc., through its subsidiaries, manufactures cans, films and equipment for the packaging industry, and prints and laminates packaging for the food and snack food industries.

HOUSTON (NOV. 12) PR NEWSWIRE - Nuevo Energy Co. (NYSE: NEV) today reported results for the 83-day period from July 10 to Sept. 30, its first period of operation following the consolidation of entities from which Nuevo was formed.

Pre-tax net earnings (before deduction of non-recurring costs associated with the consolidation) were $1,881,000. After expensing the non-recurring formation costs of $1,694,000, after-tax net earnings were $123,000. Operating cash flow for the period was $4,254,000, or $0.49 per share.

Robert L. Gerry III, president of Nuevo, commenting on the results, said:

"This is about in line with our expectations. Nuevo had strong operating cash flow during the period. The non-recurring costs associated with the Nuevo consolidation, coupled with a short July reporting period, obviously impacted our net earnings. However, these costs are behind us and Nuevo is aggressively pursuing opportunities for its future growth.

"During the first few months of operation, Nuevo has: -- Completed the conversion of the Illini pipeline serving East St. Louis, to full operation, enabling us to flow 10 million cubic feet per day to our first customer. Thf?igure should increase to 15 million cubic feet per day by the end of November.

-- In a joint venture with Union Pacific Resources Corp., completed the leasing of approximately 50,000 acres in the Giddings Field, for horizontal drilling in the Austin Chalk formation. One well has been drilled and is being tested, a second well is currently drilling, and a third location is being selected.

-- Drilled 25 wells in the Robinson's Bend coal seam gas project in the Black Warrior Basin in Alabama.

-- Completed the acquisition of additional interests in the Oak Hill Field and

proposed workover of 10 existing wells to enhance production.

-- Completed the acquisition of additional interests in the Weeks Island Field."

#90316p5974 11/12/1990 ~PR Newswire

FORT WORTH, TEXAS (NOV. 12) PR NEWSWIRE - Snyder Oil Corp. (SOCO) (NYSE: SNY) today announced its results for the third quarter of 1990. Acquisitions, coupled with higher oil prices, resulted in revenues increasing to $24.4 million from $4.5 million in the 1989 quarter. Operating income jumped more than 300 percent to $11.9 million and after-tax cash flow increased 226 percent to $7.7 million. Despite sharp rises in depletion, interest, administrative expenses and taxes due to acquisitions, net income rose 18 percent to $1.8 million. Net income per share remained below the prior year's levels due to the increase in outstanding shares.

The results reflect a substantial increase in the size of the company due primarily to the acquisition of Snyder Oil Partners. Higher oil prices in August and September contributed to record cash flow despite lower gas prices. The impact of high oil prices is expected to lead to record fourth quarter results. SOCO continues to divest nonstrategic properties in an effort to optimize its existing assets. To date, its interest in over 530 wells have been sold for an aggregate of $5.8 million.

Rapid progress is being made in SOCO's exploration program. The company's first horizontal well in the Niobrara Chalk has been drilled and should be tested within two weeks. Additional horizontal drilling is scheduled in the Niobrara before yearend. SOCO is also participating in its initial horizontal well in the Bakken Shale with Columbia Gas. Drilling on the well is underway and should be completed in early December. Oryx's seismic studies on SOCO's Halsell Ranch Project in the Austin Chalk are underway. Subject to the results, the drilling of another horizontal well there should commence early next year. Finally, SOCO holds a 25 percent carried interest in the drilling of a vertical exploratoray well in the Cuyama Valley of California. The well was recently spudded by Exxon and drilling should be completed by year end. The success of one or more of these projects could significantly increase SOCO's reserves and cash flow.

Snyder Oil is an independent oil company engaged in the acquisition, production, development and exploration of oil and gas properties and in natural gas processing and transportation. The company's common stock is traded on the New York Stock Exchange under the symbol SNY.

#90316p5979 11/12/1990 ~PR Newswire

ZEELAND, MI (NOV. 12) PR NEWSWIRE - Gentex Corporation of Zeeland, Michigan, announced today that settlement discussions with Donnelly Corporation of Holland, Mich., relating to patent litigation pending between them having been terminated by the parties.

Gentex and Donnelly signed a letter of intent on September 25, 1990, outlining the basic terms for a resolution of litigation, but the parties were unable to reach a mutually acceptable final agreement, according to Gentex Executive Vice President Kenneth LaGrand. The litigation, which relates to two patents held by Gentex on automotive electrochromic mirrors, will continue in pre-trial preparation.

In an unrelated development, Gentex also announced the receipt of a major purchase order for interior electrochromic mirrors from a new, undisclosed Japanese customer. Gentex estimates the purchase order will generate $3 million in revenue over the first full year of production, and plans to begin volume shipments of product in February 1991.

Gentex posted net income of $888,000, or 12 cents per share, on sales of $15.9 million for the nine-month period ended September 30, 1990.

Based upon recent production cutbacks announced by U.S. automakers, it now appears that shipments of automatic mirrors may decrease approximately 7 percent for the fourth quarter compared to the same period last year. Gentex sold 107,000 automatic mirrors in the fourth quarter of 1989.

Gentex Corporation (GNTX: NASDAQ/NMS) develops, manufactures and markets proprietary electro-optical products: interior/exterior electrochromic and motorized automatic mirrors for the automotive industry and an extensive line of fire protection products for commercial applications.

#90316p5980 11/12/1990 ~PR Newswire

TROY, MI (NOV. 12) PR NEWSWIRE - MLX Corp. (NASDAQ: MLXX) announced today the results of the third-quarter operations.

Net sales of $137.9 million for the third quarter of 1990 compared to net sales of $133.3 million for the third quarter of 1989. Earnings before income taxes were $1.8 million compared to $2.6 million in 1989. The net loss for the quarter was $318,000 or $.01 per share compared to earnings of $1.2 million or

$.07 per share in 1989. Third-quarter operating results for both of the company's operating groups were adversely impacted by the economy in general. Although net sales for both operating groups increased over the comparable 1989 quarter, the softening economy resulted in reduced gross margins. This adverse effect was partially offset by a $2.2 million reduction in interest expense which resulted from the new debt structure of the company. Income tax expense increased by $645,000 during the quarter which reflects the elimination of the federal income tax credit which was recognized in the first two quarters.

For the first nine months of 1990, MLX reported net sales of $354.4 million, the same amount as for the first nine months of 1989. Operating results for the first nine months of 1990 resulted in a net loss of $5 million, or $.23 per share, compared to net earnings of $793,000 or $.05 per share for 1989. As William P. Panny, chairman and chief executive officer, stated in the second-quarter report, the Refrigeration & Air Conditioning Group operating results were negatively impacted for the first six months of 1990 by delays in product shipments from vendors pending the completion of the group's refinancing.

MLX is the largest independent nationwide distributor of commercial refrigeration and air conditioning equipment, parts and supplies, and is a leading global manufacturer of high energy friction products and components used in aircraft brakes and in clutches, brakes and transmissions for heavy-duty trucks and off-highway equipment.

OAKLAND, CA (NOV. 12) PR NEWSWIRE - Kaiser Aluminum & Chemical Corp. and the United Steelworkers of America jointly announced that union members voted to approve a new master labor contract covering about 3,500 Kaiser employees at six U.S. locations. This action ratifies an agreement that was reached by company and union negotiators on Nov. 1.

Kaiser Aluminum is a subsidiary of MAXXAM Inc. (AMEX: MXM). The new contract, which extends for four years, is effective Nov. 1, 1990, and extends through Oct. 31, 1994. Among other things, it:

-- Increases base pay by 50 cents an hour in the first year and by 50 cents an hour in the fourth year; -- Increases the pension multiplier by $2 in the first year and $1 in each of the next three years; -- Provides a signing bonus of $1,000 and $500 bonuses in the second and third years; -- Continues a bonus plan tied to the price of metal with

optional
plant-specific performance bonus plans; -- Introduces a managed health care program; -- Diverts some COLA money to pay for health care cost increases; and -- Provides for a partial buy-out of Kaiser Aluminum preference stock held in the Kaiser Aluminum USWA Employee Stock Ownership Plan.

The USWA/Kaiser master contract covers aluminum smelters located at Mead and Tacoma, Wash.; a sheet and plate rolling mill at Trentwood, Wash.; an alumina refinery at Gramercy, La.; a rod/bar/wire plant at Newark, Ohio; and a coil coating facility at Toledo, Ohio.

DRYDEN, MICH. (NOV. 12) PR NEWSWIRE - Champion Enterprises, Inc. (AMEX: CHB) announced today that its odd-lot repurchase program for common stock has been extended to Dec. 10, 1990. Beneficial holders and holders of record as of the close of business on Sept. 21, 1990, are eligible to participate in the offer.

Shareholders participating in the extended program will be paid the average of the closing market prices for Champion Enterprises common stock on the American Stock Exchange for the trading dates Nov. 12, 1990, through Dec. 10, 1990, inclusive. No brokerage fees or transfer taxes will be charged.

The extended repurchase is a voluntary program which will expire Dec. 10, 1990. Brokers, banks and other nominees can obtain copies of the offering materials without charge by contacting Shareholder Communications Corporation, 40 Exchange Place, New York, New York, 10005 (1-800-678-9606).

The company said the purpose of the offer is to make it easier and less costly for these small shareholders to sell their stock. It will also reduce the company's expense connected with handling small accounts.

Champion Enterprises, Inc., headquartered in Dryden, is a holding company whose principal subsidiaries are leading producers of manufactured homes, motor homes and medium duty buses.

GOLDEN, CO (NOV. 12) PR NEWSWIRE - Imex Medical Systems, Inc. (NASDAQ: IMEX)

held its 7th Annual Shareholders Meeting on Nov. 8, 1990, at United Bank of Denver in downtown Denver.

President & CEO Dennis Newman said in part: "We are very pleased with the high level of acceptance of our IMEXLAB 9000 systems. Orders for this innovative software controlled vascular diagnostic system have exceeded our most optimistic forecasts, especially in recent months. Physicians are very pleased with the ease of using this system to produce an accurate, professional report diagnosing serious diseases, such as blockages of the arteries in the legs, which lead to 20,000 leg amputations in the U.S. every year.

"Although the bulk of these orders were too recent to substantially impact our first quarter sales and earnings, we anticipate that if the current upturn in momentum continues future quarters will be positively affected."

Located in Golden, Colo., Imex specializes in "user-friendly" and cost effective instrumentation for the office-based physician. The company produces several diagnostic instruments for either fetal heartbeat detection or for early detection of disease conditions which may lead to poor blood circulation in the legs, stroke, and other vascular problems.

LEBEC, CALIF. (NOV. 12) PR NEWSWIRE - Tejon Ranch Co. (AMEX: TRC) announced today the election of Rayburn S. Dezember to the company's board of directors. The board was increased in size from 10 to 11 directors. Dezember was the former chairman of the Bakersfield based American National Bank and its holding company, Central Pacific Corp. These entities were recently purchased by Wells Fargo Bank and Dezember is now serving as a director of Wells Fargo and company. Dezember is also a director of VISA, USA, The Bakersfield Californian, Calmat, and the Kern Economic Development Corp.

Dezember has also served terms as director of the Federal Reserve Bank of San Francisco and its Los Angeles branch. He is currently chairman of the board of trustees of Whittier College and a member of the Regional Executive Committee of the Western Region of the Boy Scouts of America. Dezember has served as chairman, president or director of numerous local and statewide trade, civic and charitable organizations.

Tejon Ranch President, Jack Hunt, commented that the company is extremely fortunate to have an individual of Dezember's stature added to its board. "Dezember not only brings great community knowledge and sensitivity to the board but also a broad business perspective of many of the issues affecting

the future of the company."

Tejon Ranch Co. owns approximately 270,000 acres of land some 60 miles north of Los Angeles and is engaged in cattle, farming, oil and minerals and commercial highway leasing operations.

ELYRIA, OH (NOV. 12) PR NEWSWIRE - Invacare Corporation (NASDAQ/NMS: IVCR), America's largest and most innovative manufacturer of wheelchairs and other home medical equipment, today announced the creation of Action Technology, a new division geared specifically to the needs of active wheelchair users.

Action Technology will operate from an independent manufacturing facility located at 34655 Mills Rd. in North Ridgeville, Ohio, with a satellite operation in Fresno, Calif.

The Action Technology product line will be unveiled later this week as part of over 50 new products Invacare will introduce at the National Home Health Care Exposition in Atlanta.

A. Malachi Mixon III, Invacare's chairman, president and chief executive officer, explained the company's strategic move, "The physically challenged - just like the rest of America's population - are leading more active lifestyles than ever before. Yet until now, mobility has often been hampered by a lack of style and performance in the wheelchairs our industry has offered.

"Active wheelchair consumers want and need equipment that supports their lifestyle," he continued. "The new designs we're building at Action Technology will do so, for everything from everyday use to high performance sporting events."

Invacare Corporation has a history of bold product innovation. The firm has revolutionized the wheelchair industry in recent years with a variety of premier concepts, including:

- the first spokeless mag-style wheel, first lightweight, titanium frame and first swingaway, removeable footrests - all of which significantly enhanced ease of use.
- the first power wheelchair operated with microcomputer components, digital controls and self-diagnostics.
- the first power wheelchair with performance adjustments - allowing speed and acceleration to be altered to fit individual needs.
- the first lightweight portable battery charger - which greatly extended the distances achievable in power wheelchairs.

Invacare's new division continues that tradition with its initial product offering of eight high-quality wheelchairs designed specifically for active users. Now, the firm will introduce the world's first wheelchairs fabricated entirely from high-performance, advanced composite materials used in the space program.

HUTCHINSON, KAN. (NOV. 12) PR NEWSWIRE - Doskocil Companies Incorporated (NASDAQ: DOSKQ) announced today that it intends to close the Clarinda, Iowa dry sausage plant effective May 31, 1991.

All production from Clarinda will be transferred to Doskocil's Jefferson, Wis. plant which has adequate capacity to handle the additional volume. The Jefferson facility currently produces dry sausage. Therefore, the technology is already in place and the transition time will allow for consistency in product formulation.

This action is in keeping with the company's continuing efforts to consolidate its asset base and the ongoing strategy to be a low cost producer.

Doskocil and its subsidiaries specialize in formulating, processing, marketing and distributing specialty precooked value added meat, meat toppings, pepperoni, and other deli specialty meats. The company is a leading supplier of beef and pork toppings and pepperoni to the pizza foods service market. In addition, Doskocil and its subsidiaries supply products to grocery and independent delicatessens, numerous restaurants, food processors, and institutional customers.

CONTACT: Ronald L. Mercer, president and COO of Doskocil Companies, 405-525-4601; or J. Desmond Towey or Bernadette McLaughlin of Cameron Towey & Associates, 212-888-7600, for Doskocil

CINCINNATI (NOV. 12) PR NEWSWIRE - Comair, The Delta Connection, today announced plans to celebrate Customer Appreciation Week Nov. 12-18. Comair customers will receive complimentary gift kits as a token of appreciation. Gift kits and literature will be distributed at gate areas throughout the system. Drawings for complimentary travel on Comair will be held periodically throughout the week. The company has chosen the week in November because it falls into the traditionally high peak business travel time. The theme of the week "The Airline You've Built" focuses on the successes that the company has achieved, including having flown 1.6 million passengers.

Comair has been in operation since 1977 and operates from the two hubs of Cincinnati and Orlando, Fla. The company serves more than 50 cities and 3 counties with a fleet of 68 state-of-the-art regional aircraft.

NORFOLK, VA. (NOV. 12) PR NEWSWIRE - Norfolk Southern Corporation (NYSE: NSC) today announced the acquisition of the assets of an Ohio River terminal near Wheelersburg, Ohio, from an affiliate of Island Creek Corporation.

Coal dumping, ground storage, blending, barge and train loading occur at the 276-acre facililty. Built in 1980, the terminal can handle 3,000 tons per hour or seven million tons annually. Its potential maximum storage capacity is 2.5 million tons. In 1989 the facility handled 3.4 million net tons.

"We believe this acquisition will expand our marketing opportunities and improve service to our coal customers," said William B. Bales, Vice President, Coal and Ore Traffic, of Roanoke, Va. "With the Wheelersburg terminal, Norfolk Southern will offer coal storage and blending services to markets served by barge as well as rail.

"Because of the recent passage of the Clean Air Act, we believe there will be opportunities for blended coals," he continued. "With the Wheelersburg terminal's storage and blending capabilities, Norfolk Southern will offer just-in-time, value-added services to its customers."

#90316p6027 11/12/1990 ~PR Newswire

NEW YORK (NOV. 12) PR NEWSWIRE - Orion Pictures' "Dances With Wolves" grossed $598,257 in 14 theaters in eight cities in its inaugural weekend, it was reported by David M. Forbes, president of Orion Pictures Distribution Corp.

The film earned an outstanding per theater gross of $42,733, a result which is the highest average this year and indicates that the film will be one of the year's top box office hits.

Standout grosses were reached in all of the film's 14 engagements: $69,259 for three days at Cineplex-Odeon's Century Plaza Theatre; the Newport Cinema in Orange County grossed $79,001 in the same period; and the UA Plaza in Dallas reported $50,703.

Elated exhibitors have reported that repeat business has already started, with patrons leaving one performance and purchasing advance seating for another show. In some theaters, managers reported advance sellouts up to seven hours prior to show start.

Commenting, Forbes said, "We are very excited about the reviews, the public's enthusiasm and the reception to a period film by first- time director Kevin Costner. The weekend results give us enormous confidence for the potential on Nov. 21 as we expand to a full national break."

Forbes continued, "This is the beginning of what appears to be a major holiday season for Orion, with 'Mermaids' and Woody Allen's 'Alice' opening before year's end, followed by 'Eve of Destruction' in January and Jonathan Demme's 'The Silence of the Lambs' in February."

"Dances with Wolves" is a TIG Production for Orion release. The film, produced, directed by and starring Kevin Costner, also stars Mary McDonnell, Graham Greene (as "Kicking Bird"), Rodney A. Grant (as "Wind in His Hair"), Floyd Red Crow Westerman (as "Chief Ten Bears") and Robert Pastorelli. Jim Wilson co-produced with Costner. Michael Blake wrote the screenplay, based on his novel.

WOODBRIDGE, N.J. (NOV. 12) PR NEWSWIRE - GR Foods, Inc. (AMEX: GRX) today announced that it had agreed to sell its remaining fish meal operations, located in Panama, to a company controlled by Pierre J. Petrou and Celia Meilan.

The Panamanian operations, which have been unprofitable this year, were sold for a purchase price of approximately $3.6 million in cash and securities. Closing is expected to take place prior to Nov. 15, 1990. This sale substantially completes the disposition of all of GR Foods' commodity businesses and, as a result, the company has discontinued its commodity operations segment for financial reporting purposes.

GR Foods' net loss for the quarter of $4.76 million, or $.74 per share, included a provision for the disposition of the Panamanian operations as well as a provision against the carrying value of the preferred stock received in connection with the sale of the domestic fish meal operations sold earlier this year.

The company reported that its Ground Round restaurant chain continued to increase in sales and profitability over last year and that volume in its shrimp business continued to expand. However, during the quarter, Pan Pacific tuna operated at a loss due to the industrywide disruption caused by the move to dolphin-safe tuna.

GR Foods, Inc. has businesses in restaurants and food products.

NEW YORK (NOV. 12) PR NEWSWIRE - For the second consecutive year, Forbes' Magazine has named Uno Restaurant Corporation to the elite group of the "200 Best Small Companies in America."

In this annual ranking of the nation's top small firms, Forbes evaluated more than 4,300 companies nationwide with sales between $1 million and $350 million.

Uno, in order to qualify, had to pass strenuous qualifications in growth in both earnings and sales, as well as return on equity.

In extending the award for Forbes, Ray J. Healey, Jr., publisher, said, "...I'd like to commend the management and Uno Restaurant Corporation on an outstanding performance."

Aaron Spencer, chairman of the board of Uno Corporation, in accepting the honor, stated that "... it is indeed gratifying to be recognized for the company's achievements, especially since we have just announced fourth results of revenue increase of 39 percent and fiscal 1990 revenue increase of 35 percent.

Uno Restaurant Corporation operates and franchises a chain of casual dining, full-service restaurants under the name "Pizzeria Uno Restaurant & Bar." The restaurants feature gourmet, Chicago-style deep dish pizza and a variety of entrees, sandwiches, appetizers, salads, desserts, and beverages. Uno Restaurant Corporation currently operates 34 Pizzeria Uno restaurants and has 47 franchised restaurants in 16 states, and Canada.

#90316p6041 11/12/1990 ~PR Newswire
SAN JOSE, CA (NOV. 12) PR NEWSWIRE - Halloween may be over, but Mentor Graphics (NASDAQ: MENT) has only begun driving a stake through the heart of Dracula, the heretofore industry-standard chip verification tool. Announced today, Mentor Graphics' Explorer CheckMate will challenge Dracula's 73-percent share of the IC verification tool market.

"Explorer CheckMate offers substantial performance and capacity improvements to IC designers," said Jim Hammock, president of Mentor Grahpics' Silicon Design Division (SDD). "Its advanced technologies finally give users what they've been looking for -- fast, accurate physical verification of integrated circuits (ICs) -- at a reasonable cost. At the same time, Explorer CheckMate gives us tremendous leverage for capturing an even larger share of the IC design automation market."

Physical verification is the final step in the design process which helps ensure that a chip will perform as specified. It checks for errors on hundreds of thousands of transistors, all of which must be error-free for proper chip operation. If an error is not caught at this stage, costly re-design and time-to-market delays may result. Design verification tools represent the second-largest segment -- 23.3 percent -- of the IC design market today.

Explorer CheckMate provides superior capacity and performance through network-distributed processing, more efficient database management, and better utilization of hardware resources like memory and disk space. "As a result, users can complete complex verification checks in a single pass that users of other tools need multiple passes to handle," said Hammock. "If the designer can cut hours -- and in some cases, days -- off each full chip verification run, the impact can be significant. Explorer CheckMate users can get their chips manufactured earlier and thus bring their products to market sooner than ever before."

Explorer CheckMate is a proven, versatile technology capable of dominating the IC verification market. Mentor Grahpics co-developed Explorer CheckMate with Texas Instruments, who has used its underlying algorithms to verify thouands of IC designs during the past 14 years.

"The algorithms represented in CheckMate are fourth generation," said Robert Rozeboom, vice president and general manager of Texas Instruments' Semiconductor Design Automation Division. "Just about every chip designed at Texas Instruments has been verified with technology that is now the core of Explorer CheckMate. Using the algorithms contained in Explorer CheckMate, Texas Instruments and its strategic partners have verified hundreds of chips -- built in CMOS, bipolar, BiCMOS, and gallium-arsenide technologies -- containing digital, analog and mixed-signal designs."

Users can expect typical throughput improvements of 20 to 300 percent using Explorer CheckMate. In a series of benchmarks that directly compared Explorer CheckMate with Dracula III, Explorer CheckMate was the hands-down powerhouse. One leading semiconductor equipment manufacturer needed 19 hours to verify its custom IC with Dracula. Explorer CheckMate finished the same run in 15 minutes by taking advantage of advanced algorithms that eliminated unnecessary verification checks of the design. A simulation systems manufacturer verified a 250,000-device microprocessor in 22 and one-half hours with Dracula. Using Explorer CheckMate, the verification took a little less than nine hours.

These benchmarks were conducted on a single CPU to ensure a fair comparison between the two companies' verification products. However, Explorer CheckMate's network-distributed processing offers users even greater performance. Network-distributed processing enables designers to spread the workload among a number of engineering workstations, thereby substantially

speeding the verification process.

In addition to providing significantly greater performance, Explorer CheckMate is competitively priced at $98,500; Dracula's base price is $173,000. Explorer CheckMate is available now and runs on both the Sun and Hewlett-Packard/Apollo platforms.

"A large number of IC designers are using Dracula today. In fact, Mentor Graphics itself has been one of the largest Dracula customers by offering Dracula verification software to its users," said Hammock. "We believe Explorer CheckMate is going to change all that."

In a related development, Hammock also announced the availability of Mentor's PARADE Place and Route tool which offers up to 10X faster processing speeds than any other place-and-route tool currently on the market. PARADE is an automatic layout tool for very complex application-specific integrated circuits (ASICs). Co-developed with National Semiconductor and OKI Semiconductor, PARADE also provides higher gate utilization and support for advanced ASIC architectures.

Explorer CheckMate and PARADE are just two recent announcements of new, advanced IC design tools from Mentor Graphics. In September, the company also announced a set of powerful new capabilities for ASIC library developers in Mentor Graphics' GDT Designer full-custom IC design system.

"We're committed to providing our customers with the best available technologies for all phases of IC design," said Hammock. "Even though the IC design market is smaller than the systems market, we think it's key to being the EDA leader. That's because it's the quality of the ICs that drive the competitiveness of electronic systems."

Mentor Graphics' Silicon Design Division provides the broadest spectrum of integrated IC design systems and modular, open design tools offered on industry-standard platforms. The company has worked with hundreds of customers, helping them achieve IC time-to-market breakthroughs. Major electronics companies using Mentor Graphics' SDD technology include Siemens, Motorola, Philips, Sharp, Tandem Computer, Texas Instruments and Toshiba.

Mentor Graphics Corp., Beaverton, Ore., was established in 1981 to design, manufacture, market and service electronic design automation (EDA) systems. The company is the leader in worldwide EDA sales, with revenues of $433,781,000 over the last 12 months. The company currently employs more than 2,600 people. In addition to its corporate offices in Beaverton, Mentor Graphics has sales and support offices in 66 locations worldwide. The company's headquarters are located at 8500 S.W. Creekside Place, Beaverton, OR 97005.

THOUSAND OAKS, CALIF. (NOV. 12) PR NEWSWIRE - Amgen Inc. (NASDAQ: AMGN) announced that it will pay Memorial Sloan-Kettering Cancer Center $50 million in exchange for a substantial reduction in royalty payments owed by Amgen to Memorial Sloan-Kettering on U.S. sales of NEUPOGEN, Amgen's recombinant granulocyte colony-stimulating factor.

This payment is made in conjunction with the modification of a 1986 license agreement between the parties. Under the terms of the amendment, Amgen will also pay additional amounts to Memorial Sloan- Kettering in future years if certain conditions are met. The amendment will have no effect on non-U.S.

royalties due on NEUPOGEN sales. As a result of this transaction, Amgen will incur a one time after-tax charge of approximately $46 million to current quarter earnings.

Amgen is a leading biotechnology firm developing pharmaceutical products based on advances in recombinant DNA and molecular biology. The company, located in Thousand Oaks, was founded in April 1980. Amgen's European headquarters in Lucerne, Switzerland was established in 1989.

IRVINE, CALIF (NOV. 12) PR NEWSWIRE - "Operation Desert Munchies," a program created by Avco Financial Services to pay the cost of shipping goods' to employees' family members serving in the Persian Gulf, has now been expanded to offer this service to Avco customers. Avco President Warren Lyons announced today that Avco will pay all shipping costs for Avco customers who wish to send baked goods, candies, photos, books and other such items to family members who have recently been deployed to the Persian Gulf.

"This offer is just one component of Avco's formal Community Involvement Program," said Lyons. "We want to show our military personnel and their families that we care for them and appreciate the sacrifices they are making for all of us."

"Operation Desert Munchies," which started as a result of an employee suggestion, grew to include all Avco Financial Services employees, has now expanded to include all Avco customers throughout the 44 states in which Avco operates branch offices.

The offer is effective immediately and will run through Dec. 31, 1990. There is no limit to the number of packages an Avco customer can send to a friend or loved one stationed in the Persian Gulf.

In order to obtain complete details and take advantage of the offer, Avco customers are invited to contact any Avco Financial Services office throughout the United States.

Avco Financial Services is a multi-billion dollar company with more than 1,200 branch offices in Australia, Canada, the United Kingdom and the United States.

The company is a subsidiary of Textron Inc., a multi-industry company with operations in three business sectors -- Aerospace Technology, Commercial Products and Financial Services.

#90316u0189 11/12/1990 ~United Press International
(NOV. 12) UPI - China's foreign minister held two rounds of talks Sunday with Iraqi Foreign Minister Tariq Aziz. The Chinese official reiterated Beijing position opposing the Iraqi invasion of Kuwait. The official Chinese news agency says the Chinese foreign minister at the same time called for- quoting- ''solving disputes between countries through peaceful means.'' The Chinese official is to meet with Saddam Hussein Monday.

Top congressional Democrats are cautious backing President Bush's military buildup in the Persian Gulf. But the Democrats say in separate television interviews that the president is still keeping his options open, hoping that the U-N sanctions and the increase in U-S troop strength by 200-thousand will convince Iraqi President Sadam Hussein to pull out of Kuwait.

Japan has a new emperor. Akihito today proclaimed himself the country's 125th emperor in a ritualistic ceremony at the Emperial Palace in Tokyo. The 56-year-old Akihito pleged to pursue international peace and honor Japan's post-war peace constitution. Akihito, wearing a 100- thousand dollar rust-colored court robe, prayed to the Shinto sun goddess for the success of his reign on the 26-hundred-year-old Chrysanthemum Throne.

Hours before the enthronement, urban guerrillas unleased a series of fires and

missiles to protest the continuation of the imperial system in modern Japan. But police say there were NO injuries in any of the attacks at shrines, train stations and U-S and Japanese military bases.

The massive U-S military buildup in the Perisan Gulf took center stage Sunday as Americans around the country honored veterans of wars past and remembered their dead warriors. The annual Veterans Day cermonies were held throughout the weekend as Veterans Day was officially Sunday, but the legal holiday is Monday. Crowds of veterans and their families flocked to the Vietnam Veterans' Memorial in Washington for a day of ceremonies that included a wreath-laying and emotional speeches from war survivors.

#90316u0217 11/12/1990 ~United Press International

WASHINGTON (NOV. 12) UPI - After learning the Senate ethics committee had scheduled unusual public hearings into the conduct of five senators accused of acting improperly on behalf of a savings and loan operator, Sen. John Glenn, D-Ohio, made a prediction to reporters.

''You people are going to have a ball, I can guarantee that,'' Glenn, one of the so-called Keating Five, said last month.

The ball, with Sens. Alan Cranston, D-Calif., Dennis DeConcini, D- Ariz., Glenn, John McCain, R-Ariz., and Donald Riegle, D-Mich., facing the music, starts Thursday and could last several weeks.

The trial-like proceedings before the Select Committee on Ethics promise to blossom into a public spectacle replete with several juicy political themes, including conflicting allegations of corruption and influence-peddling by elected officials and claims of innocence and indignation.

''The message here is going to come down to one of the institution's own credibility,'' said Fred Wertheimer, president of Common Cause, the public interest group that initiated the complaint against the five senators.

''I think there are larger questions involved here and they go to what the Senate sees as proper and acceptable conduct for a United States senator,'' Wertheimer added. ''Bottom line, that's what the committee's going to be ruling on in this case ... Is there a willingness to hold colleagues accountable for improper conduct when it occurs? Or does the Senate take care of its own at the expense of holding members accountable?''

The five senators are under investigation for intervening with federal regulators on behalf of thrift executive Charles Keating and his failing Lincoln Savings and Loan during the mid-1980s, when the quintet received a total of $1.3 million in contributions to their campaigns and political causes.

Meetings that the senators held with former officials of the Federal Home Loan Bank Board raise questions about whether the lawmakers violated a Senate rule prohibiting senator from contacting federal regulators outside of official channels.

The collapse of Lincoln Savings and Loan is the largest in the nation's S&L scandal and is projected to cost taxpayers more than $2 billion. The thrift was seized by federal regulators last year. Keating faces criminal charges in California stemming from accusations that he bilked investors in his thrift's bond programs.

The committee, chaired by Sen. Howell Heflin, D-Ala., says the hearings will present ''a full exposition of the facts.'' The senators will bring their own lawyers for representation and will be permitted to call witnesses for their defense. A key aspect of the hearings will be an attempt by the six members of the ethics committee to gauge the credibility and veracity of the key witnesses in the case.

The ethics committee has several options coming out of the hearings, including dropping action against any or all five of the senators, recommending reprimands or more stern steps, such as censure or expulsion, to the Senate.

In launching the joint public hearings into the conduct of all five senators, the ethics committee refused the recommendation of its own special counsel, Robert Bennett. After a nine-month probe, Bennett urged the panel to clear both Glenn and McCain, with Cranston, DeConcini and Riegle facing further proceedings.

Glenn and McCain expressed anger over the decision not to clear them, with McCain, the lone Republican among the Keating Five, accusing the committee of ''political cowardice.'' The committee, comprised of three Democrats and three Republicans, reportedly was split 3-3 on a straight party line vote on whether to exonerate Glenn and McCain. The other three senators have said they welcome the hearings as a chance to refute the charges publicly.

A final disposition of the matter is expected by the end of the year.

None of the Keating Five was up for re-election on Nov. 6. Cranston, however, announced Thursday that he is suffering from prostate cancer and will not seek election to a fifth term in 1992 and will surrender his position as the second-ranking Democrat in the Senate leadership. Despite saying he needs ''immediate treatment'' for the cancer, a spokesman for Cranston said the California Democrat will participate in the hearings.

#90316u0242 11/12/1990 ~United Press International

(NOV. 12) UPI - Around the world... Around the clock... U-P-I brings the news.

The Pentagon says a U-S Marine battalion plans to practice an amphibious assault this week near the border between Saudi Arabia and Kuwait. Newsweek magazine reports the exercises will be staged within range of Iraqi Silkworm anti-ship missiles. A U-S official says it was planned ''intentionally'' to show Baghdad U-S military capability.

Iraqi President Saddam Hussein is shrugging off U-S preparations for war in the Persian Gulf. He says on British television that he's prepared to enter negotiations over the crisis if the Palestinian problem is put on the agenda. And Saddam says he's sealing off Kuwait because it is a military target for U-S-led forces in the region.

There were NO reports of violence Sunday as a bloody political campaign gave way to a peaceful election in Guatemala. Turnout was low amid a rebel call for a boycott of the elections to choose a president and congressional and municipal authorities. Only about 20 percent of registered voters had cast ballots by mid-day.

At Cape Canaveral, the countdown continues as engineers prepare the shuttle Atlantis for a sky-lighting blastoff Thursday to boost a military satellite into orbit. Sources said take-off is planned for 6:46 p-m, eastern time Thursday. But NASA will only say the shuttle is set for launch sometime between 6:30 and 10:30.

Preliminary results of an autopsy are expected today in the death of the world's first heart-liver transplant. 13-year-old Stormie Jones died yesterday at Pittsburgh Children's Hospital after suffering what doctors say might have been a heart infection. The White Settlement, Texas, teen-ager captured the hearts of Millions when she underwent the historic operation six years ago.

Japan's new emperor is the 56-year-old son of the country's wartime leader Hirohito. Akihito proclaimed himself Japan's 125th emperor today in a ritualistic ceremony at the Imperial Palace in Tokyo. The ceremony was attended by 158 foreign dignataries, including Vice President Quayle.

#90316u0261 11/12/1990 ~United Press International

(NOV. 12) UPI - The Calgary Flames concluded a six-game road trip by earning a point in the standings and by impressing their opponent.

Joel Otto scored at 15:48 of the second period Sunday night, lifting the Flames to a 4-4 tie with the New York Rangers.

''A team at the end of a roadtrip like that either gets too tired or it comes out and really, really plays its best and goes home with a .500 record,'' Rangers Coach Roger Neilson said. ''Calgary obviously did the latter.

''They were big and strong. In the course of the game, Calgary played a really good game and we were fortunate to get a tie.''

Goaltender Mike Richter had to make 40 saves, including 19 in the second period, to preserve the Rangers' 27th point of the season, tops in the NHL.

''I was really impressed,'' Richter said. ''They really came at us. They kept their legs even in the third period. They kept skating right into overtime and it's back-to-back nights for them.''

John Ogrodnick scored two goals for the Rangers, giving him nine goals in his last seven games.

''They're a strong hockey club,'' he said. ''They have a lot of depth and they have a lot of speed. And they did play well.''

Otto punched home a rebound of a shot by Sergei Priakhin. The Rangers complained to referee Don Koharski that the net had been dislodged prior to the shot crossing the goal line.

''Well, it's the new rule that if the puck is going in, then it's a goal. It's the referee's determination,'' Calgary Coach Doug Risebrough said.

''I think our guys bounced back,'' Risebrough said. ''We didn't have the best effort last night (Saturday, in a loss to the Islanders). There was a lot of intensity from our guys.

''We played last night and this is the end of a six-game road trip for us. And we didn't have any extra bodies. We have seven guys injured.''

Elsewhere in the NHL, Boston beat Washington 5-3, Montreal edged Quebec 5-4 in overtime, Philadelphia blanked Vancouver 2-0, and Winnipeg forged a 3-3 tie with Chicago.

-- AROUND THE NHL --

Bruins 5, Capitals 3

At Landover, Md., Craig Janney poked in the winning goal early in the third period to boost Boston. The victory keeps the Bruins in first place in the Adams Division with 23 points. They are 3-0-1 in their last four games and 6-1-2 in their last eight. Boston has won its last three road games.

Canadiens 5, Nordiques 4, OT

At Montreal, Sylvain Lefebvre scored his first goal of the season with 53 seconds left in overtime to help the Canadiens extend Quebec's losing streak

to 10 games. The Nordiques' last victory came Oct. 20 against the Detroit Red Wings. They are two short of the team record of 11 set last season.

Flyers 2, Canucks 0

At Philadelphia, Mike Ricci and Kjell Samuelsson scored goals and Pete Peeters stopped 31 shots to record his 21st career shutout. The Flyers, who have won five of seven, snapped a four-game home losing streak and defeated the Canucks at home for the first time since Dec. 9, 1986.

Blackhawks 3, Jets 3

At Chicago, Pat Elynuik scored the game-tying goal with less than five minutes left and goaltender Stephane Beauregard stopped 46 shots to help Winnipeg rally for the tie. After Troy Murray and Dirk Graham scored within 3:54 of the third period to give the Blackhawks a 3-2 advantage, Elynuik beat goaltender Ed Belfour with a blast from the left faceoff circle.

#90316u0322 11/12/1990 ~United Press International

(NOV. 12) UPI - The U-S steps up military activity in the Persian Gulf... Japan has a new emperor... and a busy time at Cape Canaveral. Those stories and more, next from U-P-I. .

Events in the Persian Gulf continue to move toward a use of force by the United States.

The Pentagon plans to conduct a practice amphibious assault this week near the border between Saudi Arabia and Kuwait, within range of Iraqi Silkworm anti-ship missiles.

A U-S official said the exercise was planned- in his words- ''intentionally to raise the ante to show we have the capability and we're ready to take it right to their border.''

Morocco's King Hassan yesterday called on Arab leaders to give peace ''its last chance'' and offered to hold a meeting of Arab leaders. Iraq's Saddam Hussein refused to take part in the meeting.

King Hassan said he is concerned by indications of war preparations by a U-S led military force deployed in the gulf region. Morocco has sent troops to join the anti-Iraq forces.

President Bush is reported willing to consider what he terms a ''messy compromise'' to resolve the crisis.

A senior U-S official told Newsweek magazine that under the compromise, Iraq would withdraw from Kuwait without pre-conditions, but the United States would NOT interfere if fellow Arabs later wanted to meet Iraqi demands for a Persian Gulf port or part of a Kuwaiti oilfield.

However, a Bush aide told the magazine there was NO ''sense that Saddam is wearing down, changing his mind.''

Pledging to pursue international peace, Akihito, the 56-year-old son of Japan's wartime leader Hirohito, proclaimed himself the country's 125th emperor today.

In a ritualistic ceremony dating back to two-thousand-600 years, Akihito also promised to honor Japan's postwar peace constitution. He declared his enthronement in a palace ceremony attended by 158 foreign dignataries, including Vice President Quayle.

Wearing a 100-thousand-dollar rust-colored court robe said to symbolize the hue of the sky just before dawn, Akihito prayed to the Shinto sun goddess for the success of his reign on the 26-hundred-year- old Chrysanthemum Throne.

Prime Minister Toshiki Kaifu led 25-hundred guests in three ''long live the emperor'' cheers.

Meanwhile, urban guerrillas set fires and launched missiles to protest the continuation of the imperial system in modern Japan.

Police say leftist radicals claimed responsibility for several fires set at Shinto shrines and train stations... and for the launching of several small missiles at U-S and Japanese military bases. NO one was hurt in the attacks.

And palace officials say the attacks did NOT disrupt the enthronement ceremony held within the heavily guarded Emperial Palace grounds.

#90316u0327 11/12/1990 ~United Press International

(NOV. 12) UPI - This is a busy week at Cape Canaveral and the nearby Cape Canaveral Air Force Station, with two secret military missions planned.

Sources say that technicians are making final preparations to launch an UNmanned Titan 4 rocket tonight to carry a Pentagon satellite into orbit.

Engineers also will be maintaining watch over the space shuttle Atlantis, which is scheduled for launch on Thursday.

The countdown for the Atlantis mission began last night.

It's believed that the shuttle Atlantis also will be carrying military satellites.

This is the first time in recent history that two major military payloads are scheduled for launch in a single week.

Today is the legal observance of Veterans Day, but many Americans observed the day yesterday, when it actually occurred.

There were traditional wreath-laying ceremonies and parades, and even some protests.

In the nation's capital, crowds of veterans and their families flocked to the Vietnam Veterans' Memorial for a day of ceremonies.

A wreath-laying ceremony, followed by emotional speeches from war survivors, began the day at the memorial.

In Chicago, about 100 Vietnam veterans protested Operation Desert Shield in the Persian Gulf and asked people to remember their conflict when deciding if military action should be used against Iraq.

#90316u0335 11/12/1990 ~United Press International

(NOV. 12) UPI - Turnout was low as voters in Guatemala flocked to the polls yesterday in a peaceful election to choose a new government.

Rebels had called for a boycott of the balloting to elect a successor to President Vinicio Cerezo, saying the elections won't resolve the economic and political problems in Guatemala.

Nearly 30 years of political violence in the country has left an estimated 100-thousand people dead and another 40-thousand kidnapped.

There were NO reports of violence on election day. But most voters appeared apathetic and skeptical after a bloody campaign in which dozens of political party activists and several elected officials were shot dead in street attacks in the weeks leading up the election.

Despite the call for a boycott, some voters walked up to 10 hours to reach the nearest polling place to cast ballots for one of 12 presidential aspirants... congressional deputies and municipal authorities in 90 percent of Guatemala's 330 townships.

The leading candidates to succeed Cerezo on January 14th represent the political center or right, and support neo-liberal economic policies. But none has proposed significant reforms to the country's UNeven distribution of

wealth.

#90316u0346 11/12/1990 ~United Press International
JOHANNESBURG, South Africa (NOV. 12) UPI - Police in the nominally independent tribal territory of Bophuthatswana Monday accused the African National Congress of plotting to assassinate the territory's president, Lucas Mangope, and arrested a number of ANC activists.

The actions coincided with a mass ANC-backed work stayaway and consumer boycott by blacks in the nation's capital of Pretoria to protest alleged political intolerance in nearby Bophuthatswana and a cutoff of electricity to strife-torn black townships of the city.

Bophuthatswana Police Commissioner Maj. Gen. P.J. Seleke said police detained a ''number'' of ANC members in the territory northwest of Pretoria ''following the unearthing of evidence of a plot to assassinate'' Mangope. He said more arrests could be expected.

Mangope said in a statement, ''In the interests of all ... the government of Bophuthatswana regrettably has no alternative but to take steps to neutralize this despicable and unconstitutional threat.''

An ANC official in Johannesburg immediately denied the allegation, calling it ''ridiculous and outrageous.''

''They have never tolerated any opposition and are looking for an excuse to kick us out,'' the spokesman said.

The ANC has long accused Mangope of being a puppet of the white minority government. Mangope is the only leader of the four apartheid- created ''independent'' territories - recognized as sovereign only by South Africa - who has refused to accept the ANC's counsel in affairs of state.

ANC Deputy President Nelson Mandela said Bophuthatswana is ''not a major ally of our struggle.''

The ANC also said South African police had detained up to five organizers of the Pretoria stayaway over the weekend, but police would not comment on the allegation.

The protest action, by tens of thousands of people, left the city's streets almost devoid of black shoppers, and businesses drafted white staff into jobs held by blacks.

''The response to the stayaway is almost 100 percent,'' said a stayaway organizer, Ronnie Momoepa.

A poll by the daily Pretoria News had businessmen and transport officials putting the stayaway figure in the ''tens of thousands.'' ''This is as good as a blanket demonstration ... there aren't blacks anywhere in town,'' store owner Harold van Rensburg said.

The ANC-affiliated United Democratic Front and Congress of South African Trade Unions organized the action last week to highlight ANC allegations of civil rights abuses and political intolerance of opposition in Bophuthatswana and to demand the territory's reincorporation into South Africa.

The stayaway was also called to protest against the cutoff of electricity to Pretoria's Atteridgeville, Zithobeni, and Bronkhorstspruit townships by authorities reacting to politically motivated non-payment of service dues.

Rioting sparked by the cutoffs left two people dead and 25 injured by late Saturday before Law and Order Minister Adriaan Vlok imposed emergency regulations giving police sweeping powers and a 9 p.m.-to-4 a.m. curfew on Atteridgeville and neighboring Saulsville.

#90316u0424 11/12/1990 ~United Press International

TUNIS, Tunisia (NOV. 12) UPI - The PLO has given its approval to the convening of a last-ditch Arab summit to try and find a peaceful solution to the crisis in the gulf as proposed by King Hassan II of Morocco.

''From the start the PLO has pronounced itself in favor of an Arab solution likely to resolve the gulf crisis and to arrive at a global solution taking account of the interests of all,'' a Palestine Liberation Organization spokesman said in Tunis Sunday night.

''This is why the PLO approves the proposal by the Moroccan king and is convinced that the Arab nation is capable of overcoming the crisis as it has others.''

For his part former Arab League Secretary-General Chidli Klibi, a Tunisian who resigned from the post in September, said he believed the proposal by the Moroccan monarch ''is a unique chance to avoid war.''

On Sunday, King Hassan urged Arab leaders to hold an immediate ''last chance'' summit conference to head off war in the gulf. Iraq said it would attend such a meeting if it was consulted on the agenda and if the conference addressed the Palestinian question.

#90316u0441 11/12/1990 ~United Press International

(NOV. 12) UPI - Vice President Quayle was among the 158 foreign dignitaries on hand today in Tokyo as Akihito was elevated to emperor of Japan. After a ceremony dating back 26-hundred years, Akihito read a brief proclamation officially making him the 125th emperor of Japan. .

Police say violence staged by leftist radicals opposed to the imperial system staged several attacks, but they did NOT disrupt the ceremony. Fires were set at Shinto shrines, train stations and office buildings throughout Tokyo and several small missiles were launched at U-S and Japanese military bases.

Cuba's vice president reportedly has expressed hope for improvement of relations between his nation and the United States. In a meeting with the Japanese foreign minister, Carlos Rafael asked Japan to urge Washington to take the initiative.

China's foreign minister held two rounds of talks yesterday with his Iraqi counterpart. The Chinese official re-iterated the position of the Chinese government ''opposing military invasion by one country of another.''

The federal Centers for Disease Control says the flu season is expected to begin again in December, so Americans should get their flu shots this month. Last year, the United States had its worst flu epidemic in five years.

-30- 1435

#90316u0535 11/12/1990 ~United Press International

(NOV. 12) UPI - Japan's Imperial Palace courtyard was transformed in exact detail as it was one-thousand years ago, as a new emperor was enthroned today. At the conclusion of an elaborate ceremony, Akihito proclaimed himself Japan's 125th emperor, and pledged to observe the nation's constitution. He expressed hopes that Japan will achieve ''peace in the international community.'' .

37-thousand police on duty in Tokyo for the ceremony had their hands full. Hours before the enthronement of Akihito, leftist radicals set fires at Shinto shrines and other locations and launched several small missiles at U-S and Japanese military bases, office buildings and vacant homes. Police clashed with two-thousand helmeted radicals demonstrating against the emperor. Six demonstrators were arrested.

Japan's Foreign Ministry says Cuban Vice President Carlos Rafael Rodriguez has expressed hope for improvement of relations between Cuba and the United States. During a meeting in Tokyo with Japan's foreign minister, Rodriguez reportedly said ''Cuba would like to see Japan use its position to urge the United States to improve relations with Cuba.''

Iraqi President Saddam Hussein said yesterday on British television that he has NO choice but to seal off Kuwait, because he said it ''is now a military target'' for the U-S led forces. Saddam also said that he is prepared to enter

into negotiations if the Palestinian problem is on the agenda. Saddam has said before that he will consider withdrawing from Kuwait if the Israelis withdraw from the territories and Syria withdraws from Lebanon.

Stormie Jones, the Texas girl who underwent the world's first heart and liver transplant, died yesterday in a Pittsburgh hospital. Doctors said she suffered what might have been a rejection of her second transplanted liver. The 13-year old youngster died at the same hospital where she underwent her history-making heart-liver transplant on February 14th, 1984.

Federal health experts say now is the time to get your flu shot. The Centers for Disease Control says widespread outbreaks of flu usually do NOT start until December, so November is the best time to get flu shots. The shots usually take about two weeks to protect against the flu virus. Federal health officials say there were about 52-thousand flu-related deaths last year, about 10-thousand more than in NON-epidemic years.

#90316u0541 11/12/1990 ~United Press International

BONN, GERMANY (NOV. 12) UPI - Germany and Poland will sign a border treaty this week, officials said Monday, a German concession that could boost Polish Prime Minister Tadeusz Mazowiecki's bid for president against Lech Walesa, officials said Monday.

By signing the treaty, the Bonn government will formally recognize a border established 45 years ago and acknowledge Germany's loss of eastern territories ceded to Poland after World War II.

A spokesman said in a statement that German Foreign Minister Hans- Dietrich Genscher and his Polish counterpart, Krzysztof Skubiszewski, will sign the treaty Wednesday in Warsaw - less than one week after German Chancellor Helmut Kohl met with Mazowiecki at the border.

At the meeting Thursday in the eastern German town of Frankfurt an der Oder, Kohl agreed that the treaty settling Germany's postwar borders would be signed this month, although he had favored signing the document after Germany's Dec. 2 elections.

The concession was a major victory for Mazowiecki and could boost his bid to defeat trade union leader Lech Walesa in the Nov. 25 presidential elections.

Poland had long demanded that Germany formally recognize the Oder and Neisse rivers as its eastern border, but Kohl insisted that a border treaty could only be signed by a united German government.

The decision to sign the treaty has already brought sharp criticism from arch-conservative members of Kohl's Christian Democratic Union, particularly

the Federation of Expellees, which claims to represent the 15 million Germans and their descendents expelled from German territories ceded to Poland, Hungary and Czechoslovakia after Germany lost World War II.

During Thursday's meeting in the German town by the Oder river, Kohl told Mazowiecki he expected visa requirements for Poles visiting Germany to be lifted before Christmas.

But there was no indication Mazowiecki gained any significant concessions on the tricky issue of compensation for victims of the Nazi reign of terror.

Kohl said further talks would be needed on the issue.

Poland is seeking compensation for 30,000 survivors of concentration camps and for 600,000 people used as slave laborers after the Sept. 1, 1939, German invasion of Poland that set off World War II.

#90316u0575 11/12/1990 ~United Press International

SOFIA, BULGARIA (NOV. 12) UPI - Bulgaria has long been regarded as Moscow's closest ally in Eastern Europe but a survey released Monday shows most Bulgarians would prefer a cooler relationship with their Soviet ''big brother.''

The opinion poll published in the weekly newspaper Pogled suggested more than two-thirds of Bulgarians favor greater independence from Moscow and 61 percent believe their country should withdraw from the Warsaw Pact.

Sixty percent no longer believe the Soviet Union should be the chief guarantor of their country's security, the survey said, and only 30 percent favor keeping Soviet-Bulgarian relations on their course.

Ties between Bulgaria and the Soviet Union have almost always been close, prompting comparisons to a ''big brother-little brother'' relationship.

The two countries share an alphabet and a similar language, religion and other cultural and historical ties. It was the Soviets who helped Bulgaria gain its independence in 1878 by defeating Ottoman forces that had occupied the country for nearly five centuries.

A separate poll released Monday revealed that about 20 percent of the adult population is actively involved in black market trade and 15 percent earn their living from it.

The survey published in the newspaper Demokratsiya said about 60 percent of the consumer goods bought and sold in Bulgaria are traded on the black market.

Although the prices of black market goods are sometimes several times higher than in legitimate stores, severe shortages of basic consumer goods have made black marketeering extremely profitable.

#90316u0590 11/12/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (NOV. 12) UPI - Police in the nominally independent tribal territory of Bophuthatswana Monday accused the African National Congress of plotting to assassinate the territory's president, Lucas Mangope, and arrested a number of ANC activists.

The actions coincided with a mass ANC-backed work stayaway and consumer boycott by blacks in the nation's capital of Pretoria to protest alleged political intolerance in nearby Bophuthatswana and a cutoff of electricity to strife-torn black townships of the city.

Bophuthatswana Police Commissioner Maj. Gen. P.J. Seleke said police detained a ''number'' of ANC members in the territory northwest of Pretoria ''following the unearthing of evidence of a plot to assassinate'' Mangope. He said more arrests could be expected.

Mangope said in a statement, ''In the interests of all ... the government of Bophuthatswana regrettably has no alternative but to take steps to neutralize this despicable and unconstitutional threat.''

An ANC official in Johannesburg immediately denied the allegation, calling it ''ridiculous and outrageous.''

''They have never tolerated any opposition and are looking for an excuse to kick us out,'' the spokesman said.

The ANC has long accused Mangope of being a puppet of the white minority government. Mangope is the only leader of the four apartheid- created ''independent'' territories - recognized as sovereign only by South Africa - who has refused to accept the ANC's counsel in affairs of state.

ANC Deputy President Nelson Mandela said Bophuthatswana is ''not a major ally of our struggle.''

The ANC also said South African police had detained up to five organizers of the Pretoria stayaway over the weekend, but police would not comment on the allegation.

The protest action, by tens of thousands of people, left the city's streets almost devoid of black shoppers, and businesses drafted white staff into jobs held by blacks.

''The response to the stayaway is almost 100 percent,'' said a stayaway organizer, Ronnie Momoepa.

A poll by the daily Pretoria News had businessmen and transport officials putting the stayaway figure in the ''tens of thousands.'' ''This is as good as a blanket demonstration ... there aren't blacks anywhere in town,'' store owner Harold van Rensburg said.

The ANC-affiliated United Democratic Front and Congress of South African Trade Unions organized the action last week to highlight ANC allegations of civil rights abuses and political intolerance of opposition in Bophuthatswana and to demand the territory's reincorporation into South Africa.

The stayaway was also called to protest against the cutoff of electricity to Pretoria's Atteridgeville, Zithobeni, and Bronkhorstspruit townships by authorities reacting to politically motivated non-payment of service dues.

Rioting sparked by the cutoffs left two people dead and 25 injured by late Saturday before Law and Order Minister Adriaan Vlok imposed emergency regulations giving police sweeping powers and a 9 p.m.-to-4 a.m. curfew on Atteridgeville and neighboring Saulsville.

Police said factional fighting Monday between two groups with guns and machetes killed five people in the black township of Katlehong east of Johannesburg, police said.

An unknown number of Zulus and Xhosas clashed in Katlehong's Zonkwezizwe squatter camp, Police Capt. Ida van Zweel said, noting two people were fatally shot and three hacked to death.

''This unrest started when one of the sides demanded the other take part in a rent boycott,'' van Zweel said. She said police reached the scene only after the battle ended but were patrolling the ''tense'' area in force.

#90316u0612 11/12/1990 ~United Press International

OVERLAND PARK, KS (NOV. 12) UPI - Fiesta Bowl officials have decided not to move their game out of Arizona, even though an NCAA committee authorized them to do so in order to diffuse the dispute that grew out of Arizona voters

rejecting creation of a Martin Luther King Jr holiday.

The game ''has become one of this nation's top football bowl games because of the support of Arizona and its people,'' Fiesta Bowl President Larry Gunning said in a news release. ''(It) has been an Arizona tradition for 20 years. Despite the challenges we've faced, we plan to invite the best teams available to us and attempt our game in Tempe.''

About 50,000 tickets had already been sold for the New Year's Day game, said Fiesta Bowl spokesman Brent DeRaad. Also, the game serves as a centerpiece for a 60-event, monthlong festival throughout the Phoenix area.

Tuesday, Arizona voters rejected two ballot measures initiating a state holiday honoring King, the slain civil rights leader. The National Football League is threatening to move its 1993 Super Bowl from Tempe because of the failure of the propositions.

Seventh-ranked Virginia, 8-1 and projected to win its remaining games against Maryland and Virginia Tech, was invited to play in the Fiesta Bowl after the Cavaliers beat North Carolina Saturday. But Virginia Athletic Director Jim Copeland said Sunday the Cavaliers would accept an invitation from the USF&G Sugar Bowl in New Orleans, should one be formally extended Nov. 24.

Sugar Bowl Executive Director Mickey Holmes said his committee will consider ''no one else'' to play against the Southeastern Conference champion, assuring Virginia's participation.

The Fiesta Bowl initially made the request to move its event Saturday to John Swofford, chairman of the postseason football committee and director of athletics at North Carolina. The committee responded after a Sunday telephone conference call.

A contingency plan was in place to move the Fiesta Bowl to San Diego, but Swofford said the postseason committee rejected the shift, saying, ''bringing in another bowl on top of an existing bowl was not at all fair to the existing bowl.'' The Holiday Bowl will be played Dec. 29 in San Diego.

Along with Arizona, New Hampshire and Montana are the only other states that do not have a holiday in King's memory.

#90316u0614 11/12/1990 ~United Press International

LONDON (NOV. 12) UPI - Stock prices were higher at midday Monday on the London International stock exchange.

The government reported retail sales in October fell 1.1 percent from September and were down 0.4 percent from a year earlier. Traders said the data

further fueled expectations of another base rate cut before the end of the year, boosting the market to its intraday high.

One dealer said the news was bad for retailers but good in terms of lowering inflation.

Traders said stock prices remained in positive territory in the wake of a strong showing on Wall Street Friday and a weaker crude oil price.

The blue-chip Financial Times 100-stock index, was up 8.8 points to 2049.4. The narrower top 30 industrial average was up 4.6 points to 1587.2.

Volume at midday was around 205.7 million shares.

Among the most widely traded stocks, Racal Electronics rose 12 cents to 96 cents after the company said it would spin off its 80 percent stake in Racal Telecom and its wholly owned Racal Chubb.

Amersham International, a health care and life science group, climbed 13 cents to $1.38 after announcing a clinical chemicals joint venture with Eastman Kodak Co.

Elsewhere, stock prices on the Frankfurt Stock Exchange rallied but closed well of their highs after a wave of late profit taking.

The closely watched German Stock Index closed at 1402.24, up 20.75 points from Friday's close of 1381.49.

#90316u0616 11/12/1990 ~United Press International

KAMPALA, UGANDA (NOV. 12) UPI - A six-man monitoring team whose task is to prevent rebels out of little east African Rwanda arrived in the country's northern neighbor Uganda, government newspaper New Vision reported Monday.

The team, led by an unnamed lieutenant colonel, met Ugandan counterparts at Kabale, 215 miles southwest of Kampala and discussed finding ways of preventing further floods of rebels, mainly deserters from the Ugandan army, from flowing into Rwanda.

An initial force of about 1,500 men stormed into the country Sep. 30, vowing to depose President Juvenal Habyarimana and drawing strong regional concern at Uganda's possible role in the invasion.

Since then Rwanda has claimed another 18,500 entered the country, but western observers say those figures are hugely exaggerated.

Ugandan President Yoweri Museveni has repeatedly denied any involvement,

despite the fact the Rwandese Patriotic Front, as the rebels called themselves was initially led by his former right-hand man, Maj. Gen Fred Rwigyema, and since Rwigyema's death by Museveni's half-brother, Salim Saleh.

Sunday, in an apparent effort to demonstrate his lack of involvement, Museveni fired all non-Ugandan members of his armed forces, thousands of whom were long-term Rwandese refugees in his country.

Increasingly tight border controls may be responsible for a reversal in rebel fortunes in the past two weeks.

At first thought to be vastly superior in experience and numbers to Rwanda's 4,000-man army, the rebels have been pushed in apparent disarray into northeastern and northwestern corners of the country and no longer control the main road from the Rwandese capital Kigali to Uganda.

#90316u0620 11/12/1990 ~United Press International

(NOV. 12) UPI - There are signs this winter may be warmer in Minneapolis, at least concerning the Timberwolves.

Just a year ago, the Timberwolves started their first season by winning only two of their first 13 games. Sunday night, Minnesota evened its record at 3-3 with a 108-81 decision over the winless Orlando Magic.

Tony Campbell scored 24 points to lead five Timberwolves in double figures. The victory capped a decent weekend for the Timberwolves, who routed the Charlotte Hornets Friday night by a franchise-record 29 points.

Minnesota lowered its NBA-leading defensive average to 91.3 points per game and forced Orlando, 0-6, into 19 turnovers.

''Defensively we were outstanding,'' Timberwolves Coach Bill Musselman said. ''Once we started hitting and got our defense going, we started playing extremely well.''

Pooh Richardson and Tyrone Corbin each scored 18 points, while Richardson added 12 assists for Minnesota. Otis Smith led Orlando with 22 points.

Minnesota led 45-40 at halftime and broke open a close game with runs of 12-3 late in the third quarter and 18-7 to start the fourth quarter.

''We've been playing decently the first five games but we just couldn't get over the hump,'' said Orlando Coach Matt Guokas said. ''But this second half (outscored 63-41) was by far our poorest of the season.''

Minnesota was scheduled to play eight of its next 10 games on the road. Last

year it had a 5-36 record away from home.

''It's extremely hard to win on the road with an inexperienced team, especially one that's thrown together like an expansion team,'' Corbin said. ''I think we know better what it takes this year to win on the road in concentrating more and eliminating mistakes.''

In other NBA games, Houston downed Utah 110-90, Portland routed the Los Angeles Clippers 138-107 and New York defeated the Los Angleles Lakers 109-103.

-- AROUND THE NBA --

Rockets 110, Jazz 90

At Houston, Akeem Olajuwon scored 31 points and collected 21 rebounds and Kenny Smith added 15 points and seven assists, leading Houston over Utah. The score was tied 75-75 with 11:04 left but the Rockets went on a 29-11 run over the final 8:04. Darrell Griffith, who scored his 12,000th career point in the game, paced the Jazz with 24 points.

Trail Blazers 138, Clippers 107

At Portland, Ore., Clyde Drexler scored 23 points and Kevin Duckworth added 22 to help 5-0 Portland remain the NBA's only undefeated team. The Trail Blazers have won 29 straight home games over the Clippers. A 19-6 spurt gave Portland a 69-42 halftime edge, and Coach Rick Adelman went to his bench down the stretch. Charles Smith led Los Angeles with 21 points.

New York 109, Lakers 103

At Inglewood, Calif., Kiki Vandeweghe scored 10 of his 22 points in the last 5:19 to spur New York. Vandeweghe's 6-foot hook shot gave the Knicks a 100-99 edge with 3:01 remaining and the Lakers never led again. New York outscored its host 11-4 in the final four minutes. Patrick Ewing led the Knicks with 27 points and 14 rebounds. The Lakers' Magic Johnson scored his first triple-double of the year with 24 points, 15 rebounds and 14 assists.

MEXICO CITY (NOV. 12) UPI - The government has announced an 18-percent increase in the daily minimum wage to $4.13, a slowing of the devaluation of the peso against the dollar and increases in fuel prices.

The actions, unveiled Sunday, are part of a continuing pact between labor, the private sector and the government.

Under the fifth stage of the Pact for Economic Stabilization and Growth - which will be in effect until December 1991 - the gradual devaluation of the peso against the dollar will be reduced from 80 centavos to 40 centavos a day. The current exchange rate is about 2,900 pesos to the dollar.

The minimum wage, currently $3.50 a day, will be increased Nov. 16. A revision will take place in January, although a further increase is unlikely.

At the same time, gasoline will rise 20 percent to 90 cents a gallon from 75 cents for regular, and jump 11.5 percent to $1.27 from $1.14 for unleaded.

The government also announced a 10-percent increase in the price of electricity and domestic gas, and said it would continue to subsidize beans, milk and maize.

Income tax on people earning less than four times the minimum wage would be reduced as much as 40 percent in 1991, the government said.

Labor leaders presented a study of the past eight years, noting a serious deterioration in worker purchasing power, and adding neither the government nor the private sector have been able to create the 1 million new jobs needed each year to satisfy growing demand.

Of 28 million ''economically active'' people in Mexico, 10 million are either unemployed or underemployed and receive no social benefits, the study said.

#90316u0640 11/12/1990 ~United Press International

PITTSBURGH (NOV. 12) UPI - A bacterial or viral infection of the heart may have caused the death of Stormie Jones, the plucky young Texan who captured the hearts of millions when she underwent the world's first heart-liver transplant.

Stormie, 13, of White Settlement, Texas, died at Sunday 9:52 a.m. at Pittsburgh Children's Hospital, six years after the landmark heart-liver operation. Her death shocked the hospital staff and patients, who mourned the loss of a friend.

The mood at Children's Hospital was solemn as word of Stormie's death spread. "We were all very shocked," said hospital spokeswoman Sue Cardillo. "It's hard for us to know that the fight is over." Preliminary autopsy results were inconclusive Monday and final findings were not expected for several weeks, doctors said.

One of the girl's physicians, Dr. Jorge Reyes, said doctors suspect a virus or infection weakened her heart. The heart problem was unexpected and developed with unusual rapidity, he said. "Any transplant patient who is receiving immuno-suppression is susceptible to infections," Reyes said.

Stormie, who was being treated with the powerful anti-rejection drug FK-506, had felt ill for several days. She complained of fever and flu-like symptoms and physicians suspected she might be suffering a rejection episode or a flare-up of hepatitis, Reyes said.

But Reyes said he had no reason to believe the heart failure was related

specifically to the use of FK-506, emphasizing the risk of infection associated with the use of any immunosuppressive drug.

Reyes said Stormie's heart stopped beating while she was resting. The swiftness of her death shocked medical officials. "She contributed as much to us as we did to her," said Reyes, citing medical knowledge gained from the case. He said Stormie served as a role model for other young transplant patients.

The freckle-faced girl was admitted Saturday morning to All Saints Episcopal Hospital in Fort Worth, Texas, after experiencing nausea, vomiting, and dehydration. Doctors recommended that Stormie and her mother, Lois "Susie" Purcell, return to Pittsburgh for evaluation. Stormie's mother reportedly was staying with friends at an undisclosed location Monday. Funeral arrangements remained incomplete.

The child captured the hearts of people nationwide because of her persistent spunk in dealing with her health problems. She underwent the history-making heart-liver transplant Feb. 14, 1984, and underwent a second liver transplant earlier this year after hepatitis caused her first donor liver to fail.

Stormie's greatest desire was to be an "average" teenager said her best friend in her hometown, Crystal Millikan, 13. "She wished everybody would treat her normal instead of like she had an operation because she didn't like everybody asking her how she felt or if she was feeling OK," Crystal said.

Crystal said Stormie recently gave her a poster she had drawn with a bear and jack-in-the-box with the caption "Friends are friends forever." When Stormie handed over the poster, she said, "Don't forget me."

#90316u0647 11/12/1990 ~United Press International

MANILA, PHILIPPINES (NOV. 12) UPI - Panicky motorists lined up at gasoline stations Monday amid rumors of a shortage of gasoline, triggering massive traffic jams.

Philippine officials assured that the country has an adequate supply of gasoline but failed to stem the long lines of motorists at gasoline pumps.

Rumors of a gasoline shortage swept the capital over the weekend after the government ordered oil companies to cut by 10 percent petroleum allocation to conserve gasoline and directed pump owners to reduce operating hours.

Senator Orlando Mercado blamed the government for the panic buying.

''They started out with announcements saying there's nothing to fear, we have all the supply. Then the president announced there's going to be an inventory

of cars,'' said Mercado.

Officials Monday issued new guidelines extending operating hours and directed police to enforce orders prohibiting hoarding of gasoline.

The Philippines depends on imports for its petroleum needs, but a lack of foreign exchange because of a slack in merchandise trade and the need to service a $26 billion foreign debt was limiting Manila's ability to buy oil.

Oil prices have gone up since the Iraqi invasion of Kuwait Aug. 2, causing political and economic problems for President Corazon Aquino, who has survived seven military rebellions.

#90316u0712 11/12/1990 ~United Press International

(NOV. 12) UPI - There was a mix of ancient tradition and modern protests today in Tokyo. In a 26-hundred year old ceremony, Akihito was installed as Japan's 125th Emperor. Leftist radicals claimed credit for fires at Shinto shrines, train or subway stations and in office buildings hours before the ceremony. Missiles were fired at Japanese and U-S bases, but NO injuries or damage was reported. And police clashed with an estimated two thousand demonstrators, arresting at least six.

A Chinese envoy reportedly said before a meeting with Iraqi President Saddam Hussein today that China supports a proposed emergency Arab summit that Iraq has all but rejected. Cairo radio reports that Chinese Foreign Minister Qian Qichen says his government is seeking a peaceful settlement Persian Gulf crisis.

A statement released by Pittsburgh Children's Hospital says ''the world has lost a treasured friend'' with the death yesterday of 13-year old Stormie Jones. The girl from Texas captured the hearts of Millions when she underwent the world's first heart-liver transplant in 1984. She died after suffering what doctors said might have been a heart infection.

The Christian Lebanese Forces militia pulled heavy arms from east Beirut to main strongholds north of the city today, preparing to dissolve its military presence in the region. The pullout of heavy arms signaled the militia's willingness to go along with a government plan to eliminate all armed militia in and around Beirut.

The first of two secret military missions is believed to be set for tonight from the Cape Canaveral Air Force Station. A Titan 4 rocket believed carrying a spy satellite was scheduled to take off tonight. The countdown for the Thursday launch of the shuttle Atlantis began last night. It's believed that Atlantis will put a military satellite into orbit.

The Northeast was hit by high winds, rain and snow overnight. Gusts as high as 55 miles an hour downed trees in western Massachusetts. Block Island, Rhode island, reported gusts to 69 miles an hour. As much as four inches of snow was expected in Eastern New York.

Officials have ordered Filipinos in the eastern coastal region to prepare for the most powerful typhoon to strike the Philippines in nine years. The Manila weather bureau says super Typhoon Mike has winds as high as 175 miles an hour. Mike was expected to strike the central Philippines tomorrow and blast metropolitan Manila on Wednesday.

The African National Congress is backing a boycott of jobs and businesses in Pretoria today. The protest action by tens of thousands of people left the city's streets almost empty of black shoppers. Businesses drafted white staff into jobs held by blacks. .

South African police say factional fighting between two groups armed with firearms and machetes killed five people in a black township east of Johannesburg today.

#90316u0717 11/12/1990 ~United Press International

ROME (NOV. 12) UPI - Prime Minister Giulio Andreotti left for New York and Washington at the head of a delegation Monday to start what is billed as a new phase in U.S.-European relations.

Italy currently holds the rotating six-month presidency of the 12- nation European Community and Andreotti was making the two-day visit in his capacity as EC president. Jacques Delors, French president of the EC Executive Commission, and Italian Foreign Minister Gianni De Michelis will join Andreotti in the talks in Washington.

The meeting between the European leaders and President Bush was scheduled for Tuesday and the talks will be followed by a dinner at the State Department hosted by Secretary of State James Baker.

Andreotti will meet U.N. Secretary-General Javier Perez De Cuellar late Monday. While in New York he will also meet a delegation from the ''Order of the Sons of Italy'' and will inaugurate an ''Italian House'' at New York University.

The Washington talks were to be the first of a series of regular U.S.-EC encounters planned several months ago to guide what Italian officials called a ''new phase'' in relations between the United States and the rapidly evolving European Community.

On Tuesday Bush and Andreotti will sign a ''Transatlantic Declaration''

setting the framework for future cooperation.

Bush and the Europeans will also take the occasion to review the situation in the gulf, and discuss the prospects for achieving a successful conclusion of the Uruguayan Round of negotiations by the General Agreement on Tariffs and Trade.

#90316u0757 11/12/1990 ~United Press International

HOUSTON (NOV. 12) UPI - The number of rotary rigs working in the United States fell last week but more rigs worked in the Gulf of Mexico, raising the offshore rig utilization rate above 70 percent for the first time since early June, industry monitors reported Monday.

Baker Hughes Inc. reported a total of 1,124 rotary rigs worked in the nation last week compared with 1,144 the week before and 1,045 the same week a year ago.

Eight more mobile offshore rigs went to work in the Gulf last week, boosting the utilization rate there to 70.4 percent with 150 rigs working out of a fleet of 213.

Offshore Data Services said the figures might signal a long-awaited upturn in offshore exploration for the Gulf, said Tom Marsh, drilling editor for Offshore Data.

That increase in Gulf waters also boosted worldwide offshore rig utilization to the highest level since January 1986, he said. A total of 557 rigs worked worldwide out of a total fleet of 670 for a utilization rate of 83.1 percent.

Activity was unchanged in European waters where 126 rigs were working out of a fleet of 137 for a utilization rate of 92 percent.

The utilization rate is an important indicator of offshore drilling activity because it influences the rental rates paid to rig owners by oil companies.

Other relevant rig counts included Louisiana, 164 last week, 156 the week before and 151 the same week a year ago; New Mexico, 68, 69 and 54: Oklahoma, 127, 143 and 129; Texas, 401, 398 and 321; and Canada, 153, 147 and 159.

#90316u0792 11/12/1990 ~United Press International

WHITE SETTLEMENT, TX (NOV. 12) UPI - Saddened friends remembered Stormie Jones not as a medical pioneer but as a shy, 13-year-old girl who wanted a normal life more than anything else.

Neighbors described Stormie as a quiet, active girl who liked to spend time with friends. They say she hated the attention she had received in the six years since she became the world's first heart-liver transplant patient.

"She wished everybody would treat her normal instead of like she had an operation because she didn't like everybody asking her how she felt or if she was feeling OK," said Crystal Millikan, 13, who was Stormie's best friend.

The mood was somber in White Settlement, a Fort Worth suburb, after Stormie died Sunday at a Pittsburgh hospital. Neighbors were stunned as news of her death spread slowly through the apartment complex where she and her family lived.

Neighbor Josie Bortez said her son saw the news flash across the television and telephoned her. "He said 'Stormie's dead.' I couldn't believe it," said Bortez, who lives a few apartments from Stormie's family. "I told him it couldn't be true because Stormie wasn't sick. I had just saw her playing outside the other day."

Friends say animals were Stormie's greatest love. Stormie, who wanted to become a veterinarian, bought a pet rabbit in May and taught it tricks. Shopping was another of her hobbies and she had planned a spree for Saturday. But plans changed when Stormie complained of flu-like symptoms on Friday and asked to go to the hospital.

Teacher Fay Presswood said Stormie was feeling ill when he took lessons to the apartment on Friday. "Stormie was very philosophical and many times she said she wasn't afraid to die but Friday I got the feeling that she was scared about something," Presswood said. "She didn't say much but I got the feeling she wasn't feeling well and she was tired of being sick. I think she knew things we didn't know."

#90316u0801 11/12/1990 ~United Press International

BONN (NOV. 12) UPI - Two days after a controversial trip to Baghdad, former German Chancellor Willy Brandt urged the international community Monday not to abandon efforts to negotiate an end to the Persian Gulf crisis.

Brandt, who returned Friday from a five-day trip to Baghdad with about 200 released hostages, said he gained the impression in two meetings with President Saddam Hussein that the Iraqi leader was interested in a non-military solution to the stalemate.

''It is not true that the Iraqi leadership is not interested in a peace order in the Middle East - the contrary is correct,'' Brandt told a news conference.

But he said time is pressing and that Saddam does not intend ''to let the gulf

conflict smoulder until there will be a breakthrough in a Middle Eastern peace order.''

The crisis was triggered Aug. 2 when Iraq invaded and later annexed Kuwait, prompting a rapid, massive troop deployment on the Iraqi border by the United States and its allies.

Brandt said he regretted Saddam's rejection of a proposed Arab summit meeting on the issue but welcomed the prospect of a new political forum in the Middle East modelled after the Conference on Security and Cooperation in Europe.

''In case a military confrontation can still be avoided, several tracks can be taken to push ahead a Middle Eastern peace order and a preceding security conference,'' Brandt said.

Brandt, honorary chairman of the Social Democratic Party and president of the Socialist International, said ''efforts for a non- military solution to the gulf crisis should not be abandoned, but should be strengthened.''

''My talks in Baghdad convinced me even more of that,'' he said.

The British and U.S. governments sharply condemned Brandt's trip, claiming that such individual intitiatives helped Saddam improve his international image.

But Brandt rejected such claims and said he never felt he was being used for propaganda purposes.

In defending his trip, Brandt said each hostage freed after being held in Iraq and Kuwait since the invasion made such efforts worthwhile.

About 140 Germans and 60 other foreign nationals returned from Baghdad with Brandt last Friday. Another 200 Germans and thousands of other foreigners are still in Iraq and Kuwait.

Chancellor Helmut Kohl's government, under growing public pressure to achieve the release of the German hostages, did not endorse Brandt's trip but welcomed the hostages he brought back.

#90316u0806 11/12/1990 ~United Press International

MANILA, PHILIPPINES (NOV. 12) UPI - Typhoon Mike, which would be the most powerful storm to hit the Philippines in nine years, swept closer to the islands Monday, causing flooding, closing schools and suspending some air traffic.

The so-called ''super typhoon'' was expected to strike the central Philippines

Tuesday and cause destruction, with its 150 mph winds possibly whipping up tidal waves.

Mike would be the 14th typhoon to hit the Philippines this year. The Manila weather bureau said the storm was in the Pacific Ocean 180 miles east of Samar Monday evening.

The bureau said Mike had sustained winds of 150 mph, gusting up to 175 mph. It was traveling west-northwest at 15 mph.

Weathermen said if the typhoon sticks to its present course, it will strike the coconut- and rice-producing islands of Samar, Masbate, Panay, and Mindoro in the central Philippines.

Authorities expect that on Wednesday Mike will blast the southern section of the northern island of Luzon, where metropolitan Manila and its 8 million residents are located. The capital city was placed on alert.

The U.S. military facilities in the Philippines are located in northern Luzon. Authorities issued storm warnings but the bases are not expected to be hit by Mike.

Forecasters say the typhoon will exit into the South China Sea after sweeping Manila.

Residents on Leyte island and the eastern sections of nearby Samar island were warned to batten down for possible tidal waves. Both islands front the Pacific.

The military office of civil defense said heavy rains caused flooding Monday in Cebu, the country's third largest city, 350 miles south of Manila. There were no immediate reports of damage or casualties.

Defense Secretary Fidel Ramos, chairman of the National Disaster Control Center, alerted military authorities and relief agencies for immediate action in the face of expected destruction.

Authorities suspended classes at schools in areas along the path of the typhoon. Philippine Airlines suspended flights to central Philippines Monday and said the suspension will remain in effect Tuesday. Domestic shipping services were also suspended.

Mike would be the most powerful typhoon to hit the Philippines since Irma killed 470 people in November 1981 with peak winds of 160 mph.

News reports said Mike caused considerable damage over the weekend to Palau, a group of islands 500 miles east of the southern Philippines.

The typhoon is expected to weaken slightly as it sweeps through the

mountainous central regions of the Philippines, said Ellaquim Adug, chief of Manila's weather bureau.

An average of 20 storms strike the Philippines annually. The super typhoon follows a series of natural calamities that has plagued the nation of islands in 1990, and taken a toll on President Corazon Aquino's government.

The disasters started with a drought, monsoon floods and an earthquake in July that killed more than 1,600 people and devastated wide areas of the northern Philippines.

#90316u0807 11/12/1990 ~United Press International

(NOV. 12) UPI - A new emperor ascended to the throne today in Tokyo. In a ceremony taken from ancient traditions, Akihito proclaimed himself Japan's 125th emperor, then rode through the streets to the cheers of thousands. Akihito pledged to pursue peace and to honor Japan's postwar constitution. Vice President Quayle was among the 158 foreign dignitaries who attended the ceremony.

The Palestine Liberation Organization has given its approval to a last-ditch Arab summit to try and find a peaceful solution to the crisis in the Persian Gulf. The summit was proposed by King Hassan of Morocco. A P-L-O spokesman said in Tunis ''the Arab nation is capable of overcoming the crisis, as it has others.'' .

In an interview published in a Cairo weekly newspaper today, Egyptian President Hosni Mubarak said that Egypt would NOT be involved in any military strike against Baghdad. Mubarek was quoted as saying Egypt ''will NOT enter Iraq under any circumstances.'' Mubarak has dispatched more than 15-thousand Egyptian troops to Saudi Arabia to serve in the U-S-led multi-national force.

A transportation strike is paralyzing life in much of Pakistan today, presenting the new government of Prime Minister Nawaz Sharif with its first crisis. The strike was called to protest an Islamic law that says drivers must pay the equivalent of 77-hundred dollars to the families of anyone they kill in a highway accident. The strike has closed schools, government offices, banks and private businesses.

Motorists in Manila lined up at gas stations today because of rumors of a shortage of gasoline. Rumors of a gasoline shortage swept the Philippine capital during the weekend after the government issued fuel conservation orders to oil companies and pump owners. Government assurances of adequate gasoline supply failed to stop the long lines of motorists at gasoline pumps.

Last-minute contributions from film director Oliver Stone and rock musician Don Henley have enabled the Texas Theatre Society to take possession of the

theater in Dallas where Lee Harvey Oswald took refuge after killing President Kennedy. The Society announced that Henley and Stone had each given more than 10-thousand dollars to save the theatre from the wrecker's ball. Stone's film ''Born on the Fourth of July'' was filmed nearby... and Henley filmed a portion of a music video inside the theater.

A storm that dumped as much as seven inches of snow in some northern sections of New England created hazardous icy highway conditions this morning. Numerous accidents were reported as trucks and cars spun on the slick highways. High winds and low temperatures knocked out power in many areas, including western Massachusetts, Cape Cod, and Rhode Island. Two weather-related fatalities were reported in Maine during the weekend.

NEW YORK (NOV. 12) UPI - Coinquote prices were unavailable Monday due to the Veteran's Day holiday.

-30- 246

#90316u0876 11/12/1990 ~United Press International

CAIRO (NOV. 12) UPI - President Hosni Mubarak would not send Egyptian troops to Iraq to keep the peace after a U.S.-led invasion but would send them to Kuwait after the oil-rich emirate is liberated, it was reported Monday.

In a newspaper interview published Monday, the Egyptian leader also suggested that Iraqi President Saddam Hassan's generals are not telling their leader the truth about the size of the military force confronting him.

Mubarak, a strong supporter of the U.S-led military build-up - approaching a half-million men under arms - in the Persian Gulf area since the Aug. 2 Iraqi invasion of Kuwait, was reacting to a question on whether he would send Egyptian troops to maintain stability in Iraq if the United States invaded.

''We have no wish to fight Iraqi troops inside Iraq, but to enter Kuwait as a peace-keeping force (after allied action) ... we have no objection to that, because this is a natural thing,'' Mubarak told the Monday edition of Mayo, the weekly spokesman for Egypt's ruling National Democratic Party.

''I fear that Saddam has not yet realized the size of the Western troops rallied against him in the gulf and the sophistication of their weaponry ... Saddam appears to be a victim of those who surround him,'' Mubarak was quoted as saying.

Egypt is among three Arab countries that have sent troops to serve with the Western-led forces deployed to counter Iraqi aggression, with up to 20,000 troops near the Saudi-Iraqi frontier. The other two Arab countries are Syria

and Morocco.

Mubarak said he is ready to mediate between the Iraqi president and the United States and other Western countries if asked to do so, provided that Saddam announce he is ready to withdraw from Kuwait.

''I will completely forget Baghdad's insults and I will be ready to do whatever I can, secretely or publicly, whether this requires shuttling between various capitals or anything else,'' Mubarak was quoted as saying.

Mubarak said if Saddam announced his readiness to pull Iraqi troops out of Kuwait, nobody would attack him.

''Provided the withdrawal from Kuwait is completed, that will be enough ... (Saddam) has the right to ask that nobody attack him, and we hope he will (propose this) .... He should not feel shy about such a move because millions who don't want war and destruction will applaud him,'' he said.

''On the other hand, he should feel shame if he decides to withdraw from Kuwait after years of war and millions of dead and wounded,'' Mubarak said.

The Egyptian leader reiterated his appeal that Saddam consider the consequences of his actions in the emirate.

''The situation is very serious ... the entire world is against Saddam, but I believe he is not hearing all the facts, so he has no logical evaluation of the situation.

''I only see blood, destruction, starvation, tears and the collapse of everything as we know it - materially, socially, politically and economically '' the Egyptian leader warned.

The Egyptian leader also said Cairo is mediating between Syria on the one hand and Britain and the United States on the other.

London snapped ties with Damascus five years ago after accusing Syrian intelligence of plotting to bomb an Israeli airliner in London. The United States did not break relations over the incident but did remove its ambassador.

Egypt restored diplomatic ties with Syria late last year and has asked Western states such as Britain to reconsider restoring ties with Syrian President Hafez Assad. Assad's aides have indicated such a move from London, which has already restored ties with Iran, could help the fate of British hostages held captive in Lebanon.

#90316u0936 11/12/1990 ~United Press International

(NOV. 12) UPI - Icy roads, blustery winds that gusted to 60 mph and as much as 18 inches of overnight snow plagued New England Monday while skies remained fair across the nation's midsection and most of the West Coast.

Gusts up to 55 mph downed trees in western Massachusetts, and Block Island, R.I., reported gusts to 69 mph, the National Weather Service said. A high-wind warning was posted overnight in northern New Jersey and southern New York.

In Vermont, state police said a disabled tractor-trailer rig blocked Interstate 89 north near Richmond and another was across Route 7 in Charlotte. Eighteen inches of snow fell in Lowell, Vt., and 2 feet were reported outside Newport, Vt.

Highway crews trying to put sand on roads had to battle ice and blowing snow. A number of power outages were reported in Massachusetts, including parts of western Massachusetts, New Bedford, and Cape Cod.

Two Fall River men missing since Sunday in stormy Cape Cod bay were located early Monday after their disabled boat washed ashore on the Cape near Truro. They were taken to Cape Cod Hospital but their conditions were not immediately available, the Coast Guard said.

Light rain and snow falling over southern New York and parts of New Jersey and Connecticut dissipated during the early morning hours, the NWS said. A winter weather advisory was posted overnight for the western Mohawk Valley and the western Adirondacks of New York. Lake-effect snow powdered the region, which already was whitened by several inches of snow.

Eastern New Yorkers were given an early taste of winter. Snow and snow squalls blowing off Lake Ontario were expected to leave accumulations of two to four inches, with more snow possible late Monday and Tuesday.

Morning readings in the Midwest dropped to 36 in Chicago, 32 in Minneapolis and 20 in Bismarck, N.D. Skies were fair across most of the Midwest and the southern Plains, where temperatures ranged in the 40s and 50s.

On the West Coast, early morning fog crept over Portland, Ore., where the temperature fell to 44 degrees, and Los Angeles dropped to 66 under partly cloudy skies. Salt Lake City slipped to 36 under fair skies.

EASTERN SAUDI ARABIA (NOV. 12) UPI - Lt. Col. Bill Chamberlain and his driver were scouting the area near their desert camp when they rolled into a village and suddenly found themselves surrounded by two dozen curious children.

The youngsters, saying ''American'' and flashing peace signs with their fingers, climbed into the vehicle and spotted a can filled with ink pens. Chamberlain said they began to point at his pockets saying, ''pens, pens.''

''We gave them a packet of ... candies that came out of C-rations. They didn't want it. They wanted pens,'' he said. ''They took every marker I had, every highlighter I had, every pencil, every crayon, everything. We had 25. They took every one of them.''

Three months after American GIs began flooding into Saudi Arabia as part of the multi-national force confronting Iraq, such intimate contacts between U.S. soldiers and Saudi civilians are still unusual.

Most soldiers are deployed where they rarely come into contact with civilians. Visits to town are infrequent, partly because U.S. military officials

understand the need to protect the Saudis' jealously guarded sense of privacy.

But despite the veils, the compound walls and the physical separation, the GIs and the civilians are beginning to get a glimpse of one another and the Americans are doing their best to avoid offending Saudi sensibilities.

Soldiers have been told to be unfailingly polite and not to sit with the soles of their shoes towards anyone's face - points of Arab etiquette - and to avoid flaunting their religion in the country, which is home to the two holiest sites in Islam.

Women soldiers on business in the cities often wear civilian clothes rather than uniforms and those off duty sometimes cover themselves with the black abayas, or shrouds, worn by Saudi women.

''The list is a mile long,'' said Marine Cpl. Charles Lavoie, 22, of Boston. ''When they're praying and they come over the loudspeakers, you can't mimic it you can't do anything like that. And there's certain words you can't say ... 'Dude.' You can't say 'dude' because it reminds them of a worm and that's like an insult.

''Alcohol, pornography, all that's out,'' he said. ''Everybody knows that.''

''We've got these scarves that come with the desert cammies (camouflage uniforms),'' said Marine Cpl. Paul Buda, 23, of Milford, Conn. ''They call them do-rags. You just throw them on your head. And you can't wear those because they might think we were immitating their headdresses.''

''The most important thing we have to watch is the difference in religion,'' said Marine Cpl. Todd Mahoney, 21, of Powers, Mich. "We wear crosses and stuff. If you're from the Catholic religion or any other religion and you have a little pendant or something, you have to make sure you keep it under your shirt.''

Women soldiers have to be aware of even more rules of social behavior. Saudi women are not allowed to drive, for example, and their clothing must cover most of their arms and legs. Special police enforce the rules in the cities.

Some military officials believe the best way to avoid any misunderstandings is to have the women in their units follow Saudi custom when they visit cities for sightseeing or window-shopping at the malls.

''I require them to wear abayas,'' said Col. Tom Bliss, the deployed wing commander of AWACS reconnaissance aircraft. ''This is not the standard thing. They tell them to dress conservatively. But I require them to wear the abayas.

''I think it solves problems,'' he said. ''It's a more conservative approach, but I think it's appropriate.''

1st Lt. Lisa Ornoski, a purchaser for the 197th Infantry, visits the city frequently on official business to buy everything from minor vehicle parts to truckloads of concrete. She takes a male driver and wears civilian clothes.

''I'm not sure they're used to seeing females walking around in uniform with guns and gas masks,'' Ornoski said. ''It just makes it a little bit easier to deal with people ... so we don't stick out like sore thumbs.''

She said the only time she was ever treated unusually was when she went to purchase truck parts.

''The security guard sitting there, he didn't really know how to react to a female coming into the store and he asked me to sit in the corner,'' Ornoski said. ''But once he realized I was there on business and to buy something, there was no problem. People are actually very helpful.''

She said she had to get used to the slow pace of business in the Arab world, where it is polite to drink tea and talk a while before settling down to negotiations.

''By the time you go to three or four establishments, you're drinking at least 10 cups of tea. You have to talk to them,'' she said. ''They want to get to know you as people, not just customers.''

Other women soldiers said their interaction with Saudi civilians, both men and women, had been positive and sometimes enthusiastic, with people often shouting greetings from passing cars.

''The contacts that I have had, they've been warm and favorable,'' said Capt. Judy Scroggins, of Dayton, Ohio. ''They look kind of shocked when they see you. When they notice you're a female they kind of do a double-take. But they seem like they're impressed and they're happy to see us in these roles.''

DETROIT (NOV. 12) UPI - Saturn Corp. has ambitious plans to offer ten models by 1994 and build a company that it says is truly independent of parent General Motors Corp., Automotive News reported in Monday's edition.

Saturn already is looking beyond its three initial offerings and aims to add at least two vehicles in each of the next three model years, according to the trade industry publication.

The seven additional models scheduled to reach full production by 1994 include luxury-sport versions of the existing sedan and a convertible, two station wagons and a pair of two-door hatchbacks. There also are tentative plans for light trucks and a second assembly plant by the mid-1990s, Automotive News said.

"They (Saturn executives) said they wanted to give us a minivan and a small pickup, but they said they couldn't do that before 1996 because they'd need to build another plant," said a Saturn dealership official who did not want to be identified.

Special luxury versions of the twin-cam sedan (SL2) and 2+2 debut at the beginning of the 1992 model year. Those vehicles will have leather interiors, sportier exterior treatment, including new aluminum wheels and small rear spoiler, and standard anti-lock brakes. Saturn plans to build about 7,800 of the luxury-sport sedans and about 10,000 of the comparable 2+2 in the 1992 model year.

A convertible based on the current 2+2 is scheduled to debut midway in the 1992 model year, with pilot production due to begin next October and full production was slated for January 1992. Production of just under 5,000 convertibles is planned during the 1992 model year.

Automotive News said that total production at the new Saturn plant in Spring Hill, Tenn., is scheduled to reach 240,000 in the 1992 model year, up from the 99,000 targeted for this year.

Total production at the Spring Hill plant is scheduled to reach 303,000 in the 1993 model year and 360,000 in 1994 through 1996. At that point, Saturn would be forced to expand capacity - by enlarging the plant or building a second facility - if it wanted to increase output further or add models, the trade paper said.

#90316u1017 11/12/1990 ~United Press International
MOSCOW (NOV. 12) UPI - Mikhail Gorbachev and Boris Yeltsin have set up two panels to decide how to divide oil, gold and other natural resources between the central government and the Russian Federation, Yeltsin said Monday.

Yeltsin, briefing deputies on his two-hour meeting with Gorbachev on Sunday, said he assured the Soviet president that he is not trying to break up the Soviet Union through his aggressive leadership of the dominant republic.

''We are for a strong union and a (new) union treaty,'' Yeltsin told members of a Russian Parliament commission that is writing a new constitution for the giant federation.

Yeltsin said that he and Gorbachev had agreed to set up two working groups, with one panel to address the division of property between the central and Russian government and the other to deal with the distribution of powers.

The meeting was the latest twist in the topsy-turvy relationship between Gorbachev and Yeltsin, which has swung in recent months between extremes of bitter rivalry and amiable partnership.

The two leaders set up a joint panel in August to develop a plan to move the country to a market economy based on Yeltsin's 500-day program, but Gorbachev later opted for a more moderate approach, prompting accusations of betrayal from Yeltsin.

Yeltsin said the meeting Sunday, also attended by Soviet Premier Nikolai Ryzhkov and Russian Vice President Ruslan Khasbulatov, featured businesslike ''low-key'' discussion.

The meeting marked the second time in a week that Gorbachev and Yeltsin sought to present a united front. The two men led a column of people Wednesday in a march across Red Square on Revolution Day.

The two groups, made up of representatives of the Soviet and Russian governments, were charged with creating a document to be the basis for an accord in which the republics would voluntarily enter a reconstituted federation.

Gorbachev wants the new ''union treaty'' to replace the 1922 agreement that formally created the Soviet Union, binding the republics together as the renamed ''Union of Sovereign Socialist Republics.''

The secession-bent Baltic republics, which declared independence earlier this year, have said they want no part of a new pact tying them to Moscow and the rest of the Soviet Union.

The establishment of two working panels appeared to be a victory for Yeltsin, who said that Russian leaders have resisted pressure from the central government to sign the union treaty first and work out details such as the distribution of property and resources later.

The Russian legislature passed a declaration of sovereignty in June, two weeks after it chose Yeltsin as the republic's effective president.

Deputies subsequently approved measures asserting Russia's control over the vast amount of natural resources on its territory, but the Soviet government ignored the defiant resolutions in selling $1 billion worth of gold to a South African company.

JERUSALEM (NOV. 12) UPI - Israel said Monday it would receive U.N. envoy Jean Claude Aimee, but not under the auspices of a U.N. Security Council resolution condeming Israel for the Temple Mount riots.

There was no immediate reaction from United Nations or the United States to

the compromise offer, which Israeli officials hoped would end the diplomatic row over Israel's refusal to cooperate with a U.N. delegation mandated by Resolution 672.

Foreign Minister David Levy gave details of the agreement to the Parliament's Foreign Affairs and Defense Committee, Army Radio reported. Under the compromise Israel would cooperate with Aimee as he investigated the situation of the Palestinians in the territories. No connection would be made between his visit and the U.N. resolution on the Temple Mount riots.

Levy said there was ''no decision or policy of the Israeli government to break with the United Nations or reject a dialogue with the U.N. secretary-general or his representative.''

Israeli officials said there were no conditions attached to the proposal, but expressed hope that the United States would work to remove the issue of the Temple Mount riots from the Security Council's agenda.

The Council condemned Israel's handling of the Oct. 8 riots on the Temple Mount during which at least 17 Palestinians were killed by police outside the Al Aqsa Mosque, the third holiest site in Islam.

Israel called the resolution one-sided and said a mission to investigate the circumstances of the riots and make recommendations would infringe on Israeli sovereignty over Jerusalem.

''It is obvious that Israel rejected the Security Council resolution and rejects it today as well and will not receive any envoy on the basis of that decision,'' Levy told Army Radio. ''I hope ... we will reach an understanding and an agreement (with the United States), but nothing is in the pocket yet.''

Israel's refusal to cooperate with U.N. mission has strained ties with the United States by diverting attention from the Persian Gulf crisis.

Under the compromise proposal, Aimee's visit would be a continuation of his trip last May, which followed the killing of seven Arab workers by an Israeli. Aimee has visited Israel many times and is not viewed as hostile.

Levy told the closed committee meeting that talks had been held with the United States for the last 10 days to avert a negative decision against Israel by the Security Council, Israel Radio reported.

LONDON (NOV. 12) UPI - Iraq ordered a British diplomat Monday to leave Baghdad within 10 days for using ''inappropriate language'' to demonstrators outside the British mission, prompting London to retaliate by expelling an

Iraqi diplomat, officials said.

It was the first round of diplomatic expulsions since mid-September when London and Baghdad both expelled each other's military attaches in actions linked to Britain's objections over the entry of Iraqi troops into British diplomatic territory in Kuwait.

Iraqi officials said James Tensley, the second secretary at London's mission in Baghdad, was ordered to leave within 10 days for using ''inappropriate language while talking to demonstrators.''

An official at the British Foreign Office said he did not know what Tensley said to the protestors - who he said were frequently outside the British Embassy - but believed he was probably just reiterating Britain's diplomatic position.

''We suspect he has been saying what we have been saying: that Saddam Hussein has to get out of Kuwait, that he has to follow the (U.N.) Security Council resolutions,'' he said. ''It is Tensley's job to be putting forward the case, on why Saddam Hussein's men are a bunch of crooks, that they are so callous.''

The official said Wajdi Mardan, the Iraqi second secretary, was ordered to leave Britain within 10 days.

''(Tensley's explusion) was totally unjustified,'' he said. ''In response we have decided to declare (Mardan) persona non grata.''

London had been in the forefront of the U.S.-led international opposition to the Iraqi invasion of Kuwait and has about 16,000 personnel in the region as part of the multinational force against Iraq.

BRUSSELS (NOV. 12) UPI - European Community foreign ministers met Monday with their counterparts from five Arab countries in hopes of boosting pressure for the release of hostages from Iraq.

The meeting with the Mahgreb Arab states - Algeria, Tunisia, Libya, Mauritania and Morocco - followed a call by King Hassan II of Morocco that Arab leaders hold an immediate summit on the Persian Gulf crisis.

''The European Community asked the foreign ministers of five friendly countries to use friendly persuasion with Iraq for the unconditional and non-negotiated release of the hostages in line with United Nations resolutions '' said Italian Foreign Minister Gianni de Michelis.

Italy holds the rotating EC presidency.

Algerian Foreign Minister Sid-Ahmed Ghozali made no promises of intervention with Iraqi President Saddam Hussein, but said the Mahgreb countries seek a peaceful solution to the crisis.

He said the EC-Mahgreb meeting was an informal one but that it was important the sessions become ''institutionalized.'' The EC's relations with Libya must first improve, he said.

De Michelis said the initiative by the Moroccan king was not discussed in depth but that a common position in the Arab world ''would go a long way toward resolving the gulf situation.''

Meeting separately, several EC foreign ministers also spoke of the need to reaffirm the EC's opposition to individual countries negotiating the release of hostages. Such a declaration was made at last month's EC summit in Rome.

Since the summit, former officials of several nations have met in Baghdad with Saddam Hussein and some returned home with hostages.

#90316u1094 11/12/1990 ~United Press International

FORT WORTH, Texas (NOV. 12) UPI - Union workers will stay on the job at General Dynamics this week as their representatives attempt to reach an accord with plant management on a new contract.

The union membership rejected the latest contract offer in a vote Sunday. They

returned to work Monday at the aircraft plant under a a one-week extension approved by the membership.

The International Association of Machinists and Aerospace workers represents 10,000 members at the plant.

Pat Lane, president of the union local, said 3,898 members voted against the company's latest offer and 3,700 voted for it. Lane said he had advised workers to reject the package, as had four other negotiators on the union's seven-member bargaining team.

About 5,484 members then voted in favor of extending the current contract one week while negotiators for the union and the big St. Louis- based defense contractor continue to try to work out a new agreement. Lane said 1,149 union members voted against the extension.

Members will gather Sunday to vote on any new GD proposal that might result from talks this week. At that meeting they also could vote on whether to go out on strike. The last strike vote, taken four weeks ago, passed 3,800 to 20.

IAM members went on strike at GD for 17 days in 1984. That strike included outbreaks of violence, including some rock- and bottle-throwing and mutual harassment between picketers and workers crossing the picket line at the plant's main gate.

The company proposal the union voted on Sunday would have given workers a 5.5-percent general wage increase in the first year of the new agreement and a $1,000 bonus. Members would have gained a 3-percent pay raise in each of the last two years of the three-year pact, but no bonuses. The contract also included an immediate cost-of-living adjustment of 15 cents per hour.

Workers covered by IAM at GD currently earn an average $13.34 per hour, or $27,747 annually. Overtime and bonuses would add to that amount.

Lane said that more than any other issue, it was the lack of bonuses in the last two years of the proposed contract that caused workers to turn down the company's offer. He said most members believed that the company should have matched the bonuses rival McDonnell Douglas Corp. gave workers at its St. Louis plant.

That pact, agreed to in May, gave an estimated 12,000 workers a 5.5- percent general wage increase in its first year and 3-percent boosts in each of its last two years. It also provided a 4-percent lump sum bonus in all three years and a cost-of-living-adjustment.

#90316u1095 11/12/1990 ~United Press International

(NOV. 12) UPI - A Chinese envoy arrived Monday in Saudi Arabia fresh from talks with Iraqi President Saddam Hussein and was expected to brief Saudi leaders on them and on Iraq's response to a proposed emergency Arab summit on the Persian Gulf crisis, Arab radio stations said.

And in Brussels, foreign ministers of the 12-nation European Community called on Islamic and non-aligned states to use their influence to help free 3,000 Westerners in Iraqi custody, Cairo Radio reported.

Egyptian President Hosni Mubarak, a staunch supporter of U.S. policy in the Persian Gulf, said in an interview with a Cairo weekly newspaper that Egypt would not participate in a military strike against Iraq.

''We will not enter Iraq under any circumstances,'' said Mubarak, who sent more than 15,000 troops to Saudi Arabia to join the U.S.-led multinational force deployed to counter Iraqi aggression after Iraq invaded Kuwait Aug. 2.

''We have nothing to do with Iraq, but to enter Kuwait as peacekeeping forces, we have no objections whatsoever,'' he told Mayo, the weekly publication of his governing party. ''This is natural, although I hope this day will never come. I want everything to be achieved by peace.''

Many military observers have said if the multinational force tried to oust Iraqi troops from Kuwait it would also have to enter Iraq to stabilize the region.

Chinese Foreign Minister Qian Qichen, a key player in the crisis because his country has the power to veto any U.N. Security Council resolution calling for force, said Beijing seeks a peaceful settlement to the 3-month-old standoff.

Qian met Monday with Saddam and then flew to Jeddah to discuss the talks with Saudi officials, Riyadh Radio reported.

Chinese officials traveling with Qian said Saddam expressed willingness for a political settlement but did not say if he was willing to pull his troops out of Kuwait, as the forces against him demand, the radio said.

Cairo Radio quoted Qian - the first foreign minister of a permanent U.N. Security Council member to visit Baghdad since the invasion - as endorsing the proposed summit after talks Sunday with Iraqi Foreign Minister Tariq Aziz.

King Hassan of Morocco proposed Sunday that Arab leaders meet in an intensified effort to find a peaceful solution to the crisis that would counter what appear to be U.S. moves toward a military strike.

Of the 21 members of the Arab League, only the Palestine Liberation Organization, Jordan and Mauritania immediately accepted the proposal.

Iraq issued a statement suggesting the proposal was a ''cover for a Zionist-American aggression against Iraq,'' but laid out conditions under which it might participate - specifically calling for the Palestinian question to be placed on the agenda.

The PLO said it approved of the summit, saying ''from the start the PLO has pronounced itself in favor of an Arab solution to resolve the gulf crisis and to arrive at a global solution taking account of the interests of all.''

But no other Arab country yet supports the summit and regional observers said Saudi Arabia - in whose territory most of the multinational force is based - is the key. They said Saudi leaders would probably discuss it and other ideas coming out of Baghdad with Qian before making any statement.

Hassan, the Arab world's longest-serving leader, has maintained a somewhat neutral position in the crisis, assinging troops to the multinational force but keeping ties with Saddam, who he refers to as ''my brother'' although they are not related.

In another development, President Bush was reportedly willing to consider a ''messy compromise'' to resolve the crisis, triggered when Iraq invaded Kuwait on Aug. 2.

A senior U.S. official told the American magazine Newsweek that under the compromise, Iraq would withdraw from Kuwait without preconditions and the United Nations would not interfere if Arab nations later wanted to meet Iraqi demands for a Persian Gulf port or for part of a Kuwaiti oil field.

''There would be no reward'' for Iraq, but ''Saddam does have a face- saving way out should he choose it,'' the official said.

A Bush aide told the magazine the administration had no feeling ''that Saddam is wearing down, changing his mind.''

The Iraqi president told Independent Television News in a Sunday interview he is prepared to negotiate but only if the decades-old Israel-Palestinian problem is also resolved.

Saddam has sought Arab backing by likening his occupation of Kuwait to the Israeli occupation of the West Bank and Gaza Strip, but Western leaders reject any relationship.

#90316u1099 11/12/1990 ~United Press International

DALLAS (NOV. 12) UPI - Large doses of vitamin E apparently can reduce harmful side effects of bypass surgery in heart patients, researchers reported Monday.

A study involving 28 bypass patients found the 14 patients who took vitamin E for two weeks before their operations had significantly better heart function after the procedures than the 14 patients who took dummy pills.

The vitamins apparently prevent damage to heart muscle by destroying the toxic chemicals, called free radicals, that form when blood is cut off during the surgery, said Dr. Terrence Yau of the University of Toronto.

"Vitamin E has been demonstrated to prevent damage by consuming the free radicals and preventing them from damaging heart muscle cells," said Yau, who presented his findings to an American Heart Association meeting.

More than 350,000 Americans undergo bypass surgery each year. The surgery involves replacing arteries that supply blood to the heart because they have become narrowed by fatty buildups, causing chest pain and boosting the chances of having a heart attack.

During the surgery, the blood supply to the heart is shut off, which spurs the formation of free radicals. "We've been looking for a long time to reduce that. For people who are quite sick, that could be the difference between doing well and not doing well," Yau said in a telephone interview before his presentation.

In the study, the researchers first showed that taking 300 milligrams of a highly purified form of vitamin E each day for two weeks could double the amount of the vitamin in heart tissue. The Recommended Daily Allowance of vitamin E is ten milligrams per day for an adult male.

The researchers then gave patients either the vitamin or a phony substitute and tested their hearts after the surgery. They found the patients who took vitamin E had much better heart function.

The researchers next plan to test the benefits of vitamin E on patients who undergo bypass operations on an emergency basis, Yau said. The patients in the study had the surgery on an elective basis.

Also Monday, Dr. William Hollander and colleagues at Boston University presented further evidence to support their view that hardening of the arteries may be partly due to an immune system malfunction.

In studies of people with advanced atherosclerosis and monkeys with earlyatherosclerosis, Hollander's team found proteins produced by the immune system, known as antibodies, bound to low-density lipoprotein - the so-called bad cholesterol - so it could not easily be removed from the body.

In addition to trapping cholesterol in the arteries, the antibodies may signal other proteins into action, releasing toxins and other inflammatory substances that further damage blood vessels, the researchers said.

(NOV. 12) UPI - Egyptian President Hosni Mubarak says that his 15-thousand troops in Saudi Arabia will NOT take part in any military attack on Iraq. However, the usually staunch U-S ally adds that he has NO objection to his troops entering Kuwait as so-called ''peace-keepers.''

Former German Chancellor Willy Brandt says it's his impression that Iraqi President Saddam Hussein is interested in finding a NON-military solution to the Gulf stalemate. Brandt returned to Bonn from Baghdad on Friday with about 200 freed hostages.

There was considerable activity in Japan today marking the coronation of Emperor Akihito. While most of the country watched ceremonies at the Imperial Palace, leftist radicals set fires at train stations and office buildings. They also fired missiles at military bases to show opposition to the emperor.

Schools are closed and airline flights have been canceled throughout the Philippines, as the islands prepare for Typhoon Mike, the 14th to strike the nation this year. Mike is NOT just a typhoon. It carries the title of ''super typhoon,'' and forecasters say it could be the worst to hit the Philippines in nine years.

Massive traffic jams spread across Manila today when panicky motorists lined up at service stations to fill their tanks amid rumors of a gasoline shortage. Philippine officials assured the population that the country had adequate supplies, but the statement did little to cut the long gas lines.

This is going to be a busy week for military launches at Cape Canavaral. A TitanS-T, carrying a Pentagon satellite into orbit. And NASA technicians are preparing the shuttle Atlantis for a Thursday launch. It is to put a military spy satellite into space.

Doctors at Children's Hospital in Pittsburgh say a heart infection, either bacterial or viral, may have caused the death of Stormie Jones, the world's first heart-liver transplant. The 13-year-old Texan underwent the operation six years ago. She was died yesterday after being ill for several days.

Friends and neighbors in suburban Fort Worth, Texas, are remembering Stormie an an active girl who wanted everyone to treat her like a normal kid. Her best friend, Crystal Millikan, says Jones ''didn't like everybody asking her how she felt or if she was feeling O-K.''

A public opinion poll published by a weekly magazine in Sofia shows that most Bulgarians would prefer a cooler relationship with their Soviet ''big brother.'' Long regarded as the closest Soviet ally in East Europe, Bulgarians apparently are changing their minds, with the poll showing two-thirds favoring greater independence from Moscow.

The Press Trust of India says the two Burmese students who hijacked a Thai Airways jetliner to India this weekend say they would prefer to return home but would seek political asylum rather than face a firing squad. The two held more than 200 passengers and crew members hostage for more than eight hours to call attention to military repression in Burma.

#90316u1142 11/12/1990 ~United Press International

WASHINGTON (NOV. 12) UPI - There will be plenty of turkey to put on Americans' dinner plates this holiday season but the increasingly popular bird will carry a slightly higher price tag.

Turkey consumption has skyrocketed in the past few years, rising an average of 9.9 percent a year since 1985. Government analysts credit the increase to attractive prices, the hunt for lower-fat foods and an array of products that allow shoppers to buy a convenient amount of meat.

''Today, consumers do not have to buy a 13 (pound)-25 pound turkey,'' the Agriculture Department said in an analysis.

''Rather they can buy a package of turkey breast or thigh that is about the same size as most beef or pork roasts. Also, tenderloin cuts and ground turkey allow turkey to compete directly with other fresh meats in the relatively easy and fast-to-cook meat category,'' the department said.

The shift in marketing has allowed turkey to break from a mold of being predominantly a centerpiece for holiday meals, although the winter holidays still are prime period for sales.

Despite the availability of turkey parts or processed products, ''whole birds

are estimated by industry sources to constitute 35 (percent)-40 percent of total turkey consumption,'' the government says.

It is anticipated each American will eat an average of 18.3 pounds of turkey this year, up 1.2 pounds from last year. For 1991, consumption is projected to climb to 19.2 pounds.

''Production for the year is up around 9 percent,'' the Agriculture Department said in a recent report. ''Even so, for the upcoming holiday season, retail prices may run slightly above last year.''

There may be some variation in price, the department said, depending on how heavily grocers promote turkey or put special prices on it. For the year, retail prices were estimated to average about $1 a pound.

On Oct. 1, there was a near-record 617 million pounds of turkey in cold storage. However, production was projected to trail off in the closing months of the year, which would prevent the build-up of surpluses.

Growers were estimated to produce 4.54 billion pounds of turkey this year and 4.77 billion pounds, a 5 percent increase, in 1991.

For farmers, market prices in September and October were higher than one year earlier, due in part to relatively high prices for pork and beef.

''Estimated net returns to growers during (July, August and September) exceeded year-earlier levels for the first time this year,'' the federal Economic Research Service said.

''Fourth-quarter returns, reflecting slightly lower feed costs and higher turkey prices, are expected to be substantially above break-even and the most favorable in two years. For the year, however, returns will average slightly above break-even, probably limiting 1991 production growth to about 5 percent.''

The Agriculture Department is scheduled to issue later this week a quarterly update on factors affecting meat and poultry production.

#90316u1145 11/12/1990 ~United Press International

SEABROOK, N.H. (NOV. 12) UPI - The Seabrook nuclear power plant, which was shut down for repairs to an air pressure line, will remain idle for several more days after technicians discovered an additional technical problem, a Seabrook spokesman said Monday.

The $6.6 billion plant shut down automatically at 2:41 p.m. on Friday when a leak in an air pressure line caused a valve to close, resulting in a reduction

in the flow of water to one of its four steam generators.

Rob Williams, a spokesman for Seabrook operator New Hampshire Yankee, said the problem was corrected over the weekend. But while that work was in progress, the second glitch was discovered.

''During that shutdown, we found that a valve position indicator on the pressurizer needed repair or replacement,'' Williams said. ''Technicians are now making preparations for that work.''

He said the position indicator is associated with a valve that is used to relieve pressure in the reactor cooling system.

The malfuction in the component was discovered via an indicator in the plant's control room.

Williams said he could not give a more precise indication of when Seabrook would be returned to service other than ''in the next few days.''

He said other parts of the plant are being checked as well.

''Whenever we're shut down, we take a look at other equipment to see what (other) work needs to be done.'' Williams said.

Two weeks ago, Seabrook was shut down for maintenance work to steam valves and to repair an electrical malfunction in the plant's turbine rotor. Prior to that shutdown, which began on Oct. 27, Seabrook had operated continuously at or near 100 percent power for 65 days.

Seabrook received its full-power license in March after nearly twenty years of legal delays, financial problems and anti-nuclear protests, and was placed in permanent full-power operation in August.

At full power, Seabrook generates 1,150 megawatts of power, enough to supply 1 million homes.

(NOV. 12) UPI - World oil prices dropped more than $1 a barrel in early trading Monday as traders sold on the belief that war in the Middle East has been delayed.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for December delivery was down $1.74 at midday to $32.15 a barrel after trading as low as $31.95 a barrel.

''The feeling is that war is not imminent and is at least a couple of months

away. The market is refocusing on fundamentals and supplies are growing and demand is weakening,'' said Nauman Barakat, vice president of Merrill Lynch Futures Inc. in New York.

''U.S. forces won't be in place for an offensive action before the end of the year and it's unlikely that there will be a war before then,'' Barakat said.

The trader said the Middle East Economic Survey also was reporting that Saudi Arabia's crude-oil output would reach 8.3 million barrels daily in November compared with 7.8 million barrels a day in October.

Prior to Iraq's Aug. 2 invasion of Kuwait and the U.N. embargo on exports from those two nations, Saudi production had been about 5.6 million barrels daily.

In the Middle East, Egyptian President Hosni Mubarak, a staunch supporter of U.S. policy in the Persian Gulf, said in an interview with a Cairo weekly newspaper that Egypt would not participate in a military strike against Iraq.

''We will not enter Iraq under any circumstances,'' said Mubarak, who sent more than 15,000 troops to Saudi Arabia to join the U.S.-led multinational force deployed to counter Iraqi aggression.

''We have nothing to do with Iraq, but to enter Kuwait as peacekeeping forces, we have no objections whatsoever,'' he told Mayo, the weekly publication of his governing party. ''This is natural, although I hope this day will never come. I want everything to be achieved by peace.''

On the Merc, home heating oil for December delivery was down 3.09 cents at midday to 87.15 cents a gallon, while December unleaded gasoline had fallen 3.98 cents to 84.25 cents a gallon.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent had lost $2.65 from Friday to $31.90 a barrel by midday.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - was down $1.85 to $27.45 a barrel.

#90316u1173 11/12/1990 ~United Press International

PITTSBURGH (NOV. 12) UPI - The lead negotiator for the United Steelworkers of America says it's too early to discuss the possibility of a strike against USX Corp., and both sides remained optimistic Monday that a contract would be reached before the union's current four-year pact expires Feb. 1.

USW District 15 Director Andrew ''Lefty'' Palm said the company's proposal failed to come close to matching the industry pattern as the union had wanted.

''We're prepared to talk - but we're prepared to fight,'' said Palm, the union's chief negotiator.

Early-bird talks between the union and USX broke off after negotiators failed to reach agreement by a self-imposed deadline of Nov. 10. Details of the company's proposal would be mailed to union members Monday or Tuesday, Palm said.

He said the company offered 1982 wage levels, ignored retirees' and their spouses' insurance needs and didn't address job security or other issues related to a recent USX decision to make its United States Steel division a wholly owned subsidiary by year's end.

''The company is obviously disappointed that no agreement was reached, but remains optimistic that a competitive agreement in the interests of all concerned parties will be reached before the Feb. 1 expiration date,'' the company's chief bargainer, Thomas Sterling, said in a prepared statement.

No date was set to resume bargaining. The USW represents 18,000 workers at USX mining and steelmaking operations in seven states.

#90316u1183 11/12/1990 ~United Press International

WASHINGTON (NOV. 12) UPI - The nation's Roman Catholic bishops Monday told President Bush it could be immoral for the United States to go to war with Iraq, warning the president to exhaust all possible peaceful solutions to the Persian Gulf crisis.

At the opening session of the four-day annual National Conference of Catholic Bishops meeting, the 300 prelates voted overwhelmingly to endorse a letter to Secretary of State James Baker sent last week by Los Angeles Bishop Roger Mahony, head of the conference's international policy committee.

But a number of bishops called for a stronger statement including a statement telling Catholic military personnel they have a right to be ''selective conscientious objectors'' to any U.S.-initiated war with Iraq.

Under the prodding of a group of peace-oriented bishops, led by Bishop Michael Kenny of Juneau, Alaska, and Archbishop Francis Hurley of Anchorage, Alaska, the bishops agreed to debate an even stronger condemnation of Bush administration policy in a closed session on Wednesday.

The bishops' policy on the crisis, which threatens to escalate into an Iraqi-U.S. war, has been based on a series of principles, including the ''clear need to resist (Iraqi) aggression.''

''We cannot permit nations to simply overwhelm others by brutal use of force '' Mahony told Baker.

But at the same time the bishops said there is an ''imperative to seek a peaceful resolution of the crisis and pursue legitimate objectives by non-violent diplomatic means.''

The bishops said that even right of self-defense and the need to repel aggression ''is restricted and governed by a series of moral principles'' and it is these principles - known as the just war theory - a number of bishops feel the United States violates by changing the emphasis of its military presence in the gulf from defensive to offensive.

Mahony's letter only suggested the administration may run afoul of the principles while others argued the policy already violates them.

In addition, bishops such as Kenny want their colleagues to make clear to Catholics serving in the military that they have the right to be ''selective conscientious objectors'' to any U.S.-initiated war with Iraq.

''We don't hesitate to tell Catholic men and women what to do about abortion ... or about condoms,'' Kenny said. ''We should not hesitate in speaking out about their use of weapons of mass destruction.''

''This is not a time to be timid,'' he said.

No bishop objected to endorsing the Mahony statement, sent to Baker last week just before Bush announced the huge build-up of U.S. troops, but several wanted the conference to go even further in opposing the present direction of administration policy.

The Mahony letter, Hurley said, ''does not go far enough'' and Archbishop John Quinn of San Francisco said the letter should just be ''a first step.''

Auxiliary Bishop Thomas Gumbleton of Detroit said it is important the bishops indicate ''we want to do even more'' than make the cautionary statement contained in the Mahony letter.

''It is very important that we do more,'' he said. ''The troops in the Middle East - 400,000 of them now - need moral guidance.''

But Cardinal Bernard Law of Boston, warning the situation was ''fluid'' and the bishops ''did not have all the facts,'' urged the conference to stick with just the Mahony letter.

But, Gumbleton said, ''If we don't have all the facts at hand, (under the Catholic doctrine of just war) we must reject war.''

Cardinal John O'Connor fo New York, often portrayed as a leader of the conservative bloc of bishops, noted, ''There are anxieties here.''

''I have some anxieties as well,'' he said, questioning the cost of the policy in the face of mounting budget deficits and widespread homelessness and hunger in the United States.

''If time can be allotted, then I would hope we could have some opportunity'' to further address the issue, O'Connor said.

#90316u1199 11/12/1990 ~United Press International

NEW DELHI (NOV. 12) UPI - A militant Hindu group said Monday it will again try to relocate a 460-year-old Moslem mosque and build a Hindu temple, a move likely to agitate a controversy that led to the downfall of a prime minister.

Ashok Singhal, the secretary-general of the Vishwa Hindu Parishad, said his group would renew the temple construction program Dec. 6 in the Hindu holy town of Ayodhya if the government of new Prime Minister Chandra Shekhar fails to recognize the desire of Hindus to build the temple.

''This time the program would continue for months together till the construction begins,'' Singhal told reporters during a news conference.

He said hundreds of thousands of Hindus from across the country would reach Ayodhya in northern Uttar Pradesh state to participate in the construction of the temple for Lord Rama, a key Hindu mythological god.

The VHP and the Hindu militant party of the Bharatiya Janata Party planned to begin building the controversial temple last month, but were thwarted by the government of V.P. Singh.

The BJP with its 86 members in the lower house of Parliament withdrew its support to the minority coalition government of Singh on Oct. 23 - hours after the party's president, L.K. Advani, was arrested.

After considerable political maneuvering Singh lost a vote of confidence in the lower house of Parliament Nov. 7. His coalition government collapsed and he resigned as prime minister. Shekhar, a dissident leader, was sworn in as new prime minister Saturday.

Advani was arrested when he failed to heed a government warning to halt his pro-temple procession to Ayodhya.

Despite the arrest of Advani and other leaders, Hindu militants pressed ahead with their plan, storming the complex surrounding the mosque. They climbed atop the domes of the mosque and planted Hindu flags and caused minor damages

to the structure.

Security personnel, however, drove them away and foiled their plan.

More than 200 people died in police firing and communal clashes between Hindus and Moslems in the dispute.

Since assuming office, Shekhar has met with Hindu leaders, but has not unveiled a new program to ease tension.

Hindu militant group claim that the mosque was built in the 16th century by Moghul Emperor Babar after destroying a Hindu temple. But Moslem groups deny the charge and asserts that no temple ever existed at the site.

The Ayodhya dispute has been smoldering since Feberuary 1986, when a court agreed to allow Hindus to worship in the mosque. The move led to widespread communal riots in northern India.

#90316u1249 11/12/1990 ~United Press International

(NOV. 12) UPI - Chinese Foreign Minister Qian Qichen arrived in Saudi Arabia today from Baghdad, where he met with Iraqi President Saddam Hussein. Arab radio stations reported that Qian is to brief Saudi officials on his talks in Baghdad and the Iraqi response to a proposed emergency Arab summit on the Persian Gulf crisis.

As the Chinese official flew to Saudi Arabia, the foreign ministers of the 12-nation European Community called on the Islamic and non- aligned states to help free Western hostages in Iraq and Kuwait. The European leaders are asking the Islamic and non-aligned nations to try to use their influence to free about three-thousand people... many of whom are being used as ''human shields'' around Iraqi military installations.

The tightest security in modern Japanese history was used today to guard 158 foreign dignitaries who were among 22-hundred-23 guests watching the elevation of Akihito as the 125th emperor of Japan. Leftist radicals unhappy with the imperial system managed to set a number of fires throughout Japan but they were unable to mar the ceremonies. Akihito read his own proclamation making him emperor and then rode in an open convertible Rolls-Royce from the Imperial Palace to his residence.

Up to 18 inches of new snow fell overnight in areas of New England, and the area was swept by winds reaching 69 miles an hour in gusts. Highway crews were busy putting sand on roads to battle the ice and blowing snow and a number of power outages were reported in Massachusetts. The highest wind readings were measured at Block Island in Rhode Island.

French President Francois Mitterand has agreed to meet with a delegation of high school students as France is rocked by more mass demonstrations protesting the French education system. Five-thousand riot police have been called into duty in Paris as tens of thousands of students turn out for the second demonstration in eight days. The students are said to be unhappy with reforms of the French education system and are discontented with life in general.

Soviet President Mikhail Gorbachev is preparing for what is expected to be a one-day working visit to Italy next Sunday. He is expected to use the time to sign a treaty of friendship and collaboration between the Soviet Union and Italy.

A transport strike grips Pakistan and caused chaos today in the southern port of Karachi, the nation's largest city and chief financial center. Bus drivers began the walkout in the nation's most populous province on November 6th to protest an Islamic law. The strike has spread to other areas and to drivers of trucks, oil tankers, taxis and rickshaws. In Karachi, many schools, colleges, government offices, banks and private businesses closed.

CHICAGO (NOV. 12) UPI - Mercurial former Mayor Jane M. Byrne Monday announced she will run against Mayor Richard M. Daley in February's mayoral primary.

Her announcement could set up a three-way Democratic primary fight if the black community is able to unify behind a candidate. A similar set-to in 1983 gave the late Harold Washington the opening to become the city's first black mayor.

"Instead of a leader in City Hall, we have a person who hides from responsibility, blames others such as the federal government and speaks to us in nothing more than 30-second sound bites in a carefully controlled and screened setting, as if everything is rosy," Byrne told a news conference. "Well, things are not rosy in the city of Chicago. And I am calling on Mayor Daley to come out of his rose garden."

Byrne suggested four debates before the Feb. 26 primary - on crime, health care, economic development, and education. Daley is in New York for a mayors' meeting and was not immediately available for comment.

Byrne, who entered the Democratic Party as a campaign worker for John F. Kennedy in 1960, came from far behind in the polls to defeat Mayor Michael Bilandic in 1979. That primary election turned primarily on the inability of Bilandic's streets and sanitation crews to dig the city out after a near-record blizzard.

After criticizing some of the more powerful aldermen during the campaign as an "evil cabal," Byrne then made peace with the city's power structure and, during a tumultuous term of office, raised millions of dollars for her re-election effort. That effort, however, floundered when black organizers registered thousands of new voters to push Washington to the top of a three-way primary.

During her four years in office, Byrne and her husband moved into the crime-ridden Cabrini-Green housing project to dramatize the need for better housing; took over and expanded the ChicagoFest summer festival which later evolved into Taste of Chicago; and fought a running battle with the media which at times included rambling, late-night telephone calls to offending news desks.

Her prospects for the 1991 primary are dimmed by Daley's continued high popularity with virtually every segment of the city's population and the inability of blacks to organize behind any specific citywide or countywide candidates in last week's election.

LONDON (NOV. 12) UPI - Stock prices finished higher Monday on the London International stock exchange.

The blue-chip Financial Times 100-stock index was up 11.3 points at 2051.9. The narrower top 30 industrial average was up 7.1 points to 1589.7.

Volume reached a moderate 379.3 million issues compared with 370.1 million shares Friday.

Elsewhere, stock prices on the Frankfurt Stock Exchange rallied but closed well of their highs after a wave of late profit taking.

The closely watched German Stock Index closed at 1402.24, up 20.75 points from Friday's close of 1381.49.

CLEVELAND (NOV. 12) UPI - The Society Corp. plans to cut up to 500 jobs from its work force of 9,100 by the middle of next year, but due to attrition, only about 100 layoffs are expected, it was reported Monday.

Henry Meyer, executive vice president of the corporation and president of Society National Bank, told Crain's Cleveland Business of the cuts in a story published Monday.

He said there have been hiring limits for the last six months.

Society, which in January purchased the financially troubled Trustcorp Inc. of Toledo, has workers in Ohio, Indiana and Michigan.

Meyer, however, said the first round of cuts will likely be limited to the bank's northern Ohio region, as well as Dayton and Columbus. There are about 6,000 workers in those areas.

Meyer said that during the second phase in the spring, Society will look at possible cuts at the Toledo bank, out-of-state banks and operation centers. He said plans for those cuts have not been completed.

Society said in April it wanted to cut expenses by about $40 million over the next two years, hoping attrition would account for the cuts.

Meyer, however, said Society found ''that attrition is not going to take care of as many positions as we had hoped.''

''We would hope that the layoffs would be 100 people or less, but I'm not going to sign in blood,'' Meyer said.

Earlier this year, the Ameritrust Corp. in Cleveland said it would cut 800 employees, accounting for 10 percent of the work force for Ohio's

fourth-largest bank holding company.

Banks elsewhere have also made cuts.

Society has 220 branches in Ohio.

#90316u1351 11/12/1990 ~United Press International

CAPE CANAVERAL, FL (NOV. 12) UPI - An Air Force Titan 4 rocket was primed for liftoff Monday night to launch a Pentagon satellite, sources said, with the shuttle Atlantis on track for takeoff Thursday to put a second spy station in orbit.

The two rapid-fire military missions marked the first time in recent history that two major military satellites were scheduled for launch in a single week, demonstrating a growing Air Force capability to deliver high-priority national-security payloads to space.

The shuttle-class $173 million Titan 4 was believed to be scheduled for liftoff from the Cape Canaveral Air Force Station shortly before 8 p.m. EST, more than a month and a half after the booster was grounded by a technical glitch Sept. 23 at the T-minus five-minute mark in the countdown.

The identity of the payload was classified, but the rocket may have been carrying a $180 million Defense Support Program early warning spacecraft built by TRW of Redondo Beach, Calif. DSP satellites are capable of detecting enemy rocket launches using large infrared telescopes.

At nearby pad 39A at the Kennedy Space Center, meanwhile, engineers pressed on with work to ready Atlantis for a sky-lighting launch Thursday night to ferry a second military satellite into orbit, one that may be used to spy on the Persian Gulf region.

The countdown began on time Sunday night - about 16 hours early because of a conflict with the Titan 4 - and while the exact launch time will not be revealed until nine minutes before engine ignition, sources said liftoff is planned for 6:46 p.m. Thursday.

Launch originally was planned for July, but Atlantis was grounded by a hydrogen fuel leak similar to at least two such leaks that sidelined the shuttle Columbia in May and September. Both ships have since been repaired and cleared for flight.

At the controls aboard Atlantis will be commander Richard Covey, 44, an Air Force colonel, and co-pilot Frank Culbertson, 41, a Navy commander. Their crewmates are Marine Col. Robert Springer, 48, Air Force Lt. Col. Carl Meade, 39, and Army Maj. Charles Gemar, 35. The astronauts were scheduled to fly to

Florida Tuesday evening for final preparations.

The mission length is classified, but sources said the 37th shuttle flight is scheduled to last three days, 23 hours and 55 minutes, resulting in a landing Nov. 19, at 3:41 p.m. PST, at Edwards Air Force Base in California's Mojave Desert.

Aviation Week & Space Technology magazine reported last month that Atlantis would be launched into an orbit carrying it 28.5 degrees to either side of the equator and that the shuttle's cargo is a photo- reconnaissance satellite that will be used to monitor conditions in the Persian Gulf region.

Other space experts have questioned that conclusion, pointing out that in such an orbit, Atlantis and its payload would pass well south of Iraq, limiting the usefulness of photo reconnaissance.

Getting the Titan 4 program up and running has been a high-priority goal for the nation's recovery from the 1986 Challenger shuttle disaster and back-to-back failures of less-powerful Titan 34D rockets in 1985 and 1986.

The Titan 4 program debuted on June 14, 1989, when a Defense Support Program satellite was reportedly launched. A second Titan 4 was successfully launched June 8 to boost what was believed to be an electronic eavesdropping satellite into space.

Martin Marietta Space Launch Systems of Denver holds contracts valued at $7.1 billion to build 41 Titan 4s with options for eight more to eliminate Pentagon reliance on NASA's space shuttle for launching heavy military payloads.

Between 1983 and 1988, the Air Force budgeted $685 million for unmanned expendable launch vehicles. Between 1988 and 1994, the figure is projected to be at least $14.1 billion with the Titan 4 the centerpiece of the buildup.

While the Air Force's military space program is expanding, military use of NASA's manned space shuttle is being phased out. Atlantis's flight represents the last fully classified Department of Defense shuttle mission currently on the books, the result of a post- Challenger decision to build a fleet of Titan 4s to give the Air Force independent access to space for high-priority payloads.

While two more military shuttle missions are planned for 1991, the payloads of both have been declassified, allowing the Air Force to do away with an expensive security program that cost $80 million a year to implement.

#90316u1407 11/12/1990 ~United Press International
(NOV. 12) UPI - China is emerging as a power broker in the Persian Gulf crisis. Foreign Minister Qian Qichen has arrived in Saudi Arabia after talks with Iraqi President Saddam Hussein. He is supposed to brief Saudi officials on Iraq's response to a proposed emergency Arab summit on the crisis.

China's importance in all of this comes because it has the power to veto any U-N resolution that might call for the use of force by the multi-national troops drawn up against Iraq. Beijing is seeking a peaceful settlement to the crisis.

The Palestine Liberation Organization has given its blessings to a proposal from Morocco's King Hassan for yet another Arab summit to try to end the Persian Gulf crisis peacefully. Hassan admits that the summit might be a ''last chance'' effort but he says it should be called anyway.

Israel is offering a compromise under which it will co-operate with a U-N envoy's investigation of the Temple Mount violence in which at least 17 Palestinians were killed. Israel says it will receive the envoy but NOT under the auspices of a resolution that condemned Israeli actions in the rioting. The resolution also called for a commission to investigate the outbreak, but Israel rejects that idea as an infringement on its sovereignty.

Observers say a January 6th run-off is likely in the presidential election in Guatemala, where 12 candidates were seeking the office in yesterday's election. A top official in the former military government of Efrain Rios Montt took a commanding lead in the returns today. Jorge Serrano Elias was holding about 29 percent of the vote. If NO candidate receives a 50 percent majority, a run-off is set for January 6th, and the winner will take office on January 14th.

Two panels are going to be set up to decide how to divide valuable natural resources between the central Soviet government and the Russian Federation, its largest component. The decision follows a two-hour meeting yesterday between Soviet President Mikhail Gorbachev and federation leader Boris Yeltsin.

#90316u1415 11/12/1990 ~United Press International
WASHINGTON (NOV. 12) UPI - A veterans' group is preparing gift packages filled with candy, dried fruit, cookies and other snacks that can be purchased for American troops in the Persian Gulf region for the holiday season.

Help Hospitalized Veterans, a non-profit organization based in San Diego that

is organizing the project, says the goodies should arrive before Christmas.

Roger Chapin, president of the group and organizer of the G.I. Gift Pac Program, said several manufacturers of snack foods have provided items for the packages at below-wholesale prices. The holiday treats include various candies cookies, nuts, raisins, and dates.

"From the radio and television talk shows we've done so far, we have received thousands of requests to send packages to a specific loved one or friend serving in the gulf," Chapin said. "We are proud to announce that we are ready to ship the first wave of packages to the gulf - 100,000 gift packs in all - on Nov. 15," he said.

About 25,000 packages already have been shipped and the rest are to go out Thursday. They will be sent by military sealift from Port of Elizabeth, N.J. The United Service Organizations is arranging for the delivery.

Each tax-deductible package cost $15, or two for $25 and four for $50. There is a $6 mailing fee that covers expenses not otherwise associated with normal military sealift delivery, such as mailing it to a specific person. Orders can be placed by calling 703-683-5004.

Each cardboard gift package bears the message: "Merry Christmas from the folks back home. Thank you for your sacrifices to protect our American way of life." The boxes also include a greeting card and donor address card.

During the past 20 years, Help Hospitalized Veterans has supplied 11 million free arts and crafts kits to 260 Veterans Administration and military hospitals nationwide. There are currently more than 200,000 U.S. military personnel in the gulf and the number could reach 400,000 by early next year.

-30- 2210

#90316u1430 11/12/1990 ~United Press International

MIAMI (NOV. 12) UPI - Cable News Network agreed Monday to refrain from broadcasting sensitive tapes of telephone conversations between deposed Panamanian strongman Manuel Noriega and his attorneys, pending a Supreme Court ruling on the matter.

The agreement was hammered out during an emergency hearing in the chambers of U.S. District Judge William Hoeveler. The hearing was called because CNN defied a temporary injunction by Hoeveler prohibiting the network from airing any of the tapes. Noriega, who surrendered to U.S. authorities following the Dec. 20 invasion of Panama, is in federal prison awaiting trial on drug-trafficking charges.

Hoeveler had issued the temporary order so the tapes would not be broadcast until he had time to rule on a defense motion for a permanent injunction

against having the material aired.

CNN took the matter before the 11th Circuit Court of Appeals in Atlanta, which sided with Hoeveler on Saturday. CNN, however, chose to air some of the tapes over the weekend, putting the network in contempt. CNN lawyer Terry Bienstock said the network was filing an appeal with the U.S. Supreme Court to have Hoeveler's temporary injunction lifted.

At the emergency hearing Hoeveler agreed to delay contempt proceedings provided that CNN stopped airing the tapes at least until the Supreme Court's ruling. He also issued a stay on a previous order to have CNN turn the tapes over to a federal magistrate for review.

"The judge has agreed to enter a stay of the contempt proceedings, to enter a stay of requiring CNN to produce any documents or tapes concerning the pending issues, and to let the Supreme Court of the United States resolve the issue as it stands," Bienstock said.

Jon May, a member of Noriega's defense team, said he was satisfied with the outcome of the emergency hearing. "I'm not here to squeeze blood out of CNN. I don't have to have CNN fined millions and millions of dollars for continuously being in contempt at this point. That's not my interest," he said. "My interest here is stopping CNN from disseminating the conversations, pending review by the Supreme Court, and that's what we've done."

Noriega's lawyers have recommended that CNN be fined $300,000 for each time the tapes in question are broadcast. Bienstock said at a hearing last week that the network had at least seven tapes of Noriega's telephone conversations.

Noriega has telephone access at the Metropolitan Correctional Center. He signed a waiver at the prison that allows MCC to monitor his phone conversations.

His lawyers said the waiver does not include conversations they have with the deposed general and said they will be seeking to have the charges dismissed because the tapes violate Noriega's constitutional rights to lawyer-client confidentiality and to a fair trial. The government has denied that any of the calls taped included conversations between the general and his attorneys.

Bienstock has refused to divulge the nature and source of the tapes, but lead defense attorney Frank Rubino said the tapes were acquired from MCC by the State Department, who gave copies to the Guillermo Endara government in Panama. He said a CNN reporter in Panama got the tapes from a high-ranking government official.

Indictments returned against Noriega in Miami and Tampa in 1988 charge him with marijuana smuggling and providing a drug-trafficking and money laundering sanctuary for South American drug smugglers. If convicted in the Miami

indictment, which also named 15 other defendants, Noriega would face a maximum penalty of 145 years in prison and a $1.1 million fine.

#90316u1447 11/12/1990 ~United Press International

DHAHRAN, SAUDI ARABIA (NOV. 12) UPI - The head of the Gulf Cooperation Council predicted Monday that a political settlement to the Persian Gulf crisis was unlikely and only war would force Iraq to withdraw from Kuwait.

''We're almost to the last chapter in the political field,'' GCC General Secretary Abdullah Bishara, a Kuwaiti, told reporters at a news conference. ''We are almost into the last chapter for the settlement of this problem by confrontation.''

Asked if he believed war was inevitable, Bishara replied, ''Yes, I think so.'' The only thing that might make Iraqi President Saddam Hussein withdraw his troops from Kuwait, he said, was the ''realization that war is imminent.''

''They will never withdraw through the goodwill of anybody,'' Bishara said. ''They will never withdraw through diplomatic niceties and the pleasantries of conversationalists. They will withdraw when they realize that there is a sword of Damocles at their neck.''

The GCC chief said his organization, which groups Saudi Arabia, the United Arab Emirates, Kuwait, Qatar, Bahrain and Oman, was unified in demanding the total withdrawal of Iraqi forces from Kuwait.

''We are not going to entertain any suggestion as to a reward to the aggressor to the Iraqis, or a partial settlement, a partial arrangement or an interim arrangement,'' Bishara said.

''We said that the Iraqis came complete and total and that they should withdraw complete and total,'' he said. ''They way they came was treacherous and brutal, and they should go swift and speedy.''

Despite recent calls for an Arab summit to address the crisis, Bishara said the GCC did not believe the conflict could be resolved by the Arab world.

''We have not much faith in what is called the Arab solution. I myself have no faith at all,'' he said. ''I feel that it's a prescription for prolonging the Iraqi tactic and for gaining time.''

He said the Arab world was split over the conflict and that previous summits had only left the Arab countries paralyzed. Bishara singled out Jordanian King Hussein, saying his appeals for an Arab solution were only a ''prescription for Kuwaiti concessions to please the Iraqis.''

The general secretary said the GCC's policy was to maintain a multi- national coalition supporting the U.N. resolutions on the crisis and to build an international consensus for the use of force.

''In the Gulf Cooperation Council, we feel that diplomacy does not make an inroad, cannot be reliable, unless it is based on force and the power of force '' Bishara said. ''Those who want to employ diplomacy to relieve Kuwait alone and in isolation from the logic of force are indulging, I would say, in wishful thinking.''

He acknowledged that Kuwaitis, in a bid to appease Iraq, had not mobilized their forces to confront the Iraqi threat on their border and were unprepared and unable to resist the invasion. But he said his countrymen were willing to do what was necessary to win back the tiny state.

''Kuwait at any cost, that is our policy,'' Bishara said. ''We know that Kuwait is going to be ruined, but it's better to have a liberated but destroyed Kuwait than an undestroyed but occupied Kuwait.''

DES PLAINES, Ill. (NOV. 12) UPI - Hughes Aircraft Co. said Monday it will close its optical products plant in suburban Chicago by the end of 1991.

The Des Plaines plant employs 150 people and is involved in the production of precision optical components - many of which have defense applications.

Hughes said high operating costs are forcing the closure. The company plans to transfer the manufacturing processes and equipment to other Hughes operations.

Los Angeles-based Hughes is a subsidiary of GM Hughes Electronics Corp. -

itself a division of General Motors Corp.

#90316u1484 11/12/1990 ~United Press International

NEW YORK (NOV. 12) UPI - The dollar ended mostly lower in an extremely thin New York foreign exchange market Monday as most institutions closed for the Veteran's Day holiday and Japan shut down as well for its emperor's coronation.

Currency traders said there was no significant news to move the market - but the lack of hostile developments over the weekend in the Persian Gulf despite rising tensions late last week eroded support for the dollar.

''The dollar traded off a little bit,'' said a New York bank trader. She cited ''sentiment that there was no flareup in the Middle East, which was what people were afraid of last week'' when the dollar scored gains.

With uneasy peace obtaining in the Gulf and any U.S. offensive unlikely to be staged until early next year by most analyses, currency players saw it as safe to reestablish short positions to sell the dollar.

Only the British pound sterling failed to gain on the dollar. Sterling lately has been troubled by Conservative Party challenges to Prime Minister Margaret Thatcher. News Monday of falling retail sales also hurt.

When New York trading tapered off around midday, the dollar was being quoted at 1.4770 German marks, off from 1.4870 Friday, and at 128.50 Japanese yen, off from 129.60 late last week.

Other New York dollar rates: 1.2460 Swiss francs, off from 1.2495; 4.9690 French francs, off from 4.9930; and 1,114.50 Italian lire, down from 1,118.

The British pound was unchanged at $1.9655.

In Europe, the dollar mostly declined as expectations of lower U.S. interest rates weakened demand for the U.S. currency.

Analysts said the Federal Reserve's open market committee, which sets policy on interest rates, was expected to decide on further rate cuts in its Tuesday session and take action on that decision soon.

''We are looking for the Federal funds rate to be cut a quarter point and the U.S. discount rate to be cut by at least a half a point,'' said David Smith, an analyst at Williams de Broe Ltd.

''With U.S. interest rates being cut at the same time Germany is lifting its rates and Japan's rates edging up, the dollar's significant weakness will continue for at least the next two or three months,'' he said.

In London, however, the pound lost ground at the close against the dollar, at $1.9630 vs. $1.9670 late last week.

The pound was hurt by a drop in retail sales from September to October of 1.1 percent and a leadership challenge to Prime Minister Margaret Thatcher, dealers said.

In Frankfurt, the dollar closed lower at 1.4813 German marks against 1.4895 Friday. In Zurich, the dollar closed unchanged at 1.2505 Swiss francs.

The dollar closed lower in Paris, Brussels and Milan at 4.9750 French francs vs. 5.0105; 30.50 Belgian francs vs. 30.65; and 1,113.95 lire vs. 1,122.

Currency markets were closed in Tokyo for a Japanese national holiday marking the enthronement of Emperor Akihito. Japanese markets were scheduled to reopen Tuesday. The dollar closed at 130.50 Japanese yen Friday.

In Zurich, gold closed lower at $381.50 an ounce vs. $386 Friday. In London, gold was also lower, closing at $382 an ounce from $385.

Silver closed lower in Zurich at $4.20 an ounce from $4.25 an ounce, but was unchanged in London at $4.25 an ounce.

Republic National Bank in New York closed cash gold at $381.75 an ounce, down from $385 Friday. The New York Commodity Exchange settled contract gold at $382.30 an ounce, off from $384.80.

Republic closed cash silver at $4.20 an ounce, off from $4.24. Comex silver finished trading at $4.205 an ounce, also down from $4.237.

#90316u1515 11/12/1990 ~United Press International

(NOV. 12) UPI - The Orange Bowl, attempting to set up another Notre Dame-Colorado matchup for the national title, has committed itself to inviting the top-ranked Fighting Irish regardless of the outcome of their final two games.

Bowl officials confirmed Sunday night that Notre Dame would be extended an invitation to play in the New Year's Night game in Miami, and the Fighting Irish were expected to accept.

''We expect to submit a proposal to Notre Dame,'' Orange Bowl President Arthur Hertz said. ''We think it will be a national championship game. We expect Colorado to be able to win its last game, and Notre Dame could too.''

No. 2 Colorado, 9-1-1, has only 5-5 Kansas State remaining on its schedule.

The Buffaloes would be expected to move into the top spot if Notre Dame, 8-1, stumbles in its final two games against No. 14 Penn State and No. 19 Southern Cal.

''This does set up the possibility of having the No. 1 and No. 2 teams meet on Jan. 1,'' Notre Dame Athletic Director Dick Rosenthal told the Miami Herald. ''Even if we should happen to stumble, Colorado still would afford us te probability of playing the No. 1 team.''

The invitation came over the objections of University of Miami officials. The Hurricanes are ranked third and still have an outside chance at the national title, but instead will play in the Cotton Bowl.

''We expect to receive a bid from the Cotton Bowl, and if we do, we will accept it,'' Jankovich said.

''This would have been a perfect year for the Cotton Bowl, Orange Bowl, CBS, NBC, Notre Dame and Miami to get together and wait until the end of the season so the highest-ranked team could meet Colorado.''

Hertz agreed with Jankovich that it would have been better to wait, but that is almost always impossible.

''That really would be the best of all possibile worlds, but I don't know if it could happen,'' Hertz said. ''This is such a competitive business. Everybody is after the same teams. It forces everybody to move early.''

Miami probably will take on No. 6 Texas in the Cotton Bowl, though the Longhorns still have to play No. 20 Texas A&M and unranked TCU.

The Sugar Bowl wound up the winner in the bidding for No. 7 Virginia. The Cavaliers will play New Year's Night against the Southeastern Conference champion, expected to be either Tennessee or Mississippi.

Sugar Bowl Executive Director Mickey Holmes said his committee will consider ''no one else'' to play against the Southeastern Conference champion, assuring Virginia's participation.

The Fiesta Bowl has been surrounded by controversy since Arizona voters last week rejected two ballot measures creating a state holiday honoring slain civil rights leader Martin Luther King Jr. However, Copeland said the decision was based on other factors.

''It's one of the traditional bowls, a very prestigious bowl, and the payout is very good,'' Copeland said. ''In addition, it is very accessible to our people. We have a large alumni contingent in the Southeast, and a large number of alumni in New Orleans area.''

The Fiesta Bowl was left scrambling to find ranked participants not already committed to other bowls. Leading candidates include the SEC and SWC runners-up.

The Blockbuster Bowl has lured No. 10 Florida State and Penn State for its debut at Joe Robbie Stadium in Miami.

With Blockbuster Entertainment as a title sponsor, the bowl was able to offer each team $1.6 million, the sixth-largest payment to each team. That lured Florida State and Penn State, both 7-2, though the game will be played Dec. 28 and there are New Year's Day bowls still available.

In addition, No. 9 Nebraska will accept an invitation to the Citrus Bowl to face the Atlantic Coast Conference champion. Georgia Tech can win the title Saturday with a victory over Wake Forest.

No. 15 Clemson is set for the Hall of Fame Bowl and is expected to face No. 24 Illinois.

In addition, No. 12 Iowa, No. 16 Michigan and No. 18 Ohio State are considering a plan that, in addition to the Big Ten's automatic Rose Bowl berth, would send the second best team of that group to the Gator Bowl against an SEC representative and the other to the Holiday Bowl for an expected matchup against Brigham Young.

(NOV. 12) UPI - The 35-year-old son of Beirut hostage Joseph Cicippio has died of an apparent heart attack in Lansdale, Pennsylvania... the third family member to die since the American was seized on September 12th, 1986. North Penn Hospital officials in Lansdale say Joseph Cicippio Junior was admitted to the emergency room yesterday and died a short time later. The hostage Cicippio's 73-year-old sister and her husband also have died during his captivity.

Chinese Foreign Minister Qian Qichen is in Saudi Arabia, briefing officials there on his talks with Iraqi President Saddam Hussein. One report quotes aides to the Chinese official as saying that Saddam expressed a willingness for a peaceful solution to the Gulf crisis... but did NOT say if he is willing to withdraw from Kuwait.

European Community foreign ministers are meeting with their counterparts from five Arab countries. The European officials at the meeting in Brussels, Belgium, are trying to increase pressure for the release of the remaining Western hostages in Iraq and Kuwait.

The head of the Gulf Co-operation Council says a political solution is NOT likely in the Persian Gulf and only war will be able to dislodge Iraq from Kuwait. A Kuwaiti, the council leader says- quoting now- ''We're almost to the last chapter in the political field.''

The White House says President Bush will meet with congressional leaders of both parties on Wednesday to discuss his troop build-up in the Persian Gulf. Several Democratic leaders have criticized Bush recently, saying he is putting the nation on the road to war.

The French education minister bowed to pressure from 100-thousand demonstrating students today and pledged urgent reforms in the nation's educational system. More than 100-thousand students demonstrated for education reform today, and hundreds of them battled riot police and looted stores.

Police in the nominally independent tribal territory of Bophuthatswana today accused the African National Congress of plotting to assassinate the region's president. Authorities detained 32 A-N-C members and supporters, as the anti-apartheid black group staged a one-day strike in Pretoria.

A detective who investigated the bombing of Pan Am Flight 103 over Lockerbie, Scotland, says his probe showed that the bag containing the explosives was transferred from a Frankfurt feeder flight. That's the first official claim that the explosive device came from someplace other than Heathrow Airport in London.

CHICAGO (NOV. 12) UPI - Soybean futures rallied on short-covering and were moderately higher at the close Monday on the Chicago Board of Trade.

Grain prices were under pressure all day and were mostly lower in quiet trading.

Soybeans were at or near session highs at the final bell. Commercials were featured buyers on ideas that Friday's losses were overdone and the market was due for an upward correction. Strong basis levels at interior and Gulf locations contributed to the gains in both soybeans and soybean meal.

Gains were limited by the prospect of increased production this year and reports of weekend rain in the South American soybean growing regions.

Corn and wheat prices were narrowly mixed on light buying interest and the lack of export business. The volume was relatively light which tended to exaggerate price movements.

Morocco is expected to be in the market late this week for 200,000 tons of wheat.

At the close, corn was off 1/2 to up 1 1/2, soybeans up 2 to 5 3/4, wheat unchanged to off 1 1/4 and oats down 2 1/2 to 3 1/4.

#90316u1596 11/12/1990 ~United Press International

GUATEMALA CITY (NOV. 12) UPI - A top official in the former military government of Efrain Rios Montt led Guatemalan presidential elections with nearly half the vote counted Monday, but pre-election favorite Jorge Carpio Nicolle was closing the gap.

Observers said a runoff vote is likely in January.

Jorge Serrano Elias, 45, of the rightist Solidarity Action Movement, led a field of 12 candidates with 27 percent of the vote, followed by newspaper publisher Jorge Carpio Nicolle of the National Center Union and former Guatemala City Mayor Alvaro Arzu Irigoyen of the National Party of Advancement.

If no candidate wins a majority of the votes, the top two contenders face each other in a second round ballot on Jan. 6. The new president begins a five-year term on Jan. 14.

With 47 percent of the 5,836 voting booths accounted for, Serrano led the race with 210,000 votes, or 27 percent, Carpio was in second place with 186,000 votes, or 24 percent and Arzu 163,000 votes, or 21 percent.

Alfonso Cabrera Hidalgo of the ruling Christian Democratic Party was fourth with 117,000 votes, or 15 percent.

Abstention was estimated at 41 percent of 3.2 million registered voters, according to the Supreme Electoral Tribunal.

Separately, unidentified assailants shot dead the Christian Democrat mayor of an eastern Guatemalan town early Monday. Manuel Jordan Triguero, 40, was gunned down in Comotan, about 125 miles east of the capital, according to Treasury Police spokesman Conrado Monroy.

In the race for congressional seats in the capital, early returns showed Arzu's National Party of Advancement running close with a coalition of parties backing Rios Montt, who was barred from the presidential race by a law that prohibits former coup leaders from taking office.

Rios Montt took power in a military coup in March 1982 and governed the country for 16 months until he was ousted by the army.

The retired army general was the leading presidential candidate in opinion polls when the courts ordered his name removed from the ballots less than four weeks before the vote, upholding the constitutional article that bans former coup leaders from holding the presidency or vice presidency.

Serrano, who served as president of the Council of State under Rios Montt, told a news conference that he was able to capture support of Rios Montt

backers and undecided voters during the closing weeks of the campaign.

Dozens of political party activists and several elected officials have been shot dead in street attacks in the weeks leading up to the election. No major disturbances were reported at the polls Sunday, officials said.

Some voters had walked for up to 10 hours to reach the nearest polling place to cast ballots for one of the 12 presidential aspirants, congressional deputies and municipal authorities in Guatemala's 330 townships.

The leading candidates to succeed President Vinicio Cerezo Jan. 14 represent the political center or right and support neo-liberal economic policies, although none have proposed significant reforms to the country's skewed distribution of wealth.

Cerezo, of the Christian Democratic Party, took office in 1986 as the country's first civilian leader since 1970, following a landslide victory in elections marred by charges of fraud and continued human rights abuses.

Leftist rebels had urged people not to vote in Sunday's elections, saying elections will not resolve the economic and political problems in Guatemala, where an estimated 100,000 people have been killed and another 40,000 kidnapped in nearly 30 years of political violence.

Many voters associate Rios Montt with the political violence that has claimed 100,000 lives and left another 40,000 missing during the past 30 years, although they give him high marks for cracking down on government corruption and common crime, perceived to have flowered under civilian rule.

As in the 1985 election, the army did not participate in the campaign and its 65,000 members were not allowed to vote. But one recently retired army general and a foreign military attache said resentment toward Rios Montt runs deep in the high command.

An opinion poll in March by the Guatemalan Free Enterprise Chamber showed 37 percent of those surveyed favored a military government and 42 percent preferred a civilian president.

Another poll, published in September by the Association for Research and Social Studies, showed 39.3 percent of Guatemalans did not care who wins the election and 22.4 percent cared little.

#90316u1614 11/12/1990 ~United Press International

WASHINGTON (NOV. 12) UPI - Donita Cole, a tough-talking Texan, is not going to let some striped-pants diplomat tell her not to go to Iraq to visit her hostage husband.

Cole admitted that in her frequent telephone calls between Odessa and Foggy Bottom she sometimes tells her State Department case worker how the cow ate the cabbage, as they say in west Texas. "I fired my last one," she said, describing that unlamented link with her government as "a pompous ass, a bureaucratic robot."

"That one used to phone me and say, 'This is the State Department,' and then I'd say, 'Honey, are you the whole thing or do you just work there.'" Cole laughed raucously. Then, softly, she said, "I admit I've given the State Department a lot of flack."

The woman who talks tough, perhaps to mask her fears for her husband, acknowledged that almost all of the diplomats she has dealt with have been helpful and caring. "The only problem I have," she said quietly, "is that my husband is not home. My heart is torn to pieces over this."

Before he was forced to become part of Iraqi dictator Saddam Hussein's "human shield," John Henry Cole, worked for a Texas-based oil-drilling outfit in Kuwait.

A 61-year-old towering Texan, he telephoned again Monday to assure his wife that he was fine. "Hold on," she said excitedly, putting her caller from United Press International on hold while she took the incoming call from her husband.

"He's in good shape," Cole reported later. "He told me he had just walked 20 kilometers. He's walked 700 kilometers in all since he's been there." "There," she said, is a "sensitive location." Although her husband phones several times a week, she said, their conversations are monitored and therefore innocuous.

Her government's objections to the contrary notwithstanding, Cole plans to accept Iraq's ivitation to visit her husband. She expects to leave Dec. 2 with a dozen or so other wives of hostages for a two-week trip to Iraq that is to include a visit to that "sensitive location."

"The State Department advises me almost every day not to go," she said. "I ask them what they're afraid of - that I'll be taken hostage or that the United States will go to war while I'm there."

Cole acknowledged she opposes "a U.S. miliatary offensive against Iraq and I don't mind saying so. Sometimes politicians need to be jerked up by their ears." Cole said those in her group are "not making this trip as politicians. We represent only ourselves."

She said her husband keeps track of the distance he walks around a building by shifting pebbles from one pocket to another. "His shoes are wearing out," she said plaintively, no longer talking tough.

The Germans and Japanese killed tens of thousands of people held hostage in occupied countries during World War II, prompting war crimes trials. The Geneva Convention of 1949 classed hostages as "prisoners of war" and banned reprisals against them. "My husband is a civilian," Cole said. "He has no way to protect himself. He is at a sensitive location where he will be a target."

#90316u1615 11/12/1990 ~United Press International

SAN FRANCISCO (NOV. 12) UPI - The chairman of the federal agency in charge of cleaning up the savings and loan crisis defended the government's strict regulatory crackdown Monday against charges that it was choking even healthy thrifts.

Timothy Ryan, chairman of the Office of Thrift Supervision, told the annual convention of the U.S. League of Savings Institutions that the savings and loan reform legislation passed by Congress last year was ''a necessary remedy to the excesses of the 1980s.''

Thrift executives at the convention complained bitterly that the Federal Institutions Reform, Recovery and Enforcement Act of 1989, or FIRREA, was making it difficult for even the most financially sound thrifts to raise needed capital.

''If the government's intent is to preserve the nation's healthy savings institutions, and to strengthen them, then changes in FIRREA and in certain regulatory policies are essential,'' said Kenneth Seaton, chairman of the U.S. League and chief executive of a Michigan savings and loan. ''To ignore this is to risk driving institutions to the brink of insolvency inadvertently.''

Debate over the effect of the government's savings and loan crackdown, along with the nationwide real estate downturn, dominated discussions as the savings and loan industry's largest trade association met for its 98th annual convention.

About 1,400 S&Ls were represented at the convention - less than two- thirds of the 2,404 remaining private sector thrifts in the country. Since last year's convention in Chicago, federal regulators have seized over 500 savings and loans, or nearly 17 percent of the industry, and transferred their holding assets of more than $250 billion to the government-owned Resolution Trust Corp.

Thrift executives complain that regulators, in their zeal to make up for the lax supervision of the 1980s, have swung too far the other way and are making it hard for thrifts to operate, particularly in the current scandal-tinged environment that surrounds savings and loans.

Seaton accused the Office of Thrift Supervision and the Federal Deposit Insurance Corp. of sending ''conflicting signals'' about new regulations and of fostering a climate of uncertainty by putting off regulatory decisions.

Ryan rejected the charges. Some fine tuning of FIRREA may be needed to protect healthy thrifts, but ''it does not appear that wholesale changes to FIRREA are required,'' he said.

Ryan said he was ''deeply troubled'' by the growing number of savings and loans that were trying to circumvent FIRREA's regulations by converting themselves from federally chartered institutions to state- chartered savings banks.

He said he would review all requests for ''charter flips'' with a skeptical eye and would ''vigorously oppose'' any that appeared to be motivated by a desire to escape FIRREA's rules. FIRREA require savings and loans to maintain minimum capital requirements and limit their investments in speculatory ventures.

''My sole concern is that, under these state charters, thrift institutions will return to exercising broad investment powers beyond those permitted for federal institutions underwritten by federal deposit insurance,'' Ryan said.

The trend for thrifts to invest federally insured deposits in real estate deals and other risky schemes is blamed as a major cause of the savings and loan crisis, which some estimates say may cost taxpayers $1 trillion to resolve. FIRREA attempted to block such practices and return thrifts to their traditional business of making home loans.

#90316u1642 11/12/1990 ~United Press International

NEW YORK (NOV. 12) UPI - Pan Am Corp. said Monday it was continuing to pursue a route and asset sale to UAL Corp. despite a surprise offer by Trans World Airlines Inc. to buy the whole of Pan Am if the UAL deal falters.

"Our focus here this week is on completing our agreement with UAL by Nov. 14," said Pan Am spokeswoman Pamela Hanlon. "We would anticipate at this point that we would be able to reach definitive documentation and we are working toward that goal."

TWA, based in Mount Kisco, N.Y., Friday offered to merge with Pan Am in a transaction valued at $450 million, consisting of $100 million in cash and $350 million in securities.

Pan Am announced Oct. 23 it agreed to sell valuable routes between several U.S. cities and London, some aircraft and airport facilities to Chicago-based UAL, parent of United Airlines, for $400 million.

With the stock market ending sharply higher Monday, the price of Pan Am stock closed up 25 cents to $1.875 a share in heavy trading, while UAL closed up $4.625 to $100.25 a share. The common stock of TWA, acquired by Carl Icahn in 1988, is not publicly traded.

Hanlon said the United deal did not exempt any other party from making a takeover bid for the financially ailing Pan Am. "We have said for the last couple of years that we believe the company should become part of a larger route system. One way to achieve that is a merger, and another is the kind of arrangement we have with UAL. We have said that we would entertain proposals

for a merger and we have over the past few months on occasion talked with TWA. The pact with UAL does not preclude anybody making a bid for the whole company " Hanlon said.

Responding to a Pan Am "invitation to present an offer to combine the operations of TWA and Pan Am, TWA Chairman Icahn said that if Pan Am's negotiations with United were not successfully completed, Pan Am could become a wholly owned subsidiary of TWA under a merger agreement.

"TWA has no interest in disrupting your arrangement with United or interfering with the United Agreement," Icahn wrote in a letter to Pan Am Chairman Thomas Plaskett. "However, as you told me, while you are negotiating in good faith with United, it is possible that you will not be able to reach agreement with them on the marketing agreement or on other definitive documents."

TWA would aim to complete a merger with Pan Am by next March 31. TWA's letter also proposed that it purchase the Pan Am Shuttle, providing service to Washington and Boston from New York, on or before Dec. 31.

After the UAL deal was announced, American Airlines said it would pay more for the London routes but was rejected by Pan Am, which said the sale of the routes and assets to UAL was binding.

"It still is a binding deal," Hanlon said Monday. Among other things, the transaction must receive also Transportation Department clearance. UAL and Pan Am are seeking expedited approval from the federal agency.

Dr Frank Spencer, professor emeritus of transportation and industrial relations at Northwestern University, said the TWA offer surprised him. But he did not take it seriously.

"It doesn't seem very logical to put two weak carriers together. They have got competition and overlapping routes. Other airlines will complain that they are eliminating competition, each company has rather difficult labor relations and now they are going to have to put them together. It's a mountainous job."

George Miranda, vice president of Local 732 of the Teamsters union, representing about 6,500 Pan Am employees, said the union would oppose the TWA proposal as it did the United deal, because neither promised job security for union members.

Despite Icahn's assertion that TWA would step in only if the UAL agreement fell apart, Miranda said he believed TWA was trying to scuttle the United deal because it was worried about the prospect of competing with United on trans-Atlantic routes.

Joe Hopkins, a spokesman for United, said he could not comment on whether the Pan Am deal would be completed by the deadline of this Wednesday.

Standard & Poor's Corp. said that an acquisition of Pan Am by TWA would improve the two carriers' competitive positions and revenue generation but that Pan Am could run out of cash before U.S. and foreign governments approve the deal. The credit-rating agency also said a merger would face close scrutiny from the Justice Department on antitrust grounds and from foreign governments.

A Pan Am withdrawal from the United deal without ensuring cash from another source "could be fatal" in the slow winter season and in the current environment of high fuel prices and weakening demand, S&P said.

#90316u1658 11/12/1990 ~United Press International

NEW YORK (NOV. 12) UPI - U.S. gasoline imports in October fell by nearly half from a year ago as foreign exporters apparently chased higher prices outside the United States, the American Petroleum Institute reported Monday.

In its monthly report, the oil industry's think tank also said U.S. gasoline deliveries fell to a five-year low in October as higher pump prices since Iraq's Aug. 2 invasion of Kuwait apparently drove motorists away.

In addition, the monthly report found that although deliveries of heating oil declined in October, supplies were 13.6 percent higher than a year ago and should be adequate even if the winter is unusually cold.

The monthly industry survey found that gasoline imports fell to an average 215,000 barrels a day in October, a 44.9 percent drop from a October 1989's 390,000 barrels a day.

Imports of all petroleum products fell 26.4 percent, or 560,000 barrels, to 1.6 million barrels a day, the report concluded.

Cumulative imports of crude oil and products dropped 17.9 percent in October from a year ago to 6.78 million barrels a day.

The report also confirmed anecdotal evidence of oil traders that the United States began exporting larger amounts of gasoline shortly after the Iraqi invasion triggered the world oil crisis.

It found that U.S. gasoline exports in August rose to 77,000 barrels a day from about 40,000 barrels daily in the previous month.

Exports are based on customs data, which are normally delayed two to three months.

The API monthly survey found domestic gasoline deliveries dropped 2.7 percent from a year ago to 7.1 million barrels a day following a 1.5 percent year-to-year decline in September.

''This was the lowest level of deliveries for October in five years,'' the API monthly report said. It added, ''We believe that October's ... decrease largely reflects reduced demand in response to higher prices.''

Deliveries of distillate, which includes home heating oil and diesel fuel, also fell 5.5 percent in October from a year ago to 2.9 million barrels a day in contrast with the ''sizeable increases'' in previous months, API said.

This ''is consistent with our belief that the previous growth reflected additions to the inventories of distributors and end users, rather than any substantial strength in underlying consumption,'' the report said.

It added, ''Warmer weather was responsible for a small part of October's decline in inventories,'' noting that the weather in the Northeast where much of the heating oil is consumed was 15 percent to 20 percent warmer than last year.

''Higher prices have also undoubtedly encourage conservation, though perhaps not by as much as the month's deliveries decline might suggest,'' API said.

Nevertheless distillate stocks rose 4 million barrels during October to 138 million barrels, 9 million barrels above the average of recent years and 13.6 million barrels higher than a year ago.

''Given adequate supplies of crude oil and barring unforeseen disruptions, supplies from domestic refineries, inventories, and imports appear adequate to meet demand within ranges likely to be observed, even should the winter be

unusually cold,'' the API report concluded.

Distillate imports dropped 17.3 percent from October 1989 to a monthly average of about 215,000 barrels a day.

Overall, domestic deliveries of all petroleum products declined 4.9 percent, or 850,000 barrels daily, in October from a year ago to 16.4 million barrels a day, the API report said.

''The drop in actual consumption was probably about half of the month's deliveries decrease,'' the report said.

API also found that rising prices of kerosene jet fuel, which have strained the profit margins of some airlines, peaked in mid-October.

''After peaking in the second week of the month, spot jet fuel prices dropped by as much as 45 cents a gallon,'' the report said.

Of the major refined products, jet fuel was the only one to see an increase in October deliveries, API said, rising 9.5 percent to an average of 1.37 million barrels daily.

#90316u1768 11/12/1990 ~United Press International

NEW YORK (NOV. 12) UPI - Stocks rallied Monday for the second day in a row, with an expected drop in interest rates juicing up what had been expected to be a quiet holiday session.

The Dow Jones industrial average, which surged 44.80 Friday, bolted another 51.74 to close at 2540.35.

Among broader market gauges, the New York Stock Exchange composite index jumped 2.90 to 174.07 and Standard & Poor's 500-stock index gained 5.74 to 329.48. The price of an average share surged 51 cents.

Advances thumped declines 1,160-382 among the 1,974 issues crossing the NYSE tape. Volume amounted to 161,390,000 shares, up from the 145, 162,870 traded Friday.

Most observers expected Monday to be a do-nothing day on Wall Street, but traders' fervor over the possibility of another interest rate cut from the Federal Reserve after a key Fed panel holds its regular policy meeting Tuesday ruined that scenario.

The market did observe Veterans' Day, for which government offices as well as many banks and businesses were closed, with a trading halt and two minutes of silence starting at 11 a.m. EST. But after midday the market's sharp gains turned into a full-blown rally.

Analysts said the same factors that sent stocks climbing Friday were at work again Monday. Hopes for a rate cut got a big boost last week from the good reception investors gave Treasury issues in the quarterly refunding as well as from government data released Friday that pointed to inflation as being under control in October.

''A rate cut is pretty much built into the market,'' said Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent & Co. ''But there are two ways of looking at it - one is that the Fed recognizes that the economy is weak,

that we're in a recession and have to do something to rectify it.

''But from the way the market is responding, it seems that investors think that when the Fed eases, it will be enough to turn this into a small recession and make things better going into early 1991.''

Kaminsky said a drop in oil prices as the Mideast remained quiet also helped power the rally. Monday's tumble in oil prices sent the Dow transportation average, which contains oil-price-sensitive airline and trucking companies, up almost 4 percent, soaring 33.29 to 866.68 after December crude oil futures sank $2.02 to $31.87 a barrel.

''We keep hearing about escalated action in the Mideast, yet nothing happens '' he said. ''The expectation of conflict is becoming a part of the everyday market. There are just tremendous cash positions on the sidelines, and they're being tempted into the market every time there's a decrease in rates or oil.''

On the trading floor, IBM was the most active issue, adding 2 3/4 to 113 after unveiling a portable version of its PS-2 personal computer.

American Express followed, rallying 2 to 21 5/8 as banks and other financial issues, building on their recent trend, led the market's surge, benefiting from the rosier interest rate environment. Fannie Mae was third, up 1 1/2 to 32. BankAmerica also surged, 1 3/8 to 23 5/8 in active trading.

Among the other blue chips, AT&T rose 7/8 to 33 7/8, General Electric jumped 1 5/8 to 55 3/8, Philip Morris gained 5/8 to 49 3/8, Woolworth added 1 to 28 3/8 General Motors climbed 1 1/4 to 38 3/4 and McDonald's gained 1 1/2 to 28 3/4.

Elsewhere, Pan Am climbed 1/4 to 1 7/8 in heavy trading after saying said it would pursue a route and asset sale to UAL Corp. despite a surprise offer by Trans World Airlines Inc. to buy the whole of Pan Am for $450 million if the UAL deal falters. UAL, parent of United Airlines, surged 4 5/8 to 100 1/4.

Loews soared 4 1/2 to 92. Analysts said they were at a loss to explain the move.

But Bally Manufacturing plunged 3/8 to 3 3/4 after saying it would end payment of dividends on a series of convertible exchangeable preferred stock.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 199,636,400 shares, compared with 181,416,330 shares traded in the previous session.

Prices gained in light trading on the American Stock Exchange.

The Amex Market Value index rallied 3.75 to 294.78. Advances led declines 366-203 among the 793 issues traded. The price of an average share added 12

cents. Composite volume totaled 12,265,650 shares vs. 12, 260,490 traded Friday.

Energy Service led the Amex issues, unchanged at 2 3/8.

The National Association of Securities Dealers composite index soared 9.51 to 351.46.

-30- 4805

#90316u1806 11/12/1990 ~United Press International

(NOV. 12) UPI - World oil prices plummeted more than $2 a barrel Monday as traders sold on the belief that war in the Middle East has been delayed at least until year's end.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for December delivery plunged $2.02 to end the day at $31.87 a barrel after trading as low as $31.65 a barrel. Volume was a moderate 78,851 contracts.

Coupled with Friday's $1.64 loss, WTI has fallen $3.66, or 10.3 percent, since Thursday.

The drop in oil prices combined with the expectations of lower interest rates to rally prices of stocks on the New York Stock Exchange where the Dow Industrials index of key stocks rose 51.74 points, or 2.08 percent, to 2540.35.

The trader said the Middle East Economic Survey also was reporting that Saudi Arabia's crude-oil output would reach 8.3 million barrels daily in November compared with 7.8 million barrels a day in October.

Prior to Iraq's Aug. 2 invasion of Kuwait and the U.N. embargo on exports from those two nations, Saudi production had been about 5.6 million barrels daily.

Randall Rothenberg of Dean Witter Reynolds' International Energy Futures Group in New York said the market has been on a downward trend since President Bush's announcement late Thursday that he was sending 150,000 more U.S. troops to Saudi Arabia.

Traders had been expecting the president to announce the resupply of the besieged U.S. embassy in Kuwait, which is running out of food and water, by force if necessary. Bush only said the embassy's supplies would last a few weeks.

The market is in the process of selling the ''war premium'' out of the market, Rothenberg said.

In the Middle East, Egyptian President Hosni Mubarak, a staunch supporter of U.S. policy in the Persian Gulf, said in an interview with a Cairo weekly

newspaper that Egypt would not participate in a military strike against Iraq.

It also became apparent over the weekend that Secretary of State James Baker had failed to achieve universal support during his swing through the Middle East and Europe for the immediate use of force to throw Iraq out of Kuwait.

On the Merc, home heating oil for December delivery finished the day down 3.72 cents to 86.52 cents a gallon, while December unleaded gasoline plummeted 4.70 cents to 83.53 cents a gallon.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent lost $2.95 from Friday to $31.60 a barrel.

Coupled with Friday's $1.40 loss, Brent has dropped $4.35, or 12.1 percent of its value in two days of trading.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - was down $1.90 to $27.40 a barrel.

Sun Co., Radnor, Pa. and Marathon Oil Co., the Findlay, Ohio, unit of USX Corp. lowered the posted price they will pay for crude at the wellhead - Marathon by $2 a barrel to $30.50 a barrel for WTI and Sun by $1.95 to a WTI price of $30.70 a barrel.

LANSDALE, PA (NOV. 12) UPI - The son of Beirut hostage Joseph Cicippio has died of an apparent heart attack at the age of 35, hospital officials confirmed Monday.

Officials at North Penn Hospital in Lansdale, 20 miles north of Philadelphia, said Joseph Cicippio Jr. was admitted to the emergency room early Sunday and died a short time later.

Hospital officials would not comment further on the death, but Thomas Cicippio said he didn't think Joseph Junior's death was caused by the kidnapping of his father. He said the younger Cicippio had a severe overweight problem.

He said they would make no attempt to get the word to Joseph Cicippio Sr. "No, there are no efforts being made whatsoever," Thomas Cicippio said. "The situation that he's under right now, we don't think he needs to hear of anything like this at this time."

Joseph Cicippio, 60, deputy controller of American University in Beirut, was kidnapped Sept. 12, 1986, as he walked to work. With the death of Joseph Cicippio Jr., three of the elder Cicippio's family members have died since he was taken captive.

Cicippio's sister, Rose Abell, 73, died of cancer several months after the kidnapping, and her husband, Bill, 80, died in 1989 of a heart attack. Two grandchildren have been born during the same time.

Cicippio's brother, Thomas, has kept a high-profile vigil since his brother's kidnapping, charting the days of capitivity for his brother and other American hostages on a large billboard on the front lawn of his home in Norristown, in suburban Philadelphia.

Tension and frustration climaxed for Thomas Cicippio and other family members last year when the Revolutionary Justice Organization, an offshoot of the Iranian-backed Hezbollah group, sentenced Joseph Cicippio to death after Israel kidnapped a Lebanese Shiite priest.

The sentence apparently was never carried out. The only hard evidence that the Cicippio family has been given of Joseph Cicippio's still being alive was a videotape released to the U.S. government in August 1989.

SAN JOSE, CALIF (NOV. 12) UPI - The key indicator of the health of the computer chip industry remained flat in October although orders and sales increased, the Semiconductor Industry Association said Monday.

The closely watched book-to-bill ratio, which compares semiconductor orders with shipments using a rolling three-month average, remained at 0.95 for the month, the SIA reported.

A book-to-bill ratio of 0.95 means that for every $100 of semiconductors shipped to the U.S. market, chip makers received $95 worth of new orders. A ratio of 1.0 or more is considered healthy, but October is typically a low month for the indicator. Last October, the book-to-bill ratio was 0.92, while in October 1988 it was 0.94.

Average monthly orders, or bookings, for the three months ended in October grew to $1.19 billion, up 0.4 percent from September, the SIA said. Average monthly shipments, or billings, increased 0.7 percent to $1.26 billion, the SIA said.

#90316u1876 11/12/1990 ~United Press International

BOSTON (NOV. 12) UPI - A majority of New England retailers - overwhelmingly pessimistic about prospects for the upcoming Christmas season - expect to cut the number of employees they have, according to a survey released Monday.

The survey showed that 53 percent of the region's retailers anticipated a decrease in the number of employees this fall and winter and 10 percent said they will even reduce seasonal hiring, said the accounting firm Deloitte & Touche.

Only 10 percent planned increases in hiring.

Also, 67 percent of those answering the survey expect lower sales this holiday season than last year, while 87 percent anticipate lower profits.

Deloitte & Touche found that 94 percent of the 117 firms responding to the survey mailed in October believe ''we are in a recession'' and that 77 percent expect the national economy to worsen.

Only 6 percent believe that the economy will improve or that the country is not in a recession.

Retailers were generally more optimistic about their own prospects than about the economy's or their industry's. Deloitte & Touche said 37 percent forecast an increase in their company's sales and 80 percent anticipate their own profits will at least equal last year's.

While a rising number of retailers expect lower sales, 35 percent said they believed their advertising spending would increase as a percentage of their sales. Half said they envisioned no change in that ratio.

Only about 16 percent of those surveyed said they would be able to reduce advertising as a percentage of sales. The percentage of those with opinions on advertising as a percentage of sales amounted to 101 because of rounding.

#90316u1888 11/12/1990 ~United Press International

OAKLAND, CALIF (NOV. 12) UPI - Steelworkers for Kaiser Aluminum & Chemical Corp. have approved a new contract covering 3,500 employees at six U.S. plants company and union negotiators said Monday.

The agreement with the United Steelworkers of America was reached by negotiators Nov. 1 and approved by a union vote. The four-year contract calls for an increase in base pay of 50 cents an hour in the first year and another 50 cents an hour in the fourth year.

In addition, the contract increases the pension multiplier, provides a signing bonus of $1,000 and $500 bonuses in the second and third years, and continues a bonus plan tied to the price of metal.

The package introduces a managed health care program, diverts some cost-of-living allowance money to pay for health care cost increases, and provides for a partial buyout of Kaiser Aluminum preference stock held in the Kaiser Aluminum USWA Employee Stock Ownership Plan.

The contract covers aluminum smelters located in Mead and Tacoma, Wash.; a sheet and plate rolling mill in Trentwood, Wash.; an alumina refinery in Gramercy, La.; a rod, bar and wire plant in Newark, Ohio; and a coil coating facility in Toledo, Ohio.

#90316u1926 11/12/1990 ~United Press International
WILMINGTON, MASS (NOV. 12) UPI - Sweetheart Cup Co. will close its Wilmington plant and eliminate the jobs of 210 of its 540 workers there as part of a streamling of operations, the company said Monday.

Most of the 330 not dismissed will be asked to relocate to facilities in Somerville, Mass., Manchester, N.H., or Owings Mills, Md., said Sandie J. Preiss, a spokeswoman.

Sweetheart, based in Chicago, will begin the phaseout of the Wilmington plant over the next few months and finish it by April 1992, Preiss said.

Preiss said about 200 jobs will be transferred to Somerville and about 70 to Manchester once equipment is moved from Wilmington to the existing facility in Manchester.

''The rest of the positions are either support or engineering jobs and they will move mostly to Owings Mills,'' Preiss said.

Preiss said the elimination of Wilmington would consolidate work on products that currently is done at two different plants.

#90316u1940 11/12/1990 ~United Press International
NEW YORK (NOV. 12) UPI - National basketball champion Nevada-Las Vegas, currently appealing NCAA sanctions, Monday was voted No. 1 in preseason balloting by United Press International's Board of Coaches.

The Runnin' Rebels, who obliterated Duke in last spring's NCAA title game, collected 32 of 41 first-place votes to easily outdistance Arizona for the top spot. The UPI board also rated UNLV No. 1 last preseason.

Arizona received two first-place votes, Arkansas had four, while North Carolina, Michigan State and Georgetown received one apiece.

Following UNLV in the top 25 are: No. 2 Arizona, No. 3 Arkansas, No. 4 North Carolina, No. 5 Michigan State, No. 6 Duke, No. 7 Georgetown, No. 8 Indiana, No. 9 Alabama, No. 10 UCLA, No. 11 Ohio State, No. 12 Oklahoma, co-No. 13 Connecticut and Louisiana State, No. 15 Pittsburgh, No. 16 Syracuse, No. 17 Georgia Tech, No. 18 Southern Mississippi, No. 19 Virginia, No. 20 Kansas, No. 21 Texas, No. 22 Louisville, No. 23 Georgia, No. 24 Temple and No. 25 Notre Dame.

The NCAA is considering UNLV's appeal and should determine soon whether the Rebels can defend their title. Over the summer, the NCAA placed UNLV on probation for violations committed 15 years ago, when the NCAA ordered Coach

Jerry Tarkanian suspended.

Tarkanian and UNLV officials have presented compromises that would allow the Rebels to defend their title. One option would be to ban the team from playing in the 1992 NCAA tournament. A second would be to ban just Tarkanian and not the team.

''We should hear very soon what they've decided,'' Tarkanian said. ''And then we can start the season knowing exactly where we stand.''

If the Rebels, who open the season Dec. 1 against Alabama-Birmingham, can defend their title, they'll do so with a formidable lineup that includes star forwards Larry Johnson and Stacey Augmon.

''I think the biggest obstacle for us right now is simply getting the opportunity to defend our title,'' Tarkanian said. ''We have a great group of talented kids and feel we have as good a chance as anyone.''

Arizona features a strong frontline and adds Chris Mills, a Kentucky transfer. Arkansas, a Final Four team last season, opens its final year in the Southwest Conference trying to give the league its first NCAA basketball champion. Arkansas' hopes rest on three juniors - Lee Mayberry, Todd Day and Oliver Miller.

The Big East and the Atlantic Coast Conference each placed four teams in the top 25, while the Big Ten and the Southeastern Conference had three each.

-30- 2755

#90316u1994 11/12/1990 ~United Press International

MANAGUA (NOV. 12) UPI - Riot police attacked and dispersed demonstrators who set up barricades Monday in the city of Boaco to support former rebels demanding the government honor its promises of assistance, officials said.

Napoleon Guadamuz, director of the Red Cross in Boaco, 55 miles northeast of Managua, described as tense the situation in the city, where a number of former Contra rebels are holding several public buildings and demanding the government keep promises it made when they agreed to disarm.

Guadamuz said the disturbances began at the entrance to the city shortly before 11 a.m..

''We turned up, but we could not get through because of the smoke from tear-gas bombs. Several injured people were picked up in a private truck. I only saw one person with a bullet wound and several who were beaten,'' he said.

A Boaco city official said ''the riot squad descended from two helicopters and attacked the demonstrators who were behind the barricades. First they tossed

tear gas bombs.''

''We support President Violeta Chamorro, but we do not like the fact that she has ordered the riot police to shoot on the people,'' he added.

Guadamuz said the Red Cross was the only building not taken by the former rebels. ''The police are (stationed) at the entrance to the city, '' he said.

''The city of Boaco is under siege and no vehicles are allowed in or out,'' a witness told United Press International.

The former Contras, who laid down their weapons in June and formally ended more than eight years of civil war, are demanding that the government deliver the housing, land, tools, food and medicines it promised them for resettlement.

Eighteen mayors in Boaco and Chontales provinces, east and southeast of the capital, are supporting the former rebels in their demands, and have called for the dismissal of Presidential Minister Antonio Lacayo, Interior Minister Carlos Hurtado and army chief of staff Humberto Ortega.

Talks between Chamorro and the mayors were suspended Sunday with no agreement on dismantling barricades in Boaco and Chontales along 90 miles of roads leading from Managua to the Atlantic coast region.

Ulda Amador, a spokesman for the mayors said, ''We cannot commit ourselves to the removal of the barricades.''

#90316u2012 11/12/1990 ~United Press International

(NOV. 12) UPI - There is a new round of diplomatic expulsions today. Iraq ordered a British diplomat to leave Baghdad within 10 days for what is termed the use of ''inappropriate language'' to demonstrators outside the British Embassy in the Iraqi capital. In retaliation, Britain declared the second secretary of the Iraqi Embassy in London ''persona non grata.''

A non-profit organization based in San Diego is organizing what it calls the ''G-I Gift Pac Program'' to prepare gift packages for U-S troops in the Persian Gulf. A spokesman says the manufacturers of several snack-food products are providing items for the packages at below-wholesale prices. He says the packs will contain candy, dried fruit, cookies and other snacks and should arrive before Christmas. Each tax-deductible package costs 15 dollars, or two for 25 dollars or four for 50 dollars. There is a six-dollar mailing charge. Orders can be placed by calling area code 703, 683-5004.

An Air Force Titan-4 rocket is primed for launch at Cape Canaveral, Florida, today, and observers say they expected the ship to blast into space some time before 8 p-m, E-S-T. The rocket is carrying a classified cargo, but it is

believed to be a 180-Million-dollar early warning spacecraft that uses large infrared telescopes to detect enemy rocket launches.

A veteran Japanese T-V correspondent was picked today to become the first journalist in space. 48-year-old Toyohiro Akiyama is the former Washington bureau chief of the Tokyo Broadcasting System. He will be riding a Soviet rocket into space on December 2nd with two veteran Russian cosmonauts.

A militant Hindu group in India says it will resume its controversial campaign to re-locate a 460-year-old Moslem mosque and build a Hindu temple in its place. It says it will resume the temple construction project on December 6th in the Hindu holy town of Ayodhya. The Hindu move to replace the mosque set off violent religious battles across India and helped bring down the government of Prime Minister V-P Singh.

The Philadelphia Orchestra is going back in time this week. It will celebrate its 90th anniversary with a re-creation of its inaugural concert. The celebration will occur at the Academy of Music in Philadelphia to mark the November 16th, 1900, anniversary of the orchestra's first appearance.

-30- 2505

#90316u2033 11/12/1990 ~United Press International

MOSCOW (NOV. 12) UPI - The Soviet Union, which embarked on a market plan less than a month ago, Monday opened the nation's first stock exchange since the Russian Revolution.

The Moscow exchange was founded by 187 Soviet enterprises and banks, and eventually up to 25 percent of the shares will be held by major joint-stock companies and banks in the country, officials said.

Although there is no private property to speak of yet in the Soviet Union, the officials from Moscow forged ahead with the opening of the exchange.

They said that the Moscow Stock Exchange plans to open offices in the world's major exchanges in New York, Frankfurt, Tokyo and Singapore.

The exchange's interests abroad will be represented by an international broker company, which asked that its name be withheld.

Innumerable problems still confront fledgling Soviet entrepreneurs in their efforts to build a market economy and set up commodity and stock exchanges.

One major drawback is the non-convertibility of the ruble, which is legal tender only in the Soviet Union and cannot be traded against other currencies on money markets.

Eduard Tenyakov, head of the Soviet Fininvest Investment Company, said the

company that will represent the exchange abroad plans to equate the ruble with the dollar in estimating currency exchange value of shares.

The Soviet Parliament and government plan to give the exchange the right allow its members to buy securities from foreign companies and banks and also to sell them to foreign firms, the official Tass news agency said.

The launching of the stock market comes only three weeks after the Supreme Soviet approved a cautious plan to move to a market economy and abandon seven decades of centrally planned socialism.

The exchange's opening also comes a month after New York Stock Exchange officials and U.S. financial experts conducted a three-day seminar in Moscow to explain the mechanics of equity ' markets, share trading and other building blocks of the capialist economic system.

Czarist Russia had more than 100 stock exchanges, and at the turn of the century Imperial Russia possessed one of the most rapidly growing economies in the world. It had a firm and strong currency backed almost 100 percent by gold.

The Communists, who came to power in November 1918, nationalized all production and shut down all exchanges.

-30- 2593

#90316u2050 11/12/1990 ~United Press International

CAPE CANAVERAL, FLA (NOV. 12) UPI - An Air Force Titan 4 rocket streaked toward space Monday on a clandestine flight to launch a secret Pentagon satellite, putting on a spectacular Veterans Day holiday sky show visible for hundreds of miles.

With brilliant Mars, the Roman god of war, rising in the east, the $173 million Titan 4's two solid-fuel boosters ignited at 7:37 p.m. EST after a not-so-secret countdown, turning night into day as the unmanned rocket thundered away from the Cape Canaveral Air Force Station.

''I tell you it was great. It looked like an artificial sunrise that turned into an artificial comet,'' said spectator Jeff Guzzetti, Washington, D.C. ''It just lit up the whole sky like a sunrise. I could feel the rumble right through my body.

As a safety precaution, workers evacuated nearby pad 39A at the Kennedy Space Center, where countdown clocks are ticking toward the shuttle Atlantis's planned launch Thursday to ferry what is believed to be a photo-reconnaissance satellite into orbit that may be used to spy on the Persian Gulf region.

The two rapid-fire military missions marked the first time in recent history that a pair of major military satellites were scheduled for launch in a single

week, demonstrating a growing Air Force capability to deliver high-priority national-security payloads to space.

The Titan 4, making the program's third flight since 1989, was grounded Sept. 23 at the T-minus 5-minute mark, possibly because of problems with the rocket's steering system.

The booster appeared to work normally Monday and two minutes after liftoff, the solid-fuel boosters were jettisoned and the two-stage liquid-fueled Titan ''core'' vehicle continued on its way to space, looking like a brilliant star as it slowly faded from view.

The identity of the rocket's payload was classified, but it may have been carrying a $180 million Defense Support Program early warning spacecraft built by TRW of Redondo Beach, Calif. DSP satellites are capable of detecting enemy rocket launches using large infrared telescopes.

Atlantis's countdown began on time Sunday night - about 16 hours early because of a conflict with the Titan 4 - and while the exact launch time will not be revealed until nine minutes before engine ignition, sources said liftoff is planned for 6:46 p.m. Thursday.

Launch originally was planned for July, but Atlantis was grounded by a hydrogen fuel leak similar to at least two such leaks that sidelined the shuttle Columbia in May and September. Both ships have since been repaired and cleared for flight.

At the controls aboard Atlantis will be commander Richard Covey, 44, an Air Force colonel, and co-pilot Frank Culbertson, 41, a Navy commander. Their crewmates are Marine Col. Robert Springer, 48, Air Force Lt. Col. Carl Meade, 39, and Army Maj. Charles Gemar, 35.

The astronauts were scheduled to fly to Florida Tuesday evening for final preparations.

The mission length is classified, but sources said the 37th shuttle flight is scheduled to last three days, 23 hours and 55 minutes, resulting in a landing Nov. 19, at 3:41 p.m. PST, at Edwards Air Force Base in California's Mojave Desert.

Aviation Week & Space Technology magazine reported last month that Atlantis would be launched into an orbit carrying it 28.5 degrees to either side of the equator and that the shuttle's cargo is a photo- reconnaissance satellite that will be used to monitor conditions in the Persian Gulf region.

Other space experts have questioned that conclusion, pointing out that in such an orbit, Atlantis and its payload would pass well south of Iraq, limiting the usefulness of photo reconnaissance.

Getting the Titan 4 program up and running has been a high-priority goal for the nation's recovery from the 1986 Challenger shuttle disaster and back-to-back failures of less-powerful Titan 34D rockets in 1985 and 1986.

Between 1983 and 1988, the Air Force budgeted $685 million for unmanned expendable launch vehicles. Between 1988 and 1994, the figure is projected to be at least $14.1 billion with the Titan 4 the centerpiece of the buildup.

While the Air Force's military space program is expanding, military use of NASA's manned space shuttle is being phased out.

-30- 4496

#90316u2065 11/12/1990 ~United Press International

LOS ANGELES (NOV. 12) UPI - Texas billionaire Harold Simmons, in his latest bid to seize control of Lockheed Corp., announced a $2-billion buyout plan Monday that would leave him as sole owner of the aerospace giant.

Simmons, in a letter written by key aide J. Landis Martin to Lockheed Chairman Daniel Tellep, said he is willing pay $40 a share in cash if he can obtain the support of Lockheed's mangement for the deal.

Lockheed stock closed Monday at $30.25 on the New York Stock Exchange, up 75 cents a share.

In his letter, Simmons, who already owns slightly less than 20 percent of the company, said he wanted to ''structure a transaction'' that, because of its magnitude, would require Lockheed's cooperation and support.

Lockheed, which has resisted Simmons' efforts to gain control of the company, issued a brief statement saying that the letter did not contain detailed information on the proposal and that Lockheed will give ''full consideration'' to it when further details are provided.

Simmons cannot own more than 20 percent of the stock without triggering the company's ''poison pill'' provisions, which would make it prohibitively expensive for him or any other investor to buy more stock.

Simmons sought several months ago to boost his stake in the company to about 35 percent through the purchases of Employee Stock Ownership Plan shares, but the company turned down that proposal.

The letter Monday said that Martin and Simmons had contacted Tellep about the proposal last Friday.

Aerospace analyst Lawrence Harris of Bateman Eichler, Hill Richards said that he is uncertain whether the proposal is workable, since it does not indicate

how Simmons intends to finance the deal.

Harris, who estimates the break-up value of Lockheed at about $35 a share, said that the proposed price of $40 a share will probably win some support among shareholders, but not at an overwhelming level.

Lockheed has earned $236 million, or $3.73 a share, for the first nine months of this year, up sharply from earnings of $111 million, or $1.78 a share, for the year-ago period. Sales were $6.99 billion, up 2 percent from $6.86 billion.

ASPEN, COLO (NOV. 12) UPI - Four people were killed Monday when their single-engine plane crashed into a hillside while taking off from the Aspen airport.

The Pitkin County Sheriff's Department said the plane crashed across from the tower about 12:15 p.m. under clear skies. There was no fire.

Four bodies were recovered, but the victims were not immediately identified.

(NOV. 12) UPI - President Bush scheduled a meeting with the bi-partisan congressional leadership for Wednesday to discuss the American build-up in the Persian Gulf, amid growing criticism of his policy in the region. The nation's Roman Catholic bishops today told the president that it could be immoral to go to war with Iraq and they warned Bush to exhaust all possible peaceful solutions.

White House spokesman Marlin Fitzwater sought to counter Democratic criticism that Bush is taking the nation down the road to war. Fitzwater told reporters that the president wants a peaceful resolution of the crisis. The Roman Catholic bishops, meanwhile, adopted a statement about the situation and agreed to debate an even stronger anti-war statement in a closed session on Wednesday.

Chinese Foreign Minister Qian Qichen is in Saudi Arabia, where he is expected to brief Saudi leaders on his talks earlier with Iraqi President Saddam Hussein. Egyptian President Hosni Mubarak, meanwhile, said his troops will NOT enter Iraqi territory. Mubarak said Egyptian troops would, however, go into Kuwait in a peace-keeping role.

An official inquiry into the world's worst oil disaster is putting much of the blame for the tragedy on Occidental Petroleum, saying the American-owned company was lax in safety procedures and training. 167 men were killed when an

explosion rocked the Piper-Alpha rig in the North Sea in July 1988. The British inquiry into the disaster is making 106 recommendations to prevent a repeat of the disaster.

A spokesman says the Seabrook nuclear power plant will remain idle for several more days because technicians discovered a second technical problem while repairing coolant system trouble that shut down the plant on Friday. The spokesman says the second problem requires repair or replacement of a valve position indicator associated with the reactor cooling system.

A North Penn Hospital official says the son of American hostage Joseph Cicippio died of an apparent heart attack at the age of 35. Cicippio was kidnapped in Beirut on September 12th, 1986. Since then three members of his family have died, including his sister and her husband.

Striking New York Daily News reporters and editors today began distributing one-Million copies of an alternative eight-page tabloid newspaper that claims to contain the ''Real News'' about the walkout. The papers were handed out on street corners and in bars and restaurants. A Daily News spokeswoman scoffed at the effort, saying the real news appears each day in the struck publication.

(NOV. 12) UPI - White House spokesman Marlin Fitzwater today brushed off criticism by some members of Congress that President Bush is putting the nation on the road to war with Iraq. Says Fitzwater- ''We want a peaceful resolution.'' Some Democratic lawmakers also have complained that Bush decided to double U-S forces in the Persian Gulf without consulting Congress. Asked Fitzwater- ''What are they talking about? They have been consulted all the way.''

The nation's Catholic bishops opened a four-day meeting in Washington today by telling President Bush it could be immoral for the United States to go to war with Iraq. They urged the president to exhaust all possible peaceful solutions to the crisis. But under the prodding of peace-oriented bishops, the group agreed to debate a stronger condemnation of Bush administration policy on Wednesday.

World oil prices plunged more than two-dollars a barrel today on the belief that war is NOT imminent in the Persian Gulf. On the New York Mercantile Exchange, the benchmark West Texas Intermediate for December delivery ended the day at 31 dollars 87 cents a barrel. The drop in oil prices came on word by Egyptian President Hosni Mubarak that Egypt ''will NOT enter Iraq under any circumstances.'' And Mubarak says Egyptian troops will only enter Kuwait as a peacekeeping force.

Broadcast pioneer William Paley was eulogized today in New York at a memorial service attended by more than 25-hundred friends and associates. The C-B-S board chairman and former president died two weeks ago at age 89. Mourners

were led by former President Richard Nixon in praising Paley's revolutionary role in entertainment and broadcast journalism. Paley was described as ''a truly extraordinary man.''

Black college enrollment is stagnating, NOT slipping, as recent reports have suggested. That's according to a study by the Rand Corporation. The study says the proportion of all 18- to 24-year-old blacks in college is currently the same... 20 to 22 percent... as it was in the mid-70's. It says the rate for black men remains steady and the rate for black women is one or two percentage points higher.

A new survey says most American women believe it's wrong to use tissue taken from aborted fetuses for medical research. The Redbook magazine survey of nearly 13-hundred women found that 61 percent of the respondents, mostly working mothers between 25 and 44, are against such research. And the survey found that 73 percent believe that publicizing the medical benefits gained from it could lead to a black market involving payments for aborted fetuses.

#90316u2234 11/12/1990 ~United Press International

PAHUTE MESA, NEV. (NOV. 12) UPI - A nuclear weapon possibly 12 times greater than the atomic bomb dropped on Hiroshima will be detonated 1,900 feet beneath the Nevada desert Wednesday, the Department of Energy said Monday.

Energy Department spokesman Jim Boyer declined to say whether the test was being conducted for Great Britain, as claimed by peace protesters.

Members of Greenpeace hung a banner from the Tower Bridge in London Monday which read ''Stop U.K. Nuclear Tests'', according to a statement released by Greenpeace in Las Vegas. Ten people reportedly were arrested. Members of American Peace Test and Nevada Desert Experience have announced its members will conduct a vigil at the Department of Energy offices in Las Vegas the day of the blast.

Boyer said the nuclear device to be detonated Wednesday will have a yield of 20 to 150 kilotons, a maximum equivalent of 150,000 tons of dynamite. The atomic bomb dropped on Hiroshima during World War II was a 13 kiloton weapon.

Earth motion from the blast may be felt in Las Vegas, more than 100 miles away.

''By continuing to test new nuclear weapons, the nuclear nations are encouraging developing countries to build nuclear weapons of their own,'' said Greenpeace spokesman Junior Bridge. ''Disarmament treaties mean nothing if the testing of new nuclear weapons is not halted as well.''

Energy Department officials say most nuclear tests are conducted to verify the viability of warehoused nuclear warheads.

The weapon is buried at the bottom of a 1,900 foot deep vertical shaft drilled into Pahute Mesa, a 5,000 foot high plateau located about 105 miles northwest of Las Vegas deep within the boundaries of the 1,350 square mile Nevada Test Site.

Code named ''Houston,'' the test will be the eighth announced by the United States this year and the 707th since the test site became operational in 1951. The test will be No. 502 since the United States and the Soviets signed the Limited Test Ban Treaty in 1963 that outlawed open-air detonations.

(NOV. 12) UPI - An Air Force spokesman says everything seems to have gone well with tonight's picture-perfect blastoff of a towering Titan-4 rocket. The costly rocket boosted a secret Pentagon satellite into space in a clandestine military launch. The unmanned Titan-4 lit up the sky for hundreds of miles in a spectacular night liftoff from Cape Canaveral Air Force Station.

As a safety precaution, workers evacuated nearby launch pad 39-A at the Kennedy Space Center, where countdown clocks are ticking toward Thursday's planned launch of the space shuttle Atlantis. Aviation Week and Space Technology magazine reported last month that Atlantis's cargo is a photo-reconnaissance satellite that will be used to monitor conditions in the Persian Gulf region.

In New Zealand, former Labor Prime Minister David Lange says he's negotiated the immediate release of all 16 New Zealand hostages being held in Iraq and Kuwait. Lange told reporters upon his arrival back in Wellington that the United States' criticism of his private visit to Baghdad probably helped him succeed in his mission. He says the hostages will be flown to Amman, Jordan, soon.

A Colorado researcher says he has evidence of possible cold fusion. Physicist Ed Cecil of the Colorado School of Mines says energy particles escaping from a tabletop experiment could be another sign that nuclear fusion can occur at room temperature. Cecil says he's been trying to replicate solid-state fusion since University of Utah researchers announced last year they had produced nuclear fusion in a relatively simple experiment... causing a furor in the scientific community.

The Soviet Union today opened its first stock enchange since the Russian Revolution. The Moscow Stock Exhcange was founded by 187 Soviet enterprises and banks. Officials say the M-S-E plans to open offices in the world's major exchanges in New York, Frankfurt, Tokyo and Singapore. But one major drawback confronting fledgling Soviet entrepreneurs in their efforts to build a market economy is the non-convertibility of the ruble. It is legal tender only in the

Soviet Union and canNOT be traded against other currencies on money markets.

There will be lots of turkey to put on Americans' dinner plates during the holiday season. But the Agriculture Department says the increasingly popular bird will carry a slightly higher price tag. Turkey consumption has skyrocketed in the past few years, rising an average of nine-point-nine percent a year since 1985. Government analysts attribute the increase to attractive prices, the hunt for lower-fat foods and an array of products that allow shoppers to buy a convenient amount of meat.

-30- 2856

#90316x1354 11/12/1990 ~Comtex

LOS ANGELES (NOV. 12) UPI - Actress Eve Arden, the wisecracking and thoroughly delightful English school teacher of television's ''Our Miss Brooks '' died of heart failure Monday. She was 82.

Arden, famous for her quick ripostes, died at her Doheny Estates home at 2:30 a.m. with one of her daughters, Liza West, at her bedside, Glenn Rose, her personal manager said.

''Her health had been deteriorating for the past year,'' Rose said of Arden, adding that the actress had been in declining health since the death of her husband, actor Brooks West, in 1985.

The tall, blonde comedienne had a distinguished career in movies and on the stage, but she was best known for her years as Miss Brooks, including four on radio and four in the early years of television.

Arden began the series in 1947 and made the switch to television in 1952. She won an Emmy in 1953 for best female personality.

Arden's character earned her a life-long image as a schoolmarm and wisecrack artist, with her put-downs delivered in an expressionless twang. Countless motion pictures and stage appearances and two other television series failed to rid her of the Connie Brooks image.

''I'm not fighting it anymore,'' she once said. ''I can't shake the image. Now I'm accustomed to being Miss Brooks.''

Arden was born in Mill Valley, Calif., and passed up a planned college education to take an acting job at the Alcazar Theatre in San Francisco.

She then joined the Pasadena Playhouse and was promptly noticed by Ziegfeld Follies producers. She became a Ziegfeld girl in 1936 and was a leading Broadway attraction with the company within two years.

She returned to the West Coast when her mother died and began her motion

picture career with an appearance in ''Stage Door'' in 1937, which provided her with her big break.

More than 70 motion pictures followed, including ''My Reputation'' with Barbara Stanwyck, ''Mildred Pierce'' with Joan Crawford, ''Panamericana'' with Robert Benchley and ''Earl Carroll Vanities'' with Dennis O'Keefe.

She was nominated for an Academy Award as best supporting actress for ''Mildred Pierce.''

Arden built up a screen reputation as the quick-witted ''hover girl'' who was always around when the female lead needed comforting and advice.

''Do I ever get any comforting?'' she once complained of her image. ''Do I ever have a rough day? I'm tired of being 'Miss Vinegar of the Year.'''

Whatever her feelings about her movie personality, it made her a natural for the ''Miss Brooks'' role. Her two favorite targets on the show were her principal, Osgood Conklin, and the handsome biology professor, Mr. Boynton.

Two less-successful series followed _ ''The Eve Arden Show'' and ''The Mothers-In-Law.'' She returned to movie and stage work, appearing in the plays ''Butterflies Are Free'' in Los Angeles and in ''Hello Dolly'' in Chicago, both in lead roles.

Her 1985 autobiography was titled ''Three Phases of Eve.''

Miss Arden was married twice. She wed Hollywood agent Ned Bergen in 1938 and was divorced in 1948.

She married West in 1951. She and Bergen had adopted two daughters, Liza and Constance, and she and West adopted a son, Duncan. She gave birth to a son, Douglas, in 1954.

Liza West said her mother was born April 30, 1908, four years earlier than her age listed in Hollywood reference books.

NEW YORK (NOV. 12) UPI - Steven Bochco's ''Cop Rock,'' the police show set to music, has been cancelled after its Dec. 26 broadcast, ABC announced Monday.

The series from the creator of ''L.A. Law'' and ''Hill Street Blues,'' was an experimental series that tried to use four or five musical numbers per hour-long episode to push the plot along in a sort of musical ''Hill Street.''

Robert A. Iger, president of ABC Entertainment, said in making the

announcement:

''In 'Cop Rock' Steven Bochco delivered a daring and brilliantly produced series, one all of us at ABC are proud to be associated with.''

New programming for the Wednesday 10-11 p.m. (Eastern time) slot, to begin in 1991, will be announced shortly.

DETROIT (NOV. 13) BUSINESS WIRE - NCR Corp. Tuesday announced a joint marketing agreement with Mancom Technologies Inc., a U.S.-based subsidiary of Mancom Technologies Ltd. of Great Britain.

The two companies will market Mancom's VISION system, an integrated document control and imaging system which runs on NCR System 3000 hardware.

Howard Briggs, president of Mancom Technologies Ltd., noted sales of the system are expected to be strong because of user demand for the document life cycle control features incorporated in the product.

VISION conforms to NCR's Open, Cooperative Computing (OCC) guidelines by adhering to all established and de facto industry standards, providing cooperative functions and a consistent and user focus. It incorporates Open Cooperative Computing Architecture (OCCA) in a client/server model that provides users with access to applications and files distributed throughout a network.

The two companies also co-market CAD VISION, a computer-aided design system with 500 installations in Europe.

Mancom Technologies Ltd., of Derbyshire, England, is a strategic integrator for imaging applications in the manufacturing industry.

NCR Corp., based in Dayton, Ohio, develops, manufactures, markets and supports business information processing systems for worldwide markets.

#90317b0006 11/13/1990 ~Business Wire

SANTA MONICA, CA (NOV. 13) BUSINESS WIRE - As part of its longterm organizational plan, Retix, the leading supplier of OSI products, Tuesday

announced that it has appointed current president, Steve Frankel to the position of president and chief executive officer.

In his expanded role as chief executive officer, Frankel will focus on both the strategic direction and day-to-day operations of the company. Andy De Mari, formerly chairman and chief executive officer, will remain chairman of the board and will concentrate on the positioning of the company in the end-user OSI marketplace, as well as the development of strategic relationships and alliances worldwide.

De Mari, a well-known pioneer in the networking industry, founded Retix in 1985 and has grown the company from revenues of under $1 million in the first year of business to over $50 million in 1990 with consistent profitability. Today, with over 160 OSI OEM licensees worldwide, Retix is recognized as the leading supplier of OSI products and technology.

In addition De Mari led the company into the internetworking market with a line of local LAN (Local Area Network) bridge products and strengthened Retix' position in this market in December 1988 with the acquisition of a United Kingdom-based remote bridge manufacturer. With a complete line of local and remote internetworking products, Retix has sold over 12,000 LAN bridges to date.

Frankel joined Retix as president and chief operating officer in August 1988 and has played a key role in the company's ability to penetrate new markets such as the end-user government and commercial OSI market sectors. Prior to joining Retix, Frankel, who has over 25 years experience in the computer and communications industry, was president at Emulex Corp.

Retix is the leading worldwide supplier of Open Systems Interconnection (OSI) products. Founded in 1985, Retix has more than 160 OSI original equipment manufacturer (OEM) licensees throughout the world and has installed over 12,000 local and remote LAN bridges.

#90317b0012 11/13/1990 ~Business Wire

LAS VEGAS (NOV. 13) BUSINESS WIRE - Tektronix Inc. and SuperMac Technology Tuesday announced the formation of a partnership to develop color fidelity solutions for the Macintosh-based electronic publishing industry.

The two firms will share engineering and marketing resources for the development and marketing of new products based on Tektronix TekColor color fidelity system and SuperMac's recently announced SuperMatch Professional Color Matching System.

Color matching solves two critical problems faced by color graphics professionals: One, it ensures that colors are consistent from one monitor to another, and two, it ensures that the colors displayed on the monitor match scanned input and printed output.

TekColor is the first color fidelity system that optimizes color matching by allowing users to pick screen colors that can be duplicated by their output devices. Because TekColor's open interface specification is based on the CIE International standard, the color management software is device independent. It can support color printers and video displays, film recorders, and virtually any other output device. A TekColor Programmer Guide containing the open specification is now available to provide a basic understanding of color graphic devices and how TekColor integrates the two to provide a cohesive color matching system across color devices.

The SuperMatch Display Calibrator is the first product jointly developed as a result of the Tektronix and SuperMac partnership. The calibrator is the first device to adjust displays from a broad range of vendors, including SuperMac, Apple, E-Machines, Radius and RasterOps. The calibrator is part of SuperMac's professional color matching system, SuperMatch, but can be purchased separately for $695. It is bundled free of charge with SuperMac's 24-bit color card, the Spectrum/24 PDQ.

SuperMac Technology is a leading developer, publisher and manufacturer of color solutions for Macintosh graphics professionals. The company's products include accelerated color graphics cards; 16-inch, 19-inch and 21-inch color monitors; graphics storage devices; color graphics software and color matching utilities. SuperMac delivers color graphics solutions for end users in such markets as graphic arts, desktop publishing, engineering and business graphics.

Tektronix is a leading manufacturer of electronic products and systems in the areas of computer graphics, test and measurement and communications. Sales in fiscal 1990 totaled $1.4 billion. Tek has approximately 13,000 employees worldwide. Tek's Graphics Printing and Imaging Division is part of the Visual Systems Group, which markets a complete line of graphics products including color graphics terminals, netstations, X stations, workstations, superworkstations, printers and software.

#90317b0013 11/13/1990 ~Business Wire
LENEXA, KS (NOV. 13) BUSINESS WIRE - Syntro Corp. (NASDAQ:SYNT) reported revenues of $1,134,737 for the quarter ended Sept. 30, 1990, an increase of 75 percent over revenues of $648,626 for the same quarter last year and 18 percent over the prior quarter.

Revenues for fiscal 1990 were $3,658,551, up 72 percent over the $2,123,490 reported for fiscal 1989. Net loss for the quarter was $418,753, or a loss of 5 cents per share, a 34 percent improvement from the fourth quarter loss in fiscal 1989 of $630,644, or loss of 6 cents per share.

For the year, Syntro's net loss was $1,975,361, or a loss of 21 cents per share, compared to a net loss of $4,323,326, or a loss of 45 cents per share, for the prior year, an improvement of 54 percent.

Syntro Corp., founded in 1981, is a Lenexa and San Diego-based biotechnology company engaged in the development and commercialization of animal health products. Its current strategy is focused on achieving rapid revenue growth and profitability by penetration of the animal health market with innovative vaccines.

Syntro is pursuing corporate alliances that will broaden its product line and allow the company to commercialize its technology as rapidly as possible. SyntroVet, the company's animal health subsidiary, was established in 1985 to register, manufacture and market products resulting from Syntro's research.

#90317b0016 11/13/1990 ~Business Wire
BOULDER, CO (NOV. 13) BUSINESS WIRE - Good Times Restaurants Inc. (NASDAQ:GTIM), operator of the Good Times! Drive Thru Burgers restaurant chain Tuesday announced it has retained nationally prominent Francorp Inc. to design and execute a comprehensive franchise development program for the company.

Francorp is the nation's leading franchise development consulting organization and counts among its clients such companies as Kentucky Fried Chicken, Bonanza Omni Hotels, Ace Hardware, ARCO and Pizzeria Uno.

Francorp will assist Good Times in developing a complete franchise development

program, including operations procedures; franchise policy; service, fee and royalty structures; franchise agreements; marketing plans; and collateral materials. In addition, Francorp will assist Good Times with a planned acquisition program and in seeking joint venture partners for multi-store development projects.

Good Times! Drive Thru Burgers stores are double-drive-through, ultra-fast-service restaurants that offer a limited, high quality menu for drive-through and walk-up customers only. The concept is designed to exploit a trend in the restaurant industry of take-out and drive-through sales growing at a faster rate than on-premises consumption.

Good Times Restaurants currently operates three company-owned locations in Denver and Boulder. The company has a letter of intent for a fourth store to be located in Fort Collins, Colo., and has three additional locations planned for Fort Collins, Boulder and Greeley, Colo.

The company is currently reviewing several multiple-unit operators for potential acquisition and is also in discussions with joint venture partners and restaurant industry groups regarding funding for development of additional front-range stores and master franchise programs.

Good Times Restaurants expects to report revenue in the $1.6 million range for the year ended Sept. 30, 1990. That would be a 33 percent increase over the $1.2 million in sales for fiscal 1989. Fiscal 1988 sales were $705,000.

Good Times recently raised $1,120,000 in a secondary offering of stock and warrants that was managed by Cohig & Associates, the Denver-based investment banker.

#90317b0020 11/13/1990 ~Business Wire

RANCHO MIRAGE, CA (NOV. 13) BUSINESS WIRE - American Toxxic Control Tuesday announced that consolidated revenues for the quarter ended Sept. 30, 1990, increased 21 percent to $6,554,000 as compared to $5,427,000 for the like period in 1989.

For the six-month period ended Sept. 30, revenues increased 19 percent to $13,184,000 as compared to $11,111,000 for the year-ago period.

Net income after tax for the quarter was $252,000 as compared to a loss of

$319,000 for the year-ago period. For the six-month period net income after tax was $385,000 as compared to $203,000 for the year-ago period. The number of shares outstanding on Sept. 30 were 189,286,000 and on June 30 were 112,286,000.

Operating earnings for the quarter were $293,000 as compared with a loss of $323,000 for the like period last year and the six-month operating earnings were $456,000 as compared to a loss of $286,000 last year.

At Sept. 30, 1990, the company had a positive working capital position of $4,566,000 vs. a deficit of $1,725,000 at year end, March 30, 1990. A capital infusion of $1.6 million was received from the issuance of preferred and common stock to a group of investors during the quarter ended Sept. 30, 1990.

The new capital was used to settle all claims with creditors, resolve all disputes with various persons and entities, and to provide working capital. All defaults in the lending agreements between the company and its lenders have been cured.

The company reduced its long-term debt during the quarter by $550,000, and paid off $548,000 outstanding in short-term debt during the quarter. The company now has no short-term debt.

American Toxxic Control Inc. stock is traded on the NASDAQ system in the over-the-counter market with the symbol ATCX.

LOS ANGELES (NOV. 13) BUSINESS WIRE - Gabe Sumner Tuesday announced his resignation as a co-chairman of the board, the senior executive vice president and a director of Communciations and Entertainment Corp. (NASDAQ:CECO/CECOA)(''ComEnt''), the president, chief operating officer and a director of Odyssey Entertainment Ltd. and a director of Double Helix Films Inc.

Among its other activities, Odyssey created Odyssey Distributors Ltd. which has become one of the most successful ''A'' film foreign sales groups. In the past two years, the company fully financed Sidney Lumet's ''Q & A,'' and co-financed Blake Edwards' ''Switch,'' starring Ellen Barkin, with HBO and Irwin Winkler's ''Guilty By Suspicion,'' starring Robert DeNiro, with Warner Bros.

All three films were done through joint ventures with Arnon Milchan's Regency Pictures.

ComEnt, based in Los Angeles, is engaged primarily in licensing the distribution rights to American and foreign feature-length films in foreign markets through its Odyssey division. The Double Helix division is engaged primarily in licensing the distribution of low- and medium-budget films overseas.

LAS VEGAS, NV (NOV. 13) BUSINESS WIRE - On Nov. 6, SMARTSCAN Inc. and the government of Clark County, Nev., signed a contract for the automated conversion of more than 250,000 land parcels.

The project, which is valued at approximately $1.7 million, covers a 365-square-mile area in southern Nevada and encompasses the city of Las Vegas.

Assessed as well as unassessed Assessor's parcels and easements will be scanned and digitized, and all parcel-related data, including lot and block numbers, new parcel numbers and parcel dimensions will be automated.

SMARTSCAN will register the digitized information directly to Clark County's orthophoto images and report on any discrepancies encountered.

A county wide database that will allow Clark County -- percentage-wise, the fastest-growing metropolitan area in the nation -- to manage this unprecedented growth and deal effectively with the resulting water, traffic, pollution and other problems that normally accompany rapid urban development, will be the result when the project is completed in 1993.

SMARTSCAN Inc. is the leading automated GIS conversion services company, providing data conversion services to government agencies, natural resource companies and public utilities. SMARTSCAN uses proprietary scanning, artificial intelligence and interactive graphics technology to automate and improve the quality of the digitizing process.

SAN JOSE, CA (NOV. 13) BUSINESS WIRE - David A. Norman, chairman and chief executive officer of Businessland Inc. (NYSE:BLI), Tuesday announced the appointment of Edward R. Simon, Jr. as president and chief operating officer of the company.

Simon, who will be responsible for the day-to-day operations of the company, including sales and marketing, distribution and service and support, will serve on the Businessland executive committee and report directly to Norman.

Simon, 51, formerly served as president and chief operating officer of Herman Miller Inc., the international office furniture system manufacturer. During his career with Herman Miller Inc., which spanned more than 20 years, Simon held several management positions and served on the company's board of directors.

Having joined the company is 1970 as manager of MIS, he later served as vice president distribution, and as vice president operations. He was named senior vice president and chief financial officer in 1981. Simon became chief operating officer of the company in 1985 and was named president in 1986.

''Businessland is at a key juncture in its growth and I'm excited to join David and help implement the decisions that will return the company to its leadership position in the computer industry,'' Simon commented.

''The company continues to be one of the dominant providers of personal computers and networks to corporate America, and with new initiatives and decisive action we will reduce expenses to appropriate levels and gain back market share.''

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan areas, five metropolitan markets in Great Britain, two in Germany, five in Canada and one in Japan. Businessland reported sales of $1.4 billion in fiscal 1990.

#90317b0053 11/13/1990 ~Business Wire

SANTA CLARA, CA (NOV. 13) BUSINESS WIRE - Masstor Systems Corp. (NASDAQ/NMS:MSCO) Tuesday reported revenues for the quarter ended Sept. 30, 1990 of $8.2 million, compared to $16.3 million during the like quarter of 1989.

Net loss for the third quarter was $3.8 million, or 20 cents per share, compared to net income of $.8 million, or 4 cents per share in the like period of 1989.

For the nine months ended Sept. 30, 1990, revenues totalled $31.2 million, compared to $41.7 million for the like period a year ago. Net losses totalled $5.6 million, or 30 cents per share, compared to net income of $1.4 million, or 8 cents per share for the first nine months of 1989.

Masstor reported that decreased revenues in the third quarter were the result of delays in the completion and shipment of its new M1000 storage module, as well as delays in installation of existing products to certain customers. The reduced revenues reflected a 65 percent decrease in product sales as compared with the third quarter of 1989.

Masstor also announced a 15 percent reduction in worldwide headcount as well as a consolidation of sales offices and administrative functions, to reduce ongoing fixed operating expenses. As a result, it will take a restructuring charge of approximately $5 million (26 cents per share) in the fourth quarter due to the closing or downsizing of facilities and offices and layoffs.

Chairman David Addison stated, ''We have now shipped the first M1000 storage module to a European customer, for beta test, and we are focusing our efforts on completion of field testing of this product and delivering M1000's to other customers.''

Addison also stated that the significant expense in completing development of the M960 product family, which includes the M1000 product, Archive Management Facility (AMF) and Storage Management Executive (SMX) software, combined with delays in shipment of these products to customers, was adversely affecting the company's liquidity.

As previously announced, the company completed a $2 million bridge financing from Cygnus Ventures (formerly Vista Ventures) for working capital in early October. The company is negotiating with its principal lender and the holders of its debentures to delay or restructure its indebtedness, which it is unable to repay at this time.

Founded in 1976, Masstor Systems Corp. manufactures and services mass storage systems for IBM and Bull HN mainframe customers with very high volume applications. It has over 100 large company and institutional customers in 10 countries in North America and Europe.

Its focused business strategy helps MIS managers quickly leverage their huge installed mainframe investments by automating their storage processes and expanding their on-line applications.

LOS ANGELES (NOV. 13) BUSINESS WIRE - HarCor Energy Inc. (NASDAQ:HARC) announced the acquisition of interests in certain oil and gas properties in Lea County, N.M., for $275,300, which was fully financed through an existing $4 million revolving credit facility with Dutch-based NMB Postbank Groep n.v.

The purchase includes working interests in a 1,360-acre Waterflood unit with estimated proved reserves of 80,000 Bbls of oil for an acquisition cost of $3.44 per barrel. A minor interest in an additional property was also included in the purchase.

Francis Roth, president and chief operating officer, stated, ''This acquisition is a continuation of our efforts to acquire proved reserves at favorable prices while also focusing on properties which we feel have additional reserve potential.''

SAN FRANCISCO (NOV. 13) BUSINESS WIRE - James M. Gower, currently senior vice president of sales and marketing at Genentech, will be joining the venture capital firm of Accel Partners on Dec. 1.

This well-known biotechnology industry executive will become one of the firm's partners, driving Accel's growing commitment to investing in companies in the life sciences/healthcare field and helping these companies build a solid foundation for success.

James Gower, 42, joined Genentech as director of marketing in March 1981, was named vice president of marketing in October 1982, and was promoted to senior vice president of sales and marketing in December 1988.

During this period, Gower directed the establishment of Genentech's marketing and sales functions. He also oversaw the growth of a sales staff that now numbers nearly 300 people and is one of the five largest hospital-based sales forces in the pharmaceutical industry.

At the same time, he led the marketing effort to launch Genentech's two products, human growth hormone and the blood clot-dissolving agent, TPA, each of which has sales of more than $100 million a year.

Prior to joining Genentech, Gower was vice president of marketing at the American Critical Care Division of American Hospital Supply Corp., where he began his career. He received a B.S. in operations research and an M.B.A. in marketing from the University of Tennessee.

Accel Partners is a private venture capital firm focusing on businesses engaged in telecommunications, software and life sciences/healthcare. Over the past 18 years, the firm's partners have invested in more than 100 companies and have led investor groups in the creation of numerous public companies.

Recent investments include Isis Pharmaceuticals in San Diego; Viagene Inc. in San Diego; and Glycomed Inc. in Alameda, Calif.

HOUSTON (NOV. 13) BUSINESS WIRE - Santa Fe Energy Partners L.P. announced an oil completion in Gonzales County, Texas which utilized horizontal drilling techniques.

The Meneley No. 1 was completed with initial test rates of 533 barrels of oil per day from the Austin Chalk formation. The well was drilled to a depth of 7,700 feet with horizontal extension of 3,800 feet.

A second horizontal well, the Cook No. 1, has been drilled to a depth of 6,200 feet with horizontal extension of 4,400 feet and is awaiting test. A third well, the Gescheidle No. 1, began drilling in early November and a fourth well is scheduled to be drilled in December. A five well development program is planned for 1991.

Santa Fe Energy Partners L.P. of Houston, Texas holds a 50 percent working interest and is the operator of this 13,000 acre prospect in Gonzales and Karnes Counties. Enserch Exploration Partners Ltd. of Dallas, Texas holds the remaining 50 percent working interest in the prospect. Additional acreage in the region is being pursued.

Santa Fe Energy Partners L.P. is a master limited partnership whose units are publicly traded on the New York Stock Exchange using the symbol SFP. It is an affiliate of Santa Fe Energy Resources Inc., a large independent oil and gas exploration and production company with headquarters in Houston, and whose stock is traded on the New York Stock Exchange using symbol SFR.

PHOENIX (NOV. 13) BUSINESS WIRE - Arizona Land Income Corp. (AMEX:AZL), an independent real estate trust, Tuesday announced earnings for the three month period ending Sept. 30, 1990.

For the operating period of July 1 through Sept. 30, 1990, the company had gross revenues of $494,819 compared to gross revenues of $808,962 for the quarter ended Sept. 30, 1989. This decrease was primarily attributable to a

reduction in interest received on first mortgage loans. This reduction in interest payments received was primarily the result of problems in the market for unimproved real property in the metropolitan Phoenix area.

Subsequently, the company has reported net income of $209,416, or 8 cents per share, for the period ending Sept. 30, 1990, as compared to net income of $283,626, or 10 cents per share, in the comparable prior period. A dividend of 10 cents per share was paid Oct. 16, 1990, to shareholders of record Sept. 28, 1990.

During the quarter, the company entered into a modification agreement in regards to one of its mortgage loans and agreed to accept a Deed in Lieu of Foreclosure on the property securing another of its mortgage loans.

The company anticipates accepting this Deed and taking title to the property during the month of November. The company also took a reserve of $150,000 on a property it anticipates receiving on a Deed in Lieu of Foreclosure. Also during the quarter, the company reduced its long term debt from $2,000,000 to $1,500,000 by the payment of $500,000 to its long term lender.

#90317b0082 11/13/1990 ~Business Wire

SALT LAKE CITY (NOV. 13) BUSINESS WIRE - Plexus Resources Corp. (NASDAQ:PLUSF)(TSE:PXS.) Tuesday announced results for the first quarter ended Sept. 30, 1990.

Revenues for the three months ended Sept. 30 ,1990, increased to $1,720,685 -- up $1,591,784 due primarily to sales of Plexus' share of precious metals from the Denton-Rawhide mine. Similarly, operating earnings increased four-fold as a result of the first full quarter of precious metal production from Denton-Rawhide, which has yet to reach full capacity production.

Sales during the quarter included 3,845 ounces of gold and 15,870 ounces of silver. Including a $48,712 gain from a gold loan repayment at a price less than the $420.24 borrowing cost, Plexus realized an average of $400.24/ounce from gold transactions and $4.79/ounce from silver sales.

Net loss for the three month period was $416,925 versus $260,983 for the same period in 1989. The increased loss was primarily due to increased interest expense and payroll costs during the quarter. The decline in loss per share from 5 cents in the first quarter of 1989 to 1990's first quarter loss of 4 cents reflects the issuance of 6,000,000 common shares in late June 1990 as a private placement to TOTAL Energold Corp.

Plexus Resources Corp. is an expanding U.S. natural resources organization with precious metals and oil and gas production as well as extensive base metals interests in development. The company's shares are listed on the Toronto Stock Exchange (PXS.) and are traded in the United States through NASDAQ (PLUSF).

SUNNYVALE, CA (NOV. 13) BUSINESS WIRE - DAVID Systems Inc. and Retix Tuesday announced an agreement whereby DAVID will market the Retix 2265 and 2265M Local LAN Bridges.

DAVID will supply the unit in two versions, the DAVID ExpressWay Local Bridge, Model 6215 (without SNMP) and the DAVID ExpressWay Local Bridge Model 6216 (with SNMP), both available January 1991.

The ExpressWay Local Bridge is a high-performance two-channel IEEE 802.3 Media Access Control (MAC) layer bridge. Self-configuring, the device increases effective LAN bandwidth by intelligent traffic filtering.

LAN reliability is improved by partitioning and segmentation. Channels can be individually configured for Ethernet or Thin Ethernet, allowing the unit to be used for conversion between these media. The Model 6216 also includes implementation of the IEEE 802.1 Spanning Tree Algorithm.

Prices of the two models are as follows: Model 6215, $2,775; Model 6216, $3,075. International versions are available.

Formed to enhance the role of integrated digital communication, DAVID Systems supplied its first Ethernet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents.

DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

The DAVID LAN product family includes the DAVID ExpressNet 10BASE-T Hub, Intelligent Concentrators (48 and 132 port), the DAVID ExpressView network management system, the VolksNet 10BASE-T Ethernet LAN for small network configurations, and the DAVID Ether-T Adapters for IBM personal computers and compatibles. DAVID Systems currently has over 180,000 ports of Ethernet installed worldwide.

NEW YORK (NOV. 13) BIZWIRE - Bantam Electronic Publishing and Borland International Tuesday announced an agreement for publication by Bantam of a line of official Borland-endorsed Turbo Toolboxes that support Borland's Turbo Language software.

These book/disk packages, designed to work with and augment Borland's Turbo Pascal and Turbo C++ compilers, will supply programmers with ready-to-use routines to handle common programming challenges and to provide a standard means of prototyping applications.

The Turbo Toolboxes will be object oriented and designed for easy development. Topics to be covered include object-oriented graphics class libraries, asynchronous communications support tools, a text-editing library, game writing tools, and numerous analysis routines.

These Turbo Toolboxes, each consisting of a 500+ page book and accompanying diskettes, will provide programming tips and insights, along with the complete source code and documentation for the corresponding utilities.

The first Turbo Toolboxes to be published under this agreement are scheduled for publication in the second quarter of 1991, with a tentative list price of $59.95. The exact page and disk count for each of the Turbo Toolboxes will be announced prior to publication.

Bantam Computer Books are published by Bantam Electronic Publishing, a division of the Bantam Doubleday Dell Publishing Group Inc. Bantam Electronic Publishing is one of the fastest-growing computer book publishers to emerge in recent years.

Founded in November 1983, Bantam is committed to the introduction of timely, authoritative computer books and book/disks by well-respected industry experts in cooperation with leading hardware and software companies. Bantam Computer Books are available through major book and software chains, independent book stores, and book and software distributors.

Borland International is a leading developer of high-performance computer software products. Borland offers some of the world's most widely used software development tools and business applications, such as Turbo C++, Turbo Pascal with Objects, Turbo Debugger & Tools, Paradox, Quattro Pro and Sidekick.

TUSTIN, CA (NOV. 13) BUSINESS WIRE - Luther Medical Products Inc. (NASDAQ:LUTH) Tuesday announced the availability of a new line of long-term intravenous catheters ideal for home care usage.

Like all Luther Medical products, the company's new Peripheral Inserted Central Catheter, or PICC line, features new technology that offers unique benefits to both patients and healthcare workers.

The company concurrently announced its first-quarter results for the fiscal year ending June 30, 1991. For the period ending Sept. 30, 1990, the company reported a 13 percent increase in revenues of $623,443 vs. revenues of $552,823 for the first quarter last year. The net loss for the quarter totalled $31,942, or $.002 per share, vs. losses of $50,301, or $.004 for the same period last year.

In developing its PICC line product, Luther incorporated a new polyurethane material called ''Tecoflex'' which remains soft yet strong for a 30-day period. The catheter's unique durability eliminates painful re-insertions

required with standard Teflon catheters that require changing every 48 to 72 hours.

The PICC line makes use of Luther's patented ''Peel-away'' needle system which permits nurses to insert the Tecoflex catheter. Once insertion is made, the needle literally peels away from the catheter and can be safely discarded.

Luther is beginning immediately to both manufacture and market its PICC line product. The company expects to see PICC line contribute to sales by the second quarter.

Regarding the first quarter just ended, management attributed the improvement in performance to changes in its product mix and reduction of research and development expense. The company had previously projected substantially higher first-quarter losses which were contained by reductions in research and development and general administrative expenses.

Revenue increases are mainly attributable to the introduction of the company's new LMB Series 4.0 portable EMG instruments manufactured and marketed by Luther's subsidiary, Neuro Diagnostics Inc. (NDI).

Brisk sales of the technologically innovative instrument helped to offset a decrease in revenues from catheter production as a result of the company's agreement to turn over manufacture of the PROTECTIV catheter to Critikon Inc., the Johnson & Johnson company which markets the product.

In 1987, the company introduced an innovative over-the-needle catheter product (now marketed under the name PROTECTIV) which is designed to minimize the transmission of infectious diseases through accidental needle sticks. That same year, Luther acquired NDI, a manufacturer and distributor of high-technology human nervous system testing equipment.

#90317b0105 11/13/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (NOV. 13) BUSINESS WIRE - Atlanta Gold Corp. is pleased to announce that it has granted an exploration option to Newmont Exploration Ltd. with regard to the Atlanta Gold Properties located in Elmore County, Idaho.

The shareholders will be asked to approve the granting of this option to Newmont at Atlanta Gold's Annual General Meeting on Dec. 14, 1990.

Last year's Economic and Technical Feasibility Study by the engineering partnership of Behre Dolbear & Co. Inc. and Bateman Engineers Inc. confirmed

the open pit mineable reserve figures of 1,024,000 ounces of gold and 2,516,000 ounces of silver at the Atlanta Gold Properties and concluded that, subject to pilot plant confirmation of the economics of the chosen metallurgical recovery process for the refractory Atlanta orebody, an optimized mining plan at $375 and $400/ounce gold would result in an acceptable return on Investment.

The company presented and reviewed the Feasibility Study and our extensive geological, environmental and engineering data with mining companies interested in joint venturing project development and who have the resources needed to assist in financing and sharing the inherent risk of developing a large, capital-intensive mining project and a short list of interested parties was made up.

In July 1990, Behre Dolbear & Co. Inc. was engaged to submit a report on the short and long term strategies and alternatives for furtherance of the Atlanta Gold Project.

They strongly recommended that Atlanta Gold not consider undertaking alone any of the following alternatives: developing to production the oxide ore, commissioning pilot plant testing of the bio-oxidation process, commencing exploration of the high-grade, underground mineable ore potential or updating the Feasibility Study of 1989 -- but that Atlanta Gold should joint venture the project with an established, well recognized mining company.

The various proposals received from the short listed mining companies were reviewed, with the result being that none were found to be acceptable until the receipt of Newmont's proposal.

OKLAHOMA CITY, OK (NOV. 13) BUSINESS WIRE - The Phoenix Resource Cos. Inc. (PSE:PHN) Tuesday reported income of $1.6 million, or 10 cents per common share, for the third quarter ended Sept. 30, 1990, on revenues of $7.8 million.

For the same period of 1989 the company reported a loss of $1 million on revenues of $5.8 million. On a pro forma basis, adjusting for the effects of the reorganization which became effective in April 1990, the loss for the third quarter of 1989 would have been $1.1 million, or 7 cents per share.

For the nine months ended Sept. 30, 1990 income of $2.5 million on revenues of $17.3 million was reported, compared to a loss of $4.3 million on revenues of $20.6 million for the same period of 1989. On a pro forma basis, income for the nine months ended Sept. 30, 1990, would have been $0.2 million, or 1 cent

per common share, compared to a loss of $4.5 million, or 27 cents per common share, for the same period of 1989.

The Phoenix Resource Cos. Inc. is an oil and gas exploration and production company headquartered in Oklahoma City, Okla. with its primary producing properties in the Western Desert of the Arab Republic of Egypt. It is the successor to Texas International Co. by reorganization which became effective in April 1990.

SAN FRANCISCO (NOV. 13) BUSINESS WIRE - Western Investment Real Estate Trust (ASE:WIR) reported Tuesday that operating revenues for the third quarter increased 16 percent to a record $7,917,000 as compared to $6,811,000 in 1989.

Operating revenues for the nine months ended Sept. 30, 1990 rose 16 percent to a record $23,466,000 as compared to $20,145,000 for the like period in 1989. O.A. Talmage, president and chief executive officer, said the revenue gain over the third quarter 1989 is due, in part, to income generated from recent community shopping center investments.

Also contributing to the improved results were increases in rents from the Trust's existing real estate portfolio due to scheduled increases, increased percentage rents, consumer price index adjustments and renegotiation of leases.

The Trust declared a dividend of 36 1/2 cents per share payable Dec. 15, 1990 to shareholders of record Nov. 23, 1990. The dividend is the Trust's 107th consecutive quarterly dividend and a 1 1/2 cent or 4 percent increase over the 35 cents paid the like quarter last year. The indicated annual dividend rate based on the Dec. 15, 1990 dividend is $1.46 per share.

Beginning in 1991, increases in the dividend rate will be considered on an annual basis. It continues to be the Trust's conservative practice to pay dividends solely from operating cash flow on a quarterly basis.

For the quarter ended Sept. 30, 1990, net income before gains on sales of real estate investments rose 30 percent to $4,278,000 compared to $3,288,000 in 1989.

Net income before gains on sales of real estate investments for the quarter was 27 cents per share, based on 16,082,856 weighted average number of shares outstanding, compared to 27 cents per share, based on 12,186,690 weighted average number of shares outstanding for the like period in 1989.

For the quarter, depreciation and amortization expense increased to $1,738,000 or 11 cents per share compared to $1,139,000 or 9 cents per share in 1989.

For the nine month period ended Sept. 30, 1990, net income before gains on sales of real estate investments was $13,779,000, or 86 cents per share compared to $9,808,000, or 81 cents per share for the like period in 1989, an increase on a per share basis of 6 percent.

For the nine month period ended Sept. 30, 1990, depreciation and amortization expense increased to $4,457,000, or 28 cents per share compared to $3,355,000, or 28 cents per share in 1989.

#90317b0159 11/13/1990 ~Business Wire

DETROIT (NOV. 13) BUSINESS WIRE - ASK Computer Systems Tuesday announced MANMAN/AUTOMOTIVE, a complete electronic data interchange (EDI) and release accounting system for automotive suppliers.

MANMAN/AUTOMOTIVE is the newest addition to MANMAN, ASK's complete manufacturing information system that supports accounting, manufacturing, order management and other planning functions.

MANMAN is the first closed loop corporate-wide information system from a major supplier that offers integrated automotive functionality from the receipt of an electronic release to the transmission of an advance shipment notice. Many other systems offer merely an interface to a third-party's EDI and release accounting system.

''Automotive suppliers are obliged to meet the EDI and release accounting requirements specified by their customers, the auto makers,'' commented Peter West, vice president of Business Development. ''MANMAN/AUTOMOTIVE allows automotive suppliers to meet these requirements with a standard product that

is more cost-effective and faster to implement than custom systems.''

ASK anticipates that its relationship with EDS Corp., which includes a 20 percent equity investment in ASK and a joint marketing agreement, will contribute significantly to the success of this product. EDS, an independently operated subsidiary of General Motors, develops, maintains and supports information systems used by GM to interface with its suppliers and customers.

EDS will offer MANMAN/AUTOMOTIVE, along with other ASK management information system applications, to manufacturers that have engaged EDS for outsourcing or systems integration services.

MANMAN/AUTOMOTIVE will be part of the EDS Center of Expertise dedicated to marketing MANMAN. EDS will also augment ASK's automotive engineering and support services.

The domestic automotive supplier market consists of approximately 5,800 domestic manufacturers. To address the specific needs of this large market, ASK formed a dedicated automotive engineering and support group and an Automotive Business Unit, both located in Detroit.

In keeping with its tradition of involving customers in the product design process, ASK established an Automotive User Advisory Council comprised of 42 of the leading automotive suppliers.

MANMAN/AUTOMOTIVE is integrated with MANMAN/OMAR (order management) and MANMAN/MFG (manufacturing functions) to provide users with the visibility and control of current customer demand to effectively manage planning, production and decision-making.

It is easy to install because it requires no special programming or table definitions; and it is easy to use because it is window- and menu-driven.

FRANKTOWN, CO (NOV. 13) BUSINESS WIRE - DCX Inc. Tuesday announced the award of a total of $633,000 of F-16 Fighting Falcon contracts to DCX Inc. from General Dynamics Fort Worth, Texas, division in the area of cable assemblies.

The current series of contracts, $279,000 awarded in September and $360,000 awarded in October, includes the design and engineering development of a prototype connector for preflight test set equipment used by maintenance

personnel to analyze functions in the F-16 as well as production contracts for stores management system cable assemblies to meet critical General Dynamics manufacturing schedules for the next fourteen months.

With these most recent awards, the DCX Inc. contract backlog climbs to $3.9 million, according to Jeanne Anderson, vice president and general manager. ''We are very pleased to be able to work closely with General Dynamics and to bring our ''Quality to a Schedule'' philosophy to bear on their timephasing requirements,'' she stated.

DCX Inc. plans to continue providing quality products on time at competitive cost to its customers, thereby increasing its manufacturing base and its ability to retain its highly advantageous pricing capabilities.

STAMFORD, CT (NOV. 13) BUSINESS WIRE - Warrantech Corp. (NASDAQ:WTEC) Tuesday announced two key promotions within its management team.

Richard Rodriguez has been appointed as vice president of operations, and Steven M. Thomas has been appointed as vice president of sales for Warrantech Consumer Product Services, a newly formed subsidiary of the company.

Rodriguez has been with Warrantech for more than four years. Prior to this promotion, Rodriguez was national service manager for the company. His new responsibilities will include the operations of the company's Management of Information Systems and service department as well as all personnel functions corporate-wide.

Rodriguez boasts an impressive reputation in the service contract and consumer products business, with over 15 years' experience.

Thomas, another key person in Warrantech's young and aggressive management team, brings more than eight years' experience in the service contract industry to his new position. Formerly, Thomas was Warrantech's national retail sales manager. His new responsibilities include directing the company's Retail and Original Equipment Manufacturer sales divisions as well as coordinating and implementing new marketing programs.

He will also supervise all corporate and field sales personnel.

Rodriguez will relocate to the company's facility in Texas, while Thomas will remain located at Warrantech's executive headquarters in Stamford.

Warrantech Corp. administers service contracts for consumer electronic products, appliances and home office equipment. Through Warrantech Dealer Based Services Inc., the company administers service contracts for automobiles and recreational vehicles.

LAS VEGAS (NOV. 13) BUSINESS WIRE - Shuzo Moroto, chairman of Aisin A.W. Co. Ltd., a subsidiary of Toyota, and Ayao Wada, president, Ultech Corp., announced Tuesday that they have created a joint venture in California called A.W. & Associates (AWA).

The company will develop and manufacture products that use compressed digital video. Currently in initial development is the first practical and economical videophone, for use in automobiles and offices.

The video telephone fits into an automobile dashboard and transmits video and voice using standard cellular telephone lines. The video telephone will be capable of transmitting and receiving full-color video. The technology avoids several critical performance and cost problems that have plagued other attempts at video communications. This advancement in videophones is due, in part, to some very recent developments from the laboratories at Irvine-based UVC Corp., which specializes in real-time video compression.

The videophone has been designed with digital controls for most functions. High-level microcode in firmware provides adjustments for everything from color balance to audio grain. A touch keypad with preset functions is built into the videopone to allow easy and comfortable operation. The video telephone will be manufactured in California.

AWA will draw upon the talents and resources of both Aisin and Ultech to develop a variety of other video compression products for itself and for

others. The company offers comprehensive design, manufacturing and marketing services for companies wishing to add compressed digital video products to their existing product lines. Product information: A.W. & Associates, 16800 Aston St., Irvine, Calif., 92714. Tel: 714/975-7945 Fax: 714/975-7948.

NAPA, CA (NOV. 17) BUSINESS WIRE - The Crystal Geyser Water Co., the largest American owned sparkling mineral water and natural beverage company, announced Tuesday its continued belief in the strength of the natural beverage market.

''We believe this product recall by Koala Springs will not have a negative impact on the overall natural beverage industry,'' said Crystal Geyser Chairman Peter Gordon.

''Our experience from the Perrier benzene recall indicates that customers will simply switch from imported brands to American brands,'' said Gordon.

''Just as our Sparkling Mineral water was an immediate choice during the Perrier benzene recall, we see customers turning to our Juice Squeeze product line for a great tasting alternative to the recalled Koala Springs products; especially when they find out about our much higher juice content.''

''As an American company, we have to comply with very stringent regulations,'' said Gordon. ''None of our natural beverage products have any benzene. We want to reassure our customers that we have the best and safest products on the market.''

TORONTO (NOV. 13) BUSINESS WIRE - NHI Nelson Holdings International Ltd. (ASE/ToSE/VcSE:NNH) (''Nelson'' or the ''company'') Tuesday announced financial results (in U.S. dollars) for the three and nine months ended Sept. 30, 1990.

In line with the company's earlier prediction, total revenues for the third quarter were $18,407,000 compared with $30,295,000 in the third quarter of 1989. The net loss for the third quarter of 1990 was $5,162,000 compared with net income of $3,831,000 in the third quarter of 1989.

The 1990 third-quarter loss included approximately $3 million of additional amortization relating to certain television projects which had been in development and reserves relative to Nelson Vending Technology Limited (''NVT''), the company's 69 percent owned subsidiary.

After taking account of the company's preferred dividend requirements and an extraordinary item of approximately $2.1 million related to the repurchase of certain debentures, Nelson's net loss per common share was $1.38 in the third quarter of 1990 compared with net income per common and common equivalent share of 69 cents in the third quarter of 1989.

The weighted average common and common equivalent shares outstanding for the quarter were 4,334,335 compared with 4,267,075 shares in the same period a year ago.

Nelson consolidates the operating results of NVT. Approximately $3.5 million of the company's operating loss and approximately $2.2 million of the company's net loss was attributable to this consolidation during the quarter.

Total revenues for the nine months ended Sept. 30, 1990, were $54,008,000 compared with $68,526,000 for the same period in 1989. The net loss was $12,077,000 compared with a net income of $1,540,000 for the first nine months of 1989.

The loss per common share in the first nine months of 1990 and 1989, after taking account of the company's preferred dividend requirements, was $3.33 for 1990 compared with 29 cents for 1989. The 1990 weighted average common shares outstanding for the nine months was 4,334,335 compared with 3,793,933 shares in 1989.

Commenting on these developments, Chairman and Chief Executive Officer Richard Northcott, stated: ''Nelson's third-quarter performance reflects an absence

of any new titles released into either the theatrical or video market comparable to the very successful theatrical release of ''When Harry Met Sally'' and video release of ''Bill and Ted's Excellent Adventure'' in the third quarter of 1989.

NHI Nelson Holdings International Ltd. is the holding company for the Nelson Entertainment Group and for 69 percent owned Nelson Vending Technology Limited.

LOS ANGELES (NOV. 13) BUSINESS WIRE - Hotel Investors Trust, a real estate investment trust and Hotel Investors Corp., whose shares are paired and trade together (NYSE:HOT), Tuesday announced a third quarter net loss for 1990 of $3,012,000, or 25 cents per share, as compared with a net loss of $1,091,000, or 9 cents per share, for the same period last year.

Cash flow from operations (defined as income before gains on asset sales, plus depreciation and amortization) for the three-month period ended Sept. 30, 1990 was $1,006,000, or 8 cents per share, as compared with cash flow from operations of $2,579,000, or 21 cents per share, for the same period in 1989.

Hotel Investors Trust and Hotel Investors Corp. also announced a combined nine-month net loss for 1990 of $5,220,000, or 43 cents per share, as compared with a nine-month 1989 net loss of $1,335,000, or 11 cents per share.

1989 results included gains on asset sales of $156,000, or 1 cent per share. Cash flow from operations generated during the nine-month period ended Sept. 30, 1990, was $5,975,000, or 49 cents per share, as compared with $8,699,000, or 72 cents per share, for the same period in 1989.

Management attributed the widening of the third-quarter and nine-month losses to weakness in the companies' gaming operations and to increased interest expense and depreciation charges associated with acquisitions and renovations made in the past two years.

Hotel Investors Trust and Hotel Investors Corp. also announced Tuesday that they have commenced distributing proxy statements in connection with the Special Meetings of Shareholders and Stockholders scheduled for Dec. 20, 1990. These meetings are being held in order to vote upon the proposed sale of the companies' interests in 27 hotels for $152,200,000.

VANCOUVER, B.C. (NOV. 13) BUSINESS WIRE - Cornucopia Resources Ltd. and Galactic Resources Ltd. announce encouraging assay results have been obtained from deep exploratory drilling on their Ivanhoe Joint Venture on Nevada's Carlin Gold Trend.

The 1990 deep exploration drilling program in the Hatter Area, located approximately one mile east of the Hollister Deposit and consisting of four drill holes totalling approximately 6,400 feet, is now complete. Two of the holes encountered anomalous, but uneconomic, gold mineralization associated with pyritic alteration.

The final hole of the program was drilled to a depth of 1905 feet. Between 1740 feet and 1760 feet of depth, a 20-foot interval of heavily quartz-veined porphyritic rock, characteristic of intrusive rock, was intercepted. Within the 20-foot zone of mineralization, assay results indicated a five-foot interval grading 2.070 oz./ton gold and another five-foot interval grading 0.854 oz./ton of gold. Zones immediately above and below these high grade intervals contained lower grade gold values such that the entire 20-foot interval averages 0.736 oz./ton gold.

The Ivanhoe Joint Venture exploration program is funded on the basis of a 50/50% joint venture between Touchstone Resources and Ivanhoe Gold Co., which are wholly-owned subsidiaries of Cornucopia Resources Ltd. and Galactic Resources Ltd., respectively. Touchstone Resources Co. is the exploration manager on the Ivanhoe Property. Galactic Resources Ltd. owns 16.34 % of the common shares of Cornucopia Resources Ltd.

Galactic Resources Ltd. produces gold at the Ridgeway Gold Mine in South Carolina with partner Kennecott Ridgeway Mining Co. (an indirect subsidiary of The RTZ Corp. PLC) and its Ivanhoe Gold Mine in Nevada as well as its wholly owned Summitville Mine in Colorado. Galactic Resources Ltd. also has precious metal development projects in California, Canada, and the Philippines. Galactic Resources Ltd. trades on the American, Toronto, and Montreal Stock Exchanges.

Cornucopia Resources Ltd. trades on the U.S. NASDAQ System (CNPGF) an is listed on the Toronto and Vancouver Stock Exchanges (CNP.T, CNP.V).

IRVINE, CALIF (NOV. 13) BUSINESS WIRE - Russell E. Leatherby, president and chief operating officer of UniCARE Financial Corp. will assume the additional title of chairman and chief executive officer, effective Nov. 15, 1990, the company announced Tuesday.

Ralph W. Leatherby, the company founder, current chairman and chief executive officer will become chairman emeritus.

Russell Leatherby will also assume the title of chairman and chief executive officer of UniCARE Insurance Co., its principal subsidiary. Prior to being named president and chief operating officer of UniCARE in 1988 Leatherby also served as secretary, general counsel and a member of the board of directors.

Ralph Leatherby commenting on the appointment said, ''I am pleased to announce the appointment of Russ to this new post as part of an ongoing management transition plan which will provide for a continuation of the strong corporate qualities which have long separated UniCARE as an industry leader.''

''I intend to continue an active future participation in the company; however, the time has come to pass the baton to a new generation of leadership.''

UniCARE Financial recently reported record operating results for the nine months ended Sept. 30, 1990, with revenues reaching $70,739,000 and net income of $6,394,000, or $1.17 per share, compared with the prior year nine-months revenues of $52,028,000 and net income of $5,550,000, or $1.02 per share.

UniCARE Financial, through its subsidiary UniCARE Insurance, is engaged in the business of underwriting workers' compensation insurance in California, targeting larger accounts and emphasizing service to its policyholders.

#90317b0247 11/13/1990 ~Business Wire

CALGARY, ALBERTA (NOV. 13) BUSINESS WIRE - Sceptre Resources Ltd. announced Tuesday operating and financial results for the nine months ended Sept. 30, 1990; its outlook for full-year 1990 results and the company's plan to conduct an expanded 1991 capital investment program, emphasizing domestic exploration and an extensive horizontal drilling program.

Sceptre's crude oil and liquids production demonstrated significant growth through the first nine months of 1990, averaging 21,705 barrels per day, an increase of 24 percent over the 17,453 barrels per day produced during the first three quarters of 1989. The increase in oil and liquids production was

led by strong crude oil sales through the first three quarters of 1990. Crude oil production for the period ended Sept. 30, 1990, increased 32 percent to 19,311 barrels per day. The company remains confident that growth in crude oil and liquids production will be maintained through the final quarter of 1990 with full-year sales expected to average at or near 22,000 barrels per day.

Natural gas sales during the first three quarters of 1990 averaged 142.9 million cubic feet per day, a decline of six percent from 152.0 million cubic feet per day in 1989. The direct sale component of Sceptre's natural gas production continued to increase during the initial nine months of 1990 averaging 46 million cubic feet per day, up 39 percent compared to the first three quarters of 1989. However, the strong increase in direct-sale volumes was more than offset by a 17 percent decline in sales under the company's system sale contracts and by Sceptre's decision to shut in natural gas rather than aggressively discount price to compete in the depressed summer spot market.

For 1991, the company is planning an aggressive capital program of $95 million with a major emphasis on domestic exploration, particularly for natural gas, and a greatly expanded horizontal drilling program. The 1991 capital budget will be fully funded from cash flow, with a projected surplus of funds in 1991 available to continue the company's debt reduction program.

Sceptre is a large Canadian petroleum exploration, production and marketing company listed on The Toronto, Montreal and American stock exchanges under the symbol SRL.

LOS ANGELES (NOV. 13) BUSINESS WIRE - The MacNeal-Schwendler Corp. (MSC) (ASE:MNS) has again earned a listing on the Forbes 1990 list of ''The 200 Best Small Companies in America.''

MSC, a Los Angeles-based developer of computer software products for computer-aided engineering (CAE) applications, ranked 42nd on the list. The magazine's current year ranking of top small firms was published in the Nov. 12 issue.

Forbes evaluated companies nationwide with sales between $5 million and $350 million. The 200 firms that met the requirements of the Forbes list were ranked according to their five-year average return on equity. MSC earned a 24 percent five-year average return on equity (ROE shows annual profits as a percent of net worth).

MSC, with headquarters in Los Angeles, develops, markets and supports computer software products for computer-aided engineering applications. The company's principal product is MSC/NASTRAN, a sophisticated computer program used by designers and engineers to analyze the strength and dynamic response of structures or products prior to construction or manufacture.

MSC/NASTRAN is marketed worldwide through MSC's offices in the United States, the Far East and Europe.

LOS ANGELES (NOV. 13) BUSINESS WIRE - The MacNeal-Schwendler Corp. (ASE:MNS) Tuesday reported record revenues and strong earnings during the third quarter ended Oct. 31, 1990.

Revenues for the three months ended Oct. 31, 1990 were $14,422,000, an increase of 30 percent over the $11,117,000 reported for the three months ended Oct. 31, 1989. Income from operations of $4,418,000 represents a 38 percent increase over the $3,199,000 reported for the third quarter of last year.

Net income for the three months ended Oct. 31, 1990 was $3,006,000, compared with $2,283,000 reported for the same period of the prior year. Income per share of 25 cents was up 32 percent, or 6 cents per share, from the third quarter of the prior year.

The nine-month revenue figure of $40,658,000 represents a 23 percent growth

over the $33,066,000 reported for the comparable period last year. Income from operations grew to $12,038,000 from $10,131,000, an increase of 19 percent.

Net income for the nine-month period ended Oct. 31, 1990 was $8,172,000, or 68 cents per share, compared with $7,146,000, or 59 cents per share, reported during the nine months ended Oct. 31, 1989.

The MacNeal-Schwendler Corp., with headquarters in Los Angeles, markets computer software products for computer-aided engineering (CAE) applications. The company's principal product is MSC/NASTRAN, a sophisticated computer program used by designers and engineers to analyze the strength characteristics and dynamic response to structures or products prior to construction or manufacture.

BELLEVUE, WASH. (NOV. 14) BUSINESS WIRE - Thousand Trails Inc. (OTC:TRLS) Tuesday announced net earnings of $1.2 million, or 5 cents per share, on total revenues of $25.2 million for the first fiscal quarter of 1991, which ended Sept. 30, 1990.

This compares to net earnings of $1.4 million, or 6 cents per share, on total revenues of $24.9 million for the like quarter last year. Earnings declined slightly in the current quarter due primarily to a lower margin from membership sales and higher general and administrative costs.

Thousand Trails Inc. operates one of the largest membership-based destination campground resort systems in the United States. The company owns, operates and sells memberships in a network of 39 campground resorts in 15 states and in British Columbia, Canada. Over 100,000 families are members.

SAN JOSE, CA (NOV. 13) BUSINESS WIRE - Macronix Inc., the San Jose-based maker of PC fax/modem products, has signed a vendor agreement with The ASCII Group Inc. and a distribution agreement with Check Mate Computer Supplies Inc.

The Washington, D.C.-based ASCII Group is the third largest computer storefront company, with annual sales of over $1.5 billion. The ASCII Group will add more than 500 computer stores to Macronix's retail channel across the country.

ASCII is an association of independently owned computer stores. To support member stores, Macronix has also signed a distribution agreement with one of the existing ASCII Group distributors, Check Mate Computer Supplies Inc.

Check Mate, headquartered in Stoughton, Mass., is a distributor of computer supplies and accessories from over 75 manufacturers, and has a customer base of more than 10,000 dealers, VARs and retail stores.

Check Mate will be distributing the entire Macronix line of PC fax/modems, including the MaxFax 9624 and MaxFax II for desktop PCs; the MaxFax 9624LT-T for Toshiba laptops; the MaxFax 9624LT-C for Compaq's LTE; the MaxLite/PC portable for IBM-compatibles; and the MaxLite/M portable for Macintoshes.

Macronix also offers the MaxPower intelligent power strip, which is capable of automatically powering up a computer to receive a fax or modem call, then shutting it down.

Macronix Inc., based in San Jose, is composed of three strategic business units: The TeleImaging Systems Group (fax/modems, scanners), Macronix Components Group (semiconductors) and American Video Entertainment (video games).

#90317b0620 11/13/1990 ~Business Wire

NEW YORK (NOV. 13) BUSINESS WIRE - Distributed Computing Solutions (DISCOS) Tuesday announced it has licensed its UniTree file and storage management software to FPS Computing for its Model 500 family of supercomputers.

UniTree is a UNIX-based, hierarchical file and storage management system for networked, multivendor computing environments. It is the product of a 10-year development program at the Lawrence Livermore National Laboratory.

UniTree is a tool for managing large volumes of data in high-performance computing. It provides productivity gains, cost savings and enhanced efficiency in the complex, distributed, multivendor and data-intensive computing environments of the '90s.

When UniTree is installed on a supported platform and configured with appropriate storage peripherals, it provides the user with an apparently unlimited on-line storage capacity. Any client system that supports NFS and/or FTP access and provides a network interface to Ethernet, FDDI, HIPPI,

HYPERchannel or UltraNet can provide its users with access to a UniTree central file server.

FPS Computing is integrating UniTree into its new Data Management and Automated Storage Strategy (DMASS), the first integrated system for mid-range supercomputers that provides the broad information management capabilities necessary for high-end supercomputing.

DMASS is an integrated information management solution, centered on FPS state-of-the-art SPARC/RISC supercomputers, consisting of the UniTree intelligent file and storage management system, Maximum Strategy's HIPPI Data Storage System and an implementation of the ANSI X3T9.3 High-Performance Parallel Interface (HIPPI).

Distributed Computing Solutions is a division of General Atomics, a San Diego-based research and development company. DISCOS was formed in 1988 and charted to market computer software for distributed computing applications.

Founded in 1970 as Floating Point Systems, FPS Computing designs, manufactures and markets high-performance computing solutions for scientific, engineering and technical applications worldwide.

The company has one of the largest installed bases of high-performance supercomputing equipment in the industry. Its product lines include UNIX supercomputers and specialized processors. FPS corporate headquarters is located in Beaverton, Ore.

#90317b0621 11/13/1990 ~Business Wire

LAS VEGAS (NOV. 13) BUSINESS WIRE - MarCor Resorts, Inc. (MAAR/NASDAQ) today announced operating results for the third quarter and nine months ended September 30, 1990.

Revenues for quarter ended September 30, 1990 were $15,042,117, compared to $1,117,616 for the third quarter of 1989. The company reported a third quarter loss of $773,268, or $0.11 per share for the period ended September 30 1990, compared to a $483,445 or $0.07 per share loss for the third quarter of 1989. Weighted average shares outstanding were 7,494,991 and 6,469,476 for the 1990 and 1989 periods, respectively.

For the nine months ended September 30, 1990, revenues were $47,553,913

compared to $4,052,378 in 1989. The company reported a net loss of $1,001,609 or $0.14 per share compared to a 1989 profit of $109,454 or $0.01 per share for the nine months. Weighted average shares outstanding were 7,494,991 and 6,460,598 for the 1990 and 1989 periods, respectively.

The company opened its initial gaming property, the $94 million Rio Suite Hotel & Casino, on January 15, 1990. Prior year financial data are not directly comparable to current results since the opening of the Rio has had a material effect on the MarCor's financial statements, and the company changed from a fiscal to a calendar year in 1990.

On Sept. 27, 1990, MarCor announced that final regulatory approval was received for the company's acquisition of limited partnership interests in MarCor Resorts, L.P. V, the partnership which owns and operates the Rio and the 125 acre Old Vegas property in adjacent Henderson, Nevada. The transaction increased MarCor's ownership in the partnership from 34.9 percent to 95.75 percent.

In addition to being the the principal owner and operator of the nation's first all-suite hotel/casino, MarCor Resorts and controlled entities own 185 acres in the greater Las Vegas areas targeted for the development of future gaming resorts and ancillary uses.

SAN ANTONIO, TX (NOV. 13) BUSINESS WIRE - OFFICE PRODUCTS OF AMERICA INC. (NASDAQ:OPOAA, OPOAU, OPOAW) Tuesday announced the successful grand opening of its seventh Office Stop office supply warehouse store.

Located at 945 Route 2 in Warwick, R.I., the new warehouse will not only service the immediate Warwick market but is conveniently positioned to attract Providence business as well. The store occupies approximately 30,000 square feet and is located one half mile south of the Rhode Island Mall assuring consistent traffic flow.

Thomas Klimback, president and chief executive officer of OFFICE PRODUCTS OF AMERICA INC., stated: ''We are pleased to announce the successful grand opening of OFFICE PRODUCTS OF AMERICA's seventh store, which opened as scheduled. The Warwick store represents the company's first venture in the New England region.''

Klimback continued: ''The Warwick market possesses a high concentration of small- to medium-sized businesses as well as a large number of in-home offices. We are confident that the Warwick market will be an important

contributor to the company's sustained revenue growth.

''We feel very strongly that the New England area, with a population of over 13 million, is a key to the growth potential of OFFICE PRODUCTS OF AMERICA. Accordingly, it is the company's intention to open Office Stop stores in Rochester, N.Y., and Hartford, Conn., in the first quarter of calendar 1991 as well as solidify the company's niche in the Rhode Island market by opening an additional Office Stop store in Providence at a later date.''

OFFICE PRODUCTS OF AMERICA INC. operates Office Stop warehouses offering general office supplies, office equipment, office furniture and other business-related products at discounts of 30 percent to 70 percent below manufactuers' suggested retail list prices.

The company plans to open Office Stop warehouses throughout the New England, Middle Atlantic and selected South Atlantic states.

LAS VEGAS (NOV. 13) BUSINESS WIRE - Bill Gates, chairman and chief executive officer, Microsoft Corp., tops the list in Computer Reseller News' (CRN) eighth annual ranking of the 25 most influential executives in the personal computer industry.

The weekly newspaper announced the results Tuesday in Las Vegas at Comdex, the world's largest computer exposition.

Ray Noorda, chairman, president and chief executive officer of Novell Inc., came in second. Immediately trailing him were David House, president of Intel Corp.'s Microcomputer Systems Group; Rod Canion, president and chief executive officer of Compaq Computer; and Jeff McKeever, chief executive officer of MicroAge Computer Stores.

John Russell, editor-in-chief of Computer Reseller News, said Gates earned the top spot in the publication's list by virtue of his company's ''market dominance, the incredible acceptance of Windows 3.0 and sheer determination.'' Russell called Windows 3.0 ''a major technological breakthrough for ease of use for people who use IBM compatibles.''

The Microsoft chief, who also topped CRN's list four years ago, became the

first two-time winner in the newspaper's annual industry rankings.

Novell's Noorda is cited for ''nearly pulling off a startling merger with Lotus Development Corp.'' and because his company ''maintains enviable market share.''

Among the variety of personalities in this year's most influential 25 executives are two customers: Jon Rotenberg of the Boston Computer Society (23rd place), who started organizing PC users when he was 13 years old, and Block of Manufacturers Hanover Trust Co. (sixth place), who once forced vendors to sell directly to him but who is now dipping into the channel.

In other departures, CRN's rankings for the first time list -- but do not rank -- the most influential women and foreign executives in the PC industry.

Computer Reseller News, with a circulation of 65,000, is the newspaper for microcomputer and software selling. It is published by CMP Publications Inc., a leading business-to-business publisher of high-technology, health and travel newspapers and magazines.

SANTA ANA, CA (NOV. 13) BUSINESS WIRE - Gish Biomedical Inc. (NASDAQ:GISH), a developer and manufacturer of critical-care and surgical devices, announced continued revenue and earnings growth for the first quarter ended Sept. 30, 1990.

Sales for the first quarter were $5 million, up 29 percent from the previous year's $3.9 million. President Jack Brown attributed this growth to expanded marketing and Gish's innovative product designs and superior service.

Fully taxed net income for the first quarter was $435,000, or 13 cents per share, up from $247,000, or 9 cents per share, last year. Jeanne Miller, chief financial officer, attributed the continuing growth in earnings to careful management of resources. She also stated that sales and earnings are on track with analysts' expectations for the fiscal year ending June 30, 1991.

LAS VEGAS (NOV. 13) BUSINESS WIRE - Intel Corp.'s thriving entry into computer systems sales may be a major thorn in the side of other major players in the microcomputer business, but value-added resellers (VARs) and dealers consider it a blessing in disguise, VARBUSINESS magazine reported in its November issue published Tuesday and made public at the COMDEX show, the world's largest computer exposition.

With $4 billion in annual revenues and more than $2.2 billion in what analysts call ''excess cash,'' plus long-term investments, Intel certainly has the resources to be a player, said VARBUSINESS. Its Systems Group is already bringing in $1 billion a year.

Since VARs' bread and butter is customizing and integrating systems, they couldn't be happier having Intel as a supplier.

First, VARs can get bare-bones platforms from Intel and customize them to give customers the best performance and themselves the best margins. Second, this new option provides leverage for them to demand similar flexibility from other manufacturers.

The Intel platform isn't cheap, but by being able to buy at the platform level you keep more of the profits configuring a system and integrating it into a network, explained David Meek, president of Computer Education International in Margate, Fla.

Moreover, Intel's service contract makes it seem as if Intel is working for him, said Hall. ''Their service offices are everywhere. Their zone coverage is as good as anybody's in the business.''

VARBUSINESS, with a circulation of 50,000, is the magazine for value-added resellers and dealers. It is published by CMP Publications Inc., Manhasset, N.Y., a leading business-to-business publisher of high-technology, health and travel newspapers and magazines.

SAN DIEGO (NOV. 13) BUSINESS WIRE - Telios Pharmaceuticals Inc., based in San Diego, Tuesday announced that it had raised a total of $5.3 million from an additional round of venture capital financing and from A.S. Industriforsikring of Oslo, Norway.

According to Robert J. Erickson, Ph.D., president and chief operating officer, the funds will be used for product research and clinical development.

Leading the latest round of financing was A.S. Industriforsikring, a new European investor in Telios. Other major investors include Hambrecht & Quist Life Science Ventures, Hambrecht & Quist London, Delphi BioInvestments, Technology Funding Partners III, Ventana Growth Fund, Cabanco Fondkommission A.B. and Elf Technology.

To date, Telios has received nearly $22 million in private funding, and receives additional support under a multimillion-dollar product development agreement with Ono Pharmaceutical Co. Ltd. of Osaka, Japan.

The company is developing products to speed the healing of chronic and severe wounds, including treatments for ''dry eye'' (the corneal damage that results from inadequate production of tears), TGF-beta inhibitors to prevent abnormal tissue scarring of fibrotic diseases, products to control blood-clotting and biocompatible coatings for artificial implants such as vascular grafts, joint replacements and other orthopedic devices.

Founded in 1987, Telios Pharmaceuticals is developing therapeutic products based on the company's proprietary technology. Studies by its scientists have shown that the extracellular matrix - a network of molecules that surrounds all cells in the body - is critical to the way the body heals itself and combats disease. At the heart of Telios' technology is the ability to control how cells interact with this matrix.

POIPU, HI (NOV. 13) BUSINESS WIRE - The Hyatt Regency Kauai will officially open its doors on Thursday.

The 600-room, $220 million resort becomes the most important new addition to the tourism industry of the island of Kauai.

The Hyatt Regency Kauai is the first major resort property to open in almost ten years on Kauai's south shore in the Poipu Beach Resort area, and will probably be the last for many years to come. No other developments are presently on the books for that area.

Unlike the rapid development occurring on some of the Hawaiian islands, the pace of Kauai still guarantees visitors the peaceful atmosphere, small village life and quiet resort settings sought by many who come to Hawaii.

Hyatt Regency Kauai is designed to reflect the languid, tropical image of Hawaii in the 1920s and 1930s. The architectural theme is traditional, classic Hawaiian, with generous amounts of wood, tropically designed chandeliers and metalwork, open-air courtyards and even woven lauhala (pandanus) mats used as wall coverings in some areas.

A tropical theme is particularly evident in the seafood restaurant, which is a group of hales (small thatched huts) on stilts over the resort's lagoon. Lauhala walls and coconut frond roofing lashed to the framework of bamboo reflect the entire resort's old-time Hawaiian feeling.

The resort will offer four new tennis courts and a new Robert Trent Jones II golf course bordering the ocean. Two swimming pools will offer a sheltered, quiet environment and an ''action'' area fed by a river pool with a current.

An ANARA spa will open as a part of the resort -- Hyatt's second ANARA in Hawaii, the first having opened with the Hyatt Regency Waikoloa on the Big Island. The spa facility includes a lap pool and massage rooms with garden areas for outdoor massages.

Also offered at the resort will be four restaurants, a poolside lounge, a lobby lounge, a library bar where guests may check out books and play billiards, and a nightclub.

CUPERTINO, CA (NOV. 13) BUSINESS WIRE - Buying a personal computer system is often a confusing task for small businesses.

It is an equally complex task for computer specialty stores to identify and tailor solutions to solve their business problems.

On the heels of introducing the most affordable Macintosh personal computers ever, Apple USA has launched an aggressive new marketing campaign that is designed to introduce the Macintosh computer to more small business users, and at the same time provide a range of sales guides and other tools to make the buying process easier for both small business customers and U.S. Authorized Apple Dealers.

To help educate and assist customers in their purchase decisions, Apple is offering customers ''In Business with Macintosh'', a video that demonstrates how the Macintosh computer can help improve small business, and ''The Answers'', a computer buying guide. The video and guide can be obtained by calling an Authorized Apple Dealer, or toll-free at 1-800-441-3001 ext. 110.

At the same time, Apple will provide Authorized Apple Dealers with the Small Business Sales System (SBSS), a comprehensive and flexible portfolio of sales support information, including easy-to-follow solutions guides for different professions and types of businesses, unique customizable CD-ROM-based demonstrations and a prospect database.

Each participating Authorized Apple Dealer will also receive a copy of MarketPlace from Lotus Development, a new software product that allows users to create and maintain their own mailing lists. In an effort to expand their customer base and target specific customers, Authorized Apple Dealers can cull from this list of 9 million prospects by type, size, revenue and local market requirements.

For the past year Apple has successfully tested SBSS in selected areas of the U.S. The program will be rolled out through Apple USA's five regional sales operations groups, and will start with Authorized Apple Dealer training.

Apple's print advertising aimed at small businesses contains the 800 number for customers to call and obtain ''In Business with Macintosh'' and ''The Answers''. The video and guide also will be available through participating Authorized Apple Dealers. For more information on SBSS, Authorized Apple Dealers can contact their regional Apple sales representative.

NEW YORK (NOV. 13) BUSINESS WIRE -Information Management Technologies Corp. (''IMTECH'') (NASDAQ: IMTKA (Class A Common), IMTKU (Units), IMTKW (Class A Warrants)) Tuesday announced unaudited results for the second quarter and six months ended September 30, 1990. In August 1990, IMTECH completed a private placement of equities, with gross proceeds of $1,245,000. Proceeds were applied to the repayment of certain existing loans. In the second quarter ended September 30, 1990, there was a non-recurring charge associated with bridge loans of $184,834. Net income, before the bridge loan expense, reached $209,902 in the three months ended September 30, 1990. Pierce Lowrey, Chairman and CEO of IMTECH commented, ''We are gratified to have achieved our tenth consecutive quarter of record sales and to have maintained the profitable operations reached in the first quarter of 1991. We were able to make this progress by both expanding the services we provide to our current customers, including American Express and Barclay's Bank, and by securing contracts with new customers such as Oppenheimer & Co., Backoffice Services, Mudge Rose Guthrie Alexander & Ferdon and Knight-Ridder.

''COINS (Computer Output INformation System), IMTECH's optical disk data storage system, made an important contribution to sales and profitability in the second quarter. We closed several important dealer/distributor agreements and during the second quarter and the early portion of the third quarter, such major companies including IBM, Philips Electronics, Ltd., Campbell Soup Company, Merrill Lynch and the American Stock Exchange purchased COINS for on-line data storage at a fraction of the cost for magnetic or paper storage.''

Mr. Lowrey concluded, ''We continued to reduce our costs and effectively utilize our staff and equipment in the second quarter. We anticipate that cost of sales and selling, general and administrative expenses will continue to decline as a percentage of sales. Our current product mix, together with careful cost control and expected sales increases, will continue to contribute to our efforts to achieve increasingly profitable growth.'' IMTECH provides on-site and off-site information facilities management ("IFM") services, turning many of its clients' ''back-office'' operations into revenue producers while minimizing seemingly limitless support functions. IMTECH allows its clients to focus on their primary business by providing a wide range of services including reproduction, printing, word processing, electronic publishing, fulfillment, records management, facsimile management and general mailroom operation.

SAN ANTONIO, TX (NOV. 13) BUSINESS WIRE - Advanced Telecommunications Corp. (NASDAQ/NMS:ATEL) (ATC), the nation's largest regional long distance telephone company, has been awarded a contract for inbound 800 service for the State of Texas, Department of Highways and Public Transportation.

The estimated value of the two-year contract is in excess of $500,000.

ATC Long Distance will provide inbound 800 services for the Department's Central Permit Office in Austin. The toll-free service is used by commercial truckers to contact the State's transportation department to secure a permit to travel on Texas state highways.

ATC Long Distance expects to carry more than 75,000 calls monthly for the transportation department from all over the United States. The contract is significant because all three national carriers, AT&T, MCI Communications and US Sprint, bid for the contract.

ATC Long Distance serves more than 300,000 business and residential customers in eight southern states. In Texas, ATC has offices in 27 communities from San Antonio to Amarillo.

ATC operates a nationwide digital fiber optic network providing a full range of telecommunications services, including 1+ dialing, WATS, inbound 800 services, international calling, video teleconferencing, operator services, calling card, private channel service capable of voice video and data transmission, and voice mail services through ATC MessageCentre.

ENGLEWOOD, CO (NOV. 13) BUSINESS WIRE - Nu-West Industries Inc. (NASDAQ:FERT) announced a net loss of $1 million, or 12 cents per common share, for the three months ended Sept. 30, 1990, compared to a consolidated net loss of $7.8 million, or 58 cents per common share, for the three months ended Sept. 30, 1989.

Net product sales were $24.5 million for the current quarter compared to $25.1 million for the comparable prior year period. Prior year results include losses attributable to the company's Gulf Coast subsidiaries prior to their disposition in the third quarter of the prior fiscal year.

On a pro forma basis for Conda operations only, results for the three months ended Sept. 30, 1989 were a loss of $2.6 million on sales of $18.5 million.

Nu-West President and Chief Executive Officer, Craig Harlen, stressed that a steady recovery in the phosphate fertilizer market in recent months was again evidenced by the significant improvement in both product demand and pricing in the quarter just ended vs. the same period a year ago.

Harlen indicated that the company was progressing on a program of diversification at its Conda operations and expected to have further information on its progess in the near future.

Nu-West is engaged in the manufacture and sale of phosphate fertilizer products.

#90317b0644 11/13/1990 ~Business Wire
LAWRENCEVILLE, NJ (NOV. 13) BUSINESS WIRE - Multi Soft Inc. (NASDAQ:MSOF), Tuesday announced that INFRONT, a front-end development tool for mainframe applications, is being shown in the Compaq Computer Corp. booth at the Comdex convention in Las Vegas Nov. 12-15.

Multi Soft also described a variety of potential activities with Compaq including: distributing application notes and enabling information to Compaq dealers about the role PCs play in the terminal replacement market; conducting briefings for Compaq's major accounts about cooperative processing opportunities; pooling resources for trade shows, such as the highly successful effort at Comdex in Paris; and, displaying INFRONT technology at

Compaq's Executive Breifing Center in Houston.

Steve Flannigan, vice president of Strategic Industry Relations for Compaq Computer Corp., noted the features and flexibility of INFRONT. ''The use of INFRONT software with an appropriately featured 386SX- or 286-based COMPAQ DESKPRO PC provides outstanding levels of productivity and flexibility. Our combined technologies will address customer needs in the terminal replacement market,'' said Flannigan.

That market, according to Jon Rubin, Multi Soft's director of Reseller/Distribution Operation, offers a huge potential pool of customers. ''Compaq understand these customers very well. A recent study by International Data Corp. in Framingham, Mass. points out that many organizations are ready to replace their aging 327x terminals with PCs and software like INFRONT. As organizations move towards fuller implementations of cooperative processing, Multi Soft has all the tools they will need.''

Rubin added, ''Compaq ofers a wide range of the most desirable features for cooperative processing PCs today. Their COMPAQ DESKPRO line of 386SX- and 286- based PCs are appropriate platforms for organizations adopting cooperative processing by replacing their 3270 terminals. We are happy to see Compaq recognize the importance of effective software leveraging that PC investment.''

Multi Soft Inc. (NASDAQ:MSOF) is a subsidiary of Multi Solutions Inc. (NASDAQ:MULT) and has provided state-of-the-art cooperative processing software and solutions for production operating platforms and communications environments since 1985.

For more information about Multi Soft and its products, please contact Gerry Jurrens at Multi Soft 609/896-4100.

HOPKINTON, MA (NOV. 13) BUSINESS WIRE - EMC Corp. announces an additional model to its Symmetrix Series of Integrated Cached Disk Arrays (ICDA).

The new model, 4204, offers 4 gigabytes of disk storage, up to 1.5 gigabytes of cache, and a 3880/3990-type storage controller all within a 3.5 square foot cabinet.

EMC introduced the first of the Symmetrix series in late September which made the company the first to market with a RAID (Redundant Arrays of Inexpensive Disks) technology product, 12 to 24 months ahead of IBM and Storage Technology.

According to the Gartner Group Inc., ''Symmetrix is an auspicious start for EMC's initial entry into the high-end DASD mainframe market...The initial feedback has been extremely positive especially in performance-critical environments.'' The technology provides users with capacity, performance and reliability improvements over the traditional DASD technology.

Symmetrix will allow 4300 and 9370 computer users to store and retrieve more information more quickly, reliably, and cost-efficiently than ever before. Symmetrix actually expands on the RAID concept of combining disk arrays, controllers and large amounts of cache, resulting in an Integrated Cached Disk Array (ICDA) system.

Symmetrix appears to the system as an IBM 3880 or 3990 control unit and emulates 3380 or 3390 storage devices. It also appears totally transparent to the host computer, or Central Processing Unit (CPU).

Egan said EMC is able to introduce its version of RAID first because the company is an established producer of the technologies from which Symmetrix evolved and because EMC is exclusively devoted to computer storage, currently providing the world's broadest mainframe and midrange storage product line.

EMC's Symmetrix Series of Integrated Cached Disk Arrays now includes the following models:

Model	Disk Capacity	Cache Capacity	Footprint
4204	4 GB	1.5 GB	3.5 sq. ft.
4408	8 GB	4 GB	5.0 sq. ft.
4416	16 GB	4 GB	5.0 sq. ft.
4424	24 GB	4 GB	5.0 sq. ft.

EMC Corp. supplies innovative, high performance storage products and related services for midrange and mainframe computers worldwide.

     #90317b0647 11/13/1990 ~Business Wire
SANTA CLARA, CA (NOV. 13) BUSINESS WIRE - Valisys Corp. and Applied Computer Solutions Inc. (ACS) Tuesday announced a technology transfer and product development agreement.

Under the terms of the agreement, each company will share its key technologies to jointly develop a unified product combining the ACS Variation Simulation Analysis (VSA) software and the Valisys design engineering product which includes geometric dimensioning and tolerancing (GD&T) checking and Softgauge

creation.

As a result, design and manufacturing engineers will be able to access a single computer aided design (CAD) data base for all variation and tolerance analysis.

VSA uses statistical simulation techniques to predict and control the amount of variation that can occur in an assembly due to specified design tolerances, fixturing tolerances and assembly methods. The software predicts assembly variations and product quality before component parts are manufactured.

Designed to work in conjunction with CAD systems, Valisys software is a modular set of software solutions for design engineering, manufacturing engineering, quality assurance, production and inspection applications.

Valisys software aids designers and manufacturers by verifying a design's manufacturability, communicating tolerance information directly to the shop floor and creating optimum inspection paths for coordinate measuring machines (CMMs).

Located in St. Clair Shores, Mich., Applied Computer Solutions Inc. is an engineering software development and consulting services company. Founded in 1981, the company designs and provides engineering and management solutions to predict, control and reduce variations in the design and production of complex mechanical assemblies.

Valisys Corp. is a software developer and consulting services company headquartered in Santa Clara. Founded in 1987, the company is a subsidiary of FMC Corp.

#90317b0649 11/13/1990 ~Business Wire

BERKELEY, CA (NOV. 13) BUSINESS WIRE - Thoratec Laboratories Corp. Tuesday announced financial results for its third quarter ended Sept. 29, 1990.

Sales of the Thoratec VAD System in the third quarter of 1990 were lower than product sales in the third quarter of 1989, though sales for the first nine months of 1990 were 31 percent higher than those in the like period of 1989, primarily because of new users of the Thoratec System in 1990 and continued sales of the disposable portion of the System.

Total revenue for the third quarter of 1990 was 78 percent lower than total revenue in the third quarter of 1989, due to the offsetting effects of increased product sales and decreased contract research and development revenues in 1990 and an asset sale and settlement of a dispute in 1989.

The comparisons of both total revenue and net income for 1990 and 1989 are heavily impacted by two 1989 transactions: a $1.2 million gain from a technology sale and a $5 million extraordinary gain from debt restructuring.

Because of lower contract revenues and the technology sale in 1989, total revenue for the first nine months of 1990 was 47 percent lower than total revenue inthe first nine months of 1989. Also because of the technology sale, debt restructuring and dispute settlement in 1989 net income for the first nine months of 1990 was significantly lower than net income for the like period in 1989.

Excluding these factors, results from operations improved from a $1,086,000 loss in the first nine months of 1989 to a $559,000 loss in the like period of 1990.

Results from operations in 1990 were improved from those in 1989 because of cost savings related to the technology sale. However, because of the continuing losses, the company is exploring sources of additional working capital loans for ongoing operations.

Net loss for the third quarter of 1990 was $358,000 (per share: 8 cents primary and fully diluted) and for the first nine months was $554,000 (per share: 16 cents primary and fully diluted).

Net income for the third quarter and first nine months of 1989 was $281,000 (per share: 1 cent primary and fully diluted) and $5,431,000 (per share: 37 cents primary and 35 cents fully diluted), respectively. All per share amounts reflect the deduction of accrued but unpaid preferred dividends.

EMERYVILLE, CA (NOV. 13) BUSINESS WIRE - At the annual meeting of Cetus Corp. (NASDAQ:CTUS) held in Emeryville Monday, Chairman and Chief Executive Officer Ronald E. Cape told shareholders that the two most pressing issues for the company are gaining U.S. Food and Drug Administration approval for the anticancer drug Proleukin interleukin-2, and establishing strategic alliances that will ensure the long-term development of our pharmaceutical business.

Reduction of current operating losses is another important priority, according

to Renton. He noted that expenses were lower due to the recent staff reduction at Cetus and he pointed to the growth in product revenues from European sales of Proleukin and from the PCR business. Renton also noted that strategic alliances are a way of obtaining co-funding for pharmaceutical research and development, which currently is funded almost entirely by Cetus.

During the business portion of the meeting, incumbent directors James J. Kerley, Gordon C. McKeague and Hollings C. Renton were elected by stockholders to serve three-year terms beginning this year.

Kerley and McKeague have served as directors since 1985 and 1977, respectively and were elected previously by stockholders. Renton was appointed by the board of directors in August 1990.

Separately, the board of directors authorized the exercise of the purchase option for all of the limited partners' interests in Cetus Healthcare Limited Partnership II. The option is exercisable between Dec. 15, 1990 and Jan. 15, 1991. It would require an initial payment of $4,267,000 in cash and the issuance of 1,051,700 shares of common stock, plus subsequent installment payments based on sales of certain products.

Cetus Corp. applies the tools of biotechnology and the science of immunology to the development of novel pharmaceutical products. Founded in 1971, Cetus is based in Emeryville, and also operates EuroCetus in Amsterdam, The Netherlands.

SAN FRANCISCO (NOV. 13) BUSINESS WIRE - The Bank of America board of directors has named Barbara L. Rambo an executive vice president.

With the bank since 1974, Rambo manages its United States Division Eastern Region. Based in New York City, she is responsible for corporate relationships throughout the eastern and midwest regions of the United States.

''Barbara brings a great blend of marketing skills and product knowledge to the corporate marketplace,'' Executive Vice President David A. Coulter, head of the United States Division, said.

He praised Rambo's ''excellent leadership skills'' and ''outstanding relationship management ability,'' noting that she has made ''consistently valuable contributions'' to strengthen the bank's position in the eastern United States.

Rambo, 38, has spent her entire career with Bank of America in New York. She

joined the bank as a credit trainee in 1974, next worked as a lending officer, and has since served in a full range of corporate office assignments.

She became a vice president in 1980 and a senior vice president in 1987. She headed the Northeast/Southeast Institutional Group until October, when she assumed responsibility for the United States Eastern Region as well as the global energy and airlines groups. Fluent in French and Spanish, Rambo holds a bachelor's degree in international affairs from the College of William and Mary in Williamsburg, Va., and an MBA in finance from New York University. She is a member of the board of directors of the Roundabout Theatre. She and her family live in New York City.

IRVING, TX (NOV. 13) BUSINESS WIRE - ICL Inc., based here, Tuesday announced receipt of a $5.7 million supply contract award from Army and Air Force Exchange Services (AAFES).

Under terms of the contract, AAFES will install ICL 2170 electronic cash registers and ICL 2200 point-of-sale systems in its outlets throughout the world. AAFES will use the ICL equipment in retail, food service and restaurant, automotive and specialty operations, including contract concessions, fast food franchises, package stores, military clothing stores and personal services operations.

Product deliveries are expected to begin immediately and continue through 1996.

AAFES, headquartered in Dallas, operates 5,600 retail facilities, 1,900 food facilities, and 5,400 personal services concessions such as barber and beauty shops, and dry cleaning services.

ICL Inc. is the North American division of ICL, a wholly-owned subsidiary of the $4.4 billion STC PLC, London. The company provides integrated information systems to supermarket, specialty and home center retailers in North America. STC PLC and Fujitsu Ltd., Tokyo, on July 30 announced that Fujitsu will take an 80 percent stake in ICL. The transaction is expected to be completed on Nov. 30.

#90317b0656 11/13/1990 ~Business Wire

SCOTTSDALE, AZ (NOV. 13) BUSINESS WIRE - Xsirius Superconductivity Inc. (NASDAQ:XSCIA) has successfully performed initial tests of an important new laser measurement system that could lead to significant improvements in the quality of advanced components at microwave frequencies.

The measurement system will also provide information essential to the longer-term development of ultra-high frequency technology in the millimeter wave and terahertz frequency region. This region is the next area into which advanced radars, satellite communications, high-speed computer and fiber optics technologies are moving.

Xsirius Superconductivity's results demonstrate the viability of making this system available on a commercial basis. Due to the highly specialized nature of the system and market cost to end users, the company anticipates that it may offer measurement services to third parties commencing in 1991. Additionally, the company has filed a patent application on the system with the U.S. Patent and Trademark Office.

''This measurement system could be very useful for production of high performance superconducting compounds,'' commented Dr. Daniel R. Cohn, senior research scientist and division head at the Plasma Fusion Center at MIT and a scientific advisor to Xsirius Superconductivity. ''It fits very nicely with the balanced Xsirius program to develop microwave applications and longer-term applications of superconductivity at higher frequencies.''

Xsirius Superconductivity's program is bolstered by the company's superconductive materials operation in Israel and by its strong patent position. The company is at the forefront of microwave materials technology, measurement capability and component design.

The new laser measurement system was developed by Xsirius Superconductivity in collaboration with scientists at the University of Lowell Research Foundation, under the direction of Dr. P. P. Woskov. Woskov is a scientific consultant to Xsirius Superconductivity. Woskov and his co-workers will describe the new system in a paper to be presented to the 15th International Conference on Infrared and Millimeter Waves in December.

Xsirius Superconductivity is one of the few publicly traded companies dedicated exclusively to the commercial development of superconductivity technology. The company's strategy is to develop near-term superconductive products and procedures as well as next-generation technologies. Xsirius Superconductivity is headquartered in Scottsdale, Ariz., with a majority-owned subsidiary in Jerusalem, Israel.

#90317b0666 11/13/1990 ~Business Wire

HOUSTON (NOV. 13) BUSINESS WIRE - Global Natural Resources Inc. (AMEX:GNR) Tuesday reported net income of $300,000, or 1 cent per share for the third quarter ended Sept. 30, 1990, compared with net income of $168,000, or 1 cent per share for the third quarter of 1989.

The third quarter 1990 results include one-time expenses of approximately $1.1 million, or 5 cents per share related to the settlement of a lawsuit.

Total revenues were $17.8 million for the quarter ended Sept. 30, 1990, compared with revenues of $10.4 million for the like quarter in 1989.

For the nine months ended Sept. 30, 1990, net income was $4.9 million or 22 cents per share compared with net income of $61,000 for the like period in 1989. Revenues for the first nine months of 1990 were $43.3 million, an increase of 58 percent over 1989 nine-month revenues of $27.5 million.

For the nine-month period, cash flow increased 109 percent; $25.7 million compared to $12.3 million reported in the like period in 1989.

The 1990 results include a cash distribution of $4.6 million, or 20 cents per share in the second quarter from Investment Properties International, a real estate investment trust currently in liquidation, and of which Global currently owns 47 percent. No such distribution was received in 1989.

Global Natural Resources Inc. (AMEX:GNR) is an international energy company. GNR's diversified operations include exploration, development and production, and transportation of oil and gas. The company's major operations and markets are located in North America.

International operations include: an interest in an Indonesian oil and gas production venture; participation in the first oil production joint venture in the Soviet Union; an oil exploration and development joint venture in Argentina; and oil and gas exploration licenses in Turkey.

BIRMINGHAM, AL (NOV. 13) BUSINESS WIRE - LifeSouth Inc. Tuesday reported net income of $150,286 and revenues of $802,512 for the quarter ended Sept. 30, 1990, and net income of $604,618 and revenues of $2,322,401 for the nine months ended Sept. 30, 1990.

Frank O'Neil, director of Corporate Communications, said that the net income figure for the nine months ended Sept. 30, 1990 included an extraordinary item of $113,941 attributable to the recognition of the tax benefit of a net operating loss carryforward.

In addition, O'Neil pointed out that more and more consumers and insurance agents are becoming aware of LifeSouth's innovative PROActive health plans. LifeSouth Inc. offers hospitalization and major medical health insurance principally to individuals and specialized groups in Alabama.

LifeSouth's PROActive health plans are available to individuals who lead a healthy lifestyle and meet stringent underwriting criteria. LifeSouth's group insurance is offered to licensed health care professionals and their employees.

#90317b0670 11/13/1990 ~Business Wire
HOUSTON (NOV. 13) BUSINESS WIRE - Enron Oil & Gas Co. (EOG) announced Tuesday that it has filed a registration statement with the Securities and Exchange Commission relating to concurrent United States and international public offerings totaling 4,100,000 primary shares of common stock.

The lead underwriters are Goldman, Sachs & Co.; Donaldson, Lufkin & Jenrette Securities Corporation; The First Boston Corporation; Morgan Stanley & Co. Incorporated; and Prudential-Bache Capital Funding.

EOG is currently an 84 percent owned subsidiary of Enron Corp. Upon completion of the proposed offerings, Enron Corp. will own 80 percent of the company's outstanding common stock. EOG will use the net proceeds to prepay long-term debt due Enron Corp. and for other general corporate purposes, including capital and exploration expense expenditures.

''This completes our plan to sell 20 percent of the outstanding common stock of EOG,'' said Forrest E. Hoglund, EOG Chairman and CEO. ''Sixteen percent was sold in October 1989, and this offering represents the second step or the

sale of an additional 4 percent.''

The last reported sales price of EOG's common stock on the New York Stock Exchange on Nov. 9, 1990, was $27.375 per share.

The registration statement has been filed with the Securities and Exchange Commission but has not yet become effective. Such shares of common stock may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This announcement shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these shares in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

EOG is one of the largest independent (non-integrated) oil and gas companies in the United States in terms of domestic proved reserves. The company's reserve base is 91 percent domestic and 91 percent natural gas. The company is listed on the New York Stock Exchange and is traded under the ticker symbol ''EOG.''

BALTIMORE (NOV. 13) BUSINESS WIRE - Allied Research Corp. (NASDAQ:ARAI) has received a $10.6 million contract for 105mm armor piercing tungsten dart ammunition (APFSDS).

The contract is an addition to a recently-announced award of $24.3 million for the same 105mm product.

According to Reinald W. Carter, president, the contract raises Allied Research's backlog to $71 million. The company reported a $27 million backlog at the end of June.

At the time the first contract was awarded in October, Allied Research said it expected additional interest from countries planning to upgrade their tanks' firepower performance.

The ammunition is designed for a variety of main battle tanks and light armored vehicles, including the French AMX 30 tank and the U.S. M60 and M48 tanks. Additionally, the Mecar 105 round is matched to all American, French and British 105mm guns. A 100mm variant of the Mecar round is available for the T50 series of Russian and Chinese tanks.

Allied Research Corp. is a leading developer and producer of ammunition systems, supplier of engineering services to defense departments worldwide and designer of advanced products and systems for industry.

CONCORD, NC (NOV. 13) BUSINESS WIRE - Cabarrus Savings Bank Inc. (OTC: CASB) announced Tuesday the termination of its non-binding letter of intent with Carolina First Bancshares Inc., dated July 31, 1990, which had proposed the merger of Cabarrus Savings Bank and Carolina First.

William K. Philpot Jr., president of Cabarrus Savings Bank, stated: ''We are disappointed that Cabarrus Savings Bank and Carolina First were unable to reach a final agreement to merge these two fine institutions. However, current economic and industry conditions prevented us from resolving some of the differences between us and made it prudent that we discontinue negotiations at this time.''

Cabarrus Savings Bank also announced that is has pending with the North Carolina Banking Commission an application to convert from a North

Carolina-chartered savings associations to a North Carolina chartered bank.

Philpot further stated: ''We are optimistic that our application will be approved and look forward to taking advantage of the new opportunities created by converting to a bank.''

WESTFORD, MA (NOV. 13) BUSINESS WIRE - Concurrent Computer Corporation today announced its Series 7000 systems, entry level real-time UNIX (RTU) computers. By providing this entry level product, Concurrent now enables real-time technology to penetrate extremely price-sensitive application areas. Series 7000 systems, based on Motorala's MC68040 microprocessor, are particularly well-suited for embedded run-time applications such as medical imaging, simulation, training and process control. The new systems allow real-time focused resellers to take advantage of the high level of integration in the Motorola chipset and the added value of several real-time hardware/software facilities. Based on the small 6U VMEbus form factor, which offers the advantage of a more rugged design to better withstand vibration for field or mobile applications, Series 7000 systems will be available in two new five-slot and 21-slot 6U packages as well as the existing 9U chassis. The Series 7000 systems allow a much wider group of users access to Concurrent's real-time implementation of its enhanced UNIX operating system, the RTU operating system, as well as real-time performance at workstation prices.

The Series 7000 systems expand Concurrent's position as a broad-range supplier of standards-based, high-performance, real-time systems to resellers. The multi-processing capability is key for developing deterministic, high throughput solutions because of the need to dedicate compute and I/O resources to critical tasks. A dual VMEbus supports the multi-processing capability by providing the up-to-50MB/sec throughput required for demanding digital and analog data processing.

Among the many advantages of the Series 7000 to resellers is the opportunity to work with a team of proven real-time experts when configuring their products for time-critical and throughput-critical applications. At starting prices of $14,500, resellers can incorporate real-time technology at aggressive prices, and provide applications that may not have been cost

effective in the past.

Concurrent Computer Corporation, headquartered in Tinton Falls, New Jersey, is the leading supplier of high-performance, real-time computer systems worldwide. The company's products, marketed through its Commercial Markets, Simulation/Training and Real-Time Technical Sytems Groups, provide real-time solutions to the financial, communications, public sector, techical, aerospace and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

#90317b0697 11/13/1990 ~Business Wire

WESTFORD, MA (NOV. 13) BUSINESS WIRE - Concurrent Computer Corporation today announced it has received excellent response from third-party vendors interested in porting to Concurrent's new real-time UNIX Series 7000 computer systems. The Series 7000 system is one of the first multiprocessor systems based on Motorola's 68040 microporcessor making it one of the fastest UNIX systems available today.

To date, the following third-party vendors have signed an agreement of intent to port their products to Concurrent's new 68040-based platform; many others are in the process:

Acucobol--Acucobol's ACUCOBOL-85 compiler brings a wide range of commercial applications for users.

Amerinex Artificial Intelligence--Amerinex's KBVision is a family of modules which provide an image research and development environment.

Celadon--Celadon's fresco is a fully integrated image processing management system.

DSP Development Corporation--DSP's DADiSP provides users with a graphical spreadsheet for scientific and engineering data analysis.

Empress--Empress' EMPRESS relational database management system and 4GL products provide a wide range of applications.

Entropic Research Laboratory--Entropic's ESPS provides signal processing capabilities and waves+ is a graphical user interface.

IBUKI--IBUKI's Common Lisp package IBCL for Common Lisp programmers provides a full range of machine-independent tools for use in the development and

delivery of symbolic computing applications.

Informix--Informix's relational database management system and 4GL related products are especially designed for application building.

Laboratory Technologies Corp.--Labtech Control and Labtech Notebook products for the technical market provide process monitoring and control software.

Morning Star Technology--Morning Star's Horizon products are a package of software and hardware for IBM connectivity.

Signal Technology--Interactive Laboratory System (ILS) is a signal processing application package.

Softport Systems, Inc.--Providing their office automation software products LinkMARC and WordMARC.

UniPress Software, Inc.--UniPress Q-Calc RealTime Spreadsheet, UniPress MasterPlan Project Management software and UniPress Emacs Programmer's Editor with language sensitive versions for programming in FORTRAN, C, C++, and Ada.

V.I. Corporation--V.I. Corporation's Dataviews is a set of graphical user interface development tools for dynamic data display.

Vmark Software, Inc.--Vmark's uniVerse is a multi-user, multi-tasking, relational database management system and application development environment.

VMIC--VMIC will be porting various VME I/O boards.

Concurrent Computer Corporation, headquartered in Tinton Falls, New Jersey, is the leading supplier of high-performance, real-time computer systems worldwide. The company's products, marketed through the Commercial Markets, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the financial, communications, public sector, technical, aerospace and simulation markets. #90317b0699 11/13/1990 ~Business Wire

ATLANTA (NOV. 13) BUSINESS WIRE - D&B Software Advanced Manufacturing International (AMI) announced Tuesday its AMAPS Finite Scheduling System, a real-time finite scheduling system that enables manufacturers to quickly and easily determine the best production schedule to achieve multiple business

objectives simultaneously.

Most significantly, the AMAPS Finite Scheduling System enables manufacturers to determine the production schedule which will best achieve multiple business objectives simultaneously (e.g., on time customer delivery and maximum production throughput; highest quality and lowest cost). The system reviews orders (demand for product) and resources (production capacity) to calculate the best schedule (sequence of orders) to satisfy user-defined business objectives.

The net result for the manufacturer is increased accuracy in both scheduling and inventory tracking; reduced work-in process; and, most critically, improved production throughput.

The system has two primary touchpoints with MRP II. The system links with the standard AMAPS shop floor systems for short-interval scheduling, detailing activities in minutes. Additionally, it links with master production schedulng for advanced planning activities, where the time frame is more typically in weeks and months.

At this level, the system provides one of the last major functional components for those manufacturers and distributors who are moving toward comprehensive sales and operation planning (SOP) solutions. AMI also has plans in place for finite scheduling links to other mission critical systems.

The system is initially offered on the Digital Equipment Corp. VAX-VMS family of computers. It is written in easily-transportable C++. Future plans are to migrate the system to an IBM 386/486 workstation.

The AMAPS Finite Scheduling System will be available in December. Price begins at $100,000 and ranges to $300,000, depending on system configuration.

D&B Software, a division of The Dun & Bradstreet Corp., is the world's largest provider of financial, human resource, materials management and manufacturing software solutions, tools and services. D&B Sofware was formed in 1990 by the merger of two software industry giants, Management Science America Inc. and McCormack & Dodge Corp. D&B Software is a member of Digital's Cooperative Marketing Program (CMP) and Rdb Solutions Vendor Program (RSVP). The company serves more than 10,000 customers worldwide, including 75 percent of the Fortune 500.

D&B Software Advanced Manufacturing International (AMI) is a unit of D&B Software. AMI is a leading developer and worldwide supplier of application software and services designed specifically for manufacturing industries.

#90317b0703 11/13/1990 ~Business Wire

PORTLAND, ME (NOV. 13) BUSINESS WIRE - The Board of Directors of North East Insurance Company (NASDAQ Symbol:NEIC), a Portland, Maine-based property - casualty insurer, terminated its previously announced Agreement and Plan of Merger with Mega Group, Inc. (NASDAQ Symbol:MGIN), a Delmar, New York-based insurance brokerage and agency concern, due to the failure to consummate the agreement prior to its expiration date of October 31, 1990.

Robert G. Schatz, President and Chief Executive Officer of North East, stated, ''When we entered into a merger agreement with Mega in December, 1989, we believed the combination of the two companies was a good fit, but we recognized that Mega needed to clear a number of significant hurdles to complete the transaction. Unfortunately, events have proven that those hurdles were higher than anticipated.''

Commenting on the recent performance of the North East Group, Mr. Schatz continued, ''Anticipated losses in our New York business have stabilized as projected, and our overall results continue to be positive. Through the end of the third quarter unaudited results of the Group indicate earnings of $.03 per share for the quarter and $.20 for the nine months. Book value per share as of September 30, 1990 was $2.73. We continue to implement new products and see positive growth for our core business in Maine,'' Mr. Schatz concluded.

BAYONNE, NJ (NOV. 13) BUSINESS WIRE - Pamrapo Bancorp Inc., the holding company for Pamrapo Savings Bank, S.L.A., reported net income of $404,163, or 23 cents a share, for the third quarter of 1990, compared with net income of $522,425 for the same quarter of last year.

For nine months ended Sept. 30, 1990, net income was $1,778,108 or $1.03 per share, compared to $1,845,287 during the compatible period of 1989. The bank's provision for loan losses was $265,000 for the nine months ended Sept. 30, 1989 compared to $370,000 for the nine months ended Sept. 30, 1990.

As of Sept. 30, 1990 Pamrapo's total assets were $363,136,066, an increase of 43 percent over the total assets of a year earlier. The bank's total equity to total asset was 10.5 percent at Sept. 30, 1990.

RONKONKOMA, NY (NOV. 13) BUSINESS WIRE - PDK Labs Inc. (NASDAQ Symbol:PDKL) announced Tuesday that it has offered to purchase (i) the entire mailing list of Sturdee Health Products Inc. (''Sturdee'') and Bio Organic Brands Inc. (''Bio'') for the United States, and (ii) substantially all of the assets of Sturdee, Bio and Sturdee Co. (''Sturdeeco'').

Sturdee, Bio and Sturdeeco are affiliated entities that sell and market their brand name vitamins and nutritional supplements primarily through mail order sales. Sturdee and Bio had combined U.S. sales of approximately $10 million for fiscal year 1989 and has a combined mailing list of approximately 390,000 active customers.

PDK Labs Inc. (the ''company'') notes that it had not signed definitive agreements, and that its offer is contingent on numerous factors outside of the company's control. Specifically, the company's offer is subsequent to a competing offer that has previously been made by another, larger public company.

Additionally, any offer to purchase the mailing lists and other assets of Sturdee, Sturdeeco and Bio is expressly subject to (i) the approval of the court presiding in connection with a matrimonial proceeding relating to the sole shareholder of Bio, and (ii) the appointment of a conservator for Leo Kerpen, the sole principal owner of Sturdee and Sturdeeco, by the court presiding over Kerpen's estate, whereupon the conservator must then choose among the various offers.

Accordingly, because of the various uncertainties relating to the company's ability to effect the transaction, the company has made its offer expressly contingent upon obtaining all requisite approvals prior to March 31, 1991. Thereafter, the company shall not be obligated to proceed. The aggregate purchase price to be paid by the company is to be determined by a formula on the closing date.

The company manufactures and distributes over-the-counter products and vitamins, principally through direct mail order catalogs. The company's line of products primarily consists of non-prescription caffeine products, pain relievers, decongestants, diet aids and a broad line of vitamins, nutritional supplements and cosmetics.

Perry D. Krape, the company's president, noted that ''Bio's and Sturdee's mailing lists and assets would be a good fit with the company's existing business, as well as serve to favorably diversify the company's product line.''

SAN DIEGO (NOV. 13) BUSINESS WIRE - Gensia Pharmaeuticals Inc. (NASDAQ:GNSA) Tuesday announed the presentation this month of four abstracts describing the effects of Arasine (formerly called ARA-100) in preclinical models of cardiovascular disease.

Three abstracts will be discussed at the 63rd Annual Meeting of the American Heart Association (AHA) in Dallas, Nov. 12-15 with a fourth abstract presented at the 24th Meeting of the Association for Academic Surgery, Nov. 14-17 in Houston.

The results of preclinical research with Arasine sponsored by Gensia at Columbia University, New York University School of Medicine, Osaka University (Osaka, Japan), and the University of Michigan will be described at these meetings, according to David F. Hale, president and chief executive officer.

Another abstract involving preclinical research with Arasine sponsored by Gensia and performed at St. Thomas Hospital in London, was presented at The Oxford International Symposium on Myocardial Preservation into the 21st Century at Oxford, England, during August.

Based on these and other preclinical studies, Gensia believes that Arasine may significantly reduce ischemic damage (caused by a lack of blood flow to tissues) associated with coronary artery bypass graft (CABG) surgery.

Clinical research has shown that significant ischemia occurs in CABG surgery patients and that this ischemia appears to be predictive of adverse clinical outcome.

Gensia estimates that there were approximately 390,000 CABG surgeries performed in 1989 in the United States and 600,000 performed worldwide.

Gensia is a San Diego-based biopharmaceutical company formed to discover, develop manufacture and market novel drugs for the treatment and diagnosis of human diseases.

NASHVILLE, TN (NOV. 13) BUSINESS WIRE - Northern Telecom (NYSE:NT) announced Tuesday that the company's 10,000th digital radio system has been purchased by MCI Communications Corp. (OTC:MCIC).

According to MCI, digital radios represent an integral portion of the transmission equipment deployed throughout its network to provide voice and data communications services.

MCI has pruchased a variety of digital radios from Northern Telecom. The most recent is the RD-6C, an advanced, second-generation six gigahertz high-capacity digital radio with a capacity of three DS-3 signals or 2,016 equivalent voice circuits per channel.

The radios employ forward error correction techniques which dramatically reduce or completely eliminate errors due to varying weather conditions on a radio transmission path. These capabilities allow this digital radio system to operate with performance comparable to optical fiber networks.

MCI owns and operates the world's second largest communications network, employing advanced fiber optics, digital microwave, satellite and digital switching technologies. The company provides a full range of global telecommunications services to businesses, residences and government agencies.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities and other institutions. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people around the world.

RICHMOND, VA (NOV. 13) BUSINESS WIRE - Hilb, Rogal & Hamilton Co. (NASDAQ: HRHC) Tuesday announced the completion of a local insurance agency by its Pittsburgh subsidiary.

Terms were not disclosed.

According to Robert H. Hilb, president of Hilb, Rogal and Hamilton Co., the

subsidiary acquired substantially all the assets of a local insurance agency. The company's Pittsburgh office acquired the insurance agency business of Hager Associates Inc.

Hilb commented, ''This acquisition represents part of Hilb, Rogal and Hamilton Co.'s plan for orderly growth by acquisitions. Our local office found this candidate and negotiated the transaction on terms favorable to all parties. And of course, we expect to reap the benefits of certain economies of scale achieved through combining operations.''

Hilb, Rogal and Hamilton Co. provides insurance agency services to a wide variety of clients through its network of wholly owned subsidiaries which operate 40 insurance agencies located in 16 states and the District of Columbia. The company is traded on the NASDAQ National Market System, symbol, HRHC.

RICHARDSON, TX (NOV. 13) BUSINESS WIRE - CONVEX Computer Corp. Tuesday announced a complete visualization solution called ConvexAVS, which provides an interactive visualization environment that gives scientists, engineers, and technical professionals the ability to use advanced graphics and imaging techniques without graphics programming.

ConvexAVS is the company's implementation of the widely accepted, emerging standard Application Visualization System (AVS).

ConvexAVS provides an application framework that enables users to see the results of their calculations quickly and efficiently. The vector/parallel architecture of C Series supercomputers means rapid turnaround times for three-dimensional processing. Engineers and scientists gain a faster and more accurate perception of fluid flows, molecular behavior, and stress distribution through visual representations.

Available in the first quarter of 1991, ConvexAVS will be field-tested in a variety of applications at the University of Arizona, Tucson; the University of California at Irvine; and Los Alamos National Laboratory, Los Alamos, N.M. The product provides solutions for visualizing supercomputer application results in such areas as computational chemistry, image processing, molecular biology, fluid dynamics, mechanical engineering, and geophysics.

The AVS standard is also supported by workstation manufacturers Digital Equipment, Evans & Sutherland and Stardent Computer. The CONVEX implementation of AVS broadens this availability by integrating the power of

the C Series Supercomputer with graphics desktop devices ranging from Macintosh personal computers to high-performance workstations using standard networks as well as X-based DEC systems connected to CONVEX via DECnet.

In addition to ConvexAVS, the company offers the CONVEX CXwindows system which provides a common user interface for all displays on a network. With CONVEX CX/Motif, users also can expect a consistent look and feel from one display device to another and from one application to another.

Another aspect of CONVEX's visualization strategy is HDTV technology. Currently, more than 15 electronics firms and consortiums in Japan, Europe and the United States have selected CONVEX supercomputers to be used in these research efforts. CONVEX systems supply fast CPU processing power, large memory, and fast input/output--all critical components in this research. The company also provides specially designed, high-speed, direct digital video input and output channels.

CONVEX Computer Corp., a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical processing, computational chemistry, computer-aided engineering, image and signal processing, aerospace simulations and molecular biology. CONVEX, which is listed on the NYSE with the symbol CNX, has sold some 750 systems in 34 countries. The installed base now represents more than half a billion dollars of cumulative revenues from more than 400 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network around the world.

SAN DIEGO (NOV. 13) BUSINESS WIRE - Gensia Pharmaceuticals Inc. (NASDAQ:GNSA) Tuesday released its financial results for the 1990 third quarter.

Gensia reported a net loss of $4 million, or 31 cents per share in the 1990 third quarter compared with a loss of $2.9 million, or 33 cents per share in the 1989 third quarter. Interest income was $861,000 in the third quarter of 1990 compared to $186,000 in the third quarter of 1989.

Research and development expenses were $4 million in the 1990 third quarter and $2.3 million in the comparable 1989 period. General and administrative expenses were $843,000 and $638,000 in the 1990 and 1989 third quarters, respectively.

For the first nine months of 1990, Gensia reported a net loss of $9.8 million, or 86 cents per share vs. $7.4 million, or 98 cents per share in the 1989 comparable period.

As of Sept. 30, 1990, the company had working capital of $39.4 million primarily consisting of cash, cash equivalents and short-term investments.

Arasine is an intravenous drug under development by Gensia for use in the hospital for the treatment of acute cardiovascular ischemia (lack of blood flow to the heart's tissues).

The initial indication being pursued with the drug is reduction of ischemic damage in patients undergoing coronary artery bypass graft surgery.

The ESA System consists of a novel drug, arbutamine and a computer-controlled drug delivery devices. The ESA System is being developed to administer a pharmacological stress test to enhance the diagnosis and evaluation of coronary artery disease when used in conjunction with electrocardiography (ECG), echocardiography and radionuclide imaging.

Gensia is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel pharmaceutical products for the diagnosis and treatment of human diseases.

WHITE PLAINS, NY (NOV. 13) BUSINESS WIRE - Software Artistry Inc., an Indianapolis-based computer software development and support company, has been named an IBM Cooperative Software Supplier (CSS) under the IBM Cooperative Software Program.

As a CSS, Software Artistry has published and licensed three products -- PC Expert Professional(a), Application Software Expert(a), and the Knowledge Engine(a). Both Software Artistry and IBM will market these products.

PC Expert Professional is an entry-level expert system application development tool for the business professional with no programming expertise. It will run on the DOS-based IBM Personal System/2(b) (PS/2(b)).

Application Software Expert (ASE) is a fifth-generation programming language allowing the rapid development of platform-independent applications combining graphics, data base access, expert systems and procedural programming. ASE is available on PS/2 running on DOS, the IBM 4680(b) family of point-of-sale hardware and Application System/400(b) (AS/400(b)).

The Knowledge Engine is a hypermedia development environment that can be used to create ''intelligent documents'' for use in help desks, tutorial systems, executive information systems and other applications. It is available on the PS/2 and the AS/400.

BOSTON (NOV. 13) BUSINESS WIRE - Clinical Data Inc. (NASDAQ:CLDA) announced Tuesday operating results for the second quarter and six months of fiscal 1991.

For the three month period, Clinical Data reported revenues of $3,180,000 vs. $1,999,000 in revenues one year ago, an increase of 59 percent. Net income was $132,000 or 5 cents per share, as compared to a net loss of $181,000, or (6 cents) per share, in the second quarter last year, an increase of 173 percent.

Revenues for the six months ended Sept. 30, 1990 were $5,807,000 as compared to $3,968,000 in the corresponding period of the prior year, an increase of 46 percent. The company had a net income for the six months ended Sept. 30, 1990

of $311,000, or 11 cents per share, vs. a net loss of $326,000 or (11 cents) per share, for the six months ended Sept. 30, 1989, an increase of 200 percent.

Israel M. Stein, MD, president of Clinical Data, commented, ''The strength of the last quarters performance is primarily the result of improvements in the revenues and profitability derived from our Dutch subsidiary. Our recently announced purchase of an increased equity position in Vital Scientific NV should futher allow us to benefit from their improved performance in the coming quarters.''

Clinical Data Inc. is a multinational medical company offering services and products for pharmaceutical research, hospital laboratories and the physician's office. The company's Dutch subsidiary, Vital Scientific NV, designs and manufactures blood chemistry instrumentation which is marketed worldwide by E. Merck.

The company, through its Drug Research Services Division, has developed ambulatory monitoring technology used in cardiovascular pharmaceutical research.

#90317b0744 11/13/1990 ~Business Wire

MINNEAPOLIS (NOV. 13) BUSINESS WIRE - The S & M Co. Tuesday announced sales and net income for the third quarter and nine months ended September 30, 1990.

Third quarter revenues amounted to 4,765,000, six percent lower than the $5,054,000 of the same quarter a year earlier. Net income amounted to $49,000 or three cents a share, compared with $48,000 last year.

Nine month revenues reached $12,814,000 off five percent from the $13,550,000 of the same period on 1989. Net income rose to $23,000, or two cents a share, versus a loss of $52,000, or three cents a share for the same period a year earlier.

The S & M Co. President, John P. Sieff, said third quarter sales were down due to continued slow replacaement tire sales and consumer hesitation stimulated by the crisis in the Middle East.

For the 18 months previous to September 30, 1990, wholesale tire prices decreased approximately seven percent, Sieff explained. This, plus the closing of an unprofitable Mr. Tire retail service center in May, 1990 were the principal reasons for the decline in nine month sales. In addition, Sieff explained, the company discontinued most of its line of automotive products which reduced sales versus the year ago.

Sieff indicated that despite pressure on profitability due to declining wholesale tire prices, S & M's gross profit margin increased for the first nine months of 1990. Profitability was aided by increased margins at the company's wholly-owned Lyndale Hardware Company.

Operating profits increased in the three and nine month periods due to tight control of overhead.

Looking toward the future, Sieff said the company was better positioned to take advantage of the changing markets for replacement tires and hardware than a year ago. He said he was optimistic because weak periods in the economy usually meant increased replacement tire demand in the past. He said S & M Company sales for October, 1990 were even with those of the same month a year ago.

The S & M Co. is a wholesale and retail distributor of tires, batteries and related auto parts with warehouses in Minneapolis, MN and Des Moines, IA. The company operates company-owned Mr. Tire Auto Service Centers. S & M's Lyndale Hardware Company is one of the largest ''Old Fashioned'' hardware stores in the Midwest.

#90317b0745 11/13/1990 ~Business Wire

CAMBRIDGE, MA (NOV. 13) BUSINESS WIRE - BioTechnica International Inc. (NASDAQ:BIOT) announced Tuesday its financial results for the third quarter of 1990.

Revenues were $3.0 million for the third quarter ended Sept. 30, 1990, as compared to $4.0 million for the third quarter of 1989, and $21.6 million for the nine months ended Sept. 30, 1990, as compared to $25.8 million for the nine months ended Sept. 30, 1989.

As reported in previous quarters, the decrease in revenues for the quarter and year to date results primarily from a redirection of the company's product mix away from forage and other lower-margin seeds in favor of more profitable corn and soybean lines. Soybean revenues declined compared to 1989 as a result of a wet spring that delayed planting and reduced midwest soybean acreage.

Net loss for the quarter was $4.3 million, or ($0.25 per share) as compared to $4.9 million, or ($0.56 per share) for the third quarter of 1989, and $9.1 million for the first nine months of 1990 as compared to $8.6 million for the first nine months of 1989.

The reduced loss for the third quarter 1990 compared to 1989 is partially the result of interest income from $23 million in funding which was received in December, 1989 to be utilized to repurchase the company's outstanding 8 3/4 percent publicly traded Convertible Subordinated Notes. As of Sept. 30, 1990 $8.5 million of these notes remain outstanding.

BioTechnica International is an agricultural bioproducts company dedicated principally to the development of value-added seed, grain and grain products by means of the company's advanced proprietary technologies, and to production and marketing of these products through its established commercial subsidiaries.

#90317b0749 11/13/1990 ~Business Wire

ARDSLEY, NY (NOV. 13) BUSINESS WIRE - With the aim of broadening CIBA-GEIGY's international shareholder base the company opened the registered shares to non-Swiss investors in May this year.

The following actions which include a sponsored American Depositary Receipt (ADR) program and the use of integrated clearing, registration and settlement systems are designed to make trading in CIBA-GEIGY's shares more effecient and are expected to further enhance the company's presence in the international capital markets.

1. Sponsored ADR program

CIBA-GEIGY AG has received clearance from the U.S. Securities and Exchange Commission to set up a sponsored ADR program for its registered shares. Morgan Guaranty Trust Co. will act as depositary bank. The program, which will be activated in New York on Nov. 13, 1990, is structured so that 50 ADRs represent one registered share with a par value of 100 Swiss Francs; they will be traded over-the-counter on the pink sheets. By means of an arrangement with Morgan Guaranty, CIBA-GEIGY shares can be converted into ADRs and vice versa through the Euroclear Operations Centre in Brussels and Cedel in Luxembourg. The ADRs make CIBA-GEIGY registered shares more accessible to a wide range of investors in the United States.

2. International Clearance Procedures of Registered Shares

Standardized registration and clearance procedures of CIBA-GEIGY registered shares are now possible for investors outside Switzerland via Euroclear and Cedel. This will permit the shares to be settled on a book entry, delivery receipt against payment basis.

The company's shares are currently listed in Switzerland.

CIBA-GEIGY Limited is engaged primarily in the discovery, development, manufacture and marketing of a wide variety of pharmaceuticals, agricultural and specialty chemicals, and vision care products. With international headquarters in Basel, Switzerland, CIBA-GEIGY has more than 92,000 employees in 60 countries.

Its 1989 sales totaled $12.6 billion, an increase of 17 percent, with net income of $955 million. The U.S.-based CIBA-GEIGY Corp. with headquarters in Ardsley, N.Y., is the largest of the group companies worldwide. It had 1989 sales of $3.5 billion, accounting for approximately 30 percent of international revenues. It employs 18,000 people nationwide and has facilities in more than 30 states.

#90317b0750 11/13/1990 ~Business Wire

NEWTON, MA (NOV. 13) BUSINESS WIRE - Biotechnology Development Corp. (NASDAQ Symbol: BIOD) (''BDC'') Tuesday announced that its board of directors has authorized the repurchase of up to 10 percent of the company's common stock on the open market when conditions are suitable.

At Sept. 30, 1990, 3,050,512 sares of BDC common stock were outstanding.

BDC also announced consolidated revenues of $747,118 and a consolidated net income of $22,238, or one cent per share for the three month period ending Sept. 30, 1990. In the corresponding period of 1989 the consolidated revenues were $516,012 and the net income was $77,699, or 2 cents per share, including income of 5 cents per share for a non-recurring item.

For the nine month period ending Sept. 30, 1990, consolidated revenues were $2,183,437 and net income was $290,047, or 10 cents per share. In the corresponding period of 1989 revenues were $1,760,593 and the net loss was $203,873, or 7 cents per share including a 5 cent per share income for a non-recurring item.

Our Microfluidics Corp. subsidiary (''Microfluidics'') has achieved acceptance for its unique, patented formulation/mixing systems in the food, pharmaceutical, chemical, cosmetic, and biotechnology industries, and enjoys record inquiry rates and backlog entering our fourth quarter. Sales and profit for all of 1990 are expected to exceed substantially any previous year. Our cash position has improved significantly.''

With the implementation of our successful customer/prospect seminar program, completion of development of our full line of manufacturing systems, and the sustained high level of interest in large systems, we are confident of continuing the excellent results of this year.''

Biotechnology Development Corp. is a source of innovative equipment and technology for the biotechnology and process industries.

The company's common stock is traded over-the-counter under the NASDAQ Symbol BIOD.

#90317b0753 11/13/1990 ~Business Wire

NEW YORK (NOV. 13) BUSINESS WIRE - Ameriscribe Corp. (NYSE:ACR), a leading provider of reprographic facilities management services to law firms and corporations, today reported net income from continuing operations of $310,000 for the quarter ended Sept. 30, 1990.

In the same three months of 1989, the company's net income from continuing operations was $174,000. Total net income for the recent quarter was $476,000 or $0.15 per share, after an extraordinary tax benefit of $166,000.

Total net income for the third quarter of 1989 was $366,000, or $0.16 per share, and included income from discontinued operations of $192,000. Average common and common equivalent shares outstanding were 3,347,000 and 2,841,000 for the quarters ended September 30, 1990 and 1989, respectively.

Ameriscribe attributed the earnings improvement to strong revenue growth at its operating subsidiary, Ameriscribe Management Services, mostly due to new facilities management installations. The company also said it is experiencing operating margin growth resulting from ongoing expense control efforts.

For the nine months ended Sept. 30, 1990, Ameriscribe reported net income from continuing operations of $411,000, compared with $539,000 for the same period of 1989. The decrease reflected an aggregate of $1,137,000 of non-recurring charges, of which $837,000 related to the company's recently completed refinancing and included $437,000 of interest on interest paid at the time of the retirement in full of the company's outstanding public debentures, and $300,000 in employee severance expense.

Total net income for the recent nine months was $30,000, or $0.08 per share, reflecting a $547,000 extraordinary loss on early extinguishment of debt and an extraordinary tax credit of $166,000. For the nine months ended Sept. 30, 1989, the company reported total net income of $2,649,000, or $1.02 per share, including a net gain of $2,228,000 on the disposal of a discontinued operation.

The 1990 third quarter operating income of Ameriscribe Management Services (excluding holding company expenses, taxes and discontinued operations) was $1,806,000, or 22.8% above the same 1989 period. For the nine months of 1990, AMS' operating income was $5,171,000, or 15.7% ahead of the prior year period.

Ameriscribe Corp., formerly known as Service Resources Corp., is the holding company for Ameriscribe Management Services Inc. (AMS). AMS staffs and operates in-house duplicating facilities, mail/messenger centers and facsimile services for law firms, accounting firms, investment banks and major corporations. AMS has also expanded in recent years, adding services related to its basic business, including commercial and appellate printing and litigation support. The common stock of Ameriscribe Corp. is traded on the New York Stock Exchange and Boston Stock Exchange under the symbol ''ACR''.

BOYNTON BEACH, FL (NOV. 13) BUSINESS WIRE - The formation of NATIONAL AUCTION SALES CO. is announced by George Richards and Robert Smith.

NATIONAL AUCTION SALES CO. specializes in the sale of Real Estate, Personal Property, and the handling of business liquidations. The company is located in Boynton Beach, Fla. at 1325 South Congress Ave., Suite 106.

Richards and Smith have a combined track record of over 25 years experience in the auction industry. Both were most recently with the Miami based firm, ''Auction Co. of America.'' Richards was the executive vice president with the previous firm and was the leading salesman for six years.

Smith was senior vice president and the senior auctioneer. Their combined team effort documented sales in excess of $100 million.

This team effort is the successful force which instilled the two to formulate NATIONAL AUCTION SALES CO.

''Auctions are an accepted means to sell anything,'' says Richards. ''With the current economic conditions in our country you will see more auctions on a National basis.''

''The economy today has forced the public to choose reliable and honest representation. Robert and I have always believed that service and honesty is the key to success,'' Richards stated.

Currently the NATIONAL AUCTION SALES CO. staff is actively coordinating 15 auctions to be conducted prior to 1991. An upcoming auction contains over 89 properties located in Dade, Broward, Orange, Seminole and Polk Counties scheduled for late November.

LONDON (NOV. 13) BUSINESS WIRE - British Gas plc (NYSE:BRG) announced Tuesday it has launched a company that will market worldwide an advanced software package developed by British Gas North Eastern.

The package can be used to design and build computer systems. The technology, known as Integrated Computer Aided Software Engineering, brings to the design of computer programs the skills widely used in the engineering industry for designing cars and other machinery.

The new company, Information Architects Ltd, a subsidiary of British Gas, includes both British Gas specialists who first developed the software and others who have wider business and marketing experience in this area. The new company is based in Windsor, Berkshire.

The Managing Director, John Lowry, said, ''Information Architects has been established to market an innovative and highly successful product which already has a proven track record.''

British Gas is a major user of information technology and has for many years exported technical software as part of its overseas consultancy work. This is the second software company to be launched by British Gas this year. The first, Cogsys, is designed to monitor the operations of complex industrial plants.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten ordinary shares.

MARLBORO, MA (NOV. 13) BUSINESS WIRE - Stratus Computer Inc., a leading vendor of fault-tolerant systems for critical online business applications, Tuesday announced that it has signed a third-party software agreement with ASA International Ltd. of Westboro, Mass.

Under the agreement, ASA will port its ShopKeeper shop floor data collection

software product to Stratus' XA2000 family of Continuous Processing Systems.

The availability of this new application on Stratus' systems will bolster the computer maker's position in the manufacturing market, where the demand for reliable, online data collection systems is emerging as a key trend in the 1990s. ShopKeeper is a family of integrated application modules, each of which provides online, real-time data collection for specific shop floor applications, such as time and attendance, labor reporting, work-in-process tracking, inventory control, and machine monitoring.

The combinaion of Stratus' fault-tolerant systems, which provide 24-hour-a-day continuous operations, and ASA's ShopKeeper software allows manufacturers immediate and ensured access to information they need to run the most strategic aspects of their businesses more effectively.

One of the fastest-growing companies in the industry, Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent from $265.3 million in 1988. The company, whose headquarters are in Marlboro, Mass., has 13 international subsidiaries. Stratus Computer Inc. common stock is traded via the New York Stock Exchange and the Boston Stock Exchange under the trading symbol SRA.

HAUPPAUGE, NY (NOV. 13) BUSINESS WIRE - Orbit Instrument Corp. (NASDAQ:ORBT) Tuesday announced the results of operations for the quarter ended Sept. 30.

Orbit reported net earnings for the quarter ended Sept. 30 of approximately $523,000 (6 cents per share) on net sales of approximately $15,329,000, as compared to net earnings of approximately $528,000 on net sales and approximately $15 million.

Earnings per share for the prior fiscal quarter includes $161,000 (2 cents per share), resulting from an extraordinary gain in connection with the company's branded apparel segment.

The following is a summary of the comparative results of operations for the three months ended Sept. 30, 1990, and Sept. 30, 1989.

Orbit is a Long Island-based manufacturer of customized electronic components and subsystems for military and non-military governmental applications.

Its subsidiaries are Orbit Semiconductor, which is a state-of-the-art manufacturer of customized semiconductors servicing the high reliability and quick turn-around markets; and USA Classics Inc., which designs, manufacturers and sells men's, women's, and children's apparel, particularly active wear and outerwear, under various licensed trademarks pursuant to license agreements with the trademark owners.

Trademarks used by USA Classic include ''Everlast,'' ''Nautica,'' and ''B.U.M. Equipment.'' A subsidiary of USA Classic is a designer, importer and distributor of men's and boy's leather garments using the ''Philippe Monet'' trademark.

STAMFORD, CT (NOV. 13) BUSINESS WIRE - Citizens Utilities Co. posted record high earnings per share, net income and revenues for the third quarter, nine and 12 months ended Sept. 30, 1990, it was announced Tuesday by Leonard Tow, chairman and chief executive officer.

These results continue Citizens' record of uninterrupted earnings growth for 46 years.

Net income for the third quarter ended September 1990 was $27.2 million or 60 cents per Series A and Series B share. Net income for the 1989 third quarter was $24.4 million or 53 cents per Series A share and 54 cents per Series B share, adjusted for intervening stock dividends.

Operating revenues for the current period were $97.5 million, up from $90.9 million for the comparable 1989 quarter.

For the nine-month period ended Sept. 30, 1990, net income was $69.9 million or $1.55 per Series A and Series B share. Net income for the same period in 1989 was $62.1 million or $1.34 per Series A share and $1.36 per Series B share, adjusted for intervening stock dividends. Revenues were $274.0 million vs. $249.6 million for the comparable period last year.

For the 12 months ended Sept. 30, 1990, net income was $96.5 million or $2.14 per Series A and Series B share. Net income for this 12-month period in 1989 was $85.5 million or $1.84 per Series A share and $1.88 per Series B share, adjusted for intervening stock dividends. Citizens' revenues for the 12 months were $363.0 million, compared with $327.2 million for last year's 12-month period.

Citizens Utilities (NASDAQ) is a diversified operating public utility providing telecommunications, electric, gas, water and wastewater services to nearly 506,000 consumer connections in 12 states: Arizona, California, Colorado, Hawaii, Idaho, Illinois, Indiana, Nevada, Ohio, Pennsylvania, Utah and Vermont.

BRANFORD, CT (NOV. 13) BUSINESS WIRE - Robert F. Tobey has been appointed group vice president-international of Echlin Inc. (NYSE: ECH). The appointment was announced by President C. Scott Greer.

Tobey assumes the operating responsibilities for Echlin's automotive divisions in Europe; its Central and South American subsidiaries in Mexico, Venezuela, Brazil, and Argentina; its South African and Australian businesses; and its exporting and import services operations in the United States.

Tobey had been Echlin's vice president-corporate development since 1985, with primary activities in the merger and acquisition area. He joined Echlin in 1979 as manager of special projects.

Prior to 1979, Tobey was with Price Waterhouse, and held tax positions at RKO

General and General Electric Credit Corp.

Tobey is a Certified Public Accountant with M.B.A.-Finance and B.S.-Accounting degrees from the University of Bridgeport. He and his family reside in Madison, Conn.

Echlin is a worldwide manufacturer and distributor of motor vehicle replacement parts, with annual sales of $1.6 billion.

#90317b0779 11/13/1990 ~Business Wire

MEMPHIS, TN (NOV. 13) BUSINESS WIRE - Insituform of North America Inc. (NASDAQ:INSUA (Class A Common Stock)) Tuesday reported financial results for the third quarter and nine months ended Sept. 30, 1990.

Total revenues for the third quarter were $5,815,133 compared to last year's $6,060,401. Third quarter net income was $354,521, or $.05 per share compared to $1,545,665, or $.20 per in last year's third quarter.

For the nine months ended Sept. 30, 1990, total revenues were $16,126,331,as compared to $16,457,811 in the first nine months of 1989. Net income was $1,332,877 or $.17 per share in the first nine months of 1990 versus $3,111,025 or $.40 per share in the same period one year earlier.

Results for the third quarter and nine months period in 1989 reflect a $776,000 refund of import duties and resultant interest that INA had paid in prior years, which was accounted for as other income.

The company stated that the decline in revenues in the third quarter was due to a continuing softness in contract award activities experienced by many of its licensees. This was reflected in a decline in both volume of InsitutubesR shipped to licensees and in royalty income during the period.

At the same time, completion of the development of the NuPipeR technology and its attendant market introduction expenses increased as the company's subsidiaries NU-PIPE Inc. (U.S.) and NU PIPE Limited (U.K.) continued to perform demonstration installations of this new product. These expenses totaled approximately $724,000 for the third quarter and $2,130,000 for the nine months of 1990 vs. $389,000 and $970,000, respectively for the same periods in 1989.

As previously announced, due to the discontinuance of negotiations to consummate the purchase of the controlling interest in CERBCO Inc., INA recorded a charge against earnings in the third quarter resulting from

expenses incurred in connection with the transaction and INA's legal and financial review of CERBCO and its subsidiaries. The third quarter charge was approximately $342,000; the company does not expect charges to earnings in future quarters as a results of this abandoned transaction.

In commenting on the results, James D. Krugman, chairman of the board, stated, ''The decrease in earnings represents the maximized expense level in our NuPipe commercialization effort. Coming, as it did, with the abandonment by the Eriksons of our negotiations for the acquisition of control of CERBCO, our earnings are not up to our expectations.

''With the appointment of Will Willis as CEO of our company, we look forward to an accelerated introduction of our new product and increased leadership from Memphis for our licensees. While the impact of the economic slowdown may continue to affect us in the future, we anticipate more focused efforts which should result in an improved financial performance during the coming year.''

INA provides state-of-the-art techniques for the reconstruction of deteriorated pipelines utilizing the InsituformR Process. In addition, INA furnishes its present network of thirteen United States licensees (including INEI) with the InsitutubeR, resins and other related products used by them in the rehabilitation of pipeline systems throughout the country, and is a center of research and development for trenchless pipeline rehabilitation processes.

Through a wholly-owned subsidiary, NU-PIPE, Inc., INA plans to introduce the NuPipeR Process in the near future. INA serves the needs of America's infrastructure.

NATICK, MA (NOV. 13) BUSINESS WIRE - Waban Inc. (NYSE:WBN), operator of HomeClub and BJ's Wholesale Club, Tuesday announced improved third quarter financial results.

Sales rose 18.1 percent to $606 million during the 13 weeks ended Oct. 27, 1990 and totaled $1.8 billion for the first three quarters of the year, up 18.4 percent from 1989.

Net income for the third quarter reached $6.8 million, or 24 cents per share, an 8.2 percent improvement over the $6.3 million, or 22 cents per share, earned last year. This brings year-to-date net income to $15 million or 53 cents per share, compared to net income of $21.6 million, or 76 cents per share, recorded during the first three quarters of 1989.

''We are very pleased with the progress we are making in the implementation of our long-term programs,'' commented John F. Levy, Waban president and chief executive officer. ''We are making substantial improvements in both of our businesses geared to building sales through enhanced service to our customers. It is heartening to see this improvement in our results coming even sooner than we had anticipated.''

Third quarter sales at Waban's HomeClub division totaled $323 million, a 17.6 percent increase over 1989, and aggregated $981 million year-to-date, up 20.8 percent. HomeClub's operating income totaled $11.4 million for the third quarter vs. $8.5 million a year ago. Year-to-date, HomeClub's operating income totals $29.6 million compared to $32.7 million last year.

''At HomeClub, our increased level of customer service, supported by an aggressive marketing program, has driven sales and operating margins upward,'' continued Levy. ''The costs associated with these programs are now beginning to be outweighted by higher sales volume and improved gross margins. We are off to a great start and are very optimistic about achieving the even greater measures of customer service we have targeted as our goal.''

Sales at BJ's Wholesale Club were up 18.6 percent over last year to $283 million for the quarter and for the first three quarters of the year rose 15.5 percent to $794 million. BJ's recorded operating income of $2.5 million for the third quarter compared to $3.6 million in 1989. Year-to-date BJ's operating income totals $3.3 million vs. $9.6 million last year.

''Same-store sales volume at BJ's Wholesale Club continues to show strength despite the weakened economy in the Northeast,'' added Levy. ''As we have noted before, the absence of surcharge income formerly paid by non-fee paying members negatively affected our margins over the first three quarters of the year. However, the fourth quarter should benefit, as did the fourth quarter last year, from the annual payment of membership fees from a large portion of our memership base. During the third quarter we opened three new clubs and expect to open two additional clubs over the remaining three months.''

Waban Inc. is a major participant in the rapidly growing field of warehouse retailing through its HomeClub and BJ's Wholesale Club businesses. HomeClub is one of the nation's leading merchandisers of home improvement products at everyday low prices, operating 65 warehouses in 10 western states. BJ's Wholesale Club, which currently operates 27 clubs in the eastern United States is a low-cost, low-margin, high-volume, membership-oriented distributor of food and general merchandise.

NORTHVALE, NJ (NOV. 13) BUSINESS WIRE - John H. Klein, president and chief operating officer of Zenith Laboratories Inc. (NASDAQ:ZENL), a New Jersey based company reported a net, after-tax profit of $233,000 or 5 cents per share in the third quarter of 1990, compared to a loss of $3,178,000 for the comparable period in 1989.

Sales and gross margins for the third quarter were $11,856,000 and $4,154,000 respectively, representing a 287 percent improvement over the gross margin of $1,073,000 in the third quarter of 1989.

The company reported a net, after-tax profit of $2,124,000 in the nine months of 1990, compared to a loss of $7,733,000 for the comparable period in 1989. Revenues for the nine months of 1990, compared to 1989 have increased 61 percent, $38,159,000 1990 compared to $23,651,000 1989.

During the nine months of 1990 the company has continued to increase its expenditures in Research & Development. Expenditures in the nine months of 1990 were 114 percent over 1989. The company continued to view product development as a key strategic element of our future profitable growth.

In September the company announced the signing of an agreement to co-market a major diuretic/antihypertensive product currently pending FDA approval with Geneva Generics, a Colorado based pharmaceutical company.

#90317b0791 11/13/1990 ~Business Wire

LAS VEGAS (NOV. 13) BUSINESS WIRE - Siemens Nixdorf Information Systems announced Tuesday the addition of a new mid-level desktop model to its line of personal computers in the United States at COMDEX booth number 616-622.

The Siemens Nixdorf PCD-R series provides customers with greater slot expandability and disk drive options than the company's compact PCD-B and PCD-M series.

Three models, scheduled for first quarter 1991 availability, offer a range of processor and drive options. The PCD-3RSX with one Megabyte of memory is based on the Intel 80386SX 20MHz microprocessor, and the PCD-3R with 4MB memory and an 386/25MHz processor, can be equipped with a single 3.5-inch or 5.25-inch flex drive and a fixed disk.

The PCD-4R incorporates the powerful 80486/25MHz processor and comes with five drive bays for disk and tape drives. Future PCD-R PCs will include processing speeds up to 50MHz.

All PCD-R personal computers feature six open expansion slots and transparent drive doors with security locks. CPU board memory upgrades of up to 16MB for the PCD-3SX and up to 32MB for the PCD-3R and PCD-4R are also available.

In addition to expanded drive and slot options, the PCD-R series, like all Siemens Nixdorf PCs, is based on the slot-CPU concept. Slot-CPU refers to a passive backplane architecture in which the processor, memory and controllers are contained on a single plug-in board, allowing for quick and easy upgrades in both processing power and memory.

Other Siemens Nixdorf PCs available include the PCD-B series of ultra-compact personal computers with 286/12MHz or 386SX/16MHz processors, while the PCD-M provides processors from 286/12MHz up to 486/25MHz in a compact size.

The PCD-T, meanwhile, offers users at the high end a deskside configuration that can accommodate seven disk or tape drives, and comes equipped with up to seven expansion slots. Slot-CPU boards available for the PCD-T include 386SX-20MHz, 386/25MHz with cache, 386/33MHz with cache, and 486/33MHz.

Siemens Nixdorf Information Systems develops and markets computer systems products for the United States market. With more than 90 sales and service locations and 900 employees, it is a subsidiary of Siemens Nixdorf Informationssysteme AG of Munich, Federal Republic of Germany, Europe's largest computer company, employing over 50,000 employees in 45 countries.

LOS ANGELES/NEW YORK (NOV. 13) BUSINESS WIRE - H.F. Ahmanson & Co. (NYSE:AHM) and The Home Savings Bank (NASDAQ:HMSB) jointly announced Tuesday that the merger of HMSB with a subsidiary of H.F. Ahmanson & Co., parent company of Home Savings of America and The Bowery Savings Bank is expected to be consummated on Nov. 19.

The definitive agreement, which was announced on Apr. 2, 1990, calls for each share of HMSB common stock to be exchanged for 1.3889 shares of Ahmanson common stock at the close of the transaction.

Ahmanson and HMSB have waived their rights to cancel the merger due to Ahmanson's common stock price. Under the terms of the agreement, either Ahmanson or HMSB could have terminated the transaction due to the price of Ahmanson's common stock.

Richard A. Kraemer, chairman, president and chief executive officer of HMSB said, ''After meeting with our attorneys and financial advisors, our Board of Directors concluded that in spite of the decline in the price at which the shares of Ahmanson were trading over the past three months, the transaction provides long-term value to our shareholders. The merger will bring added benefits as well to the customers and communities we presently serve.''

Richard H. Deihl, chairman and chief executive officer of Ahmanson stated, ''The reasons for completing this transaction are the same today as when we entered into the agreement. The decline in the stock market and the price of our common stock should not preclude the consummation of the merger.''

''This transaction not only will provide additional capital, which helps us reach FIRREA's fully phased-in capital requirements more quickly, but it will also enable us to expand our operations in the New York metropolitan area,'' he added. ''We believe in the long-term economic strength of New York and its continuing role as a major financial center.''

The Home Savings Bank had assets of $1.51 billion, deposits of $1.14 billion

and equity of $242.3 million at Sept. 30. Headquartered in Bayside, it conducts business through 13 full-service banking offices in Brooklyn and Queens, in New York City and in Nassau and Westchester Counties.

H.F. Ahmanson & Co., with more than $48 billion in assets, is the parent company of Home Savings of America. Home's $36.7 billion deposit base is the largest of any U.S. savings institution. It operates 360 savings branches in nine states and 97 mortgage lending offices in 13 states.

#90317b0804 11/13/1990 ~Business Wire

NEW HARTFORD, NY (NOV. 13) BUSINESS WIRE - PAR Technology Corp. (NYSE:PTC) Tuesday announced a net loss for the three months ended Sept. 30, 1990 of $8.8 million or $1.17 per share, on revenues of $20.2 million.

This compares to net income of $452,000 or 6 cents per share, on revenues of $21.1 million for the corresponding period in 1989.

For the nine months ended Sept. 30, 1990, revenues were $63.8 million and the net loss was $8.7 million or $1.15 per share, compared to revenues of $63.4 million and net income of $1.7 million or 21 cents per share, for the comparable period in 1989.

Included in the previous year's earnings per share were two non-recurring events which contributed 6 cents of the reported 21 cents. These events were an accounting change to conform to the Statement of Financial Accounting Standards No. 96, ''Accounting for Income Taxes'' and the proceeds from the sale of the assets of a subsidiary company.

The third quarter results reflect a one-time charge to net income of $8.9 million for the purpose of establishing additional reserves for inventories, receivables, potential tax liabilities and various operating expenses associated with the Point-of-Sale business.

This charge is net of a tax benefit of $4.1 million. Due to the recessionary business environment, it has become necessary to restructure the company by downsizing employment by approximately 10 percent. In addition, due to the

poor financial health of the convenience store industry as reflected by the recently reported Chapter 11 bankruptcy filings by the two largest chains in that market, Southland Corp., which operates the 7-Eleven chain and Circle K, the company believes that its recent inventory, most of which was acquired as a part of the purchase of the retail systems division of Norand Corp. in 1988, is too large for its projected level of sales.

The reserves taken in the third quarter provide the basis for a financially sound balance sheet and, when coupled with the downsizing, the company expects to remain profitable in a declining business environment should future revenues be reduced. The action taken reduces the company's book value to $37.5 million or $5.04 per share.

PAR intends to continue to invest in its businesses and operate each of them on a profitable basis. During the last four years PAR has made considerable R&D investments of $6-7 million per year and expects to utilize its technology base for continuing business expansion in 1991 and beyond.

PAR's two new developing businesses, Industrial Transaction Processing Systems and Vision Systems continue to demonstrate promise of positively impacting earnings in 1991 and beyond.

PAR is a supplier of transaction processing information systems to the food service and convenience store industries and to the Computer Integrated Manufaturing market; and a contractor providing computer based-system design and development services to the Federal Government.

FRAMINGHAM, MA (NOV. 13) BUSINESS WIRE - The TJX Cos. Inc. (NYSE:TJX), the major off-price apparel retail operator of T.J. Maxx, Hit or Miss, Chadwick's of Boston and Winners Apparel Ltd. (Canada), Tuesday announced record operating results for the third quarter ended Oct. 27, 1990.

Income from continuing operations for the quarter was 42 cents per share, up 10.5 percent over comparable earnings per share of 38 cents in the prior year. Last year's reported third quarter income of $29.6 million, or 42 cents per share, from continuing operations is not comparable because it included dividend income from Ames Department Stores Inc. preferred stock which was subsequently fully reserved against by TJX.

Thus, this year's third quarter income from continuing operations of $29.8 million, or 42 cents per share, compares with an adjusted $26.8 million, or 38 cents per share, last year.

For the first nine months, income from continuing operations was $58.8 million vs. comparable earnings of $50.7 million in the prior year, adjusted for the effects of the company's 1989 restructuring and the Ames preferred stock. Earnings per share from continuing operations increased 15.1 percent for the nine month period to 84 cents per share, up from a comparable 73 cents per share in the prior year.

Net sales for the third quarter increased 14.6 percent to $646 million from $563.5 million last year, bringing sales to $1,732.2 million for the nine months, up 13.2 percent over the same period last year.

Bernard Cammarata, president and chief executive officer of The TJX Cos. Inc., said, ''We are quite pleased with the company's strong performance during the third quarter, particularly in view of increasingly difficult economic and retail environments in most market areas. T.J. Maxx, our largest division, again recorded significant growth in operating earnings.

The TJX Cos. Inc. is a major off-price specialty apparel retailer, with 379 T.J. Maxx stores, 578 Hit or Miss stores, the nation's leading women's fashion off-price mail order catalog, Chadwick's of Boston, and five Winners Apparel Ltd. stores in Canada.

NEW ORLEANS (NOV. 13) BUSINESS WIRE - Ramsay Health Care Inc. (NASDAQ:RHCI) Tuesday announced results for its first quarter ended Sept. 30, 1990.

Gross revenues for the quarter totaled $40,093,000 compared to $36,734,000 for the comparable quarter of the previous year. Net income was $717,000, or 5 cents per share, compared to $957,000, or 6 cents per share, for the comparable quarter of the previous year.

Net income from comparable operations was $717,000, or 5 cents per share, in the current quarter compared to approximately $257,000, or 2 cents per share, in the prior year quarter.

Net income for the quarter ended Sept. 30, 1989, included an after-tax gain of approximately $450,000 on the sale of Riverwood Hospital and the after-tax contractual reimbursement benefit of approximately $250,000 for the retrospective effect of increased rates for CHAMPUS residential treatment services.

Ralph J. Watts, president and chief executive officer of Ramsay Health Care

Inc., commented: ''The first quarter of 1991 has seen continued change in the psychiatric hospital industry. In spite of pressures from payors to shorten patients' lengths of stay, we have been able to adjust to these changes and maintain strong profitability.''

Ramsay Health Care Inc. is one of the largest providers of psychiatric care throughout the United States.

#90317b0811 11/13/1990 ~Business Wire

NEW YORK (NOV. 13) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by M. Anthony Burns, Chairman, President and Chief Exeucitve Officer of Ryder System Inc.

Ryder System's cash flow and liquidity improve, chairman tells analysts; company expects to show improved financial results in 1991

Ryder System Inc. (NYSE:R) expects to continue to show improved financial results in 1991, Chairman, President and Chief Executive Officer M. Anthony Burns told a meeting of the New York Society of Security Analysts Tuesday.

Demand for some of the company's core services, particularly commercial truck rental and automotive carriage, dropped precipitously in 1989, said Burns, before the economic recession was widely acknowledged.

Senior Executive Vice President and Chief Financial Officer Edwin A. Huston told the analysts that the company's debt as of Sept. 30, 1990 was down more than $250 million compared with a year earlier, and assets were down $300 million to $5.6 billion.

Despite lower earnings in 1989, Ryder System's financial condition has remained strong, he noted. The ratio of cash flow to debt has remained relatively flat since 1985 at about 30 percent. The ratio of cash flow to interest coverage, which averaged 4 to 1 over the last five years, will be about the same in 1990.

The ratio of anticipated 1990 cash flow per share to the current share market price is about 1 to 1, an all-time low, said Huston.

Burns stressed that contractual business, which is more stable and predictable than product lines such as short-term truck rental, accounts for more than half of Ryder System's revenue.

#90317b0819 11/13/1990 ~Business Wire

NEW YORK (NOV. 13) BUSINESS WIRE - Enzo Biochem Inc. (AMEX: ENZ) Tuesday reported a 36% increase in revenues and a reduction in net loss for the fiscal year ended July 31, 1990.

Fiscal 1990 revenues rose to $21,562,700 from the $15,802,200 reported for fiscal 1989. The net loss for fiscal 1990 was $2,458,800 or 22 cents per share; in fiscal 1989 the net loss was $4,146,700 or 37 cents per share. A fourth quarter extraordinary gain of $1,638,300 or 14 cents per share, reduced the fiscal 1990 net loss from $4,097,100, or 36 cents per share, to 22 cents per share.

Increases in both diagnostic services and diagnostic products created the year-to-year revenue growth. In particular, diagnostic service revenues surged due to the two diagnostic laboratories acquired in fiscal 1989. Enzo realized an extraordinary gain when it purchased $3,570,000 aggregate principal amount of the company's 9% convertible debentures due March 15, 2001 for $1,931,700 in the fiscal 1990 fourth quarter.

Revenues for the fourth quarter ended July 31, 1990 were $5,432,000, compared to $6,228,000 for the same period last year. This decrease primarily results from reduced investment income. Net loss for the fourth quarter before extraordinary item was $382,300 compared to $1,117,000 for the previous year's fourth quarter. The extraordinary item brought about a fiscal 1990 fourth quarter net profit of $1,256,000.

Enzo Biochem Inc. is an established New York City-based biotechnology company engaged both in the research, development and manufacture of innovative health care products based on molecular biology and genetic engineering techniques and in the provision of diagnostic services to the medical community.

HOUSTON (NOV. 13) BUSINESS WIRE - Doctors Rehabilitation Corp. of America (NASDAQ:DRRC) announced Tuesday that it has acquired a 60% ownership in Spectrum Imaging Centers, Ltd. a Magnetic Resonance Imaging Center, from Dr.

William Donovan and Jose' Kauachi, chairman of the board and president and CEO respectively, replacing them as general partners of the partnership.

The acquisition signifies a vertical integration in the services of Doctors Rehabilitation Corp. of America (''DRCA''.) The first Spectrum Center is expected to contribute immediately to bottom line results in the range of $40,000-$60,000 per month. DRCA has taken over the operation of Spectrum and will develop it as part of a new division within the company.

DRCA intends to develop additional imaging centers in conjunction with the development of its Workwell Centers, which provide work hardening programs to return work-injured employees to their jobs quickly and safely.

Commenting on the announcement before security analysts in New York, Jose' Kauachi said, ''Magnetic resonance imaging is a diagnostic imaging technology that has redefined the diagnostic capability of medicine. While still in its infancy of use and potential, magnetic resonance imaging examination of the brain and spine are the diagnostic tool of choice. The unique features of the ultra-low strength open-field magnet which spectrum utilizes enables the unit to serve a significant patient population that is not served by conventional magnetic resonance imaging sites.''

He continued, ''Based on this acquisition, and combined with the strong results we achieved in the first nine months of 1990, we expect to report full-year revenues of approximately $8.3 million and consolidated net income in the range of $1.5 to $1.7 million or $0.30 to $0.34 per share, for the year ending December 31, 1990.''

On October 16, 1990 the company reported results for the nine months ended September 30, 1990. For the nine months, consolidated net income tripled, reaching $1,109,680 or $0.22 per share compared to $368,897 or $0.08 per share for the same period of 1989. Operating income increased 131% to $1,740,745 vs. $753,107 last year. Patient revenues rose 75% to $5,795,555 compared to $3,319,468 in 1989.

Doctors Rehabilitation Corp. of America is a quality provider of physical therapy and work rehabilitation services. The company operates three Workwell Centers and five Physical Therapy Centers in Texas, Georgia and California. In Georgia, the Workwell Center is operated under the name Work Hardening Dynamics.

#90317b0842 11/13/1990 ~Business Wire
EAST HARTFORD, CT (NOV. 13) BUSINESS WIRE - United Technologies Research Center (UTRC) Tuesday announced it is exploring technology sharing arrangements to develop software, using its computational modules, to exploit the potential of massively parallel supercomputers.

According to Bos Olson, manager of industrial technology at UTRC, these arrangements could take several forms. ''We could sell our application software codes to a company that would enhance them for their specific application,'' he said.

He added that in other cases, UTRC could form a consortium of companies to share the cost of developing application-specific software.

Unlike most commercial computers, in which one central processor handles all computations one step at a time, massively parallel supercomputers contain thousands of processors to simultaneously process elements of a problem. ''These supercomputers are especially effective in solving highly complex engineering problems,'' Olson said.

UTRC uses a Connection Machine supercomputer, made by Thinking Machines Corp., to develop massively parallel software for several United Technologies Corp. (UTC) business units. The units, including UTRC, use the software to solve complex fluid flow and structural problems.

Thinking Machines is showcasing six UTRC-developed software codes during Supercomputing '90 (Booth 310), Nov. 12-16, in New York City. The codes featured, all of which are written in Fortran 90 and run on the Connection Machine supercomputer, are:

o a 3-D Finite-Difference Navier-Stokes prop/rotor code
o a 3-D Finite-Volume Navier-Stokes combustor code
o a 3-D Boundary-Element external flow code
o a 3-D Boundary-Element linear structural analysis code
o a 3-D Finite-Element nonlinear structural analysis code
o a 3-D Atomic Level material simulation code

According to Dr. Wayne G. Burwell, UTRC director of research, sharing technology is essential for success in today's markets. ''In the rapidly changing global environment, companies no longer have the luxury of time to develop technology on their own,'' he said. ''To compete in the world marketplace, we have to collaborate, where possible, to acquire technology more rapidly.''

Olson said technology sharing agreements will provide an opportunity for more rapid development of supercomputing software. ''In addition to speeding the delivery of software products to the market, teaming arrangements should reduce the costs individual users would have paid to develop software on their own,'' he said.

United Technologies Research Center is the central research organization for United Technologies Corp. UTRC carries out basic, applied and exploratory research across a broad span of scientific disciplines.

Thinking Machines Corp., based in Cambridge, Mass., is a leading supplier of highly parallel supercomputers.

PARSIPPANY, NJ (NOV. 13) BUSINESS WIRE - Faber-Castell Corp. has announced

that it is sending American brand pens and pencils to the U.S. troops in Saudi Arabia.

Notecards from Faber-Castell are enclosed in each carton to demonstrate Faber-Castell's support. The cards read ''Greetings from Faber-Castell!!! Enclosed are some American pens and pencils for you to write home with. Our thoughts are with you.''

''We thought this effort would be an appropriate way for us to help soldiers keep in touch with their families at home,'' explains Laura Blatz, American Ball Pen Product Manager. The idea for the project was suggested by Faber-Castell salespeople, and moved like lightning through the corporation. ''We all worked together wholeheartedly to make this project happen in a timely manner,'' comments Randi Berman, Faber-Castell American Pencil Product Manager.

Faber-Castell has a personal interest in the operation with three Faber-Castell employees active in Operation Desert Shield. They are Tim Arthur, Tim Crane and Adam Ewing.

Faber-Castell Corp. is the largest marketer of writing instruments in the United States.

#90317b0867 11/13/1990 ~Business Wire

PASADENA, TX (NOV. 13) BUSINESS WIRE - Insituform Gulf South Inc. (NASDAQ: IGSI) Tuesday reported that its first quarter revenues increased by 21 percent to $8,477,000 from $7,023,000 in the prior year's first quarter.

Net earnings in the current year's quarter ended Sept. 29, 1990 were $83,000, or 2 cents per share, as compared to a net loss of $93,000, or 2 cents per share, for its first quarter of last year.

William S. Naylor, chairman and chief executive officer, attributed the increase in revenues to a greater demand for all of the company's services. Increased revenues and more efficient field operations were the principal reasons for the quarterly earnings improvement.

Naylor added that the company's turnaround which began in the final quarter of fiscal 1990 continued into this quarter. Furthermore, Naylor indicated that he expects future performance will also improve.

Naylor stated that the company's pipe reconstruction services segment recorded revenues of approximately $3,436,000 in the current quarter as compared to

revenues of $2,648,000 in its first quarter of fiscal 1990.

Revenues attributable directly to Insituform installations in this year's quarter were approximately $1,536,000, as compared to approximately $1,264,000 in last year's first quarter. Naylor reported that the company's current backlog in this segment is approximately $11,500,000, or 10 percent greater than at this time last year. Included in the backlog is a $1,400,000 project for the city of Houston.

The company was recently named the apparent low bidder on this project which is one of the first recontruction contracts resulting from the city's $43 million sewer system survey. Houston's capital improvement program provides for almost $1 billion to be spent on sewer collection and treatment system rehabilitation over the next 10 years. Naylor also reported that the company's industrial services segment recorded revenues of approximately $5,041,000 in this year's first quarter as compared to revenues of $4,375,000 in the first quarter of last year.

Insituform Gulf South Inc. provides a wide range of specialty contract services including pipe reconstruction and maintenance principally to governmental entities and cleaning and maintenance of industrial process plants from 10 facilities located along the Gulf Coast of Texas and Louisiana.

The company's pipe recontruction services include underground pipe inspection, evaluation, maintenance and trenchless reconstruction. The company is the exclusive licensee of the Insituform method of reconstructing underground pipes in Louisiana and in parts of Texas and Mississippi.

This method involves the construction of a new jointless pipe withing an existing pipe, usually without excavation. The company also performs inspection and evaluation studies of sewerage systems and, based upon the results of these studies, recommends rehabilitation programs for system compliance with regulatory guidelines.

The company also furnishes cleaning and maintenance services principally to refineries and chemical and petrochemical manufacturing plants along the Texas and Louisiana Gulf Coast, through its wholly owned subsidiary, Naylor Industrial Services Inc. (''Naylor Industrial''). These services include hydroblasting, vacuum services, sewer cleaning and chemical cleaning.

Naylor Industrial also provides specialized cleaning services to power generation plants throughout the United States. Naylor Industrial helps customers by improving plant efficiency and product quality, by safeguarding essential equipment and by promoting compliance with environmental regulations.

Insituform Gulf South Inc. is committed to providing innovative, environmentally-responsible solutions to our nation's deteriorating infrastructure.

#90317b0868 11/13/1990 ~Business Wire

DALLAS (NOV. 13) BUSINESS WIRE - Continental Mortgage and Equity Trust (NASDAQ: CMETS) Tuesday announced operating results for the third quarter and nine months ended Sept. 30, 1990.

For the three months ended Sept. 30, 1990, the trust recorded a net loss of $553,000, or 15 cents per share, on revenues of $3.8 million. During this quarter the trust recorded a provision for losses of $346,000.

This compares with net income of $192,000, or 5 cents per share, on revenues of $3.8 million in the third quarter of the prior year. The third quarter of 1989 included a gain on the sale of real estate of $557,000, or 15 cents per share, with no such gain for the third quarter of 1990.

For the nine months ended Sept. 30, 1990, the trust recorded a net loss of $1.3 million, or 34 cents per share, on revenues of $11.0 million, compared with net income of $211,000, or 6 cents per share, on revenues of $12.5 million in the first nine months of 1989.

Net rental income for 1990's third quarter was $679,000, compared with $518,000 for the third quarter of 1989. The trust sold four foreclosed properties during 1989 which reduced net rental income during the first six months of 1989.

In 1990 the trust was able to increase occupancy rates and lower management and administrative expenses at its remaining properties, resulting in an increase in net rental income.

During the third quarter the trust purchased one apartment complex in Hurst, Texas for $1.3 million. The trust also completed an odd-lot share repurchase program in which it bought 91,477 shares at a cost to the trust of $600,000.

Continental Mortgage and Equity Trust is a combination mortgage and equity real estate investment trust which operates nationwide.

ROCKY RIVER, OH (NOV. 13) BUSINESS WIRE - SIS CORP Tuesday announced a net

loss of $374,754 on sales of $8,828,836 for the quarter ended Sept. 30.

The 24 cents per share loss compares to a 3 cents per share loss, $49,839, on sales of $10,232,508 in the like 1989 quarter.

On Feb. 28, 1989, the company filed a voluntary petition for relief under Chapter 11 of the U.S. Bankruptcy Code and has been operating its business as debtor-in-possession under supervision of the Bankruptcy Court.

On Oct. 29, 1990, an order confirming a plan of reorganization was entered by the United States Bankruptcy Court for the Northern District of Ohio, Eastern Division. The Plan is entitled Debtors' Second Amended Joint Plan of Reorganization as Modified Aug. 1, 1990, (Revised Oct. 24, 1990).

The Plan is, in effect, a Chapter 11 plan of self-liquidation, under which SIS CORP and Sisters International Inc. will sell their assets and/or distribute all or any part of their assets among those having an interest in same. The proceeds of any sales will be distributed to holders of claims in accordance with the provisions of the Plan.

There will be no distribution on account of issued and outstanding common stock of SIS CORP. SIS CORP will be dissolved, at which time all of the authorized common stock of SIS CORP will be cancelled. The Debtors shall continue to administer the provisions of the Plan, even after dissolution, in accordance with ''wind-up'' provisions of state law.

SIS CORP operates Sisters Chicken & Biscuits restaurants, as well as serving as franchisor with respect to certain Sisters Chicken & Biscuits franchises.

SIS CORP is traded over the counter.

#90317b0876 11/13/1990 ~Business Wire

CLEVELAND, OH (NOV. 13) BUSINESS WIRE - TransCapital Financial Corporation announced today that its third quarter 1990 results of operations would reflect a number of major restructuring activities anticipated to be largely completed by year-end and possibly by the end of the first quarter 1991.

The restructuring activities being undertaken are the divestiture of its major mortgage banking subsidiary, the sale of the Columbus, Ohio, area retail branch network, the disposition of certain low yielding mortgage-backed securities and investment securities, the early retirement of high cost liabilities and a general provision for steps to improve operating efficiencies. The total special restructuring provision reflected in the third quarter has an $18.7 million unfavorable effect on earnings.

Primarily, as a result of the restructuring charge, the Company reported a loss of $24.1 million, or $2.53 per share, for its third quarter. This compares with a loss of $2.2 million, or $.23 per share, as restated in the similar 1989 quarter. For the first nine months of 1990, TransCapital recorded a loss of $29.1 million, or $3.06 per share, including the restructuring charge, compared with a loss of $15.3 million, or $1.60 per share, in the 1989 nine-month period.

TRANSOHIO is adjusting to the changing regulatory environment created by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (''FIRREA''). In recognition that a thrift must be more competitive and use its capital resources for only the highest returns, the Company has undertaken an extensive evaluation of profitability by business line. The special restructuring provision is the culmination of that process and includes provisions for exiting unprofitable businesses and improving the performance of the balance sheet.

Earlier, TransCapital announced the consolidation of back office operations and reduction in the branch network at AmeriStar Financial Corporation, TRANSOHIO's major mortgage banking subsidiary. The Company had expected these changes would return this portion of TRANSOHIO's business to profitability; however, generally due to market conditions, this expectation has not been realized. Accordingly, the decision was made to divest this business, at an estimated loss of approximately $6.7 million, which is expected to be completed by March 31, 1991.

TransCapital Financial Corporation is Ohio's largest savings and loan holding company with approximately $4.9 billion in assets. Through its wholly owned subsidiary, TRANSOHIO Savings Bank, it has offices in the Cleveland, Akron, Columbus and Cincinnati markets of Ohio. TransCapital's stock is traded on the New York Stock Exchange under the symbol, ''TFC''.

TORONTO, ONTARIO (NOV. 13) BUSINESS WIRE - Enscor Inc. Tuesday announced a net loss of $6.2 million or 58 cents per common share on revenues of $61.9 million for the nine months of 1990, compared with earnings of $5 million or 45 cents per share on revenues of $32.8 million for the corresponding period in 1989.

Losses for the three months ended Sept. 30 were $7.2 million or 66 cents per common share on revenues of $16.9 million, compared with losses of $77,000 or 1 cent per common share on revenues of $1.1 million.

The nine month results include previously announced write-downs which were prompted by concerns about current and anticipated conditions in the Toronto-based real estate market. In total, $17.5 million of pre-tax write-downs were recorded, following a project-by-project review of all of the company's land holdings. As a consequence of this write-down, the company will be able to recover income taxes previously paid totalling $5.5 million.

Real estate development within the metropolitan Toronto commutershed is Enscor's core business, including development and sale of land, marketing and building of low- and high-rise residential properties, and development of commercial properties for retention or sale.

The company operates within the financial services field through a wholly owned subsidiary, Heritage General Insurance Co. Heritage is a licensed property and casualty insurer in Ontario, underwriting risks principally within the farming sector.

Enscor also holds a portfolio of investments including equity positions in TSE- listed Tele-Radio Systems Limited, a distributor of telecommunications equipment, and Trinity Resources Ltd., an oil and gas exploration company.

HILLIARD, OH (NOV. 13) BUSINESS WIRE - First-quarter, double-digit sales increases in all Medex operating entities contributed to an overall 29 percent sales increase for Medex Inc. over sales recorded in the like period last year.

The company also achieved substantial earnings increases, posting net income up 59 percent.

First-quarter net sales for fiscal 1991 reached $11.76 million and net income was $969,878, or 20 cents per primary share (20 cents per fully diluted share). Net sales for the first quarter of fiscal 1990 were $9.11 million and net income was $610,300, or 14 cents per primary share (14 cents fully diluted share).

''Continued market penetration combined with the success of our MedFusion 2001 syringe pump contributed to Medex's strong overall gains,'' said Craig Waldbillig, chairman and chief executive officer. ''While Medex steadily builds its core business, we are pleased with the impressive gains made by our domestic and international subsidiaries, which will continue to contribute to our long-term growth.''

Medex designs, manufactures and distributes a wide range of disposable medical products for critical and acute care. Life-support products include disposable sets for intravenous fluid and drug administration and invasive pressure monitoring, as well as products for anesthesia, intensive care, cardiac catheterization, oncology and pain management.

Operating subsidiaries of Medex Inc. include: Medex Medical Inc., Rossendale, England; Cardionova GmbH, Dusseldorf, West Germany; and MedFusion Inc., Duluth Ga. Medex stock is traded over-the-counter on the NASDAQ National Market System under the MDEX symbol.

#90317b0893 11/13/1990 ~Business Wire
DOVER, NH (NOV. 13) BUSINESS WIRE - Seacoast Savings Bank (NASDAQ:SSBA) Tuesday announced a net loss for the first quarter ended Sept. 30, 1990 of $730,000, or 62 cents per share, as compared with net income of $14,000, or 1 cent per share, for the same period last year.

Total assets at Sept. 30, 1990 were $104,595,000, down $6,751,000, or 6.1 percent, from $111,346,000 a year ago. On the same date, total stockholders' equity was $10,433,000, or 9.97 percent of assets.

According to Joseph M. Sarno, executive vice president and chief operating officer, the earnings decline was a result of the need to make additional provisions to the reserve for possible loan losses and an increased level of nonperforming assets due primarily to the continuing deterioration in the New England economy.

Nonperforming assets at Sept. 30, 1990 amounted to $11,100,000, 10.6 percent, of total assets. During the quarter ended Sept. 30, 1990, the bank provided $592,000 for possible loans losses, and the allowance at Sept. 30, 1990 was $2,460,000, 3.1 percent of total loans and 35.2 percent of nonperforming loans. Sarno stated, ''Our focus remains on the successful resolution of our problem real estate loans and the disposition of other real estate owned, along with the containment of operating expenses.''

Seacoast Savings Bank is a FDIC-insured financial institution headquartered in Dover, N.H.

ARLINGTON, TX (NOV. 13) BUSINESS WIRE - Technology Development Corp. (NASDAQ:TDCX) announced 1990 third quarter earnings of $140,973 or 7 cents per share of common stock, on revenues of $7.8 million.

Revenues more than doubled over the prior quarter and are up 44 percent as compared to the same period in 1989, as a result of the acquisition of Kaizen Corp., dba ComputerLand Metroplex, which became a wholly owned subsidiary of the company during this reporting period.

Both the parent company and its subsidiary contributed to profitability, reversing losses which had been reported by TDC for the prior three quarters.

The company reported that new orders with agencies of the Department of Defense continue to be slow and backlog declined to $8.5 million, while both orders and deliveries for the microcomputer reseller market remained strong.

The third quarter revenues include $4.5 million in sales from ComputerLand Metroplex, and $3.3 million in support of DoD programs. The company will continue to place increasing emphasis in the commercial sector.

Technology Development Corp. is the nation's largest independent developer of test software and related products and services for use by commercial, aerospace, and federal government organizations.

Through its subsidiary, ComputerLand Metroplex, the company sells microcomputer systems and services to industries and businesses in the Dallas/Fort Worth Metroplex.

#90317b0898 11/13/1990 ~Business Wire

REDWOOD CITY, CA (NOV. 13) BUSINESS WIRE - Advanced Polymer Systems (NASDAQ:APOS) announced Tuesday revenues of $387,000 for the third quarter ended Sept. 30, 1990, compared with $455,000 for the same period last year.

The net loss for the quarter was $1,235,000, or 13 cents per share vs. $917,000, or 10 cents per share last year.

Revenues for the nine months ended Sept. 30, 1990, were $1,702,000 compared with $2,231,000 for the same reporting period of 1989. The net loss for the nine months was $3,286,000, or 34 cents per share compared with $3,376,000, or 36 cents per share for the same period one year earlier.

Excluding a one-time milestone payment of $750,000 from a corporate partner in 1989, revenues grew by 15 percent and the net loss was reduced by 20 percent in the nine months.

The company indicated that orders received under supply agreements and the Analytical Standards business continued strong in the third quarter.

The increase in total operating expenses in the quarter is principally attributable to costs incurred in the expansion of production in the company's manufacturing facility in Lafayette, La., and research and development expenses associated with products being developed for its own account rather than for licensees.

The company also said that it is continuing to negotiate the refinancing of the $3 million Industrial Revenue Bonds used to construct its Louisiana manufacturing facility.

Advanced Polymer Systems develops and manufactures patented Microsponge delivery systems which allow for the release of active ingredients in a programmed or ''controlled'' manner.

FREEHOLD, NJ (NOV. 13) BUSINESS WIRE - Calton Inc. (NYSE:CN) announced Tuesday that it has reached a final agreement with Holmes Regional Medical Center with respect to the settlement of an action instituted by Holmes in federal court in Florida.

The suit originally arose in connection with the activities of certain real estate limited partnerships previously engaged in the development of adult congregate living facility projects in Florida. Calton Capital II Inc., a wholly owned subsidiary of Calton Inc., had an indirect interest in these limited partnerships through its 50 percent owned subsidiary, Wedgewood Park Development Inc.

The settlement involves a mutual release of claims by the parties and does not require payments of money or property by either party.

WALTHAM, MA (NOV. 13) BUSINESS WIRE - The David Sarnoff Research Center Inc., Princeton, N.J., (Sarnoff), under contract to the Defense Advanced Research Projects Agency (DARPA), and Compass Inc., Wakefield, Mass., (COMPASS) Tuesday announced that Sarnoff has licensed the COMPASS Compiler Engine Architecture and Framework for use with Sarnoff's Princeton Engine massively parallel SIMD computer.

The companies' joint efforts will produce a Fortran compiler system that executes on an Apollo workstation, the host machine for the Princeton Engine, and generates code to be executed on the Princeton Engine. The Princeton Engine is presently being used in a number of advanced research projects, including data compression, multi-spectral analysis, data visualization and neural nets. The Princeton Engine is also being considered for ASW (anti-submarine warfare) and space surveillance applications.

The Fortran compiler adds a high-level language programming tool to the present extensive set of graphical programming tools for the Princeton Engine. The COMPASS Compiler Engine will take programs written in COMPASS Fortran, which consists of FORTRAN 77 with array extensions from the proposed ANSI Fortran 90 standard, and produce 8-Code, COMPASS's generic SIMD assembly language.

The 8-Code produced the COMPASS Compiler Engine will then be translated into native instructions to to be executed by the Princeton Engine. The compiler performs several key optimizations and analyses, including classical local and global optimization, specification of processor array allocation, specification of interprocessor motion, and specification and optimization of strip mining operations.

The David Sarnoff Research Center developed the Princeton Engine to support

its work in state-of-the-art video research for Thomson Consumer Electronics. The Princeton Engine is a massively parallel computer designed for continuous simulation of large visual systems.

The architecture is a single instruction multiple data (SIMD) linear array of processors. The linear array can be scaled from 64 to 2048 processors in steps of 64 and, in full configuration, achieves a computational rate of 28,672 MIPS at an instruction clock of 14 MHz Each processor has local memory and can communicate with its neighbors via two bidirectional channels. Input and output data rates of 14 and 1.8 Gbps, respectively, are provided.

Compass Inc., a SofTech Co., was founded in 1961. COMPASS has an international reputation for providing compiler software and software engineering services for high performance and advanced architecture computers. Recent COMPASS clients include Concurrent, Kubota Pacific, MasPar, nCUBE, Numerix, Stardent, the Supercomputing Research Center, SUPRENUM GmbH, and Thinking Machines, among others.

#90317b0912 11/13/1990 ~Business Wire

BIRMINGHAM, AL (NOV. 13) BUSINESS WIRE - Secor Bank, Federal Savings Bank (NASDAQ:SECR) reported a net loss (unaudited) for the quarter ended Sept. 30, 1990, of $(3,987,000).

The net loss for the quarter included a $4,719,000 provision to the bank's general valuation allowance. Management recorded the provision in response to a recent examination by regulators. The OTS examiners are attempting to bring Secor's general valuation allowance to the level of commercial banks. The additional provision was not tied to specific loans.

Management agreed that as a result of declining real estate values and the lower level of the bank's general reserve, the provision was necessary to reduce the effect of unanticipated future credit problems on earnings. Primary and fully diluted loss per share for the quarter was $(1.60). Loss per share has been increased by the effect of cumulative preferred stock dividends in arrears of $1,687,000.

For the nine months ended Sept. 30, 1990, Secor reported a net loss (unaudited) of $(2,256,000). Primary and fully diluted loss per share was $(2.06) for the nine-month period. Loss per share has been increased by the effect of cumulative preferred stock dividends paid of $1,687,000 and dividends in arrears of $3,374,000.

Commenting on the reported loss, Jack Shannon, chairman and chief executive

officer, said: ''We believe the results for the third quarter tend to obscure fundamental operating improvements being made at Secor. Operating expenses are down $1,211,000 in the third quarter as compared to the first quarter of this year.

''Employment levels are down 152 employees, or 19 percent, since Jan. 1. Consumer loan volumes have shown good increases and mortgage volumes have held steady.

''Improvements have been made in managing and reducing problem assets. Earnings for the fourth quarter and next year should be significantly improved as a result of new investment opportunity and the continued improvement in operations.''

Management has negotiated the redemption of the bank's 12.5 percent cumulative preferred stock issued to the government with investment bankers representing the government. This agreement is subject to the approval of the FDIC and the OTS which approval may or may not be forthcoming.

If the redemption occurs, the bank's earnings will improve together with a significant increase in common stockholders' equity.

Secor Bank is a regional financial services institution headquartered in Birmingham, servicing markets in Alabama, Louisiana and Florida. Secor has 60 branch offices and 10 loan production offices. Secor is publicly owned with stock trading as SECR in the OTC market.

#90317b0914 11/13/1990 ~Business Wire

WALNUT CREEK, CA (NOV. 13) BUSINESS WIRE - Longs Drug Stores Tuesday announced a 10 percent increase in sales and flat earnings for the three quarters ended Oct. 25 the declaration of a 26 cent quarterly dividend, and the appointment of two new officers.

Unaudited net income for the three quarters was $42,425,000, or $2.09 per share, as compared to $42,389,000, or $2.07 per share, for the prior year. Net income for the third quarter was down six percent to $11,964,000, or 59 cents per share, from $12,709,000, or 62 cents per share, reported last year.

Unaudited sales for the three quarters were $1,652,856,000 as compared to $1,506,032,000 reported for the prior year. Sales for the third quarter ended Oct. 25 were $556,743,000 compared to $509,852,000, an increase of nine percent.

Earnings for the third quarter were impacted by lower gross margins and increased salary and benefits costs. Gross margins declined as stores aggressively reacted to maintain sales in light of the softening economy. Salaries rose as a result of improved staffing levels. Benefit costs reflected higher employee medical and other benefit costs.

The board of directors at its meeting today declared a quarterly dividend of 26 cents per share of common stock to holders of record at the close of business Nov. 27, payable Jan. 2, 1991. The board also announced the appointments of James L. Famini and Ronald E. Lovelady to the position of vice president-district manager. Famini joined the company in 1975 and Lovelady has been with Longs since 1973.

Both moved up through the ranks in store management to positions of district manager, which they both achieved in 1988.

Longs operates 256 stores in California, Hawaii, Alaska, Arizona, Nevada, and Colorado. Three new stores were opened during the quarter. Currently the company has eight stores under construction, and anticipates opening five more stores before the end of the fiscal year.

#90317b0918 11/13/1990 ~Business Wire

ORLANDO, FL (NOV. 13) BUSINESS WIRE - Gencor Industries (NASDAQ:GCOR) Tuesday announced the results for the third quarter ended Sept. 30, reporting a loss of $1.1 million, or 69 cents per share on revenues of $6,375,000.

This represents an improvement over the like period of the prior year when a loss of $1,189,000, or 74 cents per share on revenues of $9,622,000 were reported. Sales for the nine months ended Sept. 30, 1990, were $37,614,000, down from $45,062,000 recorded in the like period in 1989.

Gencor reduced its net loss to $516,000 or 32 cents per share for the nine months ended Sept. 30, 1990 from $849,000 or 53 cents per share in the like period of 1989.

E.J. Elliott, Gencor's chairman and president, stated that the reduced losses are attributable to the aggressive cost reductions management has implemented during this year. The company has benefited also from reduced patent litigation costs, as well as the benefits from the consolidation of the Indianapolis facilities during the third quarter of 1989.

Many of the cost reductions attained in the past nine months were partially

offset by operating losses in the company's operations in England where the economy is experiencing a significant recession. Among other steps taken in the United Kingdom, the company has restructured and downsized the operations to weather out what management believes is a severe but temporary situation.

The reduction in sales in the United States is attributable to the significant recession in the company's primary market which is the highway construction industry and asphalt production machinery.

Elliott stated, ''The recent increased petroleum prices, as well as the vacillations over/and less than desirable outcome for the budget deliberations - compounded by the crisis in the Middle East, have adversely impacted all aspects of the construction industry, thereby reducing capital expenditures and deferring purchase plans.''

Gencor Industries is based in Orlando, Fla., where it has major manufacturing facilities and its headquarters. Products include thermal fluid heat systems, combustion systems, hot mix asphalt production plants, electronic process automation systems, soil remediation units and other related construction machinery products.

NORWODD, MA (NOV. 13) BUSINESS WIRE - Phoenix Technologies Ltd. (NASDAQ:PTEC) announced Tuesday results for the fourth quarter, ending Sept. 30, 1990.

The figures were in line with preliminary announcement from Sept. 21.

Revenues for the fourth quarter were $9,791,000, as compared to $4,467,000 for the fourth quarter of fiscal 1989. This represents the fourth consecutive quarter of increased revenue.

For the fourth quarter of fiscal 1990 ending Sept. 30, Phoenix reported a loss of $1,781,000 before restructuring charges, bad debts, and taxes, and a loss after restructuring charges, bad debts, and taxes of $8,488,000.

Cash and cash equivalents at Sept. 30, 1990, were $11,118,000 as compared to $10,924,000 for the quarter ended June 30, 1990.

Phoenix Technologies Ltd. designs, develops and markets system software products for personal computers and laser printers. Its products allow manufacturers to offer their customers computers and printers that are compatible with industry standards. More than 300 of the major personal computer and peripherals manufacturers rely on Phoenix for its system-level

software and hardware compatibility expertise.

#90317b0925 11/13/1990 ~Business Wire

LOUISVILLE, KY (NOV. 13) BUSINESS WIRE - Dataguard Recovery Services Inc. reported net income of $87,918 for the three months ended Sept. 30, 1990, its highest quarterly earnings since the company's inception in 1984.

Revenue for the three month period ended Sept. 30, 1990, totalled $900,608, a 24 percent increase over revenue of $724,800 reported for the same period last year.

The increase in net income and revenues can be primarily attributed to a new, five-year agreement to provide additional backup services to General Electric Co. that was announced in July.

Richard W. Smith, president of Dataguard, noted that ''even though the GE agreement was chiefly responsible for our strong quarterly performance, we are pleased that other marketing activity also played a role in this record quarter.

''We were also successful in securing both new customer agreements and agreements to provide additional services to certain other existing customers.''

Dataguard is a Louisville-based publicly held company which markets disaster recovery services to users of large-scale computers throughout the United States and Canada. The company's stock trades in the over-the-counter market.

HOUSTON (NOV. 13) BUSINESS WIRE - DI Industries Inc. (ASE:DRL), the ''company '' Tuesday announced the purchase of the drilling assets of James Bigard Drilling Co. (''Bigard'').

Bigard is one of the largest drilling contractors in Michigan with a material percentage of the market share in that state. The purchased assets include 12 drilling rigs with capabilities to 18,000 feet. The purchase also included

the assets of a trucking company with 26 trucks in its fleet and certain casing tool assets.

The acquisition was for $5,019,785 cash and was effective Nov. 13, 1990. Max M. Dillard, president of DI Industries, stated that this purchase is in line with its acquisition objectives. A portion of the proceeds from the public offering in March of this year was used to finance the acquisition.

This acquisition will bring DI's domestic rig fleet to 95 drilling rigs and DI continues to have cash for further acquisitions. DI is currently profitable, reporting its best earnings since 1982.

DI Industries provides onshore contract drilling and well workover services to firms in the oil and gas industry, commercial drilling, oil and gas exploration and production and equipment repair and sales.

#90317c0008 11/13/1990 ~Comtex

WASHINGTON (NOV. 13) COMTEX - The 10-Q report filed at the NASD shows Canal-Randolph Limited Partnership reported profits of $124,000, or $0.08 per share, on revenues of $226,000 for the quarter ended Sept. 30, 1990.

This compares with net income of $112,000, or $0.07 per share, on revenues of $269,000 for the same period in 1989.

The company reports it is in the process of liquidation and that gains are due primarily to the activities of the partnership's investment operations.

Its corporate address is 717 Fifth Avenue, New York, NY 10022, and its telephone number is (212) 826-6040.

-30- 753

#90317c0009 11/13/1990 ~Comtex

WASHINGTON (NOV. 13) COMTEX - The 10-Q report filed at the NASD shows Default Proof Credit Card System Inc.(TICKER: DPRS) lost $240,814, or $0.03 per share, on revenues of $9,699 for the quarter ended Sept. 30, 1990.

This compares with net losses of $225,319, or $0.03 per share, on revenues of $55,966 for the same period in 1989.

The company is a development stage enterprise and reports there were no significant revenues from operations in the three-month period ended Sept. 30, 1990.

The company states it does not expect any change in its revenue-generating ability until pending litigation is concluded.

Its executive address is Suite 370, 800 Douglas Entrance, Coral Gables, Florida 33134, and its telephone number is (305) 446-8361.

TOKYO (NOV. 14) - Bridgestone Corp., Japan's largest tiremaker, announced

Wednesday it was acquiring the foreign operations of the United States' Banner Industries Inc. for about 28 million dollars.

The purchase involved Banner's indirect, wholly-owned subsidiaries -- Thompson Aircraft Tire Corp. Belgium, S.A. and Thompson Aircraft Tire Corp. (U.K.) Limited, Bridgestone said.

It also included as the company's 45-percent equity interest in Thompson Aircraft Tire Co. (Asia) Ltd., based in Hong Kong.

The transaction is expected to close in January 1991 pending approval by both companies' boards of directors, the company said, and Bridgestone will continue to sell new aircraft tires to Banner's U.S. operations.

The firms have also made arrangements that could facilitate Bridgestone's entry into the U.S. aircraft tire-retreading market, Bridgestone said.

Bridgestone's consolidated sales totaled 11.7 billion dollars in 1989 on products including industrial rubber, chemical products and sporting goods sold in more than 150 countries and territories.

Banner Industries, Inc. is a Virginia-based aircraft and industrial products retailer with consolidated sales in 1989 of 433 million dollars and net income of 50 million dollars.

TOKYO (NOV. 14) - Japan's Yamaha Motor Co. Ltd. said Wednesday its net profit rose 2.5 percent from a year earlier to 1.85 billion yen (13.4 million dollars) in the six months to September.

The world's second-largest motorcycle manufacturer attributed the rise to brisk sales that jumped 12.1 percent to 220 billion yen (1.6 billion dollars).

Domestic sales of motorcycles dropped 8.2 percent, but exports advanced 13.1 percent, reflecting smooth sales to Europe and Southeast Asia.

Boats and outboard engines, special-duty products and automobile motors also performed well.

For the full year to March, Yamaha forecast a net profit of 3.2 billion yen (23 million dollars), up 20.3 percent from the previous year, on sales of 450 billion yen (3.3 billion dollars), up nine percent.

MANILA (NOV. 13) - The Asian Development Bank (ADB) Tuesday said it had approved a three million-dollar technical assistance grant to the Philippine-based International Rice Research Institute.

The grant will be used in research on problems of rain-fed rice ecosystems and rice-wheat farming systems in Asia, where 90 per cent of the world's rice production is harvested, a statement by the Manila-based ADB said.

MANILA (NOV. 13) - The Asian Development Bank (ADB) on Tuesday guaranteed a supplementary 110 million dollar loan to India's Power Finance Corp. (PFC) for two thermal power projects, the bank said in a statement.

The two projects, North Madras Thermal Power in Tamil Nadu state and Rayalaseema Thermal Power in Andhra Pradesh state, comprise two 210-megawatt units each and had received ADB loans of 150 million dollars and 230 million dollars respectively.

The new loan is to be released through the Manila-based bank's complementary financing scheme, in which commercial lenders provide funds to the ADB to co-finance a project.

The loan, to be divided equally between the two projects, will come as a two-tranche package, with the first installment of 60 million dollars to be funded by eight international commercial banks, with Mitsui Taiyo Kobe Asia Ltd. as the agent.

The first tranche has a final maturity of 15 years including a five-year grace period at an interest rate of 50 basis points per annum over the six-month London interbank offered rate (Libor).

The second tranche of 7.5 billion yen (about 50 million dollars) will come from 20 Japanese institutional lenders, with Dai-Ichi Mutual Life Insurance Co. as the lead manager and Mitsui Taiyo Kobe Bank Ltd as the agent.

The tranche has a 21-year maturity, including a 15-year grace period with the repayment of the principal to come only from the last six years.

TOKYO (NOV. 13) - Mitsubishi Motors Corp. Tuesday denied reports that it planned to further expand cooperation with its U.S. partner, Chrysler Corp., America's third largest automaker.

Mitsubishi was responding to a report Monday in the newsletter Automotive News

Report that Chrysler, after its negotiations with the Italian firm Fiat collapsed, was about to start talks with Mitsubishi on extending cooperation in the United States and in Southeast Asia.

Chrysler sold 45 percent of its Mitsubishi shares to a Japanese investment consortium in September 1989 for 592 million dollars, reducing its participation in Mitsubishi from 21.8 percent to 10.99 percent.

#90317d4020 11/13/1990 ~French/German News Agency

TOKYO (NOV. 13) - Japan's Saitama Bank Ltd. and Kyowa Bank Ltd. have agreed to merge, forming the country's ninth-biggest bank with some 33 trillion yen (258 billion dollars) in assets, spokesmen for the two banks said Tuesday.

The spokesmen said the merger would take effect from April 1 next year and would be formally announced at a joint news conference Tuesday evening. Further details, including the terms of the merger, were not available

Saitama Bank, based in Urawa City north of Tokyo, is Japan's 10th-biggest so-called city bank and the 12th-largest bank overall with 16.7 trillion yen in assets (130 billion dollars) at the end of March. It is also the biggest bank in Saitama prefecture, a suburban rural area adjoining the capital.

Kyowa Bank, based in Tokyo, ranks 11th among city banks and 13th overall with total assets amounting to 16.5 trillion yen (129 billion dollars).

As well as being of similar size, the two banks have similar activities, concentrating on retail banking and lending to medium- to small-sized companies.

The proposed merger is the first by major banks in Japan since Mitsui Bank Ltd. and Taiyo-Kobe Bank Ltd. announced their intention to merge last year.

The two banks merged their activities in April this year, forming the second-biggest bank in Japan -- and the world -- with more than 63 trillion yen (492 billion dollars) in total assets.

"I think we're seeing the writing on the wall for the number of banks in this country," said Stuart Matthews, a banking analyst at British stockbroker Barclays de Zoette Wedd Securities (Japan) Ltd.

"These banks desperately need to merge," he said, adding that the latest move was expected to increase the likelihood of other mergers involving major candidates such as Sanwa Bank Ltd., Tokai Bank Ltd. and Bank of Tokyo Ltd.

But he also predicted hard times ahead in combining the activities of the two banks, noting that Saitama was a relatively fast growing and aggressively-run

bank while Kyowa was more conservative.

"Banking mergers amongst equals are really difficult," he said.

TOKYO (NOV. 13) - Prime Minister Toshiki Kaifu pledged 227 million dollars in additional aid to the Philippines Tuesday in a meeting with President Corazon Aquino, a Japanese government spokesman said.

Foreign Ministry spokesman Taizo Watanabe said 200 million dollars would be in the form of commodity loans for rehabilitation after a killer earthquake in the Philippines in July.

The remaining 27 million dollars would be a non-project grant to be spent as Manila thinks fit, he said.

Mr. Watanabe described the second part of the aid as "rather exceptional," reflecting the parlous economic situation in the Philippines as a result of the earthquake and the impact of the Gulf crisis.

The main aid would be in the form of a loan to finance the purchase of goods needed for rehabilitation projects following the Luzon earthquake, which killed 2,300 people on July 16.

Manila says it needs about half a billion dollars for relief and rehabilitation, mostly to rebuild damaged infrastructure.

Japanese officials also quoted Mr. Kaifu as saying he wanted to make a full and appropriate effort for speedy provision of yen loans to help tide the Philippines over the Gulf crisis, but adding that Philippine efforts were needed so that this could be discussed.

The Philippines is the only country promised immediate and specific aid on request during the many meetings between Japanese officials and dignitaries visiting here for Monday's enthronement of Emperor Akihito.

Tokyo had already been warned of Manila's needs in a letter from Mrs. Aquino last month.

A Japanese statement quoted Philippine Finance Secretary Jesus Estanislao, who accompanied Mrs. Aquino here, as saying Manila hoped for an early disbursement of the Philippine portion of the Association of Southeast Asian Nations (ASEAN)-Japan Development Fund (AJDF).

Mr. Kaifu replied that Tokyo planned to send an AJDF mission to the Philippines by the end of the year.

TOKYO (NOV. 13) - Japan's two biggest watchmakers, Seiko Corp and Citizen Watch Co. Ltd., announced Tuesday sharp rises in earnings for the six months to September accompanied by strong increases in sales.

Seiko, the country's biggest manufacturer of watches and clocks and one of the largest worldwide, said its net profit leapt 30.8 percent from a year earlier to just over one billion yen (7.3 million dollars).

Sales grew 11.1 percent to 153 billion yen (1.1 billion dollars) in the same period with increased sales of watches, clocks and jewellery.

Net profit for the full year is forecast to reach 1.5 billion yen (11 million dollars) on sales of 310 billion yen (2.3 billion dollars).

Citizen, the country's second-biggest watchmaker but its most profitable, said its net profit surged 63.5 percent to 5.9 billion yen (43 million dollars) in the six months.

Sales climbed 37.1 percent to 123 billion yen (891 million dollars). Sales of watches and parts rose, along with sales of industrial machinery, information equipment and electronics equipment.

Net profit for the full year is expected to reach 9.5 billion yen (69 million dollars) on sales of 240 billion yen (1.7 billion dollars).

TOKYO (NOV. 13) - The Japan Development Bank said Tuesday it would issue government-guaranteed Eurobonds worth 200 million dollars on the Euromaket next week.

The seven-year bond would be issued under fixed-price sales formula, the first flotation of its kind by government-financed bank.

The seven-year bonds carry a coupon rate of 9.25 percent per annum with the subscribers' yields also set at 9.25 percent. The payment date is on November 21.

Since the bond issue is to be made at a fixed price, no discounts are available when underwriters resell them to customers, bank officials said.

WELLINGTON (NOV. 13) - The Uruguay Round of trade liberalization talks under the General Agreement on Tariffs and Trade (GATT) has no chance of reaching a conclusion, Australian Trade Negotiations minister Neal Blewett said here Tuesday.

Mr. Blewett, also head of the Cairns Group of agricultural exporting nations, said in an interview this was a result of European Economic Community (EEC) intransigence over farm subsidies.

He said the Brussels meeting next month had been intended to enable ministers to resolve a small number of outstanding issues but was designed primarily to wind up the talks.

"There is no chance now the Brussels meeting can be that because of the state of the Round. Not only is agriculture deadlocked but the deadlock over agriculture has helped to poison many of the other negotiations," Mr. Blewett said.

Mr. Blewett, here to attend a conference on Australian-New Zealand economic relations, said the EEC appeared to have little flexibility to negotiate and there would be no settlement of agricultural issues unless there was a determination to reach some real compromise.

He laid responsibility for the deadlock squarely at the feet of the Europeans and said it should be made clear it was the richest collection of nations in the world which was refusing to budge.

"We may need to look at new ways where we can keep the process going and try and renew it, but certainly the present proposals I do not believe are going to be able to be worked through unless there is some miracle conversion by the European Community this week."

New Zealand Trade Negotiations Minister Philip Burdon said the EEC stand had jeopardised the talks.

"I am dedicated to seeing Brussels succeed but this is clearly not going to be possible unless the EC shows it is willing to improve on its agricultural offer," he said.

"We have searched the EC's offer for its liberalising content but have failed to find it."

The EEC agreed last week to cut farm subsidies by 30 per cent, retroactive to 1986. The United States, New Zealand, and other agricultural exporting countries have been pressing for much larger cuts in the subsidies.

PERTH, AUSTRALIA (NOV. 13) - Australian inventor Ralph Sarich has vigorously rejected claims that his company's two-stroke orbital combustion process engine may not meet stringent exhaust emission standards.

"We categorically refute any suggestion that the engine is not capable of reaching the most stringent exhaust emission standards proposed for the early 21st century," Mr. Sarich said in a statement to the Perth Stock Exchange on behalf of Sarich Technologies Ltd.

The response came in the wake of a reported statement by the president pf the Honda Motor Co., Nobuhiko Kawamoto, that the Sarich engine was "not such a great engine."

According to the report, he had said that Honda engineers found it difficult to control the engine's exhaust gases under low load.

The reported observation is of major significance because the Sarich engine's environmental cleanness has been regarded as one of its major virtues in an increasingly emissions-conscious world.

Mr. Sarich said in his statement that his company had respected Honda's request to keep details of the two companies' agreement confidential.

"But incorrect public statements which question our results, the company's credibility and the integrity of directors, means the company's legal obligations to regulatory bodies must be met."

Mr. Sarich said the Sarich Technologies subsidiary, Orbital Engine Co., had been paid a large amount by Honda for engines which were delivered. He said Honda had sent seven engineers to Perth to examine the performance of the Sarich engine.

"This resulted in Honda being satisfied with the validity of Orbital's claims and had led to Honda entering into an agreement," Mr. Sarich said.

#90317d4650 11/13/1990 ~French/German News Agency

FRANKFURT (NOV. 13) - The Hoechst chemical concern reported here Tuesday its group pre-tax earnings in the first nine months of 1990 plunged 21.7 per cent to 2.45 billion marks (1.65 billion dollars).

Hoechst chairman Wolfgang Hilger cited the dollar's decline, dropping sales prices and the rising cost of raw materials for the sharp falloff in earnings.

The Hoechst group turnover of 33.2 billion marks in the first nine months was

2.4 per cent lower than in the same period of 1989.

The parent company accounted for 12.4 billion marks of the turnover, down 1.5 per cent, and for pre-tax earnings of 1.4 billion marks, off by 12.7 per cent.

Hoechst is the first of the top three German chemical companies to report its results for the first nine months.

The other two firms, Basf and Bayer, will be reporting their figures in the coming two weeks, with industry analysts predicting that those companies' earnings will also be drastically below their year-ago levels.

TOKYO (NOV. 13) - Japan's largest toilet manufacturing firm, Toto Ltd., said Tuesday its net profit edged up 0.6 per cent from a year earlier to 8.6 billion yen (62 million dollars) in the six months to September.

Sales grew 13.8 per cent to 186 billion yen (1.4 billion dollars), it said. Sales of toilets and metal fittings rose modestly while sales of housing and facility equipment along with other sanitary accessories grew sharply.

Net profit is forecast to reach 18 billion yen (130 million dollars) in the year to March on sales of 390 billion yen (2.8 billion dollars).

-30- 776

#90317d4980 11/13/1990 ~French/German News Agency

TOKYO (NOV. 13) - Japan's Mitsubishi Petrochemical Co. Ltd. said Tuesday its net profit fell 4.6 per cent from a year earlier to 12.98 billion yen (94 million dollars) in the six months to September.

The company, an affiliate of Anglo-Dutch oil group Shell and the country's biggest petrochemical concern, said sales climbed 5.5 per cent to 200 billion yen (1.5 billion dollars) in the same period.

Sales of plastics along with special-pupose and fine chemicals rose, while sales of general chemical products fell. Exports leapt 37.6 per cent to 21.1 billion yen (153 million dollars).

The company forecast a net profit for the full year of 26 billion yen (188 million dollars) on sales of 430 billion yen (3.2 billion dollars).

#90317d5190 11/13/1990 ~French/German News Agency

BONN (NOV. 13) - Germany expects economic growth in former West Germany to reach 4.5 per cent this year, the fastest growth rate since 1976, the economy ministry said in a report publshed here Tuesday.

It revised upwards an estimate by Economy Minister Helmut Hausmann who said last month that growth in this part of the country would be around four per cent.

Tuesday's report said that growth in the third quarter of 1990 had reached 5.5 percent over the same period last year,

The official figure will be announced December 4.

In the first quarter of this year growth in west Germany was 4.5 percent compared with the same period last year and then 3.4 percent for the second quarter.

Strong demand from the five new Laender (states) which made up former east Germany was behind the spurt in growth in the third quarter, said the ministry.

But the ministry's experts point out that the gap between the two former nations continues to widen. The economic outlook for the west was healthy but that for the east was poor.

The ministry did not provide any figures but said that output in the east continued to decline in the third quarter.

In a report last month the five main economic institutes in Germany forecast the the gross national product of the east would decline by 16 percent this year and 10 percent next.

The ministry said 700,000 new jobs had been created in west Germany, a rise not seen since the 1950s when the west was recovering after World War II.

In the east, however, unemployment rose 92,900 to 537,800 in October with part time workers numbering 1,767,000.

#90317d5230 11/13/1990 ~French/German News Agency

BRUSSELS (NOV. 13) - The Japanese automaker Toyota is in the process of buying a site here for its new European headquarters, a Toyota spokesman said here Tuesday.

He said the company had agreed to pay 1.475 billion Belgian francs (49 million dollars) for a 12 hectare (29 acre) site at Zaventem, on the outskirts of the Belgian capital. The deal is to be signed at the end of November.

The new headquarters, to be called Toyota Motor Europe Marketing and Engineering SA, will handle sales, marketing and research and development for Europe, grouping functions now carried out separately in various countries.

Vehicles to be sold in Europe will be channelled through Brussels, including the estimated 200,000 a year to come off Toyota's British production line, which is due to be completed in 1993.

Last year, Toyota sold 400,000 vehicles thoughout Europe. The spokesman would not estimate projected sales, saying only: "Competition will be tough."

An automobile industry source said Toyota's decision to expand its Belgian operations reflected the growing importance of the European Economic Community (EEC) as it moves towards a single market in 1993.

The EEC' executive arm, the European Commission, has its headquarters here. Recently the Japan Automobile Manufacturers Association moved its headquarters from Paris to Brussels.

Japanese car sales in Europe are a sensitive issue during the run-up to the single market for the 12 EEC countries in 1993.

The commission has been holding informal talks with Japan for nearly a year in a bid to limit Japanese car imports to the EEC after 1992.

Some EEC countries, notably France, Italy and Spain, apply tough restrictions to Japanese auto imports, and want a long transition period during which these imports will continue to be subject to quotas.

Earlier this month, the European Commissioner in charge of industrial policy, Martin Bangemann, proposed a compromise five-year period from 1993 before Japanese carmakers have unlimited access to the European market.

In the first eight months of this year, Japanese firms sold 1.09 million cars in the EEC -- up nearly six per cent on the corresponding period last year. They increased their market share from 10.9 to 11.6 per cent.

#90317d5250 11/13/1990 ~French/German News Agency

COPENHAGEN (NOV. 13) - The Danish current balance of payments could register a surplus in 1990 for the first time since 1963, observers said Tuesday after figures for the first three quarters of this year were released by the national statistics institute.

A surplus of almost six billion Danish kroner (1.052 billion dollars) was registered in the first nine months of the year, against a 4.3 billion kroner (754 million dollar) deficit for the corresponding period last year, the institute said.

Economic experts said that although results for the last quarter of the year were "uncertain", the balance of paments for the year overall could register a surplus.

Niels Helveg Petersen, minister for the economy, said he was pleased at the results but warned that the current quarters' results could be badly affected by fluctuating oil prices and changing interest rates on the foreign debt.

The foreign debt so far has dropped from 300 billion kroner (52.6 billion dollars) to 285 billion kroners (50 billion dollars) thanks to the kroner's strong performance against a weakened dollar.

#90317d5460 11/13/1990 ~French/German News Agency

TAIPEI (NOV. 13) - Taiwan approved a record 1.21 billion U.S. dollars worth of overseas investment projects by local businessmen in the first 10 months of 1990, the Investment Commission said Tuesday.

The value of the 246 approved projects represented a 98.7 percent surge over the same period last year, the government agency said.

The commission attributed growing outbound investment to a strategy among local enterprises to penetrate the international market by establishing companies abroad through mergers or acquisitions.

Many Taiwan low-value-added industries have shifted their capital and operations overseas to avert an acute labor shortage and prohibitive land prices, it said, adding that foreign countries offering duty-free or low-tax treatment were especially attractive to local manufacturers.

It said the United States was the most popular country for the island's investors, attracting 83 projects totalling 330.74 million dollars, trailed by Malaysia with 32 projects worth 180.99 million dollars.

Banking and insurance industries were Taiwan businessmen's favorites, followed by the electronics and electrical appliances fields, it added.

But the value of approved foreign investment projects on the island dropped 6.68 percent to 1.93 billion dollars in the January-October period against the 110 percent growth posted in the first 10 months of 1989, the commission said.

Among the approved foreign investment projects, the 309 by non-Chinese foreign nationals totalled 1.72 billion dollars, down 9.2 percent, it said,

and 74 projects worth 206.49 million dollars were from overseas ethnic Chinese, a 21.8 percent growth in value.

Japan was Taiwan's largest foreign investor in the 10 months with 635.63 million dollars of 148 projects approved, a 28.29 percent rise. It was trailed by the U.S. with 49 projects valued at 472.3 million dollars.

The chemical industry was most favored by foreign investors, absorbing 22.25 percent of approved foreign investment value, while the electronics and electrical appliance manufacturing sectors followed with 16.45 percent.

#90317d5530 11/13/1990 ~French/German News Agency

MOSCOW (NOV. 13) - The Lithuanian parliament Tuesday protested over Moscow's bid to control trade in the Baltic republics, saying this created a "very serious crisis", informed local sources said.

A declaration, adopted by the vast majority of deputies, said that talks with Moscow over economic cooperation for the next year had floundered because of the Kremlin's "dictates" that it should retain overall control of foreign trade and currency exchanges.

The premiers of the three Baltic republics -- Lithuania, Latvia and Estonia -- met in Moscow last weekend with Soviet Prime Minister Nikolai Ryzhkov to discuss economic cooperation in the coming year.

An agreement, however, "is impossible at present" because of the Soviet Union's attitude, Lithuanian Premier Kazimiera Prunskiene told parliament Tuesday.

The situation had created "a very serious crisis between the governments of the Baltic states and the Soviet Union," she added.

In the declaration, deputies called for individual Soviet republics to continue trading directly with Lithuania next year and demanded that the Soviet Union open its foreign borders to free trade with the West.

Soviet President Mikhail Gorbachev recently issued a decree restricting the amount of foreign currency Soviet firms can retain after receiving payment for exports and introducing centralized controls on the sale of raw materials abroad.

Meanwhile, Lithuanian President Vytautas Lansbergis, who has spearheaded his republic's bid for independence, has arrived in Britain on a visit.

AMMAN (NOV. 13) - Palestine Liberation Organisation Chairman Yasser Arafat arrived here Tuesday for talks with King Hussein on prospects for convening an extraordinary Arab summit conference called for by Morocco to avert a war in the Gulf.

In an arrival statement at Amman airport, Arafat said diplomatic efforts launched by Hussein, King Hassan Ii of Morocco and other Arab leaders were beginning to gain momentum on the Arab and international levels with the proposed Arab summit.

Arafat, who arrived on board an Iraqi Airways executive jet, said ''what some Arab countries have called for is beginning to make progress within international circles towards reaching a peaceful settlement of the Gulf crisis and the Middle East problem.

He explained that several European countries, the Soviet Union, China and Japan and most non-aligned nations ''have supported the principle of reaching an Arab solution under an international umbrella.''

The Plo leader said the purpose of his visit to Jordan was ''to continue these very important contacts with His Majesty King Hussein.''

He said an Arab summit meeting needed ''much preparation and consultation to make it successful.''

The Plo welcomed the proposed Arab summit meeting. Jordan has said it would decided on its participation once an official invitation was extended and the agenda agreed upon in consultation with all Arab states.

#90317d5570 11/13/1990 ~French/German News Agency

NIAMEY (NOV. 13) - Niger is to send a contingent of 481 soldiers and officers

to Saudi Arabia Thursday to join a multinational force assembled in the Gulf to oppose Iraq's invasion of Kuwait, Niger's news agency reported here Tuesday.

The contingent, which has been assembled at Tondibia 20 kilometers (12 miles) west of here, is being commanded by Colonel Amadou Seyni, former political secretary of the ruling National Movement for a Society of Development (MNSD).

The agency did not disclose which unit the troops belonged to nor the type of military equipment which is to be taken along.

Niger's President Ali Saibou told the troops during a visit Tuesday that their mission was to "safeguard Islam's holy sites." The head of state is to be present when the troops leave Thursday.

The West African country's decided to send the military unit September 20 after receiving a formal request by the Saudi government.

Niger, which is 85 per cent Moslem and a member of the Organization of the Islamic Conference, is the second black African state after Senegal to send troops to Saudi Arabia.

LAGOS (NOV. 13) - Liberian interim president Amos Sawyer arrived here Tuesday as part of a consultation tour of four states that sent peacekeeping troops to his country.

Mr. Sawyer went into talks with Nigeria's vice-president, Augustus Aikhomu, and was due to meet President Ibrahim Babangida on Wednesday. He flew in from Accra and talks with Ghanaian leader Jerry Rawlings.

Nigeria and Ghana provided the bulk of a five-nation intervention force sent to Liberia in August by the Economic Community of West African States (ECOWAS) to enforce a ceasefire after eight months of brutal civil war.

A government source said Mr. Sawyer on Tuesday presented "a review of the diplomatic situation in Liberia" and discussed "a lack of consensus" among the five nations within the peacekeeping force as to when his government would be installed in Monrovia.

African diplomats in Sierra Leone had on Monday said the new government was to be inaugurated on Thursday at the executive mansion in Monrovia, understood to have been vacated by the leader of remaining army loyalists to the late president Samuel Doe.

Mr. Sawyer, a lawyer and constitutional expert, was named interim president at a conference among Liberian politicians, religious leaders and exiles held in

the Gambia under ECOWAS auspices. His current tour is also to take him to Gambia and Guinea.

Mr. Doe was put to death in September by one of two Liberian rebel factions, led by Prince Johnson who has accepted the interim government plan.

Charles Taylor, head of the main guerrilla force which invaded Liberia last December, has opposed ECOWAS arrangements for the country and resisted the West African troops who eventually forced his men out of the battered Liberian capital.

JOHANNESBURG (NOV. 13) - South African Defense Minister Magnus Malan said Tuesday black leader Nelson Mandela was aware of a broad African National Congress (Anc) plan to transfer power from the white minority government to itself.

He said the organisation, of which Mandela is deputy president, intended achieving this goal through mass mobilisation, its political underground, an armed struggle and international isolation of the country.

Speaking at a military parade in the Orange Free State province capital of Bloemfontein, Malan said the Anc saw the transfer of power to the black majority as a transfer of power to itself.

''It emerges very clearly from (an) official Anc publication, which deals with the Anc's views on negotiations, that Mr Mandela's mass action is part of a broader plan.

''It also appears that Mr Mandela is aware of this broader plan, because he promoted it by asking during his most recent overseas visit for the international isolation of South Africa,'' Malan said.

#90317d5760 11/13/1990 ~French/German News Agency

JEDDAH, SAUDI ARABIA (NOV. 13) - British Defense Secretary Tom King arrived here Tuesday from the United Arab Emirates (UAE) to start a 48-hour visit that will include the inspection of British forces deployed in Saudi Arabia.

Mr. King was also to meet Saudi Defense Minister Prince Sultan bin Abdel Aziz to discuss the situation in the Gulf and means to secure an Iraqi withdrawal from Kuwait, British sources said.

Mr. King is On Wednesday to visit some of the 10,000 British troops stationed here alongside U.S., French, Arab, African and Asian units to defend the

kingdom against an attack from Iraqi forces in Kuwait.

On Monday he met UAE president Sheikh Zayed bin Sultan al-Nahayan and warned that time was "running out" for President Saddam Hussein and his occupation of Kuwait.

MANILA (NOV. 13) - Philippine communist rebels on Tuesday accused U.S. surveillance planes and undercover agents of taking part in a military offensive in which scores of guerrillas have been reported killed.

U.S. Embassy and Philippine military spokesmen dismissed the allegation by the National Democratic Front (NDF), the political arm of the banned Communist Party of the Philippines (CPP) and the New People's Army (NPA).

The NDF made the charge in a press statement that called for a halt to the drawn-out operations in Kalinga-Apayao, a province in the Cordillera mountains in northern Luzon island.

"Direct U.S. participation in this campaign has been confirmed with the involvement of U.S. planes and undercover personnel," the NDF Far North Luzon Command said.

"In August 1990, U.S. Air Force planes have been spotted conducting surveillance flights at low altitude over the valley," it added.

U.S. Embassy spokesmen Stanley Schrager said the NDF allegation "doesn't sound right to me. I don't think that's true."

Philippine armed forces spokesman Colonel Juanito Rimando also brushed aside the NDF statement.

"We do our operations by ourselves. We don't need others to help us."

The NDF statement came five days after the military claimed that 95 NPA guerrillas had been killed in the offensive. The official death toll could not be independently confirmed.

The NDF statement referred only to a "genocide" and "untold misery and loss of lives of the populace. "

A division-size contingent of Philippine Army and paramilitary troops with bombers, tanks, gunships and artillery is waging the offensive, the NDF said. It gave no further details on alleged U.S. participation.

The only time U.S. forces openly intervened in the Philippines was in December

1989, when F-4 Phantom jets from Clark Air Base flew over Manila to dissuade mutinous troops from attacking the presidential palace during a coup attempt against President Corazon Aquino.

Meanwhile, the U.S. Embassy said Admiral Huntington Hardisty, the commander of the U.S. armed forces in the Pacific, will arrive in Manila shortly to attend an annual conference on mutual defense against foreign aggression.

The embassy also said U.S. Representative Stephen Solarz, chairman of the House Subcommittee on Asian and Pacific Affairs, will arrive here Wednesday for his "annual information-gathering" visit.

The scheduled arrivals followed the third round of talks on the future of U.S. bases in the Philippines last week. The talks resume here next month.

JOHANNESBURG (NOV. 13) - Twenty-one people were killed early Tuesday when the mini-bus they were travelling in crashed into a railing and plunged down an embankment near the town of Theunissen, in the central Orange Free State province, South African police said.

All the victims, eight men, eight women and five young girls, were black,

and had been travelling from the Cape province to the Transvaal province when the accident occurred.

BONN (NOV. 13) - German Finance Minister Theo Waigel is counting on another strong year for the country's economy in 1991 to permit only a slight increase in the high level of public borrowing to finance the costs of unification, dpa learned here Tuesday.

According to information leaked while the ruling coalition parties were reviewing Bonn's 1991 budget financing options, Waigel said he foresees new net borrowing of 70 billion marks (47.3 billion dollars) next year, slightly over this year's 67 billion marks.

Waigel told the cabinet he expected the economy for all of Germany next year to grow by three to 3.5 per cent, following this year's rate of four to 4.5 per cent.

A precondition in Waigel's plans for 1991 is that a 35 billion mark package of money saved in other sectors of the federal budget is to be invested in the former East Germany, dpa learned.

By 1994, according to Waigel's strategy, the continued economic improvement in eastern Germany would permit Bonn's net borrowing to be lowered again to below 30 billion marks.

Next year, total new borrowing by federal, state and local governments is expected to reach between 140 and 150 billion marks, approaching what the Bundesbank has said is a critical level in terms of monetary and inflationary stability.

The coalition partners in their talks here Tuesday agreed that public sector borrowing should be kept to a maximum of 5 per cent of the German gross national product, so that new loans should be limited to 150 billion marks.

Approaching the first all-German elections set for December 2, the Christian-Liberal coalition of Chancellor Helmut Kohl has repeatedly insisted that taxes will not be increased to finance unification.

MANAMA (NOV. 13) - Arab leaders were Tuesday engaged in intensive diplomatic activity as they pondered a Moroccan call for an emergency Arab summit to secure a diplomatic settlement in the Gulf.

Egyptian President Hosni Mubarak, one of the Arab world's sharpest critics of the August 2 Iraqi invasion of Kuwait, was meeting in Libya with Colonel Moamer Kadhafi.

The Libyan leader on Monday met in Tripoli with Iraqi Deputy Prime Minister Saadoun Hamadi, who was carrying a message from President Saddam Hussein.

Palestine Liberation Organisation Chairman Yasser Arafat meanwhile flew to Jordan, where senior Palestinian officials were already meeting with Jordanian officials on the summit.

Iraq's first deputy prime minister, Taha Yassin Ramadan, left for Morocco with a message for King Hassan II in an unexpected move that appeared to indicate that Baghdad was taking the summit appeal seriously.

Baghdad has said its participation is conditional on an end to foreign threats against it from U.S.-dominated forces based in Saudi Arabia and an expanded agenda to include other Arab issues, notably the Palestinian question.

Mr. Ramadan warned before leaving Baghad that if Iraq's conditions were not taken into consideration, the summit "would be nothing more than a gathering to plot against the Arab nation, as it was during the Cairo summit."

That meeting condemned the Iraqi invasion of Kuwait and authorized the deployment of Arab troops in a multinational force stationed in Saudi Arabia.

But King Hassan's suggestion for a last-ditch meeting to avert war in the Gulf has to date received a lukewarm response in the Arab world, with only a handful of the 21 Arab League members signalling support.

Three of Iraq's closest allies in the current crisis, the Palestine Liberation Organization, Yemen and Sudan, have publicly expressed their backing.

Mr. Ramadan's visit to Morocco follows a statement by President Hussein late Monday that Iraq was prepared to make "sacrifices" for peace.

"In the region, Iraq is the only country willing to make sacrifices to achieve peace on condition that the chance for a sincere dialogue be guaranteed," he said after a meeting with Chinese Foreign Minister Qian Qichen.

LONDON (NOV. 13) - Richard Lewis, one of Britain's finest opera singers, died on Tuesday morning after a long illness, at his village home outside Eastbourne, East Sussex. He was 76.

"He had an unforgettable voice and will be greatly missed", a spokesman for the Glyndebourne Opera House in Sussex said.

The distinguished tenor started his career in the male chorus in the "Rape of Lucretia" at Glyndebourne in 1947, where he became a familiar figure, and at Covent Garden.

Renowned for his extreme versatility, he was equally at ease with Mozart as with modern works, like Britten's "Peter Grimes", Berg's "Wozzeck" and Puccini's "Madame Butterfly".

He was the first British singer to make an international name after appearing in Paris and with the San Francisco Opera from 1955.

PORT FUAD, EGYPT (NOV. 13) - The suspected killer of Israeli anti-Arab extremist Rabbi Meir Kahane has been hailed as a hero by his neighbors and friends in Egypt but his family now fears an Israeli reprisal.

The father of 34-year-old El Sayed Noseir, in an interview with AFP here in northern Egypt on the banks of the Suez Canal, described his son as "calm, serene, artistic."

"He loved painting and would spend most of his time at it -- and he had no political affiliation," said Abdel Aziz Noseir, 65.

Mr. Noseir, accused of the November 5 assassination in New York of Rabbi Kahane, had been under psychiatric treatment and may have been using an anti-depressant drug that some specialists say induces violent behavior in certain users, the New York Times reported last Friday.

Mr. Noseir, who left Egypt for the United States in 1981 and was an electrician with New York City's General Services Department, has denied shooting Rabbi Kahane. He was wounded in the aftermath of the attack and is still in hospital.

Founder of the extreme right-wing Kach movement, Rabbi Kahane advocated the expulsion of Palestinians from Israel and its occupied territories.

"All the visitors who come to see me say my son is a hero," said Abdel Aziz Noseir.

"I am pround of him. But as his father I am sad and concerned about his future and I am also afraid of reprisals against my family by Mossad (Israel's foreign intelligence service)."

For the suspect's friends and acquaintances here he is now a symbol of Arab revenge, despite his reported denials from New York.

He killed "the leading Zionist extremist, who deserved what he got," declared Mr. Noseir's 31-year-old brother Ahmad.

"The assassination of Kahane was an heroic act, a reprisal against the killing at the Haram al-Sharif, which as Moslems has us upset all," added Ibrahim Dessouki, a doctor who went to school with Mr. Noseir.

JERUSALEM (NOV. 13) - A group of Palestinians tried to abduct an Israeli patrolman on Tuesday after hurling a petrol bomb at his car in Arab east Jerusalem, police said.

The officer seized his gun and opened fire on the assailants, who managed to escape, a police spokesman said. One of the Palestinians was believed to have been wounded.

After setting an ambush for the police car in Salaheddin Street, the assailants had hurled a petrol bomb and jumped on the officer, trying to grab him by the arms.

HIROSHIMA, JAPAN (NOV. 13) - Some 500,000 Soviet citizens living near a nuclear test site in Central Asia have suffered from radiation effects and 100,000 of them have died of cancer, a top Soviet researcher said here Tuesday.

Half a million people living within a 550-kilometer (345-mile) radius of the Semipalatinsk test site in central Kazakhstan suffered from the effects of increased radiation, Dr. Boris Gusev, head of the Soviet Radiology Research Institute, told reporters here.

Of them, about 100,000 had died apparently from various cancers caused by radiation, he said.

The Soviet Union carried out more than 200 tests in the air between 1949 and 1965 at the site in Kazakhstan, he said.

Dr. Gusev said cases of leukaemia increased by 70 per cent between 1955 and 1960. Infants dying before their first birthdays nearly doubled compared with other regions.

Tests were halted in October last year because of antinuclear protests by people living near the site, he said.

LUSAKA (NOV. 13) - Zambia's Ambassador to Angola Axon Chalikulima and his son Aaron have been arrested here for drug trafficking, the government-owned Daily Mail reported Tuesday.

The newspaper said the diplomat and his son were picked up on Friday with four others who had formed a drug syndicate in Zambia which has become a transit point between Europe and South Africa.

Sources in the anti-drug enforcement commission told Agence France-Presse that Mr. Chakulima and others would appear in court Tuesday afternoon to answer the drug trafficking charges.

The sources said that arrested with the diplomat were Papeni Pofana, a Kenyan, Amadon Jamel, a Senegalese, Kapumpa Kalenga, son of prominent member of parliament John Kalenga, and Ishmail Badat.

The group was allegedly found in possession of Mandrax tablets, heroin, cocaine and hashish. The Daily Mail also reported that an unlicenced AK-47 rifle and ammunition were found at Mr. Chakulima's house.

BAGHDAD (NOV. 13) - Iraq issued a warning Tuesday to the United States and accused the U.S. Administration and intelligence services of planning acts of provocation.

Iraq "strongly warns the United States against their criminal plots and holds the U.S. Administration responsible for all acts of provocation that could take place in the region," Foreign Minister Tareq Aziz said.

Mr. Aziz, quoted by the official Iraqi News Agency, referred to a statement Monday by White House spokesman Marlin Fitzwater that U.S. President George Bush would consult closely with Congress on the conflict with Iraq.

Mr. Fitzwater added however that "unforeseen kinds of provocations" might force the president to order military action without Congress approval.

The reference to provocation from Baghdad was a "pretext to allow the U.S. Administration to launch aggression against Iraq and to jumble the cards to deceive the American people and Congress," Mr. Aziz charged.

#90317d6810 11/13/1990 ~French/German News Agency
HAMILTON (NOV. 13) - Canadian External Affairs Minister Joe Clark, meeting in Bermuda with U.S. Secretary of State James Baker, expressed support Tuesday for a U.N. Security Council resolution authorizing the use of force against Iraq.

Such a resolution "is certainly our preference if it's doable," Mr. Clark told journalists before the talks at the residence of the U.S. consul in Hamilton, the capital of Bermuda.

Canada currently sits on the Security Council. Since the end of September, the United States, which this month presides over the council, has been exploring the idea of a resolution that would authorize it to attack Iraq should the occasion arise.

Mr. Baker last week consulted the four other permanent members of the Security Council -- China, the Soviet Union, Great Britain and France.

"We would naturally like to see the unanimity that has been so remarkable in the security council maintained and we are all working towards that objective " Mr. Clark said.

Canada has sent two destroyers and a supply ship to the Gulf, as well as a squadron of 18 CF-18 fighter-bombers.

#90317d6850 11/13/1990 ~French/German News Agency

FREETOWN (NOV. 13) - The World Council of Churches (WCC) is to provide 1.5 million dollars in relief aid for tens of thousands of Liberian refugees in neighboring Sierra Leone, Guinea and Ivory Coast, a local church official said here Tuesday.

Alfred Kamara, general secretary of the Sierra Leone Council of Churches said the aid package was being prepared following a visit here last month by a seven-member WCC team which also visited refugee camps in Guinea and Ivory Coast.

About 600,000 Liberians have sought refuge in the three countries since rebels of Charles Taylor's National Patriotic Front (NPFL) launched their bid to topple the government of the late president Samuel Doe last December 24.

The bloody civil war has claimed some 10,000 lives, most of them civilians.

#90317d6870 11/13/1990 ~French/German News Agency

BAGHDAD (NOV. 13) - Former U.S. attorney general Ramsey Clark left Baghdad on Tuesday at the end of a three-day visit during which he met President Saddam Hussein, Iraqi officials said.

Mr. Clark, quoted by the Iraqi News Agency, called for "solutions to the region's problems through dialogue and negotiations, away from threats and

interference that could lead to a destructive war."

He was also quoted as backing an Arab solution to the Gulf crisis.

Mr. Clark, who has spoken out strongly here against the foreign military presence in the Gulf region, met Monday with President Hussein for talks on "peace and humanitarian issues in the Arab world."

The official news agency also said Mr. Clark had expressed support for a plan by anti-war groups to set up a permanent presence in Iraq in order to try and prevent an outbreak of hostilities.

Mr. Clark, who visited Baghdad at the invitation of the Iraqi government, served as attorney general from 1967 to 1969 under former U.S. president Lyndon Johnson.

#90317d6900 11/13/1990 ~French/German News Agency

TOKYO (NOV. 13) - Israeli President Chaim Herzog told U.N. Secretary General Javier Perez de Cuellar here that he hoped a U.N. mission to Israel would help defuse international criticism, the Kyodo news agency said Tuesday.

"We hope we're finished with this condemnation," Mr. Herzog told Kyodo on Monday, referring to the U.N. Security Council resolution criticizing Israel for the bloodshed in Jerusalem on October 8 when Israeli police opened fire on Palestinian protestors, killing 18.

He said the resolution was "the height of injustice" and told Kyodo that he shared this feeling with Mr. Perez de Cuellar when the two met here. Both were in Tokyo for the enthronement of Emperor Akihito on Monday.

"I believe Mr. Perez de Cuellar, my old friend, understands the position," Mr. Herzog was quoted as saying.

Israeli Foreign Minister David Levy said in Jerusalem on Monday that Israel and the United States had reached an agreement under which Jean-Claude Aime, a special advisor of Mr. Perez de Cuellar, who visited the Occupied Territories in July, would conduct the mission.

In the Kyodo interview Mr. Herzog criticized France's proposal to link the Palestinian question to the Iraqi invasion of Kuwait, calling it "very naive," adding that Iraqi President Saddam Hussein was a "very clever individual."

#90317d7070 11/13/1990 ~French/German News Agency

CAIRO (NOV. 13) - Forty-four Egyptian nationals who were held by Iran as

prisoners of war arrived home Tuesday a few hours after their release was announced in Teheran.

Iran has said the former prisoners had been held after they were captured fighting alongside Iraqi forces in the eight-year Gulf war that ended in 1988.

Their release was secured by Sheikh Mohammad Ghazali, an Egyptian religious leader, during a recent visit to Iran.

An Iranian official in charge of POWs, Mohammad Ali Nazaran, said Monday that "around 80 Egyptian soldiers" were being held prisoner. Iran freed 20 Egyptian prisoners in March.

#90317d7100 11/13/1990 ~French/German News Agency

AUCKLAND, NEW ZEALAND (NOV. 13) - Flush from his successful hostage rescue mission to Iraq, former premier David Lange returned home Tuesday to launch a new tell-all, no-holds-barred book full of swipes at his pet peeves and insights into the corridors of power.

"Nuclear Free -- The New Zealand Way," which describes the development of Wellington's anti-nuclear policies under Mr. Lange's premiership from 1984 to 1989, is also rich in anecdote and tales told out of school.

The most unsatisfying meetings he ever attended, Mr. Lange wrote, were those of the Commonwealth Heads of Government.

The 1985 conference in the Bahamas, he said, was run by a prime minister who "was a remarkable character who came unscathed through an inquiry as to why in the past year he had put in his bank account an amount 18 times greater than his total salary."

In Vancouver in 1987, he wrote, the Botswana delegation ran up 1,300 dollars of international phone calls and charged it to Mr. Lange's bill.

"The Ugandan delegation took advantage of their leader's absence ... to invite a fair number of Vancouver's prostitutes to their hotel. They refused to pay and had the police evict the women," he wrote. "Those were the greatest moments of the conference."

At the 1984 South Pacific Forum, Nauru's President Hammer DeRoburt fell asleep with a cigarette in his mouth, woke with a start when it burned his lip and demanded of Australian Prime Minister Bob Hawke: "Can I ask you about that man in Melbourne who is ruining my shipping company?"

"It's all right, mate," Mr. Hawke replied, "it's all been fixed."

Mr. DeRoburt went back to sleep, again burned his lip and repeated the same question.

Mr. Lange wrote: "The fourth time it happened, Hawke stood up in his place and screamed, 'I'm telling you the c---'s dead!' Conversation became even more stilted after that."

British Prime Minister Margaret Thatcher, according to Mr. Lange, sounds exactly the same in private as she does in public.

#90317d7130 11/13/1990 ~French/German News Agency

MOSCOW (NOV. 13) - President Mikhail Gorbachev argued here Tuesday that the Soviet Union should maintain its integral armed forces and military conscription, the official Tass news agency reported.

Gorbachev described the quest of some republics to form their own armies as ''more a political game than a recognition of realities''.

In reply to a question he also repeated that he saw the Baltic states as Soviet territory. The Baltic republics had openly called for the withdrawal of the Red Army's ''occupation troops''.

Gorbachev said the issue of conscription would be taken up by one of the next meetings of the federation council or federal cabinet with heads of government from all the constituent republics taking part.

#90317d7160 11/13/1990 ~French/German News Agency

WASHINGTON (NOV. 13) - President George Bush will spend Thanksgiving Day with U.S. troops near Daharan in eastern Saudi Arabia and probably on a U.S. warship in the Gulf as well, U.S. officials said Tuesday.

Mr. Bush will arrive in Saudi Arabia November 21, meeting the same evening in Jeddah with Saudi King Fahd and the exiled emir of Kuwait, Sheikh Jaber al Ahmad al Sabah, the sources said.

After visiting the troops November 22, the president is scheduled to travel to Cairo for a meeting with Egyptian President Hosni Mubarak before returning to Washington November 23, the sources said.

In Daharan, Mr. Bush will be less than 250 kilometers (150 miles) from the Kuwaiti border and the front with Iraqi occupation forces. The president, who will be accompanied by his wife Barbara, will take part in the traditional Thanksgiving feast with the troops.

He was expected to visit a warship the same day, but U.S. officials refused to give any other details of his agenda for security reasons.

The base at Daharan serves as a command center for Desert Shield, the U.S. military deployment in the Gulf involving some 230,000 U.S. troops. The size of the U.S. force is expected to grow to at least 380,000 troops by early next year.

Mr. Bush will arrive in Saudi Arabia from Paris where he will attend the summit of the Conference on Security and Cooperation in Europe (CSCE) from November 19 to 21. On November 17, he will stop in Prague on the first anniversary of the "velvet revolution" and in Ludwigshafen, Germany, for a meeting with Chancellor Helmut Kohl.

In Paris, Mr. Bush is expected to discuss the Gulf crisis with French President Francois Mitterrand over dinner November 18 as well as with Soviet President Mikhail Gorbachev. Several other bilateral meetings also have been arranged.

#90317d7170 11/13/1990 ~French/German News Agency

JERUSALEM (NOV. 13) - Israel on Tuesday boosted security along its cease-fire line with Jordan after an infiltrator shot and killed an Israeli soldier, a senior official said.

Israeli officials linked the incident to the Gulf crisis. They said the conflict had triggered a wave of Islamic fundamentalism in Jordan, where many people have supported Iraq's invasion of Kuwait.

In east Jerusalem, a Palestinian man stabbed and slightly wounded two Israeli border guards before managing to escape. Two separate organisations claimed responsibility for the attack.

"We took military measures along the border," said the president of parliament's foreign affairs and defense commission, Eliahou Ben Elissar. He did not elaborate.

"We must get the Jordanians to understand that we will not stay with our arms folded should the situation get worse," Mr. Ben Elissar told Agence France-Presse in the first official reaction to the pre-dawn border incident.

An armed infiltrator from Jordan shot and killed an Israeli soldier before being captured by troops near the Adam Bridge that spans the Jordan River on the cease-fire line between the two countries, the army said.

They identified the assailant as a 17-year-old member of the Moslem fundamentalist group Islamic Jihad (Holy War). The victim was named as reserve

sergeant Pinhas Levy, 37.

The assailant was seized after he grabbed the soldier's weapon and tried to enter a room where other troops were gathered, the army said.

Sources close to the defense ministry said Israel could launch "preventive military operations" in case of further border incidents, citing similar measures against anti-Israeli groups in south Lebanon.

"Since the start of the Gulf crisis, the (Jordanian) king has been making more and more concessions to the Islamic groups. There is no difference any longer between soldiers, extremists and simple terrorists," one source said.

"The Jordanian army has become affected by the pro-Iraqi mood that prevails these days," he added.

#90317d7230 11/13/1990 ~French/German News Agency

BANGUI (NOV. 13) - The Centrafrican president's spiritual guide, murdered in September, played a key role in the nation's politics and appears to have been killed by someone close to the head of state, informed sources said here.

The marabout (religious leader), Bernard Kowada, shot dead at his home on September 29, had an office next to that of President Andre Kolingba, vetted all his visitors, had a decisive say in the appointment of his aides and set the dates for the president's excursions, sources said Tuesday.

Sources close to the government said police and gendarmes had narrowed their search for the assassin down to the president's entourage. Several people close to the head of state have been interrogated and since released, the sources said.

Early in November, reliable sources in Geneva said that a former health minister of the Central African Republic, General Sylvestre Yagongo, and his wife had both been arrested, but officials here have refused to confirm the report.

Like General Kolingba, Mr. Kowada came from the Yacoma tribe. Western sources said that until relatively recently a third of the best-paid and most responsible jobs went to Yacoma people. Sources close to the president said he was strongly criticised for this at the most recent meeting of the single ruling party's leadership in May.

Since then, some posts have changed hands.

Observers posted here said Tuesday that the affair has virtually split the governing Democratic Rally (RDC) party, while lawyers and former ministers

have been openly demanding a multi-party system. Most of those who signed a pluralist appeal issued on May 15 are now behind bars.

September's appointment of hardliner Christophe Grelombe to the justice ministry, in place of the sacked Hugues Dobozendi, indicates that those favouring a crackdown have the upper hand, observers said. Colonel Grelombe is also defence minister.

Gen. Kolingba appears to have been personally deeply affected by the murder of his marabout, who had claimed that he was immortal through the protection of a powerful 'mamie wata', or spirit, a source close to the presidency said. The general almost called off a visit to the United States early in October.

Animist traditions are still strong in this small central African nation.

#90317d7250 11/13/1990 ~French/German News Agency

BERLIN (NOV. 13) - At least 137 policemen were hurt during riots by about 500 left-wing radicals here Monday night, Berlin's chief of police, Georg Schertz, said Tuesday.

Four policemen remained hospitalised. A spokesman for the radicals said there were three serious and numerous minor injuries in their ranks.

Twenty rioters were arrested. Schertz said that although 1,400 policemen were sent to the scene, no more arrests could have been made without putting their lives in jeopardy.

The clashes, which lasted five hours, broke out in the Friedrichshain district after police cleared squatters from three houses in the Prenzlauer Berg and Lichtenberg districts in the eastern part of the city.

Left-wing radicals had headed for occupied buildings on Mainzer Street in Friedrichshain, apparently fearing that police would clear those apartment houses as well.

The city's squatter community called for another ''major demonstration'' Wednesday and demanded ''guarantees'' from Mayor Walter Momper that no more buildings would be evacuated.

Eyewitnesses compared Mainzer Street on Tuesday morning to devastated Beirut.

The pavement was ripped up in many places, rioters had dug deep trenches with excavating equipment and erected metre-high barricades with cars and a tram they had set afire.

LUSAKA (NOV. 13) - Zambian police used teargas Tuesday to disperse a crowd of about 2,000 people besieging a court where pro-democracy figures were answering unlawful-assembly charges.

A resident said a 15-year-old boy was shot in the leg and several persons beaten up, but police in the remote southern town of Choma denied hurting anyone.

The case against Fredrick Chiluba, vice-chairman of the Movement for Multi-Party Democracy (Mmd), and seven members of the Choma branch of the Mmd was adjourned to Wednesday for legal argument.

''The courtroom was too small for the crowd. When police dispersed the people, they got angry and looted a state shop and a few Indian shops in town,'' the Choma resident told the German Press Agency dpa by phone.

LYONS, FRANCE (NOV. 13) - Five police officers were among some 20 people detained in connection with a total 80 armed robberies committed in this central-eastern region in the last four years, police said Tuesday.

The five, who had all been stationed in Lyons, were immediately suspended.

Some of the detained officers were caught during a bank robbery in Lyons on Monday, the police sources said.

MOSCOW (NOV. 13) - The crew of a Tupolev-154 airliner on a domestic flight thwarted a hijack attempt by a teenager, the Soviet news agency Tass reported Tuesday.

It quoted the secret service Kgb as saying that 18-year-old Mikhail Grachev threatened to blow up the aircraft shortly after take-off late Monday unless it changed course and flew to Sweden.

The plane was on its way from Leningrad to the Ukrainian town of Lvov.

But the pilot decided to land at the Byelorussian airport of Minsk after receiving information that all 143 passengers and their luggage had been thoroughly checked during loading, the agency said.

The crew then overwhelmed Grachev who apparently had tried to bluff. The

hijacker was arrested by police, Tass said.

PRAGUE (NOV. 13) - Former Czechoslovakian foreign minister under the disgraced Communist regime, Bohuslav Chnoupek, has been under house arrest for the past fortnight, the Vecerni Praha newspaper reported here Tuesday.

The paper said that Mr. Chnoupek, foreign minister from 1971 to 1988, had been placed under house arrest "in connection with a judicial inquiry", but gave no further details.

Mr. Chnoupek, 65, is a former journalist who became head of Radio Prague in 1969 after the crushing of the Prague Spring pro-democracy movement.

He was ambassador to the Soviet Union from 1970-71 before spending 17 years as Czechoslovakian foreign minister.

He was forced to resign from the post in 1988 amid accusations that he had accepted bribes.

JOHANNESBURG (NOV. 13) - A judicial committee set up to probe allegations that South African police and military death squads were murdering anti-apartheid activitists has come up with no evidence to support the claims, according to the committee report published here Tuesday.

Justice Louis Harms, who sat alone on the committee, said he could draw no firm conclusion on the deaths of 71 people allegedly assassinated for political motives. They were on a justice ministry list of unclarified murders.

Harms criticised the now disbanded Civil Cooperation Bureau (Ccb) and said evidence indicated that members of this special army unit had been involved in covert operations and violent acts.

The Ccb, which closed down last June, was employed ''to disrupt maximally the enemies of the state'', said Harms who was appointed by President Frederik de Klerk on January 31.

Harms said he was only passing to prosecutors details of the 1986 murder of doctor and anti-apartheid activist Fabian Ribiero and his wife Florence.

A former Ccb agent, Noel Robey, who it is believed may have gone into hiding in Britain, is wanted in connection with the murder. Whether or not the Ccb authorised the killing ''could not be determined'', according to Harms' report.

Harms criticised the Ccb for engineering the dissappearance of important documents. This aspect and a number of contradictory statements from witnesses had meant that alleged Ccb involvement in a series of murders could be neither confirmed nor disproved, he added.

MOSCOW (NOV. 13) - Soviet top rivals Mikhail Gorbachev and Boris Yeltsin Tuesday said they had a good meeting last weekend, even if major differences remain over how power will be shared between the union and the republic.

Speaking on television here, Mr. Gorbachev described his four-and-a-half hour talk Sunday with Mr. Yeltsin as "responsible, serious and constructive".

Mr. Yeltsin, the president of the Russian federation, the largest and richest of the 15 Soviet republics, also welcomed the talks, saying they contributed to the realization of Russian "sovereignty".

Mr. Gorbachev played down the recent "war of decrees" which has opposed him and the federal power to the Russian parliament.

Pointing to the good nature of the talks, Mr. Gorbachev said: "I want to stress this because a number of bills passed by the Russian Supreme Soviet lately, including those on economic sovereignty and the application of federal laws, have given rise to concern among the people of Russia and in the Union as a whole".

"I am confident that both the centre and the Russian leadership will act in a spirit meeting the interests of our multinational state and all its peoples," he added.

The Soviet president said the talks had mainly focussed on the future treaty of the union, which should be ready within "a week to 10 days".

Mr. Yeltsin has vowed that Russia will remain within the union, but he intends to fight to broaden its powers.

He has also called for the formation of a government of coalition at the national level, saying the Russian parliament should be at liberty to chose the Prime Minister, along with the defence and finance ministers.

Mr. Gorbachev agreed in principle on the need for such a coalition government, Mr. Yeltsin also told the Russian parliament.

PESHAWAR, PAKISTAN (NOV. 13) - Afghan mujahedin guerillas would accept elections as proposed by the United Nations provided the present rulers in Kabul were kept out of them and they were held ''without foreign interference'', according to a mujahedin leader.

Sibghatullah Mujaddedi, president of the Afghan Interim Government (Aig) of the mujahedin based here, said: ''Communists and other secular parties have no right to participate in the polls because they have committed untold crimes against their own nation.''

Mujaddedi made the comment to the Aig news agency, Midia, while on a tour of liberated areas in western Afghanistan. The report was distributed Tuesday.

Last week, the U.N. General Assembly adopted a resolution calling on ''all concerned parties'' to the 12-year civil war in Afghanistan to negotiate a political settlement and accept elections.

JERUSALEM (NOV. 13) - Israeli military authorities Tuesday jailed without trial three prominent Palestinians, charging that they were leading members of the underground uprising (intifada) leadership in the occupied West Bank and Gaza Strip.

In Jerusalem, a young Palestinian attacked and wounded with a knife two Israeli soldiers in the Old City, while an Arab guerrilla late Monday killed an Israeli soldier manning a West Bank post bordering Jordan.

The head of the Palestinian Journalist Organisation, Radwan Abu Ayash from the West Bank city of Ramallah, and lawyer Ziad Abu-Ziad from Elasiria near Jerusalem were jailed for six months. Ahmed Yazdji, a lawyer in the Gaza Strip was imprisoned for a year.

The order to put the three under ''administrative detention'' was signed by General Itzhak Mordechai, head of the Israeli army's central command, and was authorised by Defence Minister Moshe Arens.

According to an official communique, they were described as ''central figures'' of the al-Fatah group, which is led by Palestine Liberation Organisation (Plo) Chairman Yassir Arafat.

#90317d7690 11/13/1990 ~French/German News Agency

BAALBECK, LEBANON (NOV. 13) - The Iranian-backed Hezbollah movement has strengthened its presence in this eastern Lebanon town after evacuating its militants from the southern suburbs of Beirut, correspondents here said.

For the first time since their deployment here in 1982, the Moslem fundamentalist militants are patrolling the streets of this Syrian-controlled town with their weapons in three-car convoys.

They have also forced their way into private homes to check if the inhabitants were breaking a Moslem ban on alcohol consumption.

The militia has also detained three male hairdressers because they continued to practice their job in defiance of a Hezbollah-imposed ban on male hairdressers.

Residents are concerned that Hezbollah, which released their hairdressers after making them promise to give up their trade, will issue new bans affecting other jobs.

Pro-Syrian secular groups have reportedly sought assurances with the Syrian army command in the region that they will not have to bend to Hezbollah rule and were told that the Syrian troops would continue to guarantee security.

These measures coincided with the evacuation of Hezbollah militants from Beirut's southern suburbs in compliance with a government decision to end militia rule in the capital to place it under the control of the regular army.

Hezbollah on Monday announced it had completed its evacuation from the southern suburbs and dispatched its militants and arsenal towards positions facing Israel in southern Lebanon.

According to various estimates, Hezbollah is the most powerful militia in the Baalbeck region and can mobilise up to 20,000 armed supporters, including several thousand militiamen.

Several dozen Iranian Revolutionary Guards back up Hezbollah in the region.

BOGOTA (NOV. 13) - Bombings rocked Colombia early Tuesday in a violent prelude to a general strike called to protest the economic policies of President Cesar Gaviria, in office only 100 days.

Mr. Gaviria met with his security council to consider measures to control the violence before the general strike called for Wednesday by four labor federations.

No injuries were reported in the bombings, which targeted police posts in Barranquilla and Bucaramanga and public transportation in Cali.

In Cali, two bombs were hurled into a bus depot, a bus was set on fire and a garage was partially destroyed by an incendiary bomb, police said. Another bomb was found on a city bus and deactivted.

A regional leader of one of the four labor federations calling the strike was shot and killed in the town of Tulua by gunmen on a motorcycle, police said.

And three gasoline stations were bombed Monday night in Medellin, home of the country's most violent cocaine cartel.

The country's leftist guerrillas also have been active, scuttling chances of peace talks between the government and the rebels.

The Defense Ministry said a rebel attack Saturday on a military barracks in Taraz in northwestern Colombia claimed 43 lives, including a battalion commander. In all, nine soldiers and 34 guerrillas were killed, the defense ministry said.

Guerrillas also ambushed a police truck carrying children from a bicycle race Monday in the town of Algeciras in the southeastern province of Huila, killing two policemen and six children.

After the attack, Interior Minister Julio Cesar Sanchez said "all avenues toward a dialogue with the insurgents are closed."

"We will not chielf to blackmail, extortion and terrirorism," Mr. Sanchez said.

#90317d7790 11/13/1990 ~French/German News Agency

BONN (NOV. 13) - A secret NATO network, set up in the Cold War as a fall-back intelligence organisation in the event of a Warsaw Pact invasion of Europe, also existed in West Germany, a well-informed source in Bonn said Tuesday.

"You can bet that the German government will do everything to deny and try to cover up the existence" of the network, the source said, adding that "the organisation did exist in Germany."

A German government spokesman declined to make any comment Tuesday, saying "we are checking into the matter."

In Oslo, the Norwegian news agency NTB on Tuesday reported that in 1978 the then defence minister Rolf Hansen had acknowledged the existence of such a network in Norway in parliament.

Defence Ministry spokesman Erik Stenstad refused to comment on reports that such a network existed throughout NATO but said Mr. Hansen's remarks at the time were "still valid".

So far, Italy, Belgium and France have acknowledged the existence of the shadowy group in their country, and Italian sources say it was also operational in Britain and the Netherlands, and perhaps in Denmark.

In a radio broadcast late Monday, Alfred Mechtersheimer, a Greens MP, maintained that network "agents were trained in West Germany."

And a former member of Belgian military intelligence, Andre Moyen, on Tuesday said that the network had been operational in Germany under the name of Schwert, which means Sword in German.

Former chancellor Willy Brandt denied in Berlin Tuesday that he had any knowledge of the organisation during his 1969-74 stay in power.

The answer is "no, absolutely not," he said, in response to a question during a visit to Berlin.

Mr. Brandt's Social Democratic Party (SPD) has asked the centre-right government in Bonn to make public all its knowledge on the affair.

The North Atlantic Treaty Organisation (NATO) has refused to confirm or deny the existence of the network.

BEIRUT (NOV. 13) - Syria has rejected a U.S. request to expel the Popular Front for the Liberation of Palestine-General Command from Damascus, according to the group's leader Ahmad Jibril.

In a statement carried by newspapers here Tuesday, Mr. Jibril said in Damascus that U.S. Secretary of State James Baker personally asked Syrian President Hafez al-Assad to expel the group during a visit to the Syrian capital in September.

The U.S. media has accused the group of involvement in the explosion aboard a

Pan American Airways Boeing over the Scottish town of Lockerbie in December 1988. The crash killed 270 people.

Mr. Jibril's group is not part of the Palestine Liberation Organization (PLO). It has close ties with Iran and in the past had excellent relations with Libya.

MOSCOW (NOV. 13) - A man died from the plague Monday in a Moscow hospital, the second Soviet to die of the disease this month, according to reports on Tuesday.

The unofficial Interfax agency reported that a homeless man was found Sunday in a railroad station in Moscow and taken to hospital where he died of the plague.

The official news agency TASS reported the death last week of a well-digger in a village near Bukhara in Uzbekhistan.

More than 40 people who had contacts with him were quarantined.

The man, who died in a Bukhara hospital, had been working in the Uchkuduk region where all rodents are now being destroyed.

#90317d7960 11/13/1990 ~French/German News Agency

PARIS (NOV. 13) - President Francois Mitterrand said Tuesday the Gulf crisis was "dangerously" close to a "critical point" and the United Nations Security Council might have to "redefine its point of view in coming weeks".

Speaking after talks with Spanish Prime Minister Felipe Gonzalez, Mr. Mitterrand said: "We continue to think peace is preferable to war, but it must be accompanied by law, and the absence of law deserves United Nations intervention".

He told a news conference that representatives of 34 countries due to attend the Conference on Security and Cooperation in Europe (CSCE) summit here next Monday through Wednesday should discuss the problem, and he considered it "premature" to say more on the issue.

Mr. Gonzalez spoke out in favour of a peaceful solution to the Gulf crisis.

Meanwhile in Istanbul, former British foreign minister David Owen said he believed U.S. President George Bush might decide to declare war against Iraq this month or next.

He was speaking at a symposium on Turkey's role in the crisis.

Turkish Foreign Minister Ahmet Kurtcebe Alptemocin, who attended the meeting, said his country also wanted a "peaceful solution" to the crisis.

#90317d8510 11/13/1990 ~French/German News Agency

BOGOTA (NOV. 13) - Two communist guerrillas in Bolivia allegedly killed Tuesday seven members of the security forces and six school pupils in separate attacks, as the country was heading for a general strike the next day.

Authorities said three soldiers were shot dead and five injured in an attack against a military base in Tamara, about 250 kilometres northeast of Bogota.

Guerrillas blew up a school bus near Algeciras, 270 kilometres south of the capital, killing six pupils as well as two policemen and injuring six children. The pupils had taken part as school policemen in a sport fiest.

A military spokesman charged the military wing of the Bolivian Communist Party Farc, and the pro-Cuban group Eln were behind the Tamara attack. The incident in Algeciras was carried out only by Farc gunmen.

He added that Farc members were planning more attacks during a general strike scheduled on Wednesday to protest against the economic policy of President Cesar Gaviria, who plans to privatise a number of state-owned companies.

#90317d8570 11/13/1990 ~French/German News Agency

WASHINGTON (NOV. 13) - A U.S. National Guard reservist who has been ordered to Saudi Arabia filed suit against the government Tuesday, saying President George Bush was violating the constitution by sending troops to the Gulf without congressional permission.

Sergeant Michael Ange, 26, alleges in the suit filed in U.S. District Court that his orders are illegal because they violate federal war powers laws.

"The president is preparing for an offensive military option against Iraq," the suit said. "If he goes to war, he will do so without obtaining the constitutionally required assent or declaration of war from Congress."

Leading Republican leaders asked Mr. Bush Tuesday to call a special session of Congress on the Gulf crisis, fearing the administration was moving dangerously close to war without congressional input.

Sgt. Ange "believes that he should not have to fight in an unconstitutional war," said Michael Ratner, the lead attorney in the case.

The reservist also claims that he is medically unfit to be called to active duty, citing knee, leg and foot problems.

His attorneys said Sgt. Ange supported the military's role in defending the United States.

-30- 1394

#90317d8610 11/13/1990 ~French/German News Agency

WASHINGTON (NOV. 13) - President George Bush Tuesday extended a "national emergency" with Iran that was first declared November 14, 1979 after the hostage-taking at the U.S. Embassy in Tehran.

"The crisis between the United States and Iran that began in 1979 has not been fully resolved," Mr. Bush explained in a letter to Congress.

The "national emergency," which has been extended each year since the hostages were taken at the U.S. Embassy, grants the president the authority to take whatever steps he deems necessary to secure Iran's adherence to the agreements reached in January 1981 at the end of the hostage crisis.

In his letter, Mr. Bush said that an international tribunal responsible for settling U.S.-Iranian financial disputes is still active in The Hague. But, he said, "the normalization of commercial and diplomatic relations between the United States and Iran has not been achieved."

"In these circumstances I have determined that it is necessary to maintain in force the broad authorities that may be needed in the process of implementing the January 1981 agreements with Iran and in the eventual normalization of relations with that country," Mr. Bush said.

-30- 1389

#90317d8670 11/13/1990 ~French/German News Agency

PARIS (NOV. 13) - French Foreign Minister Roland Dumas held talks here Tuesday with his Libyan counterpart Ibrahim Mohammed al-Bechari, the foreign ministry said without giving details.

The meeting came as the situation in Chad worsened, with Ndjamena reporting Monday that Chadian troops and Libyan forces had been fighting since Saturday on the border between Chad and Sudan.

Libya has denied any involvement in the conflict.

Observers said Mr. Dumas' talks with his Libyan counterpart focused on the Gulf crisis. Tripoli and Paris have both condemned the Iraqi invasion of Kuwait and pledged to abide by the United Nations-decreed trade embargo on Iraq.

Mr. al-Bechari stopped in Paris on his way back from Brussels where he attended a meeting between the 12 European Economic Community states' foreign ministers and counterparts from the Maghreb Union countries -- Tunisia, Algeria Mauritania, Morocco and Libya.

#90317d8820 11/13/1990 ~French/German News Agency

MANAGUA (NOV. 13) - The Nicaraguan army and police are ready to put down a rebellion of former contras, deputies and mayors, many from President Violeta Chamorro's ruling party, authorities said Tuesday.

Antonio Lacayo, the minister of the presidency, said in a press conference that the army would step in if the government and demonstrators failed to come to an agreement to end two-weeks of barricaded roads and occupied churches and government buildings.

Nicaragua is in the midst of growing protests by former rebels, backed by civilian officials, who say the government has failed to deliver on pledges of land, economic aid and other help in return for their demobilization earlier this year.

More than 150 riot police backed by three helicopters broke up a protest by former contra rebels Monday. At least five people have died since the disturbances began.

Mr. Lacayo also said Tuesday that police would be called in to pull down barricades, which have been erected to block roads as a form of protest.

Interior Minister Carlos Hurtado added: "It will be a question of pondering alternatives between dialogue and the use of other methods."

The mayors, who belong to Mrs. Chamorro's ruling coalition, have been demanding the ouster of both cabinet officials, as well as armed forces chief General Humberto Ortega and other military chiefs linked to the Sandinista government, which was voted out of power in February after 10 years of rule.

Mr. Lacayo said he agreed that some of the demands were just, including the demand for land.

But he reiterated Mrs. Chamorro's call for the rebels to end the protests and said they were being manipulated for political purposes.

A faction of the ruling coalition and the former rebels, who fought the Sandinistas for nine years, believe Mrs. Chamorro is being manipulated by the Sandinistas and failing to back those who voted her into power in February.

#90317d8840 11/13/1990 ~French/German News Agency

WASHINGTON (NOV. 13) - The Pentagon said Tuesday that the Marine Corps will conduct its first amphibious assault landing exercise in Saudi Arabia, but rejected suggestions such an operation was "provocative."

The Washington Times said that the exercise would be carried out only 16 kilometers (10 miles) from the Kuwaiti border, citing unnamed U.S. officials as concerned about the "provocative" nature of a maneuver within range of Iraqi Silkworm anti-ship missiles.

"I don't see how you could in any way describe them as provocative," Mr. Williams said of the exercise. "This is Saudi sovereign territory. It isn't like parts of the country have already been red-lined away. It's all Saudi Arabia that we are talking about."

Mr. Williams would not say where or when the exercise would be held, but another Defense Department official, who requested anonymity, said most of the exercise would take place at least 16 kilometers (10 miles) from the Kuwaiti border.

Some 20 U.S. warships and 2,000 of the 11,000 Marines currently in the Gulf would take part in the maneuvers, designed to prepare for a beach assault and naval bombardment of Kuwait should President George Bush order an anti-Iraqi attack, the Washington Times report said.

#90317e0042 11/13/1990 ~Latin America New Agency

TOKYO (NOV. 13) EFE - Salvadoran President Alfredo Cristiani said Tuesday a new United Nations report sharply critical of the human rights situation in his country was an objective one, in an interview Tuesday with the Japanese news agnecy Kyodo.

"Basically, the report is objective. We have never tried to conceal the fact that there are still abuses and some violations," said Cristiani, whose right-wing ARENA party has been linked to thousands of death-squad killings.

Released Monday in New York, the U.N report cited numerous instances of torture, among other rights abuses, but said these were neither widespread nor the result of deliberate government policy.

Cristiani insisted that the number of such abuses has been falling and said the best way of ending them altogether was to end the Salvadoran civil war.

Earlier Tuesday, the Salvadoran leader had blamed leftist rebels for the delay in renewing peace talks, saying they were militarily weak and politically disoriented by the collapse of communism around the world.

BRASILIA (NOV. 13) XINHUA - ITALY IS READY AND WILLING TO PUT INTO EFFECT A BILATERAL COOPERATION AGREEMENT WITH BRAZIL SIGNED IN SEPTEMBER 1989, WHICH WOULD GIVE LOANS TO THE SOUTH AMERICAN COUNTRY.

PAOLO TARONY, ITALIAN AMBASSADOR TO BRAZIL, SAID THAT WITHIN ONE MONTH REPRESENTATIVES OF BOTH COUNTRIES WILL BEGAN TO DISCUSS THE MATTER.

THE ITALIAN GOVERNMENT HAS AGREED TO GRANT BRAZIL 1.2 BILLION DOLLARS IN CREDITS FOR INVESTMENT IN "ECONOMIC, INDUSTRIAL, TECHNOLOGICAL AND CULTURAL AREAS."

AFTER THE AGREEMENT GOES INTO EFFECT, AN INITIAL PAYMENT OF 400 MILLION DOLLARS WILL PROBABLY BE MADE. THE REMAINDER OF THE MONEY WILL BE PAID OUT WHEN BRAZIL FINALIZES A PENDING ACCORD WITH THE PARIS CLUB, TARONY SAID.

TOKYO (NOV. 13) KYODO - CANON INC. ANNOUNCED TUESDAY A NEW PROGRAM TO COLLECT AND RECYCLE USED COPIER AND PRINTER CARTRIDGES IN JAPAN AND 16 OTHER COUNTRIES A MOVE REFLECTING RECENT ENVIRONMENTAL CONCERN AROUND THE GLOBE.

THE LEADING PRECISION MACHINERY MAKER SAID IT WILL GATHER CARTRIDGES USED IN ITS PERSONAL PC/FC SERIES COPIERS AND LASER SHOT SERIES LASER PRINTERS. THE COMPANY PRODUCES MORE THAN ONE MILLION SUCH CARTRIDGES EVERY MONTH.

THE COLLECTED CARTRIDGES WILL BE DISASSEMBLED AND RECYCLED FOR THE PRODUCTION OF NEW CARTRIDGES AT A NEW PLANT IN DALIAN, CHINA, WHICH IS SCHEDULED TO BEGIN

OPERATION IN FEBRUARY.

CANON SAID THE PROGRAM, WHICH HAS ALREADY BEEN TESTED IN GERMANY AND THE WESTERN UNITED STATES, WILL BE PUT INTO PRACTICE IN JAPAN AND OTHER PARTS OF THE U.S. BY THE END OF THE YEAR AND IN 13 EUROPEAN COUNTRIES, CANADA, AND AUSTRALIA NEXT YEAR.

COMMENTING ON THE NEW SCHEME, COMPANY PRESIDENT KEIZO YAMAJI SAID CANON IS WILLING TO INCLUDE ALL ITS CARTRIDGES IN THE PROGRAM IN FUTURE, THOUGH TRANSPORTATION AND OTHER COSTS ARE MAJOR OBSTACLES.

TOKYO (NOV. 13) KYODO - AUSTRIAN PRESIDENT KURT WALDHEIM ON TUESDAY TOLD FOREIGN MINISTER TARO NAKAYAMA THAT HIS COUNTRY WANTS TO CORRECT ITS TRADE IMBALANCE WITH JAPAN, FOREIGN MINISTRY OFFICIALS SAID.

THE TWO MET ON SHORT NOTICE AT A HOTEL IN TOKYO, AFTER WALDHEIM REQUESTED A MEETING ON MONDAY.

IN THEIR 10-MINUTE TALKS, WALDHEIM STRESSED THE NEED FOR CORRECTING THE TRADE IMBALANCE WITH JAPAN, ADDING THAT HIS COUNTRY HAS MADE EFFORTS TO PROMOTE THE NATION'S EXPORTS, THE OFFICIALS SAID.

NAKAYAMA, IN RETURN, SAID HE WILL STUDY THE ISSUE, TAKING INTO CONSIDERATION RELATIONS WITH OTHER EUROPEAN COUNTRIES.

JAPAN EXPORTED 182.2 BILLION YEN WORTH OF GOODS TO AUSTRIA IN 1989 WHILE IMPORTING 72 BILLION YEN WORTH.

TOUCHING UPON TALKS HE HELD WITH AUSTRIAN FOREIGN MINISTER ALOIS MOCK IN AUSTRIA LAST DECEMBER AND JULY, NAKAYAMA WAS QUOTED AS SAYING THAT HE HAD LEARNED MUCH THROUGH MOCK ABOUT EAST EUROPEAN COUNTRIES.

WALDHEIM TOLD NAKAYAMA THAT HIS COUNTRY CAN LINK EAST EUROPEAN NATIONS WITH JAPAN BY ACTING AS A CENTER FOR JAPANESE COMPANIES, ACCORDING TO THE OFFICIALS.

TOKYO (NOV. 13) KYODO - ISUZU MOTORS LTD., A MEDIUM-SCALE AUTOMAKER, SAID TUESDAY IT PLANS TO STRENGTHEN ITS PARTNERSHIP WITH GENERAL MOTORS CORP. OF THE UNITED STATES BY PROMOTING SALES OF GM CARS IN JAPAN.

THE ANNOUNCEMENT CAME AT A PRESS CONFERENCE MADE BY ISUZU PRESIDENT KAZUO TOBIYAMA EARLIER IN THE DAY.

"GM PUTS A SIGNIFICANT IMPORTANCE ON THE JAPANESE AUTO MARKET. ISUZU WANTS TO COOPERATE TO PROMOTE ITS SALES HERE," HE SAID.

INDUSTRY SOURCES SAID THE MARKETING PROMOTION IS EXPECTED TO COVER GM'S SATURN A COMPACT CAR WHICH WAS RECENTLY INTRODUCED IN THE U.S.

TOBIYAMA SAID THAT BESIDES HELPING SELL GM CARS, THE COMPANY WILL STUDY THE POSSIBILITY OF ASSEMBLING CARS MADE BY OPEL, GM'S GERMAN UNIT.

IN CELEBRATION OF THE 25TH ANNIVERSARY OF THEIR TIE-UP NEXT YEAR, THE TWO AUTOMAKERS WILL ALSO BOOST PRODUCTION TO 250,000 VEHICLES ANNUALLY BY 1995 AT IBC, THEIR COMMERCIAL VEHICLE PRODUCTION ALLIANCE IN BRITAIN.

IBC, WHICH NOW TURNS OUT 20,000 VEHICLES OF ISUZU'S FARGO, WILL START PRODUCTION OF ITS OFF-ROAD RODEO IN THE LATTER HALF OF 1991 AND OTHER NEW COMMERCIAL VEHICLES IN 1985.

TOBIYAMA SAID ISUZU WILL ALSO PURCHASE GM ENGINE PARTS BEGINNING NEXT SUMMER.

TOKYO (NOV. 13) KYODO - THE ALLIANZ INSURANCE GROUP, ONE OF GERMANY'S LARGEST INSURERS, SAID TUESDAY IT WILL SET UP A WHOLLY OWNED SUBSIDIARY IN TOKYO TO BUILD A MARKETING BASE FOR ITS INSURANCE SERVICES.

ALLIANZ VERSICHERUNGS AG, THE NONLIFE INSURANCE COMPANY OF THE GROUP, WILL ESTABLISH THE SUBSIDIARY BY THE END OF THIS MONTH WITH CAPITAL OF 2 BILLION YEN FOR STARTING OPERATION ON APRIL 1, 1991.

THE GERMAN INSURANCE COMPANY WILL BE THE FIRST EUROPEAN INSURANCE FIRM TO ENTER JAPAN BY FORMING A LOCAL SUBSIDIARY.

ALLSTATE AUTOMOBILE AND FIRE INSURANCE CO., AND JAPAN INTERNATIONAL ACCIDENT AND FIRE INSURANCE CO., ALREADY HAVE SUBSIDIARIES IN JAPAN.

THE SUBSIDIARY, ALLIANZ FIRE AND MARINE INSURANCE CO., WILL TARGET EUROPEAN COMPANIES OPERATING IN JAPAN, COMPANY OFFICIALS SAID.

TOKYO (NOV. 13) KYODO - PROSECUTORS INDICTED A FORMER DEPUTY BRANCH MANAGER OF THE MITSUI TRUST BANKING CO. AND THREE OTHERS ON TUESDAY FOR EVADING TAXES ON 1.83 BILLION YEN IN EARNINGS FROM STOCK DEALINGS.

THE INDICTED WERE TSUNETAKA SETO, 48, A FORMER DEPUTY MANAGER OF THE SHIBUYA BRANCH OF THE BANK, HARUKI MATSUO, 40, A FORMER SHIBUYA BRANCH CLERK, NOBUYUKI

ITO, 43, A LICENCED TAX ACCOUNTANT, AND TAISUKE KOBAYASHI, 52, A COMPANY EXECUTIVE.

SETO WAS CHARGED WITH EVADING TAX OF 680 MILLION YEN BY FAILING TO DECLARE EARNINGS OF 1.14 BILLION YEN GAINED THROUGH SPECULATIVE STOCK TRADING BETWEEN 1986 AND 1987, PROSECUTORS SAID.

SETO TOOK ADVANTAGE OF SPECULATIVE STOCK TRADING BY MITSUHIRO KOTANI, 53, HEAD OF THE KOSHIN GROUP OF STOCK SPECULATORS, WHO WAS ARRESTED AND INDICTED LAST SUMMER FOR MANUPULATING SHARE PRICES.

THE THREE OTHERS ALSO ALLEGEDLY EVADED TAXES ON L.15 MILLION YEN IN PROFITS GAINED IN SHARE TRADING, PROSECUTORS SAID.

THE MITSUI TRUST AND BANKING GROUP FINANCED A TOTAL OF 80 BILLION YEN TO THE KOSHIN GROUP, SOURCES SAID.

TOKYO (NOV. 13) KYODO - CAMEROON'S PRESIDENT PAUL BIYA ON TUESDAY PRESSED PRIME MINISTER TOSHIKI KAIFU FOR ASSISTANCE TO HELP THE CENTRAL AFRICAN NATION WEATHER ITS CURRENT ECONOMIC PLIGHT, JAPANESE OFFICIALS SAID.

BIYA IS IN JAPAN TO ATTEND THE ENTHRONEMENT CEREMONY FOR EMPEROR AKIHITO, WHICH WAS HELD MONDAY.

HE EXPRESSED CONCERNS THAT ASSISTANCE TO EAST EUROPEAN NATIONS, WHICH ARE UNDERGOING SWEEPING POLITICAL AND ECONOMIC REFORMS, MAY ERODE DUE ATTENTION TO ECONOMIC AID FOR AFRICAN AND OTHER DEVELOPING NATIONS, THEY SAID.

BIYA NOTED THAT CAMEROON IS FACING SEVERE ECONOMIC DIFFICULTIES DUE TO DECLINING WORLD PRICES FOR PRIMARY PRODUCTS.

HE TOLD KAIFU THAT HIS NATION IS UNDERTAKING ECONOMIC STRUCTURAL ADJUSTMENTS IN COLLABORATION WITH THE WORLD BANK AND THE INTERNATIONAL MONETARY FUND (IMF) AND NEEDS ASSISTANCE FROM JAPAN.

KAIFU SAID ECONOMIC ASSISTANCE TO CAMEROON WILL BE STUDIED AT THE WORKING LEVEL, AND ASSURED BIYA THAT AID TO EAST EUROPEAN NATIONS WILL NOT CAUSE A REDUCTION IN ASSISTANCE TO DEVELOPING NATIONS.

KAIFU ALSO TOLD BIYA THAT JAPAN WILL SET UP AN EMBASSY IN CAMEROON BY THE END OF THIS YEAR.

HE EXPRESSED HOPE THAT CAMEROON WILL CONTINUE TO STRIVE FOR STABILIZATION AND PROMOTE DEMOCRACY.

CAMEROON HAS OFTEN BEEN SUBJECT TO ANTIGOVERNMENT MOVEMENTS BY ISLAMIC POLITICAL FORCES.

#90317k0102 11/13/1990 ~Japanese News Agency

TOKYO (NOV. 13) KYODO - JAPAN WILL REJECT SOUTH KOREA'S REQUEST FOR AN END TO FINGERPRINTING OF ITS "FIRST AND SECOND-GENERATION" KOREAN RESIDENTS, GOVERNMENT SOURCES SAID TUESDAY.

BUT THE GOVERNMENT PLANS TO APPLY OTHER MEASURES DECIDED FOR "THIRD-GENERATION" RESIDENT KOREANS TO THE FIRST AND SECOND-GENERATION ONES TO IMPROVE THEIR LEGAL STATUS, THE SOURCES SAID.

THE GOVERNMENT WILL FORMALLY UNVEIL ITS POSITION AT A WORKING-LEVEL MEETING WITH SOUTH KOREA ON NOVEMBER 19 AND HOPES TO REACH AGREEMENT AT A MINISTERIAL MEETING ON NOVEMBER 26-27 IN SEOUL, THEY SAID.

JAPAN AND SOUTH KOREAN REACHED ACCORD AT FOREIGN MINISTERIAL TALKS IN APRIL ON THE ISSUE OF IMPROVING THE LEGAL STATUS OF THIRD-GENERATION RESIDENT KOREANS.

THE AGREEMENT CALLS FOR A NEW REGISTRY TO ELIMINATE FINGERPRINTING FOR SUCH RESIDENTS.

IT ALSO LIMITS DEPORTATION FOR THIRD-GENERATION KOREAN RESIDENTS TO THOSE GUILTY OF SUBVERSIVE ACTS AND EXTENDS THEIR ALLOWABLE RESIDENCE PERIOD ABROAD FROM TWO TO FIVE YEARS.

SOUTH KOREAN PRESIDENT ROH TAE WOO URGED JAPAN TO APPLY THE ACCORD TO THE FIRST AND SECOND-GENERATION KOREAN RESIDENTS WHEN HE VISITED JAPAN IN MAY.

THIRD-GENERATION KOREAN RESIDENTS ARE LEGALLY DEFINED AS THE OFFSPRING OF KOREAN RESIDENTS BORN ON OR AFTER JANUARY 17, 1971.

WHEN JAPAN AND SOUTH KOREA SIGNED THE NORMALIZATION TREATY IN 1965, ALL KOREANS WHO HAD BEEN LIVING IN JAPAN UP TO 1945, AND THOSE BORN BEFORE JANUARY 16, 1971 WERE CLASSIFIED AS FIRST-GENERATION KOREANS.

THEIR CHILDREN WERE ALSO GIVEN THE RIGHT OF PERMANENT RESIDENCE. JAPAN AGREED IN APRIL TO GRANT THIRD-GENERATION KOREAN RESIDENTS THE SAME RIGHT.

JAPANESE LAW REQUIRES ALL FOREIGNERS OVER THE AGE OF 16 LIVING IN JAPAN FOR MORE THAN A YEAR TO SUBMIT A FINGERPRINT FOR AN ALIEN REGISTRATION CERTIFICATE WHICH THEY MUST CARRY AT ALL TIMES.

-30- 2018

#90317k0105 11/13/1990 ~Japanese News Agency

SINGAPORE (NOV. 13) KYODO - FOUR JAPANESE PUBLICATIONS CIRCULATING IN SINGAPORE HAVE BEEN EXEMPTED FROM APPLYING FOR A PERMIT UNDER SINGAPORE'S TIGHTER PRESS LAWS WHICH WILL TAKE EFFECT ON DECEMBER 1.

THE NEW LAW REQUIRES DAILY OR WEEKLY FOREIGN PUBLICATIONS WHICH REPORT ON THE POLITICS AND CURRENT AFFAIRS OF SINGAPORE AND OTHER SOUTHEAST ASIAN COUNTRIES, AND WHICH HAVE A CIRCULATION OF 300 COPIES OR MORE IN SINGAPORE TO APPLY FOR A PERMIT TO CIRCULATE HERE.

THERE ARE 17 SUCH PUBLICATIONS CIRCULATING IN SINGAPORE, THE MINISTRY OF COMMUNICATIONS AND INFORMATION SAID IN A STATEMENT ON TUESDAY.

BEFORE A PERMIT IS GRANTED UNDER THE NEW LAWS, THE GOVERNMENT WILL SPECIFY THE MAXIMUM NUMBER OF COPIES THEY WILL BE ALLOWED TO SELL IN SINGAPORE.

IT WILL ALSO REQUIRE THE PUBLISHER TO FIRST APPOINT AN AGENT IN SINGAPORE TO ACCEPT THE SERVICE OF ANY LEGAL PROCESS AND PAY A DEPOSIT TO MEET THE COST OF ANY LEGAL PROCEEDINGS.

BUT IT DECIDED TO EXEMPT 14 OF THESE PUBLICATIONS INCLUDING THE ASAHI SHIMBUN SATELLITE EDITION, THE NIHON KEIZAI SHIMBUN ASIAN EDITION, THE BANGKOK SHUHO, AND THE YOMIURI SHIMBUN.

WESTERN PUBLICATIONS SUCH AS TIME MAGAZINE, THE INTERNATIONAL HERALD TRIBUNE, NEWSWEEK, AND THE ECONOMIST, WERE ALSO EXEMPTED BECAUSE THEY ''DO NOT REPORT REGULARLY ON SINGAPORE AND HAVE NOT INTERFERED IN SINGAPORE'S DOMESTIC AFFAIRS '' THE GOVERNMENT SAID.

ONLY THREE REGIONAL PUBLICATIONS CURRENTLY CIRCULATING HERE, THE WEEKLY NEWS MAGAZINE, "ASIAWEEK," ITS CHINESE SISTER PUBLICATION, "YAZHOU ZHOUKAN" AND "MEDIA" WILL NEED PERMITS TO CIRCULATE IN SINGAPORE.

THE FAR EASTERN ECONOMIC REVIEW AND THE ASIAN WALL STREET JOURNAL WILL ALSO NEED A PERMIT BEFORE THEY CAN RESUME CIRCULATION IN SINGAPORE, THE GOVERNMENT SAID.

MAH BOW TAN, SINGAPOREAN MINISTER OF STATE FOR COMMUNICATIONS AND INFORMATION, TOLD PARLIAMENT LAST AUGUST THAT THE NEW RULING IS NOT INTENDED TO CURB THE CIRCULATION OF FOREIGN PUBLICATIONS IN SINGAPORE.

BUT IT IS MEANT TO OVERCOME PROBLEMS ENCOUNTERED WITH A SMALL NUMBER OF FOREIGN PUBLICATIONS WHICH REGULARLY REPORT ON SINGAPORE.

HE SAID SOME OF THESE PUBLICATIONS HAD BUILT UP SIZEABLE CIRCULATIONS IN SINGAPORE AND ATTEMPTED TO PLAY THE SAME ROLE IN SINGAPORE POLITICS AS THEY DID IN THEIR COUNTRIES BY TAKING SIDES AND INFLUENCING EVENTS.

#90317m0001 11/13/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (NOV 13) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei rockets 1042 points. ... The FTSE also gains, adding 13 points in early afternoon trading. ... Bonds continue to move higher with the long yield down to 8.50%. ... The dollar is also stronger. ... GENEX CORP. plans to lay off more than half of its 65 employees and sell its biotechnology unit. ... USX CORP. and the UNITED STEELWORKERS UNION have recessed talks without reaching an early contract settlement on a new contract. The current contract runs for 10 more weeks. ... GENERAL DYNAMICS machinist union rejects a three-year contract offer, but decide not to walk off the job pending further negotiations. ... LOCKHEED received a proposal from Dallas financier HAROLD SIMMONS to take the company private for $40 a share, or about $1.6 billion. The buy-out plan is contingent of Lockheed's providing about half the cash. The company is expected to reject the bid as too low. ... DAYS INN has missed some payments on its high-interest debt, and is trying to overhaul its capital structure.

WHAT'S AHEAD:

The FEDERAL OPEN MARKET COMMITTEE meets today. ... Despite U.S. opposition the WORLD BANK is preparing to lift curbs on loans to China imposed after the Tiananmen killings in June 1989.

FROM THE BULLS:

"I think we can probably go to 2600 or 2650 [on this rally]," says ALAN BOND at W.R. LAZARD & CO. "Near-term, we think that's a possible range, especially if we get a very accommodative Fed posture. After that, we think we might go to 2700 or 2750 ... by year-end." (CNBC "Market Wrap-Up", 11/12)

"Everything's in place for a good rally," says block trader BRAD WEEKES at DONALDSON, LUFKIN & JENRETTE. "Technology stocks are very strong, but stocks are really up across the board." ("The Washington Post", 11/13)

FROM THE BEARS:

One of the more bearish bears on Wall Street is SOGEN INTERNATIONAL FUND's JEAN-MARIE EVEILLARD, who has only 37% of the fund invested in equities. "Over the last 12 months there has been an unwinding of the credit boom, as exemplified by the fall in the junk-bond market, the collapse of the Japanese stock market and the fall in commercial real estate in the U.S.," he says. "One by one, the dominoes have fallen." He continues, "This bear market is

one of three things. It's either a traditional cyclical bear market, in which case it's over. Or it's a 1973-1974 type of affair, in which case we've had 1973 and we still have to go through 1974. Or it's a 1930s type of a bear market, in which case we ain't seen nothing yet." Mr. Eveillard is currently betting on the third scenario. (WSJ, 11/13)

"The Fed's hands are tied until it sees what West Germany and Japan do with their interest rates," says RON SLOAN of SIEBEL CAPITAL MANAGEMENT. "So this run-up [in stocks] is a knee-jerk reaction to

lower rate prospects. Don't get sucked into this rally." ("USA Today", 11/13)

STOCK MARKET:

Yesterday's move was "fairly spirited, considering some players were on the sidelines" for the bank holiday, says SMITH BARNEY analyst ALAN SHAW. He says if there is good volume today, "we could get a decent rally to Dow 2600 to 2640, a 50% retracement from the decline off the top." ("Investor's Daily", 11/13)

Last week, some of the poorest-performing stocks were utility and energy issues, both traditionally safe harbors in times of distress. "That tells me that stock people are getting out of the parking-lot stocks and into real stocks,' says PETER CANELO, chief market strategist at BEAR STEARNS. With the decline in oil prices comes increased confidence that interest rates will be falling too, says Canelo. That view is bolstered by other statistics, including declining prices for some industrial goods, rising unemployment claims and the gloomy outlook among industrial purchasing agents. "Those are all the things the bond market can be happy about," he says adding that they don't necessarily suggest a recession thus buoying the stock market. "If it was really a weak economy, that wouldn't be good for stocks, but as long as the economy remains flat or growing slightly, what's good for bonds is good for stocks." (WSJ, 11/13)

"Earnings are still a question, and while lower interest rates would offset poor earnings, I don't think this rally can last," says RAO CHALASANI, chief investment strategist for PRESCOTT, BALL & TURBEN. He says even a sharp rate cut might not boost the Dow past 2700. ("USA Today", 11/13)

"You're getting a good bear-market rally, and it may be something much bigger " says HARVEY EISEN, president of SUNAMERICA ASSET MANAGEMENT. "The bull case is that rates have peaked, inflation is not re-emerging, and oil is coming down." Mr. Eisen is still cautious holding 25% of his portfolio in cash. What worries him is that the big buying in the Treasury market may be stimulated by fear of a financial collapse resulting in bank failures. (WSJ, 11/13)

"The technology stocks are getting the brunt of the buying, led by IBM," says

strategist MICHAEL METZ at OPPENHEIMER & CO. "That in itself is significant -- it represents a shift away from the defensive plays that have led rallies recently." ("The Washington Post", 11/13)

"Typically when you get into a bear market, interest rates drop and the stock market responds as people begin thinking the economy will pull out of the recession," says ART MICHELETTI of BAILARD BIEHL & KAISER. "But as you get out two or three months and the economy is not responding, people get discouraged." Based on that he advises investors to "sell the rally and look for a 1-percentage-point drop in interest rates and 10% to 15% drop in stock prices." ("USA Today", 11/13)

"We want more time to go by to make sure that there isn't a shooting war in the Middle East," says FOSTER FRIESS, of the BRANDYWINE FUND, who describes his decision to stay out of the market as "a lot grayer" now than it was back in August when the Iraqi invasion, corporate profits and worries about the banking system and the federal budget were more prevalent. "All those things are more out on the table than they were two or three months ago," says Mr. Friess. The fund still has 80% of its assets in cash. (WSJ, 11/13)

"We're getting good leadership in the market," says MARSHALL ACUFF of SMITH BARNEY. He gives as an example IBM, which "broke out" setting a new high above 110. "Plus, we're getting people feeling a little bit better about the stocks that have been depressed a great deal." (FNN "Marketwrap", 11/12)

LASZLO BIRINYI of BIRINYI ASSOCIATES reports that $343 million of yesterday's trading came from new money entering the market in blocks of 10,000 shares or more, while $195 million entered in smaller blocks. "The little guy, the big guy, the institutions, they were all active," says Birinyi. (NYT, 11/13)

BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC," says the stock market is entitled to have "three good days of good psychology," but warns that "could turn around in an instant" and says he remains unconvinced real interest rates are low enough to brighten a poor earnings picture. "That is not yet clear, even though the big companies looked very good in the last few days in the stock market. I am not convinced that the earnings turnaround is at hand, or can even be seen yet. ... I think this may be what our technical friends call a trading rally on a few good days of psychology in the midst of your general gloom. I really don't expect that good psychology to last barring some great success in the Mideast -- either diplomatic or military." (CNBC "Market Wrap-Up", 11/12)

At least part of today's surge in the Nikkei can be attributed to "politeness toward the Emperor after his enthronement," says MERRILL LYNCH's LIAM NEWBURG from Tokyo where markets were closed on Monday. "Percentage wise, we did in one day what [New York] did in two." Volume was relatively light and much of

it was dealer centered, says Newburg. (FNN "A.M. Business", 11/13)

STOCK TIPS:

"World Depression II Ahead," warns "Money & Markets" where editor MARTIN WEISS sees brokerage firms running for cover, corporate profits falling and real estate values declining at least 50% from current levels. He advises his clients to nail down profits made by shorting GM and GE. New short recommendations: DOW, NYNEX and WAL- MART. (CNBC "World Business", 11/13)

BING CARLIN, manager of the $193 million IAI REGIONAL FUND, was firmly in the bear camp until recently as bargain hunting has whittled his 37% cash position down to a cash position of 25%. Mr. Carlin believes the bears are missing an opportunity to buy. He says, "People are mesmerized by the market and the Middle East, but over the next six months, you should be using a bottom-up approach" to the market, judging individual stocks on their merits. Mr. Carlin is delving into battered over-the-counter stocks like ANALYSTS INTERNATIONAL, NELLCOR and NETWORK SYSTEMS. (WSJ, 11/13)

"You never want to be with the crowd," says noted short MATT FESHBACH, managing partner at FESHBACH PARTNERS who says he is backing off this market "not a lot but a little bit" after recording 60% gains thus far this year. His current shorts include CITIBANK, WELLS FARGO, MCDONNELL DOUGLAS and NORTHROP. (CNN "Business Morning", 11/13)

The BRANDYWINE FUND, under the direction of the bearish FOSTER FRIESS, has been nibbling at health-care stocks such as PREFERRED HEALTH CARE and UNITED HEALTHCARE, and some technology stocks such as SYNOPTICS COMMUNICATIONS and CABLETRON SYSTEMS. (WSJ, 11/13)

-30- 10059

#90317m0002 11/13/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 13) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The dollar is too cheap," says HEIKO THIEME of THIEME ASSOCIATES. "It is grossly undervalued." He predicts that over the next year, monetary officials around the world will be easing policies since, "their economies will need to be stimulated." ("Investor's Daily", 11/13)

"With the war specter off the horizon and with rumors that the Fed will drop rates by tomorrow, there's nothing positive for the dollar at the moment," says MICHAEL McGUINNESS of HARRIS TRUST & SAVINGS. ("Investor's Daily", 11/13)

"Oil is the big hopeful" increasing chances of a Fed easing of interest rates, says JOSEPH SABBAGH, chief currency trader at EUROPEAN AMERICAN CAPITAL CORP. in New York. If the slide in oil continues, it "might help the Fed produce one more drop in rates" over and above what the [currency] market has already factored in, he says. This adds to the bias for a lower dollar. (WSJ, 11/13)

"Over the near term, it pays to be cautious" on the dollar, says DON GOULD, president of HUNTINGTON ADVISERS. "We've made a tremendous profit being out of the dollar." ("Investor's Daily", 11/13)

"We still have some poor economic statistics to come ahead," says MARSHALL ACUFF of SMITH BARNEY. "These statistics should paint a picture of continuing weakness, so if the Fed doesn't cut the rates this week, I suspect in the next couple weeks they will." (FNN "Marketwrap", 11/12)

"The Fed could move this week, or they could put it off for a few more days," says JAMES FRALICK of MORGAN STANLEY. "Dealers certainly anticipate another ease in policy, and are willing to hold the securities they bought at last week's Treasury refunding auctions." (NYT, 11/13)

"We think there is a chance of a lowering of interest rates and a possible cut in the prime rate," says SMITH BARNEY analyst ALAN SHAW. "Our indicators are showing a lessening of monetary pressure." ("Investor's Daily", 11/13)

"There are a lot of people who seem to be thinking that the combination of falling oil prices and weakening economy are good for both stocks and bonds," says ABBY JOSEPH COHEN, a strategist at GOLDMAN SACHS. "But if the bond market is rallying because the economy is weak, that isn't a reason to buy stocks, it's a reason to buy bonds." (WSJ, 11/13)

"People sense that Washington's perception on the economy began changing last week," says KIDDER PEABODY analyst DENNIS JARRETT. "They're convinced the Fed is now clued into reality." Jarrett says the Fed needs to give rates a sharp cut -- more than the one-quarter of a percentage point it cut last time -- to have much impact on Wall Street. ("USA Today", 11/13)

THE ECONOMY:

"It now seems very likely that America's longest peacetime expansion is about to come to an end," says ROBERT EGGERT, editor of "Blue Chip Economic Indicators." A survey done by Blue Chip reported 80% of the economists questioned believe a recession will have started by the end of this year, but 75% say the downturn will only last 2-3 quarters and 82% "anticipate that the recession will be relatively mild," says Eggert. (NYT, 11/13)

The weakness of the banking industry is "the most important wild card in the economic setting right now," says DONALD STRASZHEIM of MERRILL LYNCH. "Banks and their problems are at the heart of the risk." ("Investor's Daily", 11/13)

"I think there will very likely be an oil glut," says CHARLES EBINGER of INTERNATIONAL RESOURCES GROUP. Production has been increased significantly in the wake of the crisis in the Middle East. "Right now we see oil sustained purely by psychological factors," says Ebinger. (FNN "Marketwrap", 11/12)

"It's not clear how much [oil] prices will be coming down," says SUZANNE COOK of MERRILL LYNCH. But "directionally, we would expect them to come down, perhaps into the low 20s." (CNN "Moneyline", 11/12)

IN WASHINGTON:

"There is no slope even suggested in the European proposal with respect to export subsidies," says U.S. TRADE REPRESENTATIVE CARLA HILLS . She says that "amounts to economic warfare," and believes it may hamper the GATT talks. "You may as well just drop a bomb on a country's fields as to buy the market out from under them," according to Hills. (CNN "Moneyline", 11/12)

#90317p6093 11/13/1990 ~PR Newswire

IRVINE, CA (NOV. 13) PR NEWSWIRE - Rainbow Technologies Inc. has established a new German subsidiary, Rainbow Technologies GmbH, located near Munich, that will complement the current London office and further commit the company to the European marketplace.

Rainbow Technologies is the leading international developer and manufacturer of hardware devices for software execution control and data security in the IBM and Apple Macintosh personal computer markets.

NetSentinel Enforces Site License Agreements In a related development, Rainbow also introduced NetSentinel, the latest addition to its Software Sentinel line of PC/compatible software execution control devices. NetSentinel is designed to control the number of concurrent users of a LAN application software program, thus allowing it to enforce site license agreements.

NetSentinel acts as a site license management system in two respects -- first, the software can't be executed without the NetSentinel hardware key installed; second, the system tracks the number of end-users concurrently accessing the software, denying access when the limits of the agreement have been reached.

London and German Offices to Service Europe Rainbow's London office, established in 1988, will serve the European marketing efforts along with the new Munich facility. Both offices are under the direction of Al Weingartner, vice president, international. He reports directly to Straub.

In addition to sales and marketing, the two locations will handle product inventory and shipping as well as maintain full technical staffs.

Rainbow Technologies GmbH is located at Oskar-Messter-Strasse 16, Postfach 1243, D-8045 Ismaning, Germany; telephone: 011-89-961-3051-53; fax: 011-89-961-2617. The contact there is Managing Director Ulrich Beckmann.

HOUSTON (NOV. 13) PR NEWSWIRE - Garnet Resources Corporation (NASDAQ: GARN) today reported the status of drilling activities in the Putumayo area of Colombia and in Papua New Guinea.

In Colombia, Garnet said that the Toroyaco No. 2, a confirmation well 1.2 miles southwest of the Toroyaco No. 1 discovery well, flowed at a rate of 438 barrels of 26 degrees gravity oil per day on a 3/8-inch choke during a three-day test. The oil was produced from perforations in the Villeta "N" sand from 8,128 to 8,138 feet. A pump test of this zone is presently underway. The Toroyaco No. 2 was suspended in July 1990, after testing water from the Villeta "U" and "T" sands.

Also in Colombia, the Linda No. 2, a confirmation well three quarters of a mile east of the Linda No. 1 discovery well, produced 20.6 degrees gravity oil at a daily rate of 320 barrels on a 48-hour pump test from perforations in the Villeta "N" sand at 8,328-32 and 8,339-45 feet. Further testing will be required to determine the ultimate producing capability of both the Linda No. 2 and the Toroyaco No. 2.

The Mary No. 1, an exploratory well approximately 6.5 miles northeast of the Linda No. 1, has reached total depth of 8,030 feet, electric logging has been completed, and production casing is being set to test several intervals that appear to have hydrocarbon potential. Garnet management stressed that no definitive conclusions can be drawn prior to completion of the testing estimated to require 30 days.

Garnet also announced that the Kara 1X exploratory well, which was drilled by Chevron on the northern portion of Garnet's 1,000,000-acre license in Papua New Guinea, has been plugged and abandoned as a dry hole. Under the terms of a farmout agreement, Chevron earned 25 percent working interest in the license by drilling the Kara 1X well and has successive options to drill two additional test wells to earn up to 57.5 percent working interest. If Chevron fulfills all obligations and exercises all options, Garnet will retain a 17

percent working interest. The company has been informed that Chevron plans to acquire additional seismic data on the southern portion of the license in an effort to delineate a drillable prospect.

Garnet is engaged primarily in international oil and gas exploration activities. Its exploration and production operations in Colombia are conducted through its subsidiary Argosy Energy International.

CHARLOTTE, MICH. (NOV. 13) PR NEWSWIRE - Spartan Motors, Inc. (NASDAQ-NMS: SPAR) has introduced the industry's lowest-cost, rear- engine chassis, under 16,000 pounds. This chassis is designed primarily for RVs and small light-duty tour/transit buses, according to George W. Sztykiel, president.

Spartan's EC-2000 line has a unique wide axle track which improves handling and stability, a wide spring center, and air over hydraulic brakes rather than the traditional hydraulic brakes, a first in this smaller chassis market niche. Another advantage of the EC-2000 is its excellent fuel economy, which is far superior to a similar chassis equipped with a gasoline engine. This chassis is ideal for those body builders who produce lower cost vehicles and do not need large diesel "pusher" engines, Sztykiel pointed out. Prototypes of the new chassis were recently introduced at industry trade shows in Sacramento and Houston, where they were met with enthusiastic receptions. Early indications point to a market potential of 500 chassis or more over the next 12 months.

According to Sztykiel, Spartan has been very successful with its last introduction of a custom motorhome chassis for top-of-the-line motorhomes. Since it was introduced in December 1989, Spartan has sold 310 such motorhome chassis. Spartan has even greater expectations of this new chassis, which is priced well below domestic and foreign chassis of this type and size. Spartan has recently attended some shows overseas and believes this new chassis has significant overseas market potential, Sztykiel concluded.

Spartan Motors, Inc. is the leading manufacturer of custom designed fire truck chassis, motorhome chassis and other specialty and emergency vehicle chassis.

CONTACT: Peter W. McCarty or Anthony G. Sommer of Spartan Motors, Inc., 517-543-6400; or Edda Brown or Harley R. Gleckman of The Wall Street Financial Corporation, 213-552-1555, for Spartan Motors, Inc.

SAN DIEGO (NOV. 13) PR NEWSWIRE - DH Technology Inc. (DHT) (NASDAQ: DHTK) announced today that it has strengthened its leadership position in the specialty printing industry by acquiring the operations of The Identification Business Inc. (IBI). IBI is a leader in application software and continuous feed laser printer technology for the bar code industry.

IBI's product line includes the Model 1600C continuous feed laser printer, which prints more than 1,000 lines per minute and emulates HP LaserJet II and Code V bar code printing. The company has three software packages, Laser-Aide(R), LPS and Desktop-Aide which allow users to easily customize and integrate their labelling, scanning, database and communications applications.

William H. Gibbs, chairman of the board and chief executive officer of DHT, said, "This acquisition greatly enhances our bar code expertise. The combination of IBI's personnel, products and distribution channels with our current bar code products makes us a significant contender in the growing identification business. The addition of IBI's laser technology to DHT's dot matrix impact and thermal technology provides an increased flexibility to match proper technology to our customers' specific needs. We are enthusiastic about the opportunities that IBI presents us and our customers."

Ivan Jeanblanc, former chief executive officer of The Identification Business Inc., has been named a vice president and general manager of the acquired business, which will be operated under the name "The Identification Business, a Division of DH Technology Inc." Jeanblanc stated, "This acquisition enables IBI to strengthen its leadership role in the continuous feed laser printer business. The combined company is positioned as a leading supplier of a broad range of bar code printing products."

The Identification Business, a Division of DH Technology Inc., will remain located near St. Louis. This address is:

The Identification Business,
A Division of DH Technology Inc. 225 Chesterfield Industrial Blvd.
Chesterfield, MO 63005 Phone: 314-537-8400; fax: 314-537-8535 DH Technology is a leading independent supplier of technologically advanced high performance printheads, printer mechanisms and specialty printers. DH Technology's products are utilized by the lottery, labelling, ticketing, office automation, gasoline vending and specialty printing industries.

For additional information contact M. Dean Gilliam, chief financial officer, DH Technology Inc., 15070 Avenue of Science, San Diego, CA 92128, 619-451-3485.

HARTFORD, CONN. (NOV. 13) PR NEWSWIRE - Connecticut Mutual, one of the nation's larger life insurance and financial services companies, announced today a three-year contract with MCI Communications Corporation (NASDAQ-NMS: MCIC) valued at $3.75 million for telecommunications services.

Connecticut Mutual selected MCI's Vnet, or virtual private network product, to connect 60 of its U.S. offices to its campus environment in Hartford for all voice traffic. The company has dubbed its new network the "Blue Chip Network." As part of Vnet, MCI is providing Connecticut Mutual employees with custom calling cards, "the Blue Chip Network Card," to make business calls using Vnet when out of the office.

In addition, MCI will provide Connecticut Mutual with its 800 service for agents to call the home offices in Hartford. Connecticut Mutual will take advantage of MCI's Vnet location level billing and MCI's 800 service call detail for cost accountability at the home office and general agent levels.

"MCI's Vnet offers our company an array of new features and benefits such as better network management, faster network access and greater cost control for our home and general agent offices," said Ronald Baker, vice president of architecture and operations for Connecticut Mutual. "By going with MCI we expect to realize cost savings of 15 percent," added Baker.

"Vnet is ideally suited for a company like Connecticut Mutual which must support field offices around the country with quick and reliable access to information from the home office and at a reasonable cost," said Jonathan Crane, president of MCI's Northeast Division.

Connecticut Mutual, founded in 1846, is one of the nation's oldest life insurance companies. The company has over 1 million policy holders and nearly 2,000 employees in Hartford.

MCI Communications Corporation, the nation's second largest long distance telecommunications company, is headquartered in Washington. MCI reported 1989 revenue of approximately $6.5 billion.

CONTACT: Sue Cushing, 914-933-6169, or Frank J. Walter, 914-933-6292, both of MCI Communications Corporation Northeast Division; or Ronald Baker of Connecticut Mutual, 203-727-6523

NEW YORK (NOV. 13) PR NEWSWIRE - National Westminster Bancorp (NatWest Bancorp), a New York-based superregional bank holding company, announced today a three-year $9 million contract with MCI Communications Corporation (NASDAQ-NMS: MCIC) for global telecommunications services.

NatWest Bancorp selected MCI's Vnet (or virtual private network) to handle the majority of its domestic and international voice and data traffic for its 300 banking locations and 250 automated teller machines (ATMs) in New York and New Jersey.

"As we have grown the last few years, both internally and through acquisitions we realized the need for a sophisticated service like MCI's Vnet," said Patricia Ryan, vice president of telecommunications for NatWest Bancorp. "MCI's Vnet gives us the flexibility we need to quickly add new locations, respond to changes in network traffic and provide our subsidiaries with detailed billing information."

In August 1989 NatWest purchased First National Bank of Central Jersey, adding 35 bank branches to its New Jersey-based subsidiary.

Under the terms of the agreement with MCI, NatWest Bancorp will also use Vnet's custom billing package for location level billing and its advanced network management features for network configuration, management and reporting. In addition, NatWest is using MCI's 800 service for "bank-by-phone" service for out-of-state customers and its Visa card customer service.

"Vnet provides NatWest with the framework to quickly add new locations to its network as well as new features that will enhance communication services between its customers and internal offices," added Jonathan Crane, president of MCI's Northeast Division.

MCI's Northeast Division, based in Rye Brook, N.Y., is one of seven divisions for MCI Communications Corporation. MCI, the nation's second largest long distance telecommunications company, reported 1989 revenue of approximately $6.5 billion.

CONTACT: Sue Cushing, 914-933-6169, or Frank J. Walter, 914-933-6292, both of MCI Communications Corporation Northeast Division; or Patricia Ryan of National Westminster Bancorp, 516-531-7878

NEW YORK (NOV. 13) PR NEWSWIRE - New York Life Insurance Company today announced it has awarded MCI Communications Corporation (NASDAQ-NMS: MCIC), a three-year $18 million dollar contract to provide telecommunications service to its company and agent locations.

New York Life will use MCI's Vnet (or virtual private network product) to connect its 300 company locations and as many as 4,500 detached agents throughout the U.S. MCI will carry an estimated 90 percent of New York Life's

voice traffic, including future 800 service applications.

"We are pleased to be switching to MCI's Vnet for long distance telephone service," said Carol Springsteen, assistant vice president of telecommunications for New York Life. "MCI's virtual private network provides the architecture for us to roll out new network features that will give our customers and agents improved cost-effective access to company and product information. In addition, by combining all the traffic under this new contract with MCI, we can pass significant annual savings on to our agents and offices."

Considered an industry leader in effectively using telecommunications as a management tool, New York Life uses MCI's Digital Reconfiguration Service (DRS) to manage its network in case of outage or disaster. The company has high speed circuits between regional nodes in the United States that connect to its Clinton, N.J., data center. Additionally, thousands of its agents are connected to these regional nodes through modems.

"For MCI, it is exciting to be teamed up with a truly leading-edge user of technology," commented Jonathan Crane, president of MCI's Northeast Division. "We in essence have become a partner with New York Life in helping them take full advantage of the latest telecommunications services and technology."

New York Life, one of the largest insurance companies in the United States, and its affiliates offer traditional life insurance products as well as a variety of financial services, including mutual funds, partnership investments annuities and pensions, and managed health care.

MCI Communications Corporation owns and operates the world's second largest communications network, employing advanced fiber optics, digital microwave, satellite and digital switching technologies. MCI Northeast, based in Rye Brook, N.Y., is one of seven MCI regional divisions based in the United States.

COLUMBUS, OHIO (NOV. 13) PR NEWSWIRE - The Limited, Inc. (NYSE/LSE/TSE: LTD) announced today that third quarter earnings per share were $.23, unchanged from last year. Net income of $84.917 million, was virtually unchanged from last year's $84.869 million. Net sales increased 12 percent to $1.248 billion from $1.110 billion.

Leslie H. Wexner, chairman and chief executive officer, said, "Our sales for the third quarter were not as strong as planned due in part to the economic

environment, consumer uncertainty and our merchandise offering. At the same time, we demonstrated our ability to control inventories and expenses to plan without compromising customer service.

"Three divisions produced outstanding results and deserve recognition: "Cynthia Fedus and the Victoria's Secret Catalgue associates again led the business in operating income as a percent of sales.

"Victoria's Secret Stores associates led by Howard Gross produced significant store for store gains and record third quarter earnings.

"Cheryl Nido Turpin and the Lane Bryant associates produced their third successive quarterly gain in sales, margins and net income."

Wexner concluded, "My view, held since the start of 1990, remains unchanged: 'this is a time of economic uncertainty,' and lack of consumer confidence. I am, however, cautiously optimistic about our sales and earnings outlook for the fourth quarter."

The Limited, Inc., through Lerner New York, Limited Stores, Lane Bryant, Express, Victoria's Secret, Structure, Limited Too, Abercrombie & Fitch, Cacique, Henri Bendel, Victoria's Secret Bath Shops, Bath and Body Works and Penhaligon's, presently operates 3,776 specialty stores and distributes apparel nationally through the Victoria's Secret, Lerner Direct, Lane Bryant Direct and Roaman's catalogues. POMONA, NY (NOV. 13) PR NEWSWIRE - Barr Laboratories, Inc. (AMEX: BRL), today released financial results for the first quarter ended Sept. 30, 1990:

Net sales in the first fiscal quarter of 1990 were $18,785,000 as compared to $15,166,000 for the comparable quarter last year, a 24 percent increase. Net earnings for the quarter ended Sept. 30, 1990, were $348,000 or $.05 per share as compared to a net (loss) of ($792,000) or ($.10) per share for the comparable quarter last year. The major reasons for the return to profitability are the increased sales volume, an improved product mix which has yielded greater gross margins, and the effects of certain cost reduction programs.

Barr Laboratories is a prime manufacturer of a broad range of multisource pharmaceutical products with manufacturing facilities located in both Northvale, N.J., and Pomona.

MENLO PARK, CA (NOV. 13) PR NEWSWIRE - Mediagenic (NASDAQ-NMS: MGNC) today reported revenues of $8.7 million for the second fiscal quarter, ended Sept. 30, 1990, a 48 percent decrease in sales from $16.8 million in the same quarter of the last fiscal year. Constrained by limited cash resources, the company incurred a net loss of $4.3 million, or $1.02 per share. This compares to a net loss of $1.9 million, or $.46 per share for the corresponding quarter of last year.

Bruce Davis, chairman and chief executive officer of Mediagenic, explains, "We had a very tough summer, coping with a substantial reduction in bank credit and adverse publicity concerning a patent infringement judgment against the company. These events caused some customers to doubt our viability, leading to reduced sales, abnormally high stock-balancing returns and employee turnover, and some disruption of supply. General weakening of the economy and financial markets aggravated these problems."

Mediagenic is continuing its efforts to get back to stable and profitable operations. For example, the company persuaded Philips to delay until January 1992 the implementation of an agreement reached in June which required that Mediagenic pay $6.6 million in patent damages by making monthly payments of $150,000 for 42 months, followed by a balloon payment. Also, the company announced an agreement in principle with a group led by EGL Holdings to sell the assets and certain identified liabilities of ZSoft Corp., a wholly owned subsidiary of Mediagenic, for approximately $3.8 million in cash. Under the

terms of the preliminary agreement, Mediagenic will continue to manufacture and distribute ZSoft products for a period to be negotiated. Mediagenic and EGL Holdings anticipate completing the transaction by the end of November. Finally, the company recently cut non-ZSoft staff by approximately 25 percent and made other budget reductions as a part of its effort to lower spending over the course of the next two quarters to a level that can be funded by cash flow from continuing operations.

Mediagenic is an international developer and publisher of entertainment software for IBM-compatible computers and Nintendo video game systems, headquartered in Menlo Park. The company publishes its cartridge, floppy disk and CD-ROM titles under the Activision, Electric Dreams and Infocom brands and serves as an exclusive distributor for products from Absolute Entertainment and Interplay Productions.

PITTSFORD, NY (NOV. 13) PR NEWSWIRE - The Random House Electronic Encyclopedia from SelecTronics, Inc. (NASDAQ: SELE) has been cited by the editors of Popular Science as one of the 1990s outstanding technological achievements in the annual "Best of What's New" special awards section of the December issue.

The Random House Electronic Encyclopedia, a 12 ounce, hand-held unit, contains more than 8 megabytes of information in over 20,000 entries, fully indexed and searchable by any word or subject in the text. The unit will accept a variety of ROM-based (read-only memory) cartridges including dictionaries and other reference materials, organizers and language translators, as well as cartridges that increase memory capacity.

"The Random House Electronic Encyclopedia combines the excitement of Nintendo with the power of knowledge. The very features which make it an indispensable reference device for the executive's briefcase also make it an appealing tool for students who, instead of shooting turtles, can instantly tap into an extraordinary wealth of information," said Mike Weiner, chairman and CEO of SelecTronics.

The Random House Electronic Encyclopedia will be available in early 1991 in department stores and specialty shops worldwide, as well as through catalog retailers and direct-mail merchandisers for a suggested list price of $350.

The Random House Electronic Encyclopedia by SelecTronics is being shown at Popular Science's 1990 "Best of What's New" Exhibition today at New York's Tavern on the Green and will be featured on the CNBC (Consumer News and Business Channel) prime-time cable special devoted to the "Best of What's New"

on Sunday, Nov. 18, at 8 p.m., EST, with a repeat telecast at 1 a.m.

SelecTronics' line of personal hand-held electronic publishing products includes the Electronic Bible; the Berlitz EuroTraveller; the Berlitz Interpreter; the popular WordFinder 220 spelling checker and thesaurus; the WordFinder 224 and 225 which add definitions to the speller and thesaurus; European language versions of the WordFinder 20; and the DataStor series of databanks. SelecTronics' products utilize powerful compression technology developed by Xerox Corporation's Palo Alto Research Center (PARC). Xerox owns 30 percent of SelecTronics.

#90317p6122 11/13/1990 ~PR Newswire

ATLANTA (NOV. 13) PR NEWSWIRE - The Home Depot Inc. (NYSE: HD), the nation's largest home center retailer, today reported that net earnings increased 41 percent, to a record $36,096,000 ($.30 per share), for the third quarter of fiscal 1990, the 13 weeks ended Oct. 28, 1990, compared to $25,640,000 ($.22 per share), which the company earned during the comparable period of fiscal 1989.

Sales for the third quarter of fiscal 1990 rose 34 percent to a record $936,612,000, compared to sales of $699,740,000 for the third quarter of fiscal 1989.

On a comparable store-for-store basis, sales were up 8 percent for the quarter and 11 percent during the first nine months of fiscal 1990.

For the first nine months of fiscal 1990, net earnings rose 48 percent to $121,952,000 ($1.01 per share) from $82,369,000 ($.70 per share) during the comparable period of 1989. Sales through the first nine months of fiscal 1990 rose 37 percent, to $2,807,814,000, compared to $2,045,286,000 during the comparable 1989 period.

All per-share data reflect adjustments for the three-for-two stock split that was effected in June 1990.

During the fiscal 1990 third quarter, weighted average weekly store sales rose 10 percent, customer transactions rose 29 percent, and the average customer sale rose 4 percent, compared to the third quarter of fiscal 1989. For the first nine months of fiscal 1990, weighted average weekly store sales rose 12 percent, customer transactions increased by 32 percent, and the average customer sale increased by 4 percent, compared to the same period of the previous year.

Annualized inventory turnover for the third quarter of fiscal 1990 was 6.1, compared to 6.0 during the comparable 1989 period.

Sales and earnings for the third quarter of fiscal 1990 were generated from 132 stores, compared to 107 stores that were operating at the end of the third quarter of fiscal 1989. Of the seven stores (one of which is considered not "new," but a relocation of an existing store) opened during the third quarter of fiscal 1990, three are located in Florida, two are in metropolitan Atlanta, one is in Connecticut and another is in southern California. During the fourth quarter, the company plans to open approximately 13 additional stores.

Atlanta-based Home Depot operates warehouse-style stores in 30 markets in 12 states. The stores, ranging in size from 67,000 to 140,000 square feet, stock an average of approximately 30,000 different kinds of building materials, home improvement and lawn and garden products which are sold primarily to the do-it-yourselfers and professional tradesmen. Founded in 1978, the company is widely regarded as one of America's leading retailers and is the largest home center retailer in the nation. Its stock is traded on the New York Stock Exchange under the symbol "HD," and is included in the Standard & Poors 500 index.

#90317p6123 11/13/1990 ~PR Newswire

NEW YORK (NOV. 13) PR NEWSWIRE - CS First Boston, Inc., today announced that its board had approved the sale of an additional $300 million of its equity to CS Holding. When completed, this investment will raise CS Holding's ownership interest in CS First Boston from 44.5 percent to approximately 60 percent. CS First Boston's other institutional investors may also increase their investments in the firm.

Rainer E. Gut, chairman of CS Holding, said, "The present situations in the world's securities markets and in the Persian Gulf are difficult tests for any investment bank. We want to be certain that the depth of our commitment to CS First Boston is clear and that the strength of our investment banking affiliate is beyond question."

An integral part of the restructuring plan is the creation of a separate, special purpose limited partnership containing all of CS First Boston's bridge loans except those to Federated Department Stores and Jerrico, Inc. and including other of the firm's equity securities investments. In exchange for contributing these investments to the new limited partnership, CS First Boston will receive an interest in the partnership and approximately $425 million in cash. When the bridge loan vehicle is completed, the firm's net bridge loan

exposure will be approximately $377 million.

The boards of CS First Boston and CS Holding have both approved the increased ownership by CS Holding and the bridge vehicle transaction. In addition, CS Holding has received the necessary confirmation from the board of governors of the U.S. Federal Reserve System for both of these transactions. Completion of the transactions requires the successful conclusion of other events including final documentation and the approvals of other regulatory agencies and the shareholders of CS First Boston, Inc. These approvals are expected shortly.

As part of the restructuring, the current board of directors of CS First Boston, Inc. will be expanded from five members to ten. The new members will be nominated by CS Holding and will be elected at the closing.

CS First Boston is a full-service international investment banking firm serving both suppliers and users of capital around the world. Through its wholly owned subsidiaries, CS First Boston provides comprehensive financial advisory services, develops innovative financial structures and strategies for public and private institutions, and trades and underwrites securities.

RICHMOND, VA (NOV. 13) PR NEWSWIRE - Circuit City Stores, Inc. (NYSE: CC) said today that the Financial Accounting Standards Board ruled last week that all companies must follow the full deferral method rather than a partial revenue recognition method when accounting for the sale of extended service plans.

"Our preliminary estimates indicate that if the company adopts the change during the current fiscal year, net earnings per share for fiscal year 1991 would be reduced by approximately $1.40, including a cumulative adjustment as of March 1, 1990, of approximately $1.15 and an estimated impact on the current year operations of approximately $.25," said Richard L. Sharp, Circuit City's president and chief executive officer. "These estimates are based on the limited information currently available from the FASB regarding implementation of the change."

Circuit City Stores, Inc. is the nation's largest specialty retailer of brand-name consumer electronics and major appliances. With headquarters in Richmond, Va., it operates 146 Superstores, 15 Circuit City stores and eight Impulse mall stores in the eastern, midwestern and western United States.

NORTH PALM BEACH, FL (NOV. 13) PR NEWSWIRE - FPL Group, Inc. (NYSE: FPL), holding company for Florida Power & Light Company, today said it was exploring the possible sale of its citrus subsidiary, Turner Foods Corporation. FPL Group plans to retain an investment banking firm to assist in this effort.

Turner is one of the largest citrus growers in Florida with over 20,000 acres of citrus property. More than half of this acreage is currently in production. The balance, which has been planted, will come into production over the next five years. All of Turner's groves are located below Florida's so-called "freeze belt."

Turner's other operations include the largest citrus tree nursery in the state and an engineering firm that provides state-of-the-art grove engineering and grove management for third parties. Turner also operates a real estate brokerage firm specializing in citrus properties and a fish farm that produces talapia and striped bass in a controlled environment for sale to the wholesale and retail food market.

"Turner is a very successful company that is well managed and well positioned in the citrus industry," said James L. Broadhead, chairman and chief executive officer of FPL Group. He went on to say that if it is determined that this is an inappropriate time to sell Turner, FPL Group would wait until market conditions improved.

#90317p6135 11/13/1990 ~PR Newswire

FORT LAUDERDALE, FL (NOV. 13) PR NEWSWIRE - Amoco Oil Co. announced today that participating service stations in Florida will begin accepting used motor oil from consumers beginning Dec. 11.

On that date, Amoco will run ads in Florida's major metropolitan newspapers listing drop-off locations.

"Recycling used motor oil is a way for Amoco Oil Company and Amoco dealers to improve the environment," said Jim Robbins, Amoco's Fort Lauderdale district manager. "We hope our participation in motor oil recycling in Florida will help broaden consumer acceptance."

All of the locations will be full-facility outlets that have the equipment necessary to store the used oil. Each facility will have a "Used Motor Oil Recycling Center" sign posted in the window.

"No purchase is required to drop off used motor oil at these stations," Robbins said. Motorists should drop off no more than five gallons per visit, and the used oil must be in capped containers.

Robbins estimated that about 600 million gallons of used oil are generated each year in the United States -- enough to produce electricity for 900,000 homes annually. About two-thirds of the used oil is generated by do-it-yourself oil changers, some of whom dispose of it improperly.

"Some people put oil in their garbage, pour it into drains and sewers, and some even pour it directly on the ground," said Robbins. "By providing convenient locations for proper disposal and helping consumers become aware that improperly disposed used oil causes environmental damage, Amoco and Amoco dealers believe we can help solve a problem."

Amoco's motor oil recycling program is part of the company's ongoing effort to examine its products and processes as they relate to the environment.

Amoco Oil Co. is the refining, marketing, and transportation subsidiary of Amoco Corp.

NASHUA, NH (NOV. 13) PR NEWSWIRE - NFS Financial Corp. (NASDAQ: NFSF) has announced that it will not pay a dividend for the quarter ended Sept. 30, 1990.

James H. Adams, president/CEO said, "Our strong capital position permitted us

to maintain a dividend payout for the first two quarters of 1990. However, the area economy continues to be quite weak, and the unfavorable trend in loan delinquencies and property foreclosures continues. Clearly, the depth of the economic downturn is still not established. As a result, the board of directors omitted the dividend this quarter to preserve capital. This action will help assure our ability to cope with possible losses and come through these poor economic times."

NFS paid a dividend of 7 cents per share for the first two quarters of 1990.

The bank holding company said it will review its dividend poicy on a quarterly basis.

#90317p6137 11/13/1990 ~PR Newswire

ST. PAUL, MN (NOV. 13) PR NEWSWIRE - HealthEast, a St. Paul- based provider of family and acute care health services, today reported $3.2 million in net income for the fiscal year ended Aug. 31, 1990, a dramatic improvement over losses of more than $21.1 million in fiscal 1989.

For its 1990 fiscal year, HealthEast had operating revenues of $233 million, up 10.7 percent from operating revenues of $211 million for 1989. Operating income for fiscal year 1990 was $2.6 million, versus a loss of $18.0 million in 1989.

The improved financial performance will enable HealthEast to upgrade technology, improve facilities and expand programs in the future, Hanson said. In addition, HealthEast is increasing its cash reserves, which on Aug. 31 stood at $32 million, versus $6.3 million a year earlier. The organization's goal is to achieve and maintain reserves equivalent to between 55 and 66 days of operating expenses, the level maintained by hospitals with credit ratings of A or better, which requires an additional $1.3 to $8.2 million.

HealthEast attributed 1990's dramatic financial turnaround to both higher revenues and cost controls. Net revenues grew 10.8 percent, while costs per day increased just less than 1.0 percent.

The fiscal 1990 results returned HealthEast to full compliance with debt service requirements covering $139 million in hospital facility revenue bonds issued in December 1987.

At the end of the 1990 fiscal year, HealthEast had achieved a debt service coverage ratio of 1.61, significantly better than the 1.1 ratio required by its bond covenants and a full point better than the 0.61 ratio that existed at the end of fiscal 1989. This ratio is a measure of net income available for

debt service.

HealthEast's 1991-93 strategic plan includes several measures which Hanson said are designed to strengthen the organization's financial base and assure quality care. These include adhering to and expanding the commitment to cost-effectively manage quality at every level of the organization; working in partnership with physicians to meet the healthcare industry challenges of the 1990s; and ensuring that all business and operating units perform on at least a breakeven basis.

HealthEast provides a full spectrum of traditional family health services through its hospitals, Bethesda Lutheran, Divine Redeemer, Midway, St. John's and St. Joseph's; long-term care centers; home care; medical equipment; a physician referral/information line; medical transportation; and housing options for seniors. It is the largest network of health care services in the East Metro area.

CLEVELAND (NOV. 13) PR NEWSWIRE - Fabri-Centers of America, Inc. (NYSE: FCA) today said continued strong business levels led to record sales for both the third quarter and first nine months of the fiscal year.

Net sales in the quarter ended Oct. 27, 1990 totaled $96,233,000, or 12 percent above the $85,930,000 recorded a year earlier. Net income in the quarter was $2,962,000, or 56 cents per share, compared to $2,785,000, or 54 cents per share last year.

Through nine months, sales of $252,228,000 were 11 percent above the $227,388,000 for the prior year. The net income of $2,432,000, or 46 cents per share, was 18 percent better than the prior year net income of $2,058,000, or 40 cents per share.

Fabri-Centers said that its shift to larger stores in destination oriented strip shopping centers continues to produce favorable sales results. To date, the company has 182 new larger prototype stores, or 30 percent of the store base. In addition, its Cargo Express housewares business unit has opened 10 stores predominantly in the Detroit metropolitan market.

In spite of the substantial investment spending associated with its growth strategy, the company remains optimistic about the all important fourth quarter and anticipates that the full year results will be sharply improved over the prior year.

Fabri-Centers operates 617 fabric stores in 35 states and 25 Cargo Express

houseware stores.

#90317p6140 11/13/1990 ~PR Newswire

SMITHFIELD, VA (NOV. 13) PR NEWSWIRE - Joseph W. Luter III, chairman, president and chief executive officer of Smithfield Foods, Inc. (NASDAQ-NMS: SFDS), today announced that the company had net income of $5,180,000, or 72 cents per share, in the second quarter of fiscal 1991 up from net income of $1,131,000, or 15 cents per share, in the same quarter of fiscal 1990.

The company had net income of $7,246,000, or $1.01 per share, in the first six months of fiscal 1991 compared to a loss of $427,000, or 6 cents per share, in the corresponding six-month period a year ago.

The net income per share figure for the second quarter and first six months of fiscal 1991 were computed on 4.1 percent and 4.9 percent fewer shares outstanding, respectively, than were the respective net income and net loss figures in the corresponding periods of the prior fiscal year.

Dollar sales in this fiscal year's second quarter increased to $265,721,000 from $214,380,000 in the same quarter of fiscal 1990. Dollar sales in the first six months of fiscal 1991 were $501,785,000, up from $386,268,000, in the corresponding period a year ago. The increase in sales in both the second quarter and first six months of the current fiscal year were attributable to sharply higher unit selling prices for the company's products due to higher raw material costs and to increases in unit sales volume.

"The substantial increase in net income in the second quarter of the current fiscal year reflected sharply improved margins on both fresh and processed meats, aided by a significant decrease in raw material costs resulting from the company's joint hog production arrangements," Luter stated.

"We are anticipating a strong third quarter, and if present trends continue, a record year in fiscal 1991," Luter said.

ELMSFORD, NY (NOV. 13) PR NEWSWIRE - Clinical Technologies Associates, Inc. (CTA) (NASDAQ: CTAI, CTAIW) today announced its audited results for the fiscal year ending July 31, 1990. The company reported revenues of $870,155, versus $1,485,608 for fiscal year 1989. Net loss for fiscal 1990 was $1,811,230, or $.59 per share, compared to a fiscal year 1989 net loss of $486,333, or $.20 per share.

At July 31, 1990, CTA had cash and short-term investments of $2,115,491, and stockholders' equity of $1,327,649.

CTA's President and CEO, Michael Goldberg, M.D., attributed the company's increased losses to expenses associated with intensified development efforts of its proprietary oral delivery system.

Clinical Technologies Associates, Inc. is a publicly held biopharmaceutical company dedicated to the development of proprietary technologies for the benefit of human healthcare and scientific research. The company is currently focused on commercializing its patented oral delivery system which effectively surmounts the obstacles associated with the oral administration of many therapeutic agents. CTA also performs clinical studies on a contract basis for pharmaceutical companies seeking approval from the U.S. Food and Drug Administration to market new drugs in the United States.

WASHINGTON (NOV. 13) PR NEWSWIRE - President Bush today presented the National Medal of Technology to Du Pont (NYSE: DD) for the company's

pioneering role in the development and commercialization of man-made polymers over the last half century.

Du Pont is only the second company to receive the presidential medal, which was established by Congress in 1980 to recognize outstanding contributions which have improved the well-being of the United States through the promotion of technology or technological manpower. The first industry recipient was AT&T Bell Laboratories in 1985. Most recipients are individuals.

The citation states that the National Medal of Technology was presented to Du Pont "for pioneering the development and commercialization of high-performance man-made polymers such as nylon, neoprene synthetic rubber, 'Teflon' fluorocarbon resin and a broad spectrum of new fibers, films and engineering plastics which have strengthened America's global competitiveness and benefited mankind."

Beginning with a small fundamental research program in 1927, Du Pont scientists capped a decade of stunning research successes with the discovery of those polymers.

These were among the first man-made polymers with properties superior to the then-prevalent "semi-synthetic" materials such as cellophane and rayon which, derived from the natural polymer cellulose, had limited performance characteristics.

Du Pont today offers some 30,000 polymer products or formulations to more than 50,000 customers worldwide and is the leading producer of half of the 30 most significant polymer types.

Du Pont, headquartered in Wilmington, Del., is a diversified, global company with 1989 sales of $35.5 billion and earnings of $2.48 billion.

NEWMARKET, NH (NOV. 13) PR NEWSWIRE - Vitronics Corporation (AMEX: VTC) announced its operating results for the third quarter and nine months ended Sept. 29, 1990.

Sales for the three months ended Sept. 29, 1990 were $4,531,000 versus $5,112,000 for the same period in 1989. Net income was $234,000 for the quarter compared to $209,000 for the third quarter of 1989. Earnings per share were 6 cents compared to 5 cents for the same period in 1989.

Sales for the nine months ended Sept. 29, 1990 were $13,535,000 versus $15,351,000 for the same period in 1989. Net income was $458,000 for the nine

months compared to $444,000 for the comparable period in 1989. Earnings per share were 12 cents versus 11 cents for the same period in 1989.

Bookings for the three months ended Sept. 29, 1990 were $4,811,000 versus $5,057,000 for the comparable period in 1989. Bookings for the nine months ended Sept. 29, 1990 were $13,475,000 versus $15,264,000 for the same period in 1989. The backlog as of Sept. 29, 1990 was $3,833,000 as compared to our backlog of $4,057,000 as of Sept. 30, 1989 and $3,552,000 as of June 30, 1990.

James J. Manfield, Jr., president of Vitronics Corporation said, "We are very pleased with our bottom line performance in a year of unsettled economic conditions affecting the industry. We continue to make technical improvements in our equipment and have received orders in the third quarter 1990 for our semi aqueous cleaning equipment. These orders have been received from various world market areas and we continue to feel optimistic about our semi aqueous cleaning business."

Vitronics Corporation is an innovative supplier of state-of-the- art thermal processing and associated equipment. Vitronics(R) equipment is primarily aimed at the huge electronics industry and has achieved considerable technical recognition in the production of printed circuit boards. The company also supplies equipment to the medical, chemical, pharmaceutical, plastics, graphics and textile industries. Vitronics' customer list includes all 20 of the largest electronics companies with IBM, AT&T, Hewlett Packard, Delco Electronics, Chrysler, Compaq Computer and Motorola among the grouping.

RICHARDSON, TX (NOV. 13) PR NEWSWIRE - CONVEX Computer Corporation (NYSE: CNX) today announced that UniTree(TM) software, which extends the storage and retrieval options available to CONVEX customers with large data storage requirements, is now available on CONVEX C2 Series supercomputers. UniTree is a UNIX(TM)-based, hierarchical file and storage management system for networked, multi-vendor computing environments.

UniTree, originally developed at Lawrence Livermore National Laboratory and marketed and licensed by General Atomics of San Diego, Calif., is based on the IEEE Mass Storage Reference Model (MSRM) and conforms to the UNIX/POSIX file system specifications. UniTree features an object-oriented client-server configuration, which supports multiple file servers, separate data and control paths, and parallel I/O.

The UniTree software program provides storage service to large network environments including systems such as workstations, minicomputers, and supercomputers. The system relies on industry- standard network hardware and protocols, providing NFS(TM) and FTP service across Ethernet(TM), HYPERchannel(TM), and UltraNet(TM).

Within the UniTree system, user files are automatically migrated between magnetic disk, cartridge robot, and archival tape, allowing the user to select the best mixture of high performance and low cost storage for the application.

CONVEX provides a full range of high performance peripherals that are unique

in the open systems market, including high performance disk subsystems based on the IPI-2 interface standard, connection to high capacity and high performance tapes such as Digital Audio Tape (DAT), 9-track tapes and 3480 cartridges, and support for very large storage systems such as automated data libraries.

CONVEX Computer Corporation, a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high performance systems. The company markets its products primarily to scientific engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical processing, computational chemistry, computer-aided engineering, image and signal processing, aerospace simulations and molecular biology. CONVEX has sold some 750 systems in 34 countries. The installed base now represents more that half a billion dollars of cumulative revenues from more than 400 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network around the world.

ALLENTOWN, PA (NOV. 13) PR NEWSWIRE - Effective Jan. 1, 1991, Air Products and Chemicals Inc. (NYSE: APD) today announced higher prices for liquid and bulk oxygen, nitrogen, argon and hydrogen supplied to U.S. merchant and government accounts.

The unit price increases will range from 7 to 10 percent, depending upon the product. The monthly demand charge and delivery charges will remain at current levels. Prices on cylinder and specialty gases will also be increased. These changes are necessary to restore prices to levels which reflect the current costs of production and distribution, and to sustain adequate returns on investment.

In most areas of the country, unit prices for the largest volume users on the demand-based schedule will be increased to $0.34 per CSCF (hundred standard cubic feet) for oxygen and $0.31 per CSCF for nitrogen. The unit price portion of the schedules for oxygen and nitrogen customers in Arizona, California and Nevada will be $0.02 higher, reflecting the higher costs associated with serving these markets.

Nationwide, the monthly demand charge for these largest volume customers will remain at $1,850.

The surcharge implemented in October 1990 will remain in effect without change.

Air Products last increased nationwide merchant industrial gas price schedules in October 1989.

DEERFIELD BEACH, FLA. (NOV. 13) PR NEWSWIRE - CheckRobot Inc. (NASDAQ: CKRB) announced today that its controlling shareholder, OmniCorp International B.V., last week completed the purchase, contracted in May 1989, of the 1,800,000 common shares in CheckRobot originally owned by Sensormatic, but held in escrow under Blue Sky filing requirements until October 1990.

OmniCorp paid $7,875,000, equivalent to $4 3/8 a share, for the shares, against a current market price of $1 1/4.

Nigel Nicholson, a director of OmniCorp and CheckRobot said, "This was a contractual commitment with Sensormatic that we of course honored. Whilst the price we have paid is clearly well in excess of the current market price of CheckRobot's stock, we made the payment in the confident belief that the Company will become the dominant force in the automated checkout market."

CheckRobot manufactures and markets ACM(R) automated checkout machines for supermarkets. The systems are designed to improve customer service and profitability for the supermarket industry. Using enhanced laser bar code scanners and a proprietary merchandise security system, the ACM allows shoppers to quickly scan and checkout merchandise before paying centrally located cashiers.

ROSEVILLE, MINN. (NOV. 13) PR NEWSWIRE - Mirror Technologies (NASDAQ: MIRR) reported today record sales for the second quarter of fiscal 1991. Net sales for the three months ended Sept. 30, 1990, were $2,515,545, reflecting a 140 percent increase over the same period in the previous year. Net earnings for the second quarter were $31,748 compared to a loss of $1,796 for the same period of 1989. For the six months ended Sept. 30, 1990, the company had earnings of $128,826 on revenues of $5,243,553, compared to a loss of $71,055 on revenues of $1,965,523 for the same period last year. Revenues increased 167 percent from last year during the six-month period.

"We are pleased to maintain profitability and relatively strong sales despite July, August and September being traditionally slow sales months in the

computer industry," said Ronald E. Eibensteiner, president. "The above results include $40,000 of development expenses for the startup of Generation Systems, our Silicon Valley joint venture that began operations on Sept. 1."

During November the company began shipping the Mirror ProView, a 20- inch Trinitron color display system of the Macintosh computer. The Mirror ProView is priced at $2,997, which is 40 percent less than similar products offered by competitors.

Mirror Technologies, founded in 1985, assembles, markets and services peripheral products for Macintosh personal computers. Products include large screen monitors and a complete line of mass storage devices. Mirror's stock is publicly held and is traded on NASDAQ.

WOODBURY, N.Y. (NOV. 13) PR NEWSWIRE - Comverse Technology, Inc. (NASDAQ: CMVT), announced today revenues of $4,053,000 and $11,528,000 for the three-month and nine-month periods ended Sept. 30, 1990, representing increases of $341,000 (9 percent) and $1,958,000 (20 percent), respectively, over the corresponding periods of 1989 and the highest single-quarter and nine-month revenues in the company's history. Net income for the quarter and nine months amounted to $103,000 and $314,000, representing decreases of $152,000 (60 percent) and $91,000 (22 percent), respectively, from the corresponding prior year periods. Net income for each reporting period was less than 1 cent per share.

Kobi Alexander, president and chairman of the board, stated, "The results for the quarter and nine months ended Sept. 30, 1990, reflect the continued growth of the company's revenues, which have totaled approximately $14,704,000 for the last four quarters.

"The company's level of profitability," Alexander continued, "reflects substantial increases in our expenditures for research and development, marketing and related activities consistent with our operating plan for the year, which is directed at building the overall strength of our operations and expanding our domestic and international channels of distribution without compromising profitability and cash flow." Alexander added, "Our results for the year to date are on-target with our operating plan."

Comverse Technology, Inc., located in Woodbury, develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including integrated multi-media message management systems marketed under the name of TRILOGUE.

WOODBRIDGE, NJ (NOV. 13) PR NEWSWIRE - SMG-II Holdings Corporation announced today that is intends to commence shortly offers to purchase for cash up to $155,500,000 principal amount of Supermarkets General Holdings Corporation's 13-1/8 percent junior subordinated debentures due 2003 and up to 1,700,000 shares of Supermarkets' cumulative exchangeable redeemable preferred stock. SMG-II, a newly created corporation, is expected to become the holding company parent of Supermarkets pursuant to an exchange offer to holders of Supermarkets' common stock which is to commence concurrently with the other offers. Under the terms of the offers, SMG-II will pay 27 percent of the principal amount for each of the junior debentures tendered and $5.00 per share for each share of preferred stock tendered.

SMG-II is seeking to finance the offers by raising at least $80 million of equity through private placements of its convertible preferred stock with certain institutional investors, including The Equitable Life Assurance Society of the United States (and certain of its affiliates), Adler & Shaykin and certain funds affiliated with Merrill Lynch Capital Partners. Thus far, Equitable, a current stockholder of Supermarkets, and Adler & Shaykin, a new investor, have committed to purchase $30 million and $10 million of equity in SMG-II, respectively. The commitments are subject to certain conditions, including the execution of definitive purchase agreements. Upon completion of

the offers, SMG-II will transfer to Supermarkets as a capital contribution the junior debentures and preferred stock tendered to SMG-II in the offers (plus cash sufficient to pay associated taxes) resulting in the extinguishment of the indebtedness represented by the junior debentures tendered and cancellation of the preferred stock tendered. The offers are expected to produce a gain for financial reporting purposes resulting from the extinguishment of the junior debentures and the cancellation of the preferred stock tendered in the offers.

The offers will be subject to certain conditions, including (i) SMG-II having obtained sufficient financing to acquire the maximum amount of junior debentures and preferred stock tendered for by SMG-II and to pay related fees, expenses and other costs (including associated taxes), (ii) there being validly tendered and not withdrawn at least 98.5 percent of the common stock of Supermarkets pursuant to the concurrent offer to Supermarkets' common stockholders to exchange their common stock for common stock of SMG-II, and (iii) Supermarkets having entered into an agreement, acceptable to SMG-II, with Supermarkets' bank lenders amending certain financial covenants and obtaining a certain waiver under Supermarkets' bank credit agreement. In addition, the offer for the preferred stock will be conditioned upon at least 15 percent of the outstanding principal amount of the junior debentures being tendered into the offer for such junior debentures.

Merrill Lynch & Co., will be retained to act as dealer manager with respect to the offers.

Supermarkets, through its operating subsidiaries, is a diversified retailer primarily engaged in the operation of large supermarket- drugstores and is one of the ten largest supermarket retailers in the United States. Supermarkets' Pathmark supermarkets are located in the middle Atlantic states and its Purity Supreme supermarkets operate in the New England region. Supermarkets also operates Rickel Home Centers in the middle Atlantic states.

MINNEAPOLIS (NOV. 13) PR NEWSWIRE - Aequitron Medical, Inc. (NASDAQ: AQTN) announced today that it has achieved record sales for the second consecutive quarter. Sales for the quarter ended Oct. 31, 1990, were $7,012,600, up from sales of $6,731,700 for the second quarter of last year.

Net income for the second quarter of fiscal 1991 was $325,400, or $.07 per share, as compared to $329,900, or $.07 per share, for the same period one year ago.

For the six months ended Oct. 31, 1990, Aequitron reported net income of

$712,000, or $.15 per share, as compared to a net income of $625,600, or $.13 per share, for the same period last year. Sales for the period were $13,895,900, up from net sales of $12,978,400 for the six months ended Oct. 31 1989.

Aequitron President and Chief Executive Officer Curtis J. Olson said, "We continue our commitment to product diversification and we are pleased with the sales in each of our major product lines. Sales of apnea-related products continued to be led by growth in unit sales of the company's line of memory monitors. Ventilator sales continued to increase and sales of the recently acquired line of oxygen concentrators also contributed to the record quarterly sales. In addition, Aequitron's Crow River Industries subsidiary experienced strong sales of its wheelchair lifts and automobile hand controls."

Initial manufacturing and marketing expenses of the recently acquired Silent Partner Oxygen Concentrator product line and the recently introduced Model 9101 Multi-channel Recording and Analysis System contributed to flat earnings for the quarter, according to Olson.

Olson added, "Since acquiring the Silent Partner, we have made several improvements to the product line. As a result, the Silent Partner is gaining acceptance in both the domestic and international marketplaces. In addition, while its sales levels and introduction expenses were in line with our expectations, we continue to research alternatives to improve the margin on this line."

Aequitron Medical, Inc. designs, manufactures and markets electronic products for home health care and hospital use; and wheelchair lifts and automobile hand controls for the mobility impaired. The company's common stock is traded on the National Market System under the NASDAQ symbol AQTN.

WASHINGTON (NOV. 13) PR NEWSWIRE - After two years of intensive research and planning, the National PTA and GTE this week are launching a unique, comprehensive program to help parents prevent the use of alcohol and other drugs by their children.

Funded by a $1.4 million grant from the GTE Foundation, the program - "Common Sense: Strategies for Raising Alcohol & Drug-Free Children" - is offered free to the National PTA's units nationwide.

The program spotlights specific ways parents can minimize the risk that their children will become involved with alcohol or other drugs. Designed for use by PTAs and other groups to educate parents of children in grades 3-6, the program is contained in a kit that offers research-based information and easy-to-follow instructions, providing the resources to organize and conduct four interactive meetings.

The kit also contains parent brochures with tips on raising alcohol and drug-free children, and a 15-minute videotape that helps evaluate parent-child communications and aids program discussion.

"The time to deal with the problem of drug and alcohol use by children is before they first try them," said Ann Lynch, president of the National PTA. "It is our hope that, with this program, we can give every parent the tools needed to prevent their children from ever using drugs."

"GTE is proud to be launching this excellent program as partners with the National PTA," said James L. "Rocky" Johnson, GTE chairman and chief executive officer. "The research demonstrates the need for a program of this magnitude to attack the root causes of alcohol and other drug abuse among children.

"GTE is funding Common Sense because it cares about our children and, like the PTA, is concerned about this problem and its terrible effect on America's future. This is a national issue in which all of corporate America should become involved," he said.

A national advisory committee of educators, physicians and experts in alcohol and drug-abuse prevention helped develop the program. Common Sense combines several unique features, according to Lynch. It encourages coalition building in the community, seeks to educate parents early in their children's lives, and provides parents with positive parenting skills.

"We've based this program on current prevention research, which indicates actions taken by parents are the most influential factors in keeping children drug free," Lynch said.

LITTLETON, CO (NOV. 13) PR NEWSWIRE - Bingo King Co. Inc. (NASDAQ: BNGO) today reported that in the nine months ended Sept. 30, 1990, the company earned net income of $1.1 million or 36 cents per share on pre-tax earnings of $2 million and sales of $28.7 million. This compares with net income of $677,000 or 22 cents per share on pre-tax earnings of $1.1 million and sales of $26 million for the like period of the prior year.

For the third quarter ended Sept. 30, 1990, the company earned net income of $388,000 or 12 cents per share on pre-tax earnings of $689,000 and quarter sales of $9.3 million. This compares with net income of $117,000 or 4 cents per share on pre-tax earnings of $193,000 and sales of $8.9 million for the like period of the prior year.

Leonard A. Stuart, chairman and chief executive officer of Bingo King, stated that he was "pleased with the strong performance of Bingo King during each of the first three quarters of 1990" and "confident that the program implemented in early 1990 to rejuvenate the company will continue to yield benefits during the remainder of 1990 and future years." Stuart indicated that the program was designed to improve sales, reduce selling, general and administrative expenses and reduce debt through improved cash flows. Stuart stated that the company had been successful in achieving all three goals.

Stuart re-emphasized the company's renewed commitment to the more profitable

wholesale side of its operations. Stuart noted that "efforts to dispose of the company's retail branches have been successful and are near completion" and emphasized that "no significant net gains or losses were recognized on the sales of these branches."

Stuart closed by stating that "Bingo King's leadership position in the industry is firmly established, and with our costs under control we expect that the future will bring solid earnings and positive cash flows."

Bingo King is the leading manufacturer of supplies and fund raising products associated with the game of bingo.

NEW YORK (NOV. 13) PR NEWSWIRE - HRE Properties (NYSE: HRE) announced today that it has sold two stores leased to K Mart Corporation for approximately $4.7 million in cash, and will report a capital gain of about $1.1 million or 20 cents per share in the fiscal year ended Oct. 31, 1990.

Charles J. Urstadt, chairman and chief executive officer of HRE, commented, "The sales of the California and Michigan properties were another step in the trust's strategic plan of selling targeted properties and concentrating new investments in the Eastern U.S." He added, "We're actively looking for properties and expect the depressed condition of the real estate market to make good opportunities available to the trust."

The properties were purchased by HRE in 1972. The K Mart leases commenced in 1976, and including renewal options, are extendable to 2026. No other terms were disclosed by HRE.

HRE Properties is a self-administered equity real estate investment trust providing investors with a means of participating in ownership of income-producing properties with investment liquidity.

#90317p6182 11/13/1990 ~PR Newswire
LANGHORNE, PA (NOV. 13) PR NEWSWIRE - Ecogen Inc. (NASDAQ: EECN) today reported financial results for the third quarter and nine months ended Sept. 30, 1990.

Total revenues for the third quarter of 1990 were $486,000 compared with $555,000 for the comparable period last year.

Ecogen reported a net loss of $2,564,000 ($0.26 per share) for this year's third quarter compared with a net loss of $1,869,000 ($0.28 per share) for the third quarter of 1989.

For the first nine months of 1990, Ecogen reported total revenues of $1,542,000 and a net loss of $5,905,000 ($0.73 per share). Comparable figures for 1989 were total revenues of $2,340,000 and a net loss of $5,956,000 ($0.89 per share).

New Product and Overseas Sales Reported
For the first nine months of 1990, Ecogen reported product sales revenues of

$566,000, including $498,000 from new biopesticides not sold in the comparable 1989 period.

Year-to-date product sales revenues were 22 percent above last year's levels despite the discontinued marketing of Dagger(TM) G cotton biofungicide, Ecogen's largest selling product in 1989.

Ecogen also recorded its first overseas product sales during the third quarter. In August, Jia Non Enterprises Co., Ltd., the company's distributor for Taiwan, began selling on Ecogen developed vegetable bioinsecticide.

Commenting on the financial results, Ecogen Chairman John E. Davies said, "New product introductions and less reliance on contract research are shifting more of Ecogen's revenues to product sales. This trend is a measure of progress that is being made toward achieving Ecogen's goal of becoming the leading developer and marketer of biopesticides in North America."

Davies also said the company is continuing its effort to keep operating expenses below last year's levels, though non-recurring costs increased expenses for the quarter. Retention bonuses and other expenses related to downsizing along with non-cash charges for the acquisition of certain technology resulted in one-time charges of approximately $680,000 during the quarter.

Ecogen Inc. is an agricultural biotechnology company, specializing in biological pest control. Ecogen's products include Cutlass(TM) vegetable bioinsecticide, Foil(TM) potato bioinsecticide, Condor(TM) forestry and soybean bioinsecticide, Dagger G cotton biofungicide and Collego(TM) rice bioherbicide. The company is also developing products for cotton, corn and home and garden use.

KERRVILLE, TX (NOV. 13) PR NEWSWIRE - LDB Corporation (NASDAQ: LDBC) today reported operating results for the fiscal year ended July 31, 1990. Net loss

for the year was $9,714,000 on revenues of $67,837,000.

Because of losses incurred in the past two years and an expected loss for the first quarter ended Oct. 31, 1990, the company is suffering from a current liquidity problem. In addition, the company has defaulted on one loan and has covenant defaults on another loan. In the opinion of the company's Independent Auditors, these conditions raise doubt about the company's ability to continue as a going concern. The company is in the process of negotiating a restructuring of its debt with its major creditors. The company's plan is to attempt to restructure its debt, to sell selected assets to generate cash, and to continue cutting operating expenses.

WHITE PLAINS, NY (NOV. 13) PR NEWSWIRE - Software Artistry Inc., an Indianapolis-based computer software development and support company, has been named an IBM Cooperative Software Supplier (CSS) under the IBM Cooperative Software Program.

As a CSS, Software Artistry has published and licensed three products -- PC Expert Professional, Application Software Expert, and the Knowledge Engine. Both Software Artistry and IBM will market these products.

PC Expert Professional is an entry-level expert system application development tool for the business professional with no programming expertise. It will run on the DOS-based IBM Personal System/2 (PS/2).

Application Software Expert (ASE) is a fifth-generation programming language allowing the rapid development of platform-independent applications combining graphics, data base access, expert systems and procedural programming. ASE is available on PS/2 running on DOS, the IBM 4680 family of point-of-sale hardware and Application System/400 (AS/400).

The Knowledge Engine is a hypermedia development environment that can be used to create "intelligent documents" for use in help desks, tutorial systems, executive information systems and other applications. It is available on the PS/2 and the AS/400.

"Our new arrangement with IBM is an ideal marriage for us," said Don Brown, president, Software Artistry. "It provides broader distribution of our products and provides IBM additional tools for building solutions focused on the low-end platforms."

Under the terms of the CSS agreement, IBM may market these products under Software Artistry's terms and conditions without Software Artistry's direct involvement. As a CSS firm, Software Artistry retains complete control over

its products, providing IBM with the prices, terms and conditions, and product literature for marketing.

In addition, Software Artistry and IBM are exploring the feasibility of having applications written with Software Artistry tools link to The Integrated Reasoning Shell (TIRS), IBM's strategic AD/Cycle knowledge- based system product, via the Knowledge Representation Language (KRL). With KRL, applications can be ported from one platform to another and could provide low-end customers with an entry point to the Systems Application Architecture AD/Cycle.

#90317p6191 11/13/1990 ~PR Newswire

NEW YORK (NOV. 13) PR NEWSWIRE - Handy & Harman (NYSE: HNH) today reported results for the third quarter and first nine months of 1990.

For the quarter ended Sept. 30, 1990, Handy & Harman's net income was $2,502,000, or $.18 per share. For the same period in 1989, the company had earnings of $2,244,000, or $.16 per share. Sales in the 1990 quarter were $139,835,000 versus $136,889,000 last year.

For the first nine months of 1990, the company's net income was $7,485,000, or $.54 per share, compared to $7,646,000, or $.55 per share, in the same period of 1989. Nine months sales were $429,148,000 compared to $450,194,000 in the like months of 1989.

Sales for the 1989 period and for the first quarter, 1990 were restated reflecting the June 1, 1990 transfer of the automotive replacement segment to a 50/50 joint venture partnership named GO/DAN Industries.

Commenting on the results announced today, Richard N. Daniel, chairman and chief executive officer, said, "Third quarter operations reflect satisfactory progress toward this year's major objectives."

Daniel further commented, "We remain cautiously optimistic for the near term prospects despite the severity of the current slowdown in the U.S. economy."

Handy & Harman, a leading fabricator, processor and refiner of precious metals also produces a variety of specialty metal products for industrial uses through over 30 subsidiaries here and abroad. Founded in 1867, Handy & Harman is headquartered in New York.

ROCKVILLE, MD (NOV. 13) PR NEWSWIRE - CRI Insured Mortgage Association, Inc. (CRIIMI MAE) (NYSE: CMM), a real estate investment trust specializing in insured mortgage investments, today reported third quarter taxable income for the three months ended Sept. 30, 1990, of $4.6 million (23 cents per share).

The year-to-date taxable income for the first nine months of 1990 was $17.9 million (89 cents per share).

There are no comparable results for last year's third quarter and nine months because the company was not yet operating; CRIIMI MAE began operations and NYSE trading on Nov. 28, 1989.

The third quarter's dividend includes part of the 26 cents per share in gains earned in earlier quarters as a result of the profitable liquidation of mortgage investments. These gains are being evenly distributed in the year's four quarterly dividend payments.

Financial statement net income for the third quarter of 1990 was $4.4 million (22 cents per share). Net income for the first nine months of 1990 was $14.3 million (71 cents per share).

Management believes taxable income is a better indicator of the REIT's performance than net income reported on financial statements because taxable income is the basis for paying dividends. For some time in the future, management expects taxable income to be greater than net income reported on financial statements.

CRIIMI MAE's base of earning assets includes a majority ownership (67 percent of outstanding shares) of CRI Liquidating REIT, Inc., a subsidiary of CRIIMI MAE which holds a portfolio of federally insured mortgages and GNMA mortgage-backed securities, the majority of which were purchased at a discount to face value. The remaining $185.6 million portion of CRIIMI MAE's portfolio is invested directly in federally insured mortgages and government guaranteed mortgage-backed securities.

In total, $182.2 million, or 34 percent, of CRIIMI MAE's direct and indirect investments are GNMA-guaranteed mortgage-backed securities, and $358.8 million or 66 percent are FHA-insured project loans.

During the third quarter the company expanded its base of earning assets by investing $16.5 million in insured mortgage investments.

CRIIMI MAE's adviser is an affiliate of CRI, Inc., the real estate investment management firm based in the Washington area.

MINNEAPOLIS/ST. PAUL (NOV. 13) PR NEWSWIRE - Angeion Corporation (NASDAQ: ANGN), a manufacturer of cardiovascular products, has signed a letter of intent to acquire XMED, a research-and-development company which is developing products for the automatic implantable defibrillator market. Angeion announced the proposed acquisition today at the annual meeting of the American Heart Association in Dallas.

Angeion and XMED have agreed in principle on the terms of the acquisition, under which Angeion would acquire all outstanding stock of XMED.

The proposed acquisition reflects Angeion's intention to develop a variety of products to treat arrhythmia (irregular heartbeat), which is a major cause of death for adults between the ages of 30 and 65. Angeion, through its subsidiary AngeLase, Inc., is already engaged in developing a through-the-skin catheter for use in the nonsurgical cure of arrhythmia. XMED's implantable defibrillator would offer a method of treating arrhythmia through a different technology.

"The two technologies are very synergistic," said Wendell L. King, chairman and CEO of Angeion. "They would be used by the same physician specialist to treat a similar population of patients. Angeion's through-the-skin catheter would be the treatment of choice for some patients. The XMED implantable defibrillator would be the appropriate choice for others."

XMED, which was formed in Minneapolis in 1989, is also working on the development of two other key products -- an external temporary pacemaker and an external bedside automatic defibrillator.

Details of the acquisition are subject to negotiation. King is a board member of XMED, but holds no stock in the company.

Minneapolis-based Angeion Corporation is a manufacturer of cardiovascular products. Under its subsidiary, AngeLase, Inc., it is currently engaged in the research and development of a catheter which would provide a nonsurgical cure for arrhythmia. Angeion's current core business target is the angioplasty accessory market. Angeion is traded on NASDAQ under the symbol ANGN and on the Boston Stock Exchange under the symbol ANI.

MINNEAPOLIS (NOV. 13) PR NEWSWIRE - MEI Diversified Inc. (NYSE: MEI) announced a net loss for the third quarter ended Sept. 30, 1990 of $1,549,000 or $.08 a share, compared with a net loss of $2,629,000 or $.14 a share for

the comparable 1989 quarter. Third quarter sales were $60,122,000 in 1990 and $43,672,000 in 1989.

The nine month 1990 period had a net loss of $8,369,000 or $.44 a share compared with a net loss of $6,346,000 or $.33 a share for the first nine months of 1989. Sales for the nine months were $146,987,000 in 1990 and $135,453,000 in 1989.

The sales and operating results for the third quarter and nine month periods ended Sept. 30, 1990 include the recent acquisitions of New Dimensions in Medicine (NDM) and MEI-Regis Salon Corp. from their July 1, 1990 and Aug. 30, 1990 respective dates of acquisition.

As announced in early June the company completed sale of its Candy and Snack Group to Ezaki Glico, Co., Ltd., an Osaka, Japan-based company. The cash sale proceeds approximated $58 million and resulted in a $1,086,000 second quarter gain.

Donald E. Benson, MEI Diversified Inc. president, stated that "Because MEI's nut, candy and snack food businesses are considered to be one segment for financial reporting purposes the June 1990 sale of the Candy and Snack Group cannot be reported as a sale of a discontinued business. Nevertheless, a substantial part of the company's net losses reported for the nine month period ended Sept. 30, 1990 relate to the Candy and Snack Group which was sold.

"The sold businesses had 1990 sales of $45 million through the date of disposition and full year 1989 sales of $107 million. The company has retained its nut business, a business which also contributed to the larger 1990 operating loss because of the absence of profitable nut commodity opportunities when compared to 1989."

MEI previously announced that it has completed the acquisition of three companies engaged in the operation of professional beauty salons and related businesses principally in leased space in major department stores throughout the United States and Canada.

MEI owns 80 percent of the outstanding stock of MEI-Regis Salon Corp. the acquiring entity which includes The Glemby Company, Inc. and Subsidiaries, formerly headquartered in New York; Essanelle Salon Co. and Maxim's both located in Minneapolis.

The remaining 20 percent of the acquiring company is owned by Regis Corporation and affiliates, Minneapolis, the former owners of both Essanelle and Maxim's Beauty Salons, Inc. Regis Corporation is a privately owned company which owns and operates hairstyling and hair care salons throughout the United States and Canada, predominantly in shopping malls and department stores.

SCHAUMBURG, IL (NOV. 13) PR NEWSWIRE - Intercargo Corporation (NASDAQ-NMS: ICAR) today reported record earnings for the nine months ended Sept. 30, 1990, and slightly lower third quarter earnings.

Net income for the 1990 third quarter was $621,000, or 27 cents per share, down 4.3 percent from the record $649,000, or 28 cents per share in the 1989 third quarter. Total revenues were $6,271,000, compared to $6,310,000 a year earlier.

James R. Zuhlke, president and chief executive officer, said increased printing costs related to the name change of the company's primary operating subsidiary resulted in higher underwriting expenses in the 1990 third quarter.

For the 1990 nine months, net income from operations hit a record high of $1,870,000, or 81 cents per share, up 13.3 percent from $1,651,000, or 72 cents per share, for the 1989 nine months. Net income for the 1989 period received an additional benefit of $91,000, or 4 cents per share, for the adoption of FASB 96. Total revenues for the first nine months of 1990 were up 3.2 percent to $18,593,000 from $18,010,000 for the 1989 period.

Zuhlke said that as a speciality underwriter, Intercargo Corporation's underwriting results continue to outperform the general property and casualty industry. "Our aggregate combined loss and expense ration declined to a seasonal low of 90.5 percent for the first nine months of 1990 from 91.3 percent a year earlier," he said. A combined ration of under 100 percent indicates an underwriting profit.

According to Zuhlke, the company's Canadian affiliate, Kingsway Financial Services, Inc. continues to perform exceptionally well. Kingsway Financial Services contributed $146,000 to third quarter and $367,000 to year-to-date earnings.

He said company management believes that "favorable historical patterns will continue through the 1990 year end."

Headquartered in Schaumburg (a Chicago suburb), Intercargo Corporation is a leading provider of specialized insurance coverage for companies involved in international trade. Its market is primarily importers and exporters, customs brokers and freight forwarders and other global traders. The primary coverages it underwrites are U.S. Customs Bonds for which it controls about 33 percent of the market, cargo insurance and professional liability for the broker forwarder industry.

HOUSTON (NOV. 13) PR NEWSWIRE - CRSS International, Inc., a wholly owned subsidiary of CRSS Inc. (NYSE: CRX), announced today the establishment of CRSS Iberia, S.A., in Madrid, Spain, part of its plans to expand its presence in Europe to serve both U.S. and European multi-national clients.

When working internationally, CRSS International works closely with local associates to bring indigenous knowledge and experience to their work in Europe. CRSS International recently collaborated with Technicas Reunidas, a large Spanish engineering and construction company, and a U.S. consulting firm on a project for the Port of Barcelona related to the 1992 Summer Olympic games.

Other CRSS International European expansion plans, following the opening of offices in the United Kingdom two years ago, include the establishment of relationships and opening offices in Germany, Italy and France during the next two years.

Houston-based CRSS Inc., through its subsidiaries, is one of the most diversified and largest design and construction services companies in the nation. CRSS has also expanded, through its interest in NaTec Resources, Inc., into the acid rain pollution control market, which it believes to be a significant growth market in eastern Europe.

TULSA, OK (NOV. 13) PR NEWSWIRE - Vantage Point Energy Inc. announced today a net loss for the third quarter of 1990 of $141,909 (10 cents per share) on revenues of $1,777,483. For the nine months ended Sept. 30, 1990, the net loss was $241,788 (21 cents per share) on revenues of $3,938,895.

Comparable results for the third quarter and nine months of 1989 are not available as the result of the transaction with Sceptre Resources Ltd. on May 1, 1990.

S. Lee Crawley, president, said, "We are continuing to make progress toward profitability. While the depressed natural gas market has continued to have an impact on our financial performance, higher oil prices have helped significantly. During August, the company initiated an expansion and improvement program on its two principal Louisiana properties, which has resulted in current production of 650 barrels per day versus 497 during the third quarter.

"We are optimistic as we enter the fourth quarter that with the improved results from our principal oil properties, the assurance of higher oil prices (the company has hedged 60 percent of its oil production at $26.08 per barrel) and anticipated higher demand for natural gas, the Company will have a profitable year," he said.

Vantage Point Energy Inc. is a financially oriented, independent oil and gas company headquartered in Tulsa. Its business involves the acquisition,

development and production of oil and gas. It also manages properties for other companies and institutions. The Company's business plan is to grow through the acquisition of properties and/or companies in exchange for cash and/or securities while continuing to operate and develop existing oil and gas properties.

LAS VEGAS, NV (NOV. 13) PR NEWSWIRE - Caere Corp. (NASDAQ: CAER) today introduced OmniPage Professional(TM), a new page recognition software program that includes capabilities never before available in the desktop optical character recognition (OCR) world. The announcement was made here at Comdex.

OmniPage Professional, which runs under Windows(TM) 3.0, is an advanced, easy-to-use program than incorporates ground-breaking technology developed by Caere engineers.

"Caere has set a new standard for OCR products with OmniPage Professional," said Larry Miller, Caere's vice president of marketing. "Our aggressive development activities have allowed us to provide sophisticated technology at extremely competitive prices."

OmniPage Professional is a comprehensive, customizable page recognition solution for business professionals who analyze, edit, store, or retrieve data from large volumes of paper documents. The new program includes all of the capabilities of its predecessor, OmniPage, plus the following new advanced features developed in house at Caere.

Verification Window. Caere's new verification window allows users to play a more active role in the recognition process. Using easy point-and-click controls, users can verify on demand a word or character in its context, rather than in a stand-alone mode. Working within the program's Transitional Editor(TM), the verification window shows users the bit map of characters or words, which they can change or substitute with a quick click of their finger.

Toolbox. The toolbox feature improves users' productivity by making it quick and easy for them to choose editing options. By pointing and clicking on one of several icons, users can easily erase, zoom in or out, etc.

Custom Characters. OmniPage Professional includes a custom character feature that allows users to tailor the program to their particular business or profession.

This shape training capability, not found in any other product, allows OmniPage Professional to recognize unusual or proprietary characters, icons,

scientific or mathematical symbols, trademark symbols, or additional alphabets not already included in Caere's core font recognition technology.

It can also be used to recognize any type of shape, as well as consistent irregularities in characters from printers or fax machines. This feature is also available as an optional add-on package, called OmniTrain(TM), for users of earlier OmniPage products.

CONTACT: Miriam Hyman of Regis McKenna, (415) 354-4409, for Caere; or Larry Miller of Caere, (408) 395-7000.
